MILITARY SCHOOLS.

Western Military Academy, Alton, Ill.; Culver Military Academy, Culver, Ind.; Wentworth Military Academy, Lexington, Mo.; Kemper Military School, Boonville, Mo.; New Mexico Military Institute, Roswell; St. John's School, Manlius, N. Y.; St. John's Military Academy, Delafield, Wis.; Kentucky Military Institute, Lyndon, Ky.; College of St. Thomas, St. Paul, Minn.; Shattuck School, Faribault, Minn.; Staunton Military Academy, Staunton, Va.; New York Military Academy, Cornwall on Hudson, N. Y.; Marion Institute, Marion, Ala.; The Harvard School, Los Angeles, Cal.; Georgia Military Academy, College Park, Ga.; Georgia Military College, Milledgeville, Ga.; Gordon Institute, Barnesville, Ga.; Gulf Coast Military Academy, Gulfport, Miss.; Northwestern Military and Naval Academy, Lake Geneva, Wis.; Ohio Northern University, Ada, Ohio.

RESERVE OFFICERS' TRAINING CAMPS—*Continued.*

FURTHER INFORMATION.

These camps will be held: (a) One in each Regular Army, National Guard, and National Army Division. (b) One each in the Philippines, Panama, and Hawaii. (c) One each at Fort Bliss, Texas, Fort Sam Houston, Texas, and Chickamauga, Ga.

The total quota from the educational institutions named above is 2,490. The quota from the Regular Army, National Army, and National Guard, is 1.7 per cent. of the enlisted strength of the organization (regiment or other smaller separate unit). Graduates and under-graduates of the institutions listed, who will be between 21 and 31 years old on January 5, 1918, are eligible for admission. Applicants may be married or unmarried, but other things being equal, examining officers will give preference to unmarried men. Graduates and under-graduates of these institutions who did not take the course of military training offered by the institution are *not* eligible for admission.

The normal strength of each training school will be about 440 students, organized into one infantry company and one light artillery battery. The schools prescribed in (a) paragraph will be under the supervision of the division commanders who will detail the commanding officer and the instructor personnel. The school prescribed in (b) paragraph will be organized at such places as the commanding generals of the territorial divisions and departments concerned may order, and will be under their supervision. The schools at Fort Bliss, Chickamauga and Fort Sam Houston (c) will be organized by the department commanders.

STATUS OF STUDENTS.

(a) Enlisted men of the Regular Army, National Guard, and National Army will be carried on detached service while students at training schools. They will receive the pay and allowances of their grade.

(b) Graduates of the institutions listed, selected to attend, will be required, upon reporting at the school, to enlist for the duration of the war. If after completing the three months' course they are not recommended for commission they will be required to remain in service and finish their enlistment. While students they will receive the pay and allowances of privates, first class; this will be about $30 per month, plus food, clothing and quarters.

All men who successfully complete the three months' course and are so recommended, will be carried on a list as eligible for appointment as second lieutenant and will be commissioned as vacancies occur, in the order of merit determined by performance while at the training school; provided that their service, between date of graduating and date of occurence of their vacancy, has been satisfactory. The training camps are primarily for men to be commissioned in the line. The Quartermaster-General, Chief of Ordnance, Chief of Coast Artillery, Chief of Engineers and Chief Signal Officer have been authorized to organize such schools as they may deem necessary for the training of men to be officers in their corps.

THE NORTH GERMAN LLOYD DURING THE WAR.

(From the Berliner Tageblatt, August, 1917.)

SINCE the outbreak of the war the shareholders of the North German Lloyd have received no report from their directors; hence the Berlin Year Book 1916-17, "The War and Shipping," with special reference to the North German Lloyd, is of so much the greater interest to them, as well as to the general public. In this book appears an article by Mr. Heineken, the general manager of the North German Lloyd, in which he gives an insight into the activities of the company during the present war. As is known, some of its steamers have been placed at the service of the country as auxiliary cruisers. Mr. Heineken writes:

"Our ships have been used in the service of the Empire not only as ships of war but also as a means of transport for raw materials, and in that service they have rendered great assistance. During 1915 and 1916 two of our freight boats, the Norderney and the Schwabe, were engaged in carrying ore from Sweden. Unfortunately one of these, the Norderney, met with an accident. It ran upon an enemy mine and foundered, the captain and three of the crew meeting a heroic death.

"During the long time of involuntary idleness, we have naturally had in view the replacing of our loss in ships and the possible increase of our shipyards in general. We have ordered a large series of new vessels to be built simultaneously in various German shipyards. Several of these vessels were ordered before the war, and the prices for building them were considerably below the present prices. Besides our two large passenger boats, Columbus and Hindenburg, of about 35,000 gross registered tons, and our two passenger and freight boats, Munchen and Zeppelin, between 17,000 and 18,000 tons, we have given orders for a large number of larger freight steamers. On these orders not only all the instalments were paid as they fell due, but considerable advances have been made also to shipyards."

Mr. Heineken asserts that the statement that after the war all the needs of German companies will have been met and that they will all have very rich returns is not justified. He is, however, far from holding a pessimistic view with regard to the future of German shipping. "The considerable diminution of the world's tonnage during the war," he states, "which is in the first place to be attributed to the activity of our submarines, will after the conclusion of peace have as a consequence a rise in the rates of freight, from which the mercantile fleet will profit. The question is, how long this bull on the freight market will last. A further question is whether German shipping will really be destined to make unlimited use of these circumstances. A temporary reduction of certain imports after the conclusion of peace can not be avoided." He believes that a doubly difficult task awaits German shipping after the war. First, he says, it must compare and make up the great loss and damage of the years of war, and, secondly, "make up the gigantic advantage which, through the circumstances of the war, has so extraordinarily strengthened enemy and neutral shipowners in advance of us. This much, however, is certain—that the German companies, if they are helped over the first difficult times, when they will have to meet the most severe competition from their foreign competitors, will be able to withstand this severe trial and win back the lost ground."

NATIONAL GEOGRAPHIC SOCIETY.

Founded in 1889, "for the increase and diffusion of geographic knowledge," the society has now more than 600,000 members. In the promotion of its purpose to increase geographic knowledge, its expeditions have unearthed Machu Picchu, the holy city of the Incas, have studied the problems of vulcanism and earthquakes in the West Indies, Alaska, and the Mediterranean, have made the most exhaustive study of glacial action ever undertaken, and accomplished other important investigations and discoveries. In the work of diffusing geographic knowledge, it publishes a magazine which reaches more than 600,000 homes, conducts a bureau of information which furnishes daily statements without charge to the press of the United States concerning places and matters of geographic interest in the public eye, publishes books, maps, and monographs, and otherwise cultivates a national interest in the broader phases of non-technical as well as technical geography. The society last year contributed out of its reserve funds the money necessary to purchase—to preserve from destruction—the privately-owned big trees of the Sequoia National Park region of California, and deeded them to the Federal Government to be held in perpetuity for the benefit of posterity.

The society's most important exploration activity during 1917 was the despatch of a fully equipped expedition to Alaska, where a further study of volcanic disturbances in the Mount Katmai region was undertaken. This investigation, occupying many months, was supplementary to the notable work of the society's 1915-1916 expedition, which was the first to explore the now famous "Valley of Ten Thousand Smokes," the most remarkable volcanic region in the world.

The officers are: *President*—O. H. Tittmann. *Vice-President*—John E. Pillsbury. *Secretary*—O. P. Austin. *Director and Editor*—Gilbert H. Grosvenor. Headquarters, Washington, D. C.

UNITED STATES MARINE CORPS.

(As of date September 10, 1917).

Adjutant and Inspector's Department—Brig.-Gen. Charles H. Lauchheimer. *Quartermaster's Department*—Brig.-Gen. Charles L. McCawley. *Paymaster's Department*—Brig.-Gen. George Richards. *Special Assistant to the Major-General Commandant*—Charles A. Ketcham. *Special Assistant to the Quartermaster*—W. W. Trail. Headquarters, Navy Building, Washington, D. C.

The authorized strength of the corps is (October 1, 1917) 1197 officers, 100 warrant officers, 26 paymaster's clerks, and 30,000 enlisted men, as follows: 1 major-general commandant, 3 brigadier-generals, staff; 5 brigadier-generals, line; 20 colonels, 28 lieutenant-colonels, 141 majors, 373 captains, 313 first lieutenants, 313 second lieutenants, 50 marine gunners, 50 quartermaster clerks, 26 paymaster's clerks, 80 sergeant-majors, 403 quartermaster-sergeants, 2 drum majors, 453 first sergeants, 437 gunnery sergeants, 2,029 sergeants, 3,617 corporals, 349 drummers, 349 trumpeters, 1 leader of the band, 1 second leader, 10 principal musicians, 25 first-class musicians, 20 second-class musicians, 10 third-class musicians, and 22,214 privates.

GENERAL OFFICERS OF THE MARINE CORPS, IN ADDITION TO THE COMMANDANT.

Brigadier-Generals, Staff—Charles H. Lauchheimer, Adjutant and Inspector; Charles L. McCawley, Quartermaster; George Richards, Paymaster. *Brigadier-Generals, Line*—Five: L. W. T. Waller, Joseph H. Pendleton, J. A. Lejeune, E. K. Cole, C. A. Doyen.

The marine corps garrisons the following places:

Naval Proving Ground, Indian Head, Md.
American Legation, Peking, China.
American Legation, Managua, Nicaragua.
Marine Barracks, San Diego, Cal.
Marine Barracks, Washington, D.C.
Rifle Range, Winthrop, Md.

Navy Yards.

Boston, Mass.
Charleston, S. C.
Mare Island, Cal.
New York, N. Y.
Norfolk, Va.
Philadelphia, Pa.
Puget Sound, Wash.
Portsmouth, N. H.
Washington, D. C.

Naval Stations.

Cavite, Philippine Islands.
Guam, Mariana Islands.
Guantanamo, Cuba.
Pearl Harbor, Hawaii.
Key West, Fla.
Olongapo, Philippine Islands.

Recruit Depots.

United States Navy.

Detachments on board 47 vessels.

Staff Offices.

New York, N. Y.
Philadelphia, Pa.
San Francisco, Cal.

In addition, the First Brigade of Marines, comprising the First, Second and Fourth Regiments of Marines and the Artillery Battalion, are temporarily stationed in Hayti and Santo Domingo. Incident to the occupation of Hayti 35 officers and 63 enlisted men have been detailed as officers of the newly created Haytien Constabulary under the direction of Major Smedley D. Butler, Commandant, Gendamerie d'Hayti.

Commissioned officers are appointed from graduates of the Naval Academy, from worthy non-commissioned officers, and from civil life. Applicants from civil life must be 21 years of age and not over 25, and must pass such mental, moral, and physical examinations as are prescribed by the President.

The term of enlistment in the marine corps is four years. Applicants must be 18 years of age and not over 35, able-bodied and of good character. Minors must have consent of parents or guardian. All recruits, after acceptance, are sent for three months to the recruit depots at Port Royal, S. C., or Mare Island, Cal., for instruction. Permanent marine corps recruiting stations as follows:

Atlanta, Ga., 29½ Marietta Street.
Baltimore, Md., 313 Custom House Building.
Boston, Mass., 22 Tremont Row.
Buffalo, N. Y., 215 Federal Building.
Chicago, Ill., 628 South State Street.
Cincinnati, Ohio, 23 Pickering Building.
Cleveland, Ohio, Federal Building.
Denver, Col., 1605 Larimer Street.
Detroit, Mich., 22 Monroe Avenue.
Houston, Tex., 915 Prairie Avenue.
Kansas City, Mo., 1324 Main Street.
Louisville, Ky., 414 West Jefferson Street.
Memphis, Tenn., 206 South Main Street.
New Orleans, La., 638½ Gravier Street.
New York, N. Y., 24 East Twenty-third Street.
Philadelphia, Pa., 130 South Fifteenth Street.
Pittsburgh, Pa., Smithfield and Water Streets.
Portland, Ore., Third and Alder Streets.
Richmond, Va., Post-Office Building.
Salt Lake City, Utah, 216½ Main Street.
San Francisco, Cal., 36 Annie Street.
St. Louis, Mo., 122 Seventh Street.
St. Paul, Minn., 47 Baltimore Building.
Seattle, Wash., 101 First Avenue South.

Information regarding pay, allowances, etc., may be obtained by addressing the officer in charge of recruiting at any of the above addresses or the Officer in Charge of Recruiting, Headquarters, United States Marine Corps, Washington, D. C. Enlistments are also made at all navy yards and naval stations.

NAVAL TRAINING STATIONS.

THE following is a list of naval training stations: Regular naval training stations—Newport, R. I.; Norfolk, Va.; Great Lakes, Ill.; San Francisco, Cal.

Depots at which "general detail" men, including graduates of training stations, are further trained while awaiting assignment to ships—Portsmouth, N. H.; Boston, Mass. (Commonwealth Pier); New York Navy Yard; Philadelphia Navy Yard; Charleston, S. C.; Pensacola, Fla.; Key West, Fla.; New Orleans, La.; Gulfport, Miss. (projected); San Diego, Cal.; Mare Island Navy Yard; Puget Sound Navy Yard.

Training establishments for Reserves and National Naval Volunteers—Portsmouth (N. H.) Navy Yard; Bumkin Island, Boston Harbor; Newport, R. I.; Bensonhurst, L. I.; Pelham Bay Park, N. Y. (projected); U. S. S. Iowa, Indiana, Massachusetts (Delaware River); Cape May, N. J.; steamship Bulgaria, Norfolk Navy Yard; Cherrystone Island, Va.; Charleston (S. C.) Navy Yard; Key West, near navy yard; New Orleans Navy Yard; Municipal Dock, Los Angeles (San Pedro Harbor); State University Grounds, Seattle, Wash. (projected); steamship Commodore and Grant Park Camp, Chicago.

Commandants of districts have generally taken advantage of facilities within their districts for general or special training of regulars, and especially of reservists; such as colleges, technical schools, Naval Militia ships, privately owned craft, etc. In addition, men on active service at, or operating from, the numerous section headquarters of the naval defense districts may be considered undergoing training. A list of these section headquarters follows:

First District—Machias, Bar Harbor, Rockland, Bath, Portland, Portsmouth, Boston, Provincetown.

Second District—Newport, New Bedford, New London.

Third District—New Haven, Bridgeport, Port Jefferson, Montauk, Fort Lafayette, Whitestone, Fire Island, Sandy Hook.

Fourth District—Cape May City, Lewes.

Fifth District—Baltimore, Washington, Cape Charles City, Norfolk, Beaufort.

Sixth District—Wilmington, Georgetown, Charleston, Port Royal, Savannah, Brunswick, Fernandino, Jacksonville.

Seventh District—St. Augustine, Miami, Knights Key, Key West, Dry Tortugas, Tampa.

Eighth District—Pensacola, New Orleans, Galveston.

Twelfth District—San Francisco, San Pedro, San Diego.

Thirteenth District—Astoria, Aberdeen, Puget Sound Navy Yard, Sitka.

In addition there are aviation training establishments for Regulars, Reserves, National Naval Volunteers, or combinations thereof at Marblehead, Mass.; Squantum, Mass.; Bay Shore, L. I.; Huntington, L. I.; Newport News, Va.; Pensacola, Fla.; Akron, Ohio; Buffalo, N. Y.

Reservists are training at private schools, at own expense, at Mastic, L. I.; Port Washington, L. I.; East Greenwich, Ct.

U. S. DESTROYER'S RECORD RUN FROM PACIFIC TO ATLANTIC.

COMPLETING a record run from a Pacific Coast port to an Atlantic port—approximately 5,858 miles—in 14 days 10 hours and 20 minutes, the destroyer Shaw, constructed on the Pacific Coast, reported ready for immediate service, and a few hours later proceeded to the station to which she was assigned. The Shaw made a record-breaking passage through the Panama Canal—5 hours and 45 minutes. The best previous time was 6 hours and 20 minutes. With less than five days' preliminary shaking-down work at sea, the Shaw left a Pacific Coast port May 25, 1917, at 4.10 P. M., and arrived at its Atlantic destination at 2.30 A. M. June 9, making the following records en route: 487 miles, 24 1-10 hours; 2,945 miles, 174 1-2 hours; 1,785 miles, 91 3-10 hours.

The average cruising speed was 18 knots an hour; including stops, the average was 15.4-10 knots an hour.

NATIONAL PROBATION ASSOCIATION.

Organized in 1909 as the National Probation Officers' Association, title changed to present one in 1911. The purposes of the association are to promote the more extensive and wise use of the probation and parole systems of dealing with both juvenile and adult offenders; also to encourage the adoption of the most approved methods of conducting children's courts. The association holds an annual conference each Spring at the time and place of the meetings of the National Conference of Charities and Correction. It publishes a directory of probation officers in the United States, the proceedings of its annual conferences, and other literature. From time to time it appoints special committees to study and report on particular phases of probation, parole, and juvenile court work. Supported by membership fees ($1 a year) and voluntary contributions.

President—Mrs. Benjamin J. West, Chief Probation Officer, Juvenile Court, Memphis. *First Vice-President*—John W. Houston, Chief Adult Probation Officer, Court House, Chicago. *Second Vice-President*—Judge Charles W. Hoffman, Domestic Relations Court, Cincinnati. *Third Vice-President*—Herbert C. Parsons, Secretary Commission on Probation, Court House, Boston. *Secretary-Treasurer*—Charles L. Chute, 58 North Pearl Street, Albany. *Executive Committee*—Roger N. Baldwin, Munsey Building, Washington; Edwin J. Cooley, Chief Probation Officer, Magistrates' Courts, New York City; Bernard J. Fagan, Chief Probation Officer, Children's Court, New York City; Bernard Flexner, 72 West Adams Street, Chicago; John J. Gascoyne, Chief Probation Officer, Essex County, Newark, N. J.; Mrs. Jane D. Rippin, Chief Probation Officer, Municipal Court, Philadelphia; Albert J. Sargent, Chief Probation Officer, Municipal Court, Boston; Frank E. Wade, President New York State Probation Commission, Buffalo.

UNITED STATES MILITARY ACADEMY AT WEST POINT.

EACH Senator, Congressional District, and Territory, including Porto Rico, Alaska, and Hawaii, is entitled to have two cadets at the academy; the District of Columbia, four cadets. There are also eighty appointments at large, specially conferred by the President of the United States. The law (act of May 4, 1916), authorizes the President to appoint cadets to the United States Military Academy from among enlisted men in the Regular Army at 1 National Guard, the total number not to exceed one hundred and eighty at any one time.

Annual Increments—States at large, 24; Congressional Districts, 92; Alaska, District of Columbia, Hawaii and Porto Rico, combined, 1 each year to the source longest without an appointment, and when the periods are equal the choice to be by lot; honor schools, 5; Regular Army, 23 in 1916, 22 in 1917, 23 in 1918, and 22 in 1919; National Guard, 22 in 1916, 23 in 1917, 22 in 1918, and 23 in 1919.

Appointments are usually made one year in advance of date of admission, by the Secretary of War, upon the nomination of the Senator or Representative. These nominations may either be made after competitive examination or given direct, at the option of the Representative. The Representative may nominate two legally qualified second candidates, to be designated first and second alternates. The alternates will receive from the War Department a letter of appointment, and will be examined with the regular appointee, and the better qualified will be admitted to the academy in the event of the failure of the principal to pass the prescribed preliminary examinations. Appointees to the Military Academy must be between seventeen and twenty-two years of age, free from any infirmity which may render them unfit for military service, and able to pass, unless a satisfactory certificate is submitted, a careful examination in English grammar, English composition, English literature, algebra through quadratic equations, plane geometry, descriptive geography and the elements of physical geography, especially the geography of the United States, United States history, the outlines of general history. The Secretary of War is authorized to permit not exceeding four Filipinos, to be designated, one for each class, by the Governor-General of the Philippine Islands, to receive instruction at the United States Military Academy at West Point; *Provided*, That the Filipinos undergoing instruction shall receive the same pay, allowances, and emoluments as are authorized by law for cadets at the Military Academy appointed from the United States, to be paid out of the same appropriations; *And provided further*, That said Filipinos undergoing instruction on graduation shall be eligible only to commissions in the Philippine Scouts; serve for eight years, unless sooner discharged.

The course of instruction, which is quite thorough, requires four years, and is largely mathematical and professional. The principal subjects taught are mathematics, English, French, drawing, drill regulations of all arms of the service, natural and experimental philosophy, chemistry, chemical physics, mineralogy, geology, electricity, history, international, constitutional, and military law, Spanish, civil and military engineering, art and science of war, and ordnance and gunnery. About one-fourth of those appointed usually fail to pass the preliminary examinations, and but little over one-half the remainder are finally graduated. The discipline is very strict—even more so than in the army—and the enforcement of penalties for offences is inflexible rather than severe. Academic duties begin September 1 and continue until June 4. Examinations for cadets not having made satisfactory progress in studies are held in each December and June, and cadets found proficient in studies and correct in conduct are given the particular standing in their class to which their merits entitle them.

From about the middle of June to the end of August cadets live in camp, engaged only in military duties and receiving practical military instruction. Cadets are allowed but one leave of absence during the four years' course, and this is granted at the expiration of the first two years. The pay of a cadet is $709.50 per year, and, with proper economy, is sufficient for his support.

Upon graduating, cadets are commissioned as Second Lieutenants in the United States Army. The whole number of graduated from 1802 to 1916, inclusive, has been 5,601. It is virtually absolutely necessary for a person seeking an appointment to apply to his Senator or Member of Congress. The Superintendent is Col. Samuel E. Tillman, U. S. A., and the military and academic staff consists of 155 persons. Number of cadets 748.

UNITED STATES COAST GUARD.

HEADQUARTERS, NAVY DEPARTMENT, WASHINGTON, D. C.

THE United States Coast Guard, at the present time a part of the Navy, was created by the act of January 28, 1915, which provided that "There is hereby established in lieu of the existing Revenue Cutter Service and the Life-Saving Service, to be composed of those two existing organizations, the Coast Guard, which shall constitute a part of the military forces of the United States and which shall operate under the Treasury Department in time of peace, and operate as a part of the Navy, subject to the orders of the Secretary of the Navy, in time of war or when the President shall so direct." The original Revenue Cutter Service was organized by act of Congress approved August 4, 1790. The Life-Saving Service was originally operated under the Revenue Cutter Service, but on June 20, 1874, Congress created it a separate service to operate under the Treasury Department. The officers of the Coast Guard are on the same footing in rank and pay as officers of the Army and Navy. Appointments to cadetships are made after competitive examinations conducted by boards of commissioned officers of the Coast Guard. The cadets are educated at the Coast Guard Academy at New London, Ct. The course covers three years and embraces professional and academic subjects. Candidates for cadetships must not be less than 18 nor more than 24 years old, citizens of the United States, and unmarried. A class of cadets is appointed each year. Appointments as Cadet Engineers are made after competitive examinations conducted by boards of engineer officers of the Coast Guard. Candidates for Cadet Engineers must not be less than 20½ years of age and serve a probationary term of not less than one year before being commissioned Third Lieutenants of Engineers. No person can be commissioned Third Lieutenant of Engineers who is less than 21 or more than 26 years of age.

This branch of the Government is under the charge of Captain Commandant E. P. Berthoff; Senior Captain D. P. Foley is the Chief Inspector; Senior Captain H. M. Broadbent is the Superintendent of Construction and Repair; Charles A. McAllister is Engineer-in-Chief; G. H. Slaybaugh, Chief of Division of Material, and O. M. Maxam, Chief of Division of Operations.

The authorized personnel is 270 commissioned officers and 4,897 warrant officers, petty officers, and enlisted men.

The Coast Guard stations are divided into thirteen districts, embracing the Atlantic, Gulf, Great Lakes, and Pacific Coasts, including Alaska. There are 270 Coast Guard stations and houses of refuge. One station is at the Falls of the Ohio, near Louisville, Ky. Here is a summary of the year:

Lives saved or persons rescued from peril	2,153	Instances of miscellaneous assistance	1,572
Persons on board vessels assisted	13,796	Value of vessels assisted (including cargoes)	$14,960,910
Persons in distress cared for	841	Derelicts and obstructions to navigation removed or destroyed	11
Vessels boarded and documents examined	20,317	Value of derelicts recovered and delivered to owners	$50,000
Regattas and marine parades patrolled in accordance with law	30	Total expenditure for maintenance of Coast Guard	$6,076,980
Vessels to which assistance was rendered	1,594		

UNITED STATES NAVAL ACADEMY AT ANNAPOLIS.

The students of the Naval Academy are styled midshipmen. Three midshipmen are allowed for each Senator, Representative, and Delegate in Congress, two for the District of Columbia, and fifteen appointed each year from the United States at large. The appointments from the District of Columbia and fifteen each year at large are made by the President. It is the custom of Presidents to give the appointments of midshipmen at large to the sons of officers of the Army and Navy, for the reason that officers, owing to the nature of their duties, are usually not in a position to establish permanent residence. The vacancies from the District of Columbia are filled by competitive examination of candidates residing in the district.

The selection of candidates, by competitive examination or otherwise, for nomination for vacancies in the quota of Senators, Representatives, and Delegates in Congress is entirely in the hands of each Senator, Representative, and Delegate in Congress having a vacancy; and all applications for appointments or inquiries relative to competitive examinations should be addressed accordingly.

In April, 1917, Congress passed a special act authorizing an additional appointment at the Naval Academy for each Senator, Representative, and Delegate in Congress for one year only. Nominations for these additional vacancies may be made for any examination that may be ordered prior to September 1, 1918.

The law authorizes the appointment of one hundred enlisted men each year, to be selected as a result of a competitive examination of enlisted men of the Navy and Marine Corps who have been in the service at least one year and who are under twenty years of age by August 15th of the year it is desired to enter. The mental and physical requirements, as well as the amount of money to be deposited upon admission, are the same for these candidates as for other candidates for midshipmen.

The competitive examination of these enlisted men is held on the third Tuesday in April of each year, and is the regular examination given to candidates nominated for vacancies for midshipmen. One midshipman is allowed from Porto Rico, who must be a native of that island. The appointment is made by the President, on the recommendaton of the Governor of Porto Rico. Four Filipinos, one for each class, to be designated by the Governor-General of the Philippine Islands, are allowed to receive instruction at the Naval Academy; but these midshipmen will not, however, be entitled to appointment to any commissioned office in the United States Navy by reason of their graduation from the Naval Academy. In accordance with a joint resolution of the Senate and House of Representatives of the United States, a citizen of Cuba is at present under instruction at the Naval Academy.

The course for midshipmen is four years. Examinations on the ground covered are held at the end of each academic term. During the summer, midshipmen of the first, second, and third classes go to sea for about three months. Midshipmen after graduation are commissioned as ensigns in the Navy, and occasionally to fill vacancies in the Marine Corps and in certain of the staff corps of the Navy. The Act of June 29, 1906, prescribes that the Secretary of the Navy shall, as soon as possible after the first day of June of each year preceding the graduation of midshipmen in the succeeding year, notify in writing each Senator, Representative, and Delegate in Congress of any vacancy that will exist at the Naval Academy because of such graduation, or that may occur for other reasons, and which he shall be entitled to fill by nomination of a candidate and one or more alternates therefor. The nomination of a candidate and alternate or alternates to fill said vacancy shall be made upon the recommendation of the Senator, Representative, or Delegate, if said recommendation is made by the fourth day of March of the year following that in which said notice in writing is given, but if it is not made by that time the Secretary of the Navy shall fill the vacancy by appointment of an actual resident of the State, Congressional District, or Territory, as the case may be, in which the vacancy will exist, who shall have been for at least two years immediately preceding the date of his appointment an actual and bona fide resident of the State, Congressional District, or Territory in which the vacancy will exist and of the legal qualification under the law as now provided.

In cases where by reason of a vacancy in the membership of the Senate or House of Representatives, or by death or declination of a candidate for admission to the academy there occurs or is about to occur at the academy a vacancy for any State, district, or territory that can not be filled by nomination as herein provided, the same may be filled as soon thereafter and before the final entrance examination for the year as the Secretary of the Navy may determine. Candidates allowed for Congressional Districts, for Territories, and for the District of Columbia must be actual residents of the districts or territories, respectively, from which they are nominated. All candidates are required to be citizens of the United States, and must, at the time of their examination for admission, be between the ages of sixteen and twenty years. A candidate is eligible for examination on the day he becomes sixteen and is ineligible on the day he becomes twenty years of age. Attention will also be paid to the stature of the candidate, and no one manifestly under size for his age will be received at the academy.

The height of candidates for admission shall not be less than five feet two inches between the ages of sixteen and eighteen years, and not less than five feet four inches between the ages of eighteen and twenty years; and the minimum weight at sixteen years shall be one hundred and eleven pounds, with an increase of not less than three pounds for each additional year, or fraction of a year over one-half. Any marked deviation in the height and weight relative to the age of a candidate will add materially to the consideration for rejection. Candidates must be unmarried, and any midshipman who shall marry, or who shall be found to be married before his final graduation, shall be dismissed from the service. Each candidate who has passed the required examinations must, before being admitted as a midshipman, deposit the sum of $300.00 to cover the cost of his initial outfit—clothing, uniforms, text books and equipment.

Each candidate before admission will be required to sign articles by which he binds himself to serve in the United States Navy during the pleasure of the President of the United States (including his time of probation at the Naval Academy), unless sooner discharged. The pay of a midshipman is $600.00 a year, commencing at the date of his admission, and is sufficient to meet all his expenses while at the Naval Academy. The regulations regarding places and times of examinations and subjects of examinations may be obtained by addressing the Chief of the Bureau of Navigation, Navy Department, Washington, D. C.

At present there are 1,445 midshipmen under instruction at the Naval Academy, and several new permanent and temporary buildings are in progress of construction.

NATIONAL ASSOCIATION FOR CONSTITUTIONAL GOVERNMENT.

Headquarters, Colorado Building, Washington, D. C. *President*—David Jayne Hill. *First Vice-President*—Archibald Hopkins. *Second Vice-President*—Sydney Corning Eastman. *Corresponding Secretary*—Charles Ray Dean. *Treasurer*—John Joy Edson. *Executive Committee*—Dr. Harvey W. Wiley, Gen. M. V. Z. Woodhull, H. Campbell Black, Walter S. Penfield.

The object of the association is to propagate a wider and more accurate knowledge of the Constitution of the United States, and of the distinctive features of constitutional government as conceived by the founders of the Republic; to inculcate an intelligent and genuine respect for the organic law of the land; to bring the minds of the people to a realization of the vital necessity of preserving it unimpaired, and particularly in respect to its broad limitations upon the legislative power and its guaranties of the fundamental rights of life, liberty, and property; to oppose attempted changes in it which tend to destroy or impair the efficacy of those guaranties, or which are not founded upon the mature consideration and deliberate choice of the people as a whole; and to this end, to publish and circulate appropriate literature, to hold public and corporate meetings, to institute lectures and other public addresses, to establish local centers or branches, and generally to promote the foregoing objects by such means as shall from time to time be determined upon by the association or by its governing bodies.

JAPAN WELCOMES THE UNITED STATES IN THE WAR.

Viscount Ishii, Chief of the Imperial Japanese Mission to the United States, in addressing the United States Senate, on August 30, 1917, thus spoke of Japan's relation to the war and her appreciation of America's part in the conflict: "The whole people of Japan heartily welcome and profoundly appreciate the entrance of this mighty Nation of yours into the struggle against the insane despoiler of our civilization. We all know that you did not undertake this solemn task on the impulse of the moment, but that you threw your mighty weight into the struggle only after exercising a most admirable patience, with a firm determination that this world shall be made free from the threat of aggression from the black shadow of a military despotism wielded by a nation taught with the mother's milk that human right must yield to brutal might. To us, the fact that you are now on the side of the Allies in this titanic struggle constitutes already a great moral victory for our common cause, which we believe to be the cause of right and justice, for the strong as for the weak, for the great as for the small.

"We of Japan believe we understand something of the American ideal of life, and we pay our most profound respects to it. Jefferson, your great democratic President, conceived the ideal of an American Commonwealth to be not a rule imposed on the people by force of arms, but as a free expression of the individual sentiments of that people. Jefferson saw Americans not as a set of people huddled together under the muzzles of machine guns, but he saw them as a myriad of independent and free men, as individuals only relying on a combined military force for protection against aggression from abroad or treachery from within. He saw a community of people guided by a community of good thought and pure patriotism, using their own special talents in their own special way under their own sacred rooftrees; not a machine-made nation, but a living, growing, organism, animated by one passion—the passion of liberty. I assure you, gentlemen, that the Japanese ideal of national life is, in its final analysis, not so very far removed from yours. We conceive of our nation as a vast family, held together not by the arbitrary force of armed men, but by the force of a natural development. We shall call the common force that animates us a passion of loyalty to our Emperor and to our homes, as we shall call that of Americans a passion for liberty and of loyalty to their flag.

"Blind loyalty without rational consciousness of the responsibility of self is but another name for slavery, while a right of liberty ill conceived, ignoring the mutual human affection and respect for the rights of every man, which form the essence of true loyalty, must be tantamount to anarchy. These two passions—passion of loyalty and passion for liberty—are they not really one? Is not the same control working in both cases—the intense desire to be true to our innermost selves and to the highest and best that has been revealed to us. You must be free to be Americans and we must be free to be Japanese. But our common enemy is not content with this freedom for the nation or for the individual; he must force all the world to be German, too! You had hoped against hope that this was not so; but that noble hope fled and your admirable patience was exhausted. You did not then hesitate to face the issue and the foe, as you are facing it, with that great American spirit which has loved and still loves liberty, which loves the right more than peace and honor more than life.

"We of Japan took up arms against Germany because a solemn treaty was not to us "a scrap of paper." We did not enter into this war because we had any selfish interest to promote or any ill-conceived ambition to gratify. We are in the war, we insist on being in it, and we shall stay in it, because earnestly, as a nation and as individuals, we believe in the righteousness of the cause for which we stand; because we believe that only by a complete victory for that cause can there be made a righteous, honorable, and permanent peace, so that this world may be made safe for all men to live in and so that all nations may work out their destinies untrammelled by fear.

GERMAN PLANS TO REGAIN CHEMICAL TRADE IN AMERICA.

(By U. S. Consul William C. Teichmann.)

AMONG the many economic changes that the present war conditions have brought about in Germany, the combination of German dyestuff interests, effected in 1915 and operating since January 1, 1916, is of special importance to Americans, because it means a formidable competitor for our infant American dyestuff industry in every foreign field, as well as in our own domestic market. In a smaller degree it also will bring future competition to other chemical industries in our country which have prospered during the war, as the German concerns that have been combined are also producers of chemicals in pharmaceutical lines. The rapid growth of the American dyestuff industry during the war has been given serious attention by the German concerns that formerly controlled our market, and has assisted in uniting these great rivals in Germany for mutual protection. Realizing the difficulties of reconquering the lost markets of the various foreign countries after the war, the German dyestuff manufacturers in the fall of 1915 organized a combine of the seven leading companies, which practically control the output, and pooled interests to the extent of securing uniform prices and wages, systematizing production, and also insuring a harmonious policy for all other interests involved. This implies uniformity in all endeavors to regain the former German foothold in foreign markets, and will apply to the new competition in the American market particularly. The importance of German exports in chemicals prior to the war can be seen from the statistics. Their annual value averaged about $214,000,000, according to estimates of German trade organizations. The concerns that entered the combine at that time, with their annual share of profits guaranteed during the first two years, were:

Companies.	Capital.	Average Share of Profits for Two Years.	Later Share.
		Per Cent.	*Per Cent.*
Hoechster Farbwerke	$11,900,000	24.82	25.02
Badische Anilin & Sodafabrik	12,852,000	24.82	25.02
Bayer, Leverkusen		24.82	25.02
Leopold Cassella & Co., Frankfurt		10.00	Not fixed.
Aktiengesellschaft fuer Anilinfabrikation Berlin-Treptow	4,712,400	8.04	8.14
Chemische Fabrik Griesheim / Chemische Fabrik vormals Weiler ter Meer	1,904,000	7.50	Not fixed.
Total		100	100

Considerable difficulty was encountered in dividing the future profits, but the figures given were finally decided upon, together with an agreement the essential features of which were as follows: It is to be binding for 50 years beginning January 1, 1916. While the separate organization of production of each concern is to be maintained, risks in business with foreign countries are to be jointly and proportionately carried by all members of the combination, accounting for the contemplated competition in foreign markets, in both "hostile and neutral countries" after the war.

PROVISIONS OF THE TRADING-WITH-THE-ENEMY ACT.

THE following summary of the powers of the government under the Trading-With-the-Enemy Act, passed by Congress and signed by the President October 6, 1917, is published with the authority of the Committee on Public Information. An Executive order of October 12 established the administrative machinery to carry out the law's provisions.

This act has conferred on the President war powers of the widest extent. It has added to his authority to embargo all exports, given to him by the Espionage Act, and lets him prohibit all imports into the United States except under such licenses as may be granted It allows him to prohibit or regulate all transfers of credits, money, currency, bullion, and securities between the United States and all foreign countries. It imposes severe criminal penalties on all persons who trade or communicate directly or indirectly with an "enemy" or "ally of enemy," or with any person acting on their behalf or for their benefit. It creates a definition of an "enemy" and "ally of enemy." The act further provides for the use in the United States of enemy-held patents which may be of assistance to us in carrying on the war. It provides for taking over and administering the property in the United States of "enemies" and "allies of enemies." It confers upon the President power to censor all communications of every sort passing between this country and any foreign country.

Certain of the powers conferred by the act the President has directed to be exercised through the State Department, the Treasury Department, the Attorney General, the Post-Office Department, the Commerce Department, and the Federal Trade Commission. As to many of the powers conferred upon the President by Congress in this act, no single existing department is interested, and the President provided for their joint administration by a War Trade Board composed of representatives of the departments most concerned. The new War Trade Board was named as follows: Vance C. McCormick, chairman, representative of the Secretary of State; representative of the Secretary of the Treasury to be appointed; Dr. Alonzo E. Taylor, representative of the Secretary of Agriculture; Thomas D. Jones, representative of the Secretary of Commerce; Beaver White, representative of the Food Administrator; Frank C. Munson, representative of the United States Shipping Board; Thomas L. Chadbourne, Jr., counsellor to the board. The functions and organization of this board are as follows:

EXPORTS.

The War Trade Board, under the President's direction, succeeds to all the functions which have been exercised by the Exports Administrative Board, which goes out of existence. The proclamations of the President forbidding the export of various articles without a license are continued in full force and effect, but licenses were thereafter granted by the War Trade Board instead of by the Exports Administrative Board, and all applications for such licenses and all correspondence with regard to them has been addressed to the Bureau of Exports of the War Trade Board. It took over the branch offices in various cities of the Exports Administrative Board, and these branch offices have the same power and functions as to exports under the War Trade Board that they had under the Exports Administrative Board. The War Trade Board deals with exports under the powers created by Title VII. of the Espionage Act, approved June 17, 1917.

IMPORTS.

The act confers upon the President the power to prohibit the importation of any article or to impose the terms and conditions upon which it may be imported. The licensing of such importations is done by the War Trade Board.

TRADING WITH THE ENEMY.

The act makes it unlawful, under severe criminal penalties, to trade without a license with any person who there is probable cause to believe is an enemy or ally of enemy. The act gives an extremely broad definition of what constitutes trade. It provides that "trade" shall be deemed to mean—(a) To pay, satisfy, compromise, or give security for the payment or satisfaction of any debt or obligation. (b) To draw, accept, pay, present for acceptance or payment, or indorse any negotiable instrument or chose in action. (c) To enter into, carry on, complete, or perform any contract, agreement, or obligation. (d) To buy or sell, loan, or extend credit, trade in, deal with, exchange, transmit, transfer, assign, or otherwise dispose of, or receive any form of property. (e) To have any form of business or commercial communication or intercourse with.

Any person, no matter of what nationality, who resides within the territory of the German Empire or the territory of any of its allies or that occupied by their military forces is expressly made an "enemy" or "ally of enemy" by the act Even citizens of the United States who have elected to remain within such territory are "enemies" or "allies of an enemy" within the provisions of the act. Any person not residing in the United States of whatever nationality and wherever he resides, who is doing business within such territory, is placed within the definition of "enemy" or "ally of enemy." So also is any corporation created by Germany or its allies, or any corporation created by any other nation than the United States and doing business within such territory. The government of any nation with which the United States is at war or the ally of such nation and every subdivision of such government, and every officer, official agent, or agency of such government is an "enemy" or "ally of enemy," and the act makes no distinction as to where such officer, official agent, or agency may be located. It is equally unlawful to trade with any person who there is reasonable cause to believe is acting for or on account of or for the benefit of an "enemy" or "ally of enemy," and it makes no difference what the nationality or what the residence of such person may be. On the other hand, in dealing with subjects of Germany who are resident in the United States, it is important to remember that, while other provisions of law make it possible to intern them, the mere fact of their nationality does not make them "enemies" within the meaning of this act and so prevent persons in this country from having ordinary commercial relations with them. The act gives power to the President to grant licenses to trade with the enemy. The exercise of this power has been delegated by the President to the War Trade Board. Applications for license to trade with an "enemy" or "ally of enemy," or a person acting on behalf of or for the benefit of an "enemy" or "ally of enemy" are sent to the War Trade Board.

ENEMIES DOING BUSINESS IN THE UNITED STATES.

A person who is an "enemy" or "ally of enemy" doing business within the United States, may within 30 days after the act's enactment, apply for a license to continue to do business in the United States. The main application of these provisions is to German or ally-of-German concerns doing business in the United States through branch houses or agents, such as insurance or reinsurance companies. Such an "enemy" or "ally of enemy" may continue to do business within the United States until such applications are acted upon, but under the restrictions, in the case of insurance companies, of the President's proclamation of July 13, 1917. It is not necessary under these provisions for a German subject or the subject of an ally of Germany who is resident in this country to apply for a license unless for some other reason he falls within the definition of "enemy" or "ally of enemy." If a license is granted to an "enemy" or "ally of enemy" to do business within the United States it is then lawful for anyone within the United States to trade within the United States with such "enemy" or "ally of enemy" without himself applying for a license. Such "enemy," if granted a license to do business within the United States, is prohibited from the time the act takes effect from transmitting out of the United States any money or property, or using such money or property as a basis for the establishment of any credit within or outside of the United States for the benefit of or on behalf of an "enemy" or "ally of enemy." Applications for license by an "enemy" or "ally of enemy" in the United States to continue to do business in the United States are sent to the War Trade Board, except in the case of "enemy" or "ally of enemy" insurance companies, in which case they are sent

PROVISIONS OF THE TRADING-WITH-THE-ENEMY ACT—*Continued.*

to the Treasury Department. No "enemy" or "ally of enemy" doing business in the United States, or a partnership in which an "enemy" or "ally of enemy" was a member at the beginning of the war, can make a change of name during the war without a license. The War Trade Board is empowered by the President to receive and act on applications for such licenses.

COMMUNICATING WITH THE ENEMY.

The act prohibits and imposes severe penalties on taking or sending any communication in any form out of the United States intended for any enemy or ally of the enemy, and also makes it unlawful to bring in or take out of the United States any form of communication except by mail. Power is given to relieve from these prohibitions by license, and the Secretary of the Treasury receives applications for and grants such licenses.

WAR TRADE COUNCIL.

In addition to the War Trade Board the President has created a War Trades Council composed of the Secretary of State, the Secretary of the Treasury, the Secretary of Agriculture, the Secretary of Commerce, the Food Administrator, and the Chairman of the United States Shipping Board. This War Trade Council takes the place of the Exports Council, and acts in an advisory capacity in such matters as may be referred to it by the President or the War Trade Board.

PATENTS.

The act contains various provisions as to the application for patents by citizens of the United States in enemy and ally of enemy countries during the war, and for the use in the United States by citizens of the United States of enemy-held patents during the war, and also for the suspension of information as to certain patent applications made in the United States, secrecy as to which is necessary for military reasons. The Federal Trade Commission is empowered by the President to deal with all these matters, receiving applications and granting licenses with regard to them.

CUSTODY OF ENEMY PROPERTY.

Among the far-reaching provisions of the act are those dealing with the taking over by this government of the custody and control of "enemy" property within the United States. The property affected by these provisions is that which is located in the United States and belongs to any person or corporation that is an "enemy" or "ally of enemy" except those licensed to continue doing business in the United States. German subjects and the subjects of her allies resident in the United States do not, from the mere fact of their nationality, fall within these definitions. The act makes it the duty of every concern within the United States, issuing shares or stock, within 60 days after the approval of the act to report to the Alien Property Custodian the names of such of its officers, directors, and stockholders as are known to be or reasonably believed to be "enemies" or "allies of enemy," and the amount of stock or shares owned by each. Every person in the United States holding any property for an "enemy" or "ally of enemy," or for any person whom he may have reasonable cause to believe to be an "enemy" or "ally of enemy" must report the fact to the Alien Property Custodian within 30 days after the passage of the act, and any person in the United States indebted in any way to an "enemy" or "ally of enemy," or to a person whom he may have reasonable cause to believe to be an "enemy" or "ally of enemy," must make a similar report. The Alien Property Custodian may, under the provisions of the Executive order, require a transfer to himself of any property held for or on behalf of an "enemy" or "ally of enemy," or the payment of any money owed to an "enemy" or "ally of enemy," by a person in the United States. In addition, any person in the United States so holding any property or so owing any money may transfer such property or pay such money to the Alien Property Custodian with his consent. Property or money transferred to the Alien Property Custodian will be held until the end of the war and then dealt with as Congress shall direct. All funds or ready money may be invested in Liberty Bonds and held in such form. The President has delegated to the Attorney General the power to direct the payment of claims against enemy property in the hands of the custodian upon the consent of all persons interested.

CONTROL OVER FOREIGN EXCHANGE AND TRANSFERS OF GOLD.

The President, by his Executive order, has committed to the Secretary of the Treasury the prohibition and regulation of a transfer between the United States and foreign countries of coin, currency, bullion, credits, and securities. The Secretary of the Treasury was directed to continue, with the assistance of the Federal Reserve Banks, to pass on applications for leave to export bullion, coin, and currency.

CENSORSHIP BOARD.

The President has created a censorship board to administer such regulations as he may prescribe as to the censorship of cables, telegraph, and mail communications between the United States and foreign countries. This board is composed of representatives, respectively, of the Postmaster-General, of the Secretary of War, of the Secretary of the Navy, of the War Trade Board, and of the Chairman of the Committee on Public Information.

FOREIGN LANGUAGE PRESS.

The act provides that every paper printed in a foreign language shall furnish translations to the Postmaster-General of the matter concerning the war printed by it, unless a permit to omit doing so is granted to it. The administration of this provision is committed to the Postmaster-General and applications for such permits should be made to him.

The act provides that it shall be unlawful for any person without a license to transport or attempt to transport into or from the United States, or for any American vessel to transport in any part of the world any citizen of an enemy or ally of an enemy nation. The administration of this provision is vested in the State Department and authority given the Secretary of State to grant the necessary licenses for such transportation.

Collectors of Customs are given the right to refuse clearance to vessels transporting cargo in violation of the provisions of the act. Power to review such refusal of clearance by the collector is vested in the Secretary of Commerce by the Executive order of the President.

WOMAN'S PEACE PARTY.

Chairman—Miss Jane Addams, Chicago. *Honorary Chairman*—Mrs. Ella Flagg Young, Chicago. *Vice-Chairmen*—Mrs. Anna Garlin Spencer, Mrs. C. E. Cumberson, Palo Alto, Cal.; Mrs. Louis F. Post, Washington, D. C.; Mrs. Frederick J. Taussig, St. Louis, Mo. *Secretary*—Mrs. Lucia Ames Mead, Boston, Mass. *Associate Chairman and Executive Secretary*—Mrs. William I. Thomas, Chicago. *Treasurer*—Miss S. P. Breckinridge, Chicago. *Office Secretary*—Mrs. Eleance Daggett Karsten, Chicago. Offices, 116 South Michigan Avenue, Chicago, Ill.

The Woman's Peace Party recommends that during the war its members carry on three kinds of patriotic work. FIRST—Promoting the spirit of good will and mutual comprehension between persons of varying points of view. Defeating the spirit of militarism in every land. Let those of opposed opinions be loyal to the highest that they know, and let each understand that the other may be equally patriotic. SECOND—The war will sharply complicate existing social needs. It is important that such work, both local and national, should be carried forward. Otherwise there will be an increase of suffering, poverty and crime in our midst. THIRD—Work for a League of Nations to substitute law for war.

WAR WORK OF THE 65TH CONGRESS.

(As summarized in a statement to the country by Senator Martin, Chairman of the Senate Committee on Appropriations.)

PRINCIPAL ACTS PASSED.

DECLARING a state of war exists between the Imperial German Government and the Government and the people of the United States and making provision to prosecute the same. On April 2 the German war resolution was introduced in the House, and on April 6, or four days after the assembling of Congress, the President attached his signature to that measure. No delay was involved in the passage of this resolution, perhaps the most important ever offered, either in this or any other Congress.

Appropriating $68,020 for certain expenses incident to the first session of the Sixty-fifth Congress.

General deficiency appropriation act, appropriating $163,841,400.52, of which $100,000,000 was for the National security and defense and for each and every purpose connected with the war.

Authorizing an issue of bonds to meet expenditures for the National security and defense, and, for the purpose of foreign governments, and for other purposes. This act appropriates $3,007,063,945.46 for establishing credits in the United States for foreign governments by purchase of bonds of our Allies and expenses incident to preparation and issue of bonds and certificates; authorizes the issue of bonds amounting to $5,063,945,460, of which $3,000,000,000 is for meeting the loans authorized to foreign governments, $2,000,000,000 to meet domestic expenditures, and $63,945,460 to redeem the 3 per cent. loan of 1908 to 1918, maturing August 1, 1918; and also authorizes $2,000,000,000 of one-year certificates of indebtedness temporarily to provide revenue.

Authorizing one additional midshipman for each Senator, Representative, and Delegate in Congress

Appropriating $273,046,322.50 for the support of the army for the fiscal year 1918.

Authorizing the President to increase temporarily the military establishment of the United States. This act authorized a selective draft of 1,000,000 men and contains other important legislative features pertaining to the army.

Authorizing the President to take over for the United States any vessel owned in whole or in part by any corporation, citizen, or subject of any nation with which the United States may be at war.

Authorizing the American Red Cross to erect certain temporary buildings in Washington, D. C.

An act to temporarily increase the commissioned and warrant and enlisted strength of the navy and Marine Corps from 87,000 to 150,000 men, in the first instance, and from 17,400 to 30,000 in the second.

Appropriating $1,344,896.18 for the support of the Military Academy for the fiscal year 1918, and for other purposes.

Amending an act entitled "An act to regulate commerce," as amended, in respect of car service, and for other purposes.

Amending the war-risk insurance act and appropriating $45,150,000 to insure vessels and their cargoes and expenses connected therewith.

Appropriating $147,363,928.77 for the sundry civil expenses of the Government for the fiscal year 1918.

Authorizing the issue to States and Territories and the District of Columbia of rifles and other property for the equipment of organizations of home guards.

Appropriating $3,281,094,541.60 for the military and naval establishments on account of war expenses. Up to this time this is the largest appropriation act known to this or any other country. Among other things, it appropriates $405,000,000 for an emergency shipping fund with which to begin construction of the greatest merchant fleet the world has ever known.

To punish acts of interference with foreign relations, the neutrality, and the foreign commerce of the United States, to punish espionage, and better enforce the criminal laws of the United States, and for other purposes.

Amending the Federal reserve act.

Authorizing condemnation proceedings of lands for military purposes.

Appropriating $640,000,000 to increase temporarily the Signal Corps of the army and to purchase, manufacture, maintain, repair, and operate airships.

Authorizing the United States to take possession of a site for use for permanent aviation stations of the army and navy for school purposes.

Appropriating $27,826,150 for the construction, repair, and preservation of certain public works on rivers and harbors.

Enlarging the membership of the Interstate Commerce Commission and amending the act to regulate commerce, by authorizing priority shipments by any common carrier, etc.

Appropriating $11,346,400 to provide further for the National security and defense by stimulating agriculture and facilitating the distribution of agricultural products.

Appropriating $162,500,000 to provide further for the National security and defense by encouraging the production, conserving the supply, and controlling the distribution of food products and fuel.

Authorizing an additional issue of bonds to meet expenditures for the National security and defense and, for the purpose of assisting in the prosecution of the war, to extend additional credit to foreign governments, and for other purposes. This act makes an additional appropriation of $4,021,377,890.92 to extend credit in the United States for foreign governments by purchase of bonds of our Allies and expenses incident to preparation of an issue of bonds and certificates; authorizes an additional issue of $4,000,000,000 of bonds to meet loans to foreign governments; authorizes an additional issue of one-year certificates of indebtedness amounting to $2,000,000,000 and an issue of five-year war-saving certificates amounting to $2,000,000,000.

Authorizing the construction of a building for the use of the Treasury Department in Washington, D. C., at a total cost not exceeding $1,250,000.

Appropriating $5,356,666,016.93 to supply deficiencies in appropriations for the fiscal year 1918 and prior years on account of war expenses, and for other purposes, and authorizes contract obligations to be met by future Congresses amounting to $2,401,458,393.50. This is the largest appropriation act passed by this or any other country. This act makes further appropriations for the emergency shipping fund of $635,000,000 and raises the limit of cost to carry out the purposes of the shipping act to $1,734,000,000.

An act to define, regulate, and punish trading with the enemy, and for other purposes, and appropriates $450,000 to enforce the provisions thereof.

An act to provide revenue to defray war expenses, and for other purposes. This measure raises approximately $2,500,000,000 for the expenses of the Government.

To provide a military and naval family allowance, compensation, and insurance fund for the benefit of soldiers and sailors and their families, and makes an appropriation therefor of $176,250,000.

APPROPRIATIONS AND CONTRACT AUTHORIZATIONS FOR THE FISCAL YEAR 1918.

A statement showing by acts the appropriations for the fiscal year 1918 made during the Sixty-fourth Congress, second session (including appropriations made by the army, Military Academy, rivers and harbors, sundry civil, and general deficiency acts passed during the Sixty-fifth Congress, first session):

Agriculture	$25,929,113.00
Army	273,046,322.50
Diplomatic and Consular	5,082,746.66
District of Columbia	14,172,997.85

WAR WORK OF THE 65TH CONGRESS—*Continued.*

Fortification	51,396,593.00
Indian	11,589,736.67
Legislative, executive, and judicial	39,894,592.42
Military Academy	1,344,896.18
Naval	517,273,802.08
Pension	160,060,000.00
Post-Office	331,851,170.00
River and harbor	27,826,150.00
Sundry civil	147,363,928.77
Total	$1,606,832,049.13
General deficiency	163,841,400.52
Urgent deficiency	4,578,250.00
Miscellaneous	*41,093,670.08
Permanent annual and indefinite appropriations	145,864,830.32
Total	$1,962,210,200.05
Increased compensation of 5 and 10 per cent. to certain employees (estimated)	15,000,000.00
Total regular appropriations, Sixty-fourth Congress, second session	$1,977,210,200.05
Appropriations for the fiscal year 1918, made during the Sixty-fourth Congress, first session (exclusive of army, Military Academy, river and harbor, sundry civil, and general deficiency acts):	
Expenses incident to the Sixty-fifth Congress, first session	68,020.00
Loans to the Allies under act of April 24, 1917	† 3,000,000,000.00
Expenses of preparation and issue of bonds and certificates of indebtedness under act of April 24, 1917	7,063,945.46
Bureau of War-Risk Insurance, cost of insuring vessels and their cargoes, etc	45,150,000.00
Urgent deficiency act for the military and naval establishments	3,281,094,541.60
Increase of Signal Corps of the army, including purchase, operation, etc., of airships	640,000,000.00
Expenses under act to encourage production, conserve the supply, and control distribution of food products and fuel	162,500,000.00
Expenses under the act to stimulate agriculture and facilitate the distribution of agricultural products	11,346,400.00
Additional loans to the Allies under act of September 24, 1917	† 4,000,000,000.00
Expenses of preparation and issue of bonds, certificates of indebtedness, and war saving certificates	21,377,890.92
Expenses under the act to define, regulate, and punish trading with the enemy	450,000.00
Expenses under the act establishing a military and naval family allowance, compensation, and insurance fund for the benefit of soldiers and sailors and their families	176,250,000.00
Urgent deficiency act for the fiscal year 1918 and prior years on account of war expenses	5,356,666,016.93
Interest on bonds and certificates (estimated)	200,000,000.00
Total appropriations, Sixty-fifth Congress, first session	$16,901,966,814.91
Total appropriations for the fiscal year 1918	$18,879,177,014.96
Contract authorizations, by acts in addition to appropriations heretofore made, to be met by future appropriations by Congress, authorized during the fiscal year 1918:	
Fortification	$5,250,000.00
Naval	86,145,532.00
Sundry civil	900,000.00
Urgent deficiency appropriation act of June 24, 1917	16,550,000.00
Urgent deficiency appropriation act of October —, 1917	2,401,458,393.50
Act to authorize the construction of a building for the use of the Treasury Department	1,250,000.00
Total contract authorizations	$2,511,553,925.50
Total appropriations and contract authorizations, fiscal year 1918	$21,390,730,940.46
Recapitulation:	
Total appropriations, Sixty-fourth Congress, second session	$1,977,210,200.05
Total appropriations, Sixty-fifth Congress, first session	16,901,966,814.91
Total contract authorizations, fiscal year 1918	2,511,553,925.50
Total appropriations and contract authorizations, fiscal year 1918	21,390,730,940.46
Total appropriations, fiscal year 1918, exclusive of $7,000,000,000 for loans to the Allies	11,879,177,014.96
Total appropriations and contract authorizations, exclusive of $7,000,000,000 for loans to the Allies	14,390,730,940.46

* This sum includes an appropriation of $10,000,000 for the War-Risk Insurance Bureau, which has been repealed by subsequent legislation. † The $3,000,000,000 and $4,000,000,000, making in all $7,000,000,000, to meet loans to the Allies, is reimbursable by the foreign governments to whom the advances are made.

ONE WAY TO FIGURE THE WAR'S ENDING.

A CHICAGO man does it this way:

	Pres. Wilson.	Pres. of France.	King of England.	King of Italy.	Czar of Russia.	King of Belgium.	Emperor of Japan.	King of Serbia.	King of Montenegro.
Year born	1856	1860	1865	1869	1868	1875	1879	1844	1841
Year took office	1912	1913	1910	1900	1894	1909	1912	1903	1910
Years in office	5	4	7	17	23	8	5	14	7
Has lived	61	57	52	48	49	42	38	73	76
Totals	3834	3834	3834	3834	3834	3834	3834	3834	3834
Divided by 2	1917	1917	1917	1917	1917	1917	1917	1917	1917

Note—In the case of Wilson "took office" means "elected."

THE NEW WAR REVENUE LAW.

(Passed by Congress and approved by the President, October 3, 1917.)

INCOME TAX CHART.

(Based on the War Income Tax Law, and the Income Tax Law, as amended October 3, 1917. Chart shows the tax payable by a married person, but does not take cognizance of the $200 exemption for each dependent child.)

† Single persons, $3,000. * Single persons, $1,000. ** Total surtax is the total of the installments for the income considered.

The chart and the summary of the law which follows have been prepared by the Guaranty Trust Company of New York, in co-operation with Government experts. As is indicated in the table, in addition to the present rate of normal tax of 2%, the law provides for a further normal tax of 2% on incomes of residents or citizens of the United States in excess of $2,000 for married persons or heads of families, or in excess of $1,000 for single persons. By the assessment of this additional tax of 2%, incomes in excess of $4,000 for married persons or heads of families, or $3,000 for single persons, will be subject to a normal tax of 4%. The additional normal tax does not apply to non-resident alien individuals.

Surtax—In addition to the surtax imposed by the act of September 8, 1916, a further surtax on incomes of citizens and residents of the United States and non-resident aliens, is imposed, as shown in the chart.

Collection of Tax—Additional taxes under the War Tax Law are to be levied, assessed, collected and paid in the same manner as similar taxes imposed by the Income Tax Law of September 8, 1916.

Exemptions—For the purpose of the assessment of the additional war tax, the specific exemption allowed to married persons or heads of families shall be $2,000, and for single persons, $1,000.

Returns—Annual returns for taxes are required for net incomes of $1,000 or over, in the case of single persons, and $2,000 or over, in the case of married persons or heads of families.

Deduction at Source—Deduction of tax at the source on interest derived from tax free bonds shall not apply to the additional normal tax of 2% until after January 1, 1918, and thereafter only one 2% normal tax shall be deducted. Any further normal tax, for which the recipient of such income is liable, shall be paid by the recipient.

Additional Tax—In addition to the tax of 2% now assessed on net earnings of corporations, under the act of September 8, 1916, the War Tax Law provides for a further tax of 4%, making the total income tax on net earnings now 6%.

Collection of Tax—The additional tax shall be levied, assessed, collected and paid in the same manner as the tax imposed by the act of September 8, 1916, as amended.

Dividends—For the purpose of the assessment of the additional tax, the income of a corporation shall be credited with the amount received as dividends upon the stock or from the net earnings of any other corporation, which is taxable upon its net income for the additional tax.

The additional taxes provided for shall be assessed for the calendar year 1917 and each year thereafter. If a corporation has fixed its own fiscal year, the additional tax imposed for the fiscal year ending during the calendar year 1917 shall be assessed, collected and paid only on that proportion of its income for such fiscal year which the period between January 1, 1917, and the end of such fiscal year bears to the whole fiscal year.

The provisions of this title do not extend to Porto Rico or the Philippine Islands, and the legislatures of Porto Rico and the Philippine Islands are given power to amend, alter, modify or repeal the income tax laws enforced in Porto Rico or the Philippine Islands.

INCOME TAX AMENDMENTS.

(Changes in the law of September 8, 1916.)

Individuals—Tax on dividends: Dividends paid from earnings acquired subsequent to March 1, 1913, are taxable. The amendment of the Income Tax Law provides that dividends shall be deemed to have been paid from the net income of the year in which paid, or from the most recently accumulated

surplus, and shall constitute income of the shareholder for the year in which received, but be taxed at the rates prescribed for the year in which earned by the corporation. The above provisions do not apply to distributions made prior to August 6, 1917, out of profits accrued prior to March 1, 1913. Stock dividends are to be considered income to the amount of surplus, undivided profits and earnings so distributed. For example, if a corporation issues a stock dividend of 100 shares, having a par value of $100 each, and transfers to capital an amount of surplus and undivided profits equal to the value of the stock distributed, the par value of the stock received shall be returned as taxable income.

Interest on Government Bonds—Interest on United States bonds issued after September 1, 1917, is exempt from taxation only to the extent provided in the act authorizing the issue.

General Deductions—The law relating to general deductions is changed with respect to deductions on account of taxes and deductions on account of interest on indebtedness. Interest on indebtedness incurred in the purchase of obligations or securities, the interest upon which is exempt from income tax, may not be deducted in determining net income. Taxes paid on income and excess profits will also not be permitted as a general deduction. This applies to both citizens and residents of the United States and to non-resident aliens. Contributions or gifts within the year for religious, charitable, scientific, educational or humanitarian purposes, to an amount not in excess of 15% of the taxpayer's taxable net income, when verified under prescribed regulations, shall be allowable as deductions. General deductions allowed non-resident aliens will be permitted only in case a true and accurate return filed of all income received from sources corporate or otherwise within the United States.

Specific Exemption—Under the law as amended an additional exemption of $200 for each dependent child, if under 18 years of age, or if incapable of self-support because mentally or physically defective, is allowed. This additional exemption operates only in the case of one parent in the same family. The provision of the law permitting the specific exemption to non-resident aliens is repealed.

PARTNERSHIPS.

Returns—Partnerships, when required to file return, shall have the same privilege of fixing and making returns upon the basis of their own fiscal years as is accorded to corporations. The share of profits of a partnership to which any taxable partner would be entitled for the fiscal year ending in 1916 or a subsequent calendar year, for which the rates of tax have been or shall be changed by law, shall be returned for taxation and the tax paid under the respective rates applicable to each calendar year in the proportion that the period of each calendar year bears to the full fiscal year. Income derived from interest on Government bonds shall be credited in determining net income only to the extent that it is provided in the act authorizing the issue that they are exempt.

DEDUCTION OF THE TAX AT THE SOURCE.

Individuals, Residents or Citizens—Deduction of the normal tax at the source on income of individuals, residents or citizens of the United States, is abolished, except with respect to tax free bonds. Exemption may be claimed from deduction of tax on tax free bonds by filing a certificate prior to February 1.

Non-Resident Aliens—Deduction of the normal tax at the source on the income of non-resident alien individuals remains unchanged.

Foreign Corporations and Firms—Deduction of the tax at the source on dividends payable to non-resident alien corporations not having a place of business in the United States is retained, and deduction of tax on interest on bonds of domestic corporations payable to non-resident alien corporations or firms, not having a place of business in the United States, is also continued.

Tax Withheld During 1917—Any amount of tax withheld by a withholding agent during the year 1917 on account of tax imposed upon the income of any individual, citizen or resident of the United States, except in case of interest on tax free bonds, shall be released and paid over to such individual.

Payment of Tax by Recipients—The entire tax upon the income of individuals, citizens or residents of the United States shall be paid hereafter directly by the owners of the income, except where deduction at the source is authorized.

DEDUCTION OF EXCESS PROFITS TAX.

In assessing income tax, the net income embraced in the return shall be credited with the amount of any excess profits tax assessed for the calendar or fiscal year upon the taxpayer. In the case of a member of a partnership, the net income of the member shall be credited with his proportionate share of the excess profits tax of the partnership.

INCOME OF FOREIGN GOVERNMENTS.

Income of foreign governments received from investments in the United States in stocks, bonds or other domestic securities, or from interest on deposits in banks, shall not be subject to tax.

CORPORATIONS.

Undistributed Surplus—In addition to other taxes, a tax of 10% shall be imposed on the net income, beginning with the year 1917, of every corporation, joint stock company or association or insurance company, received during each year and remaining undistributed six months after the end of each calendar or fiscal year. Undistributed income which is actually invested or employed in the business or is retained for employment, in the reasonable requirements of the business, is not subject to the tax. Likewise income invested in obligations of the United States issued after September 1, 1917, is not subject to the tax. If the Secretary of the Treasury ascertains and finds that income is retained at any time for employment in the business and is not so employed or is not reasonably required in the business, the tax shall be assessed at the rate of 15%. In case return is made on the basis of a fiscal year ending prior to December 31, 1917, the tax shall be imposed on that proportion of the income which the part of the fiscal year in the year 1917 bears to the whole of such fiscal year.

Payment of Dividends—A corporation is required to include in its annual return a statement of its payments of dividends which are made in cash or its equivalent or in stock, including the names and addresses of stockholders and the number of shares owned by each and the applicable amounts in which such dividends were earned.

General Deductions—The law relating to general deductions is changed with respect to deductions on account of interest on indebtedness and deductions on account of taxes. Interest on indebtedness incurred in the purchase of obligations or securities the interest upon which is exempted from income tax, may not be deducted in determining net income. Taxes paid on income and excess profits will also not be permitted as a general deduction. This applies to both foreign and domestic corporations.

INFORMATION AT THE SOURCE.

The system of information at the source is substituted for deduction of the tax at the source with respect to income received by citizens or residents of the United States, except income derived from interest on tax free bonds. Information at the source shall apply to the calendar year 1917, but shall not apply to the payment of interest on bonds of the United States.

Brokers' Returns—Every person, corporation, partnership or association doing business as a broker on any exchange, board of trade or other similar place of business shall, when required by the Commissioner of Internal Revenue, render a return showing the names of customers for whom such person, corporation, partnership, or association has transacted any business with such details as to the profits, losses, or other

information as will enable the Commissioner of Internal Revenue to determine whether all income tax due on profits or gains of such customers has been paid.

Returns of Miscellaneous Income—All persons, corporations, partnerships, associations and insurance companies, in whatever capacity acting, including lessees or mortgagors of real and personal property, trustees acting in any trust capacity, executors, administrators, receivers, conservators and employers making payment due another person, corporation, partnership association or insurance company of interest, rent, salaries, wages, premium, annuities, compensation, remuneration, emoluments or other fixed or determinable gains, profits and income of $800 or more in any taxable year, or in the case of such payments made by the United States to officers or employes of the United States having information as to such payments, and required to make returns in regard thereto, are authorized and required to render a return to the Commissioner of Internal Revenue setting forth the amount of such gains, profits and income and the names and addresses of the recipients of such payments.

Returns of Interest on Bonds and Foreign Dividends—Returns shall be required regardless of the amount of payment (1) in the case of payments of interest upon bonds and mortgages or deeds of trust or other similar obligations of corporations, joint stock companies, associations and insurance companies, and (2) in the case of collections of items of interest upon the bonds of foreign countries and interest from bonds or the stock of foreign corporations by persons, corporations, partnerships or associations undertaking as a matter of business or for profit, the collection of foreign payments of such interest or dividends by means of coupons, checks or bills of exchange.

Disclosure of Ownership—The name and address of the recipient of the income must be furnished on demand of the person paying the income.

Penalty—Penalty for refusal or neglect to make return or supply information is fine of not less than $20 and not more than $1,000. Any individual or officer of a corporation who makes any false or fraudulent return or statement with intent to defeat or evade the assessment of taxes shall be fined not exceeding $2,000, or be imprisoned not exceeding one year, or both.

COLLECTION OF FOREIGN ITEMS.

Persons, firms, corporations or associations making collection of foreign payments of interest or dividends by means of coupons, checks or bills of exchange are required to obtain a license from the Commissioner of Internal Revenue. Any concern that undertakes to collect such payments without having obtained a license therefor shall be subject to a fine not exceeding $5,000 or imprisonment for a term not exceeding one year, or both. This requirement is the same as that in effect before collection of the tax at the source was abolished.

LIFE INSURANCE PREMIUMS.

Premiums paid on life insurance policies covering the lives of officers, employés, or those financially interested in any trade or business conducted by an individual, partnership, or corporation shall not be deducted in computing the net income of such individual, partnership, or corporation.

WAR EXCESS PROFITS TAX.

Definitions—"Corporation" includes joint stock companies or associations and insurance companies. "Domestic" means created under the laws of the United States, or of any State, Territory or District thereof. "Foreign" means created under the laws of any other possession of the United States or of any foreign country or government. "United States" means only the States, the Territories of Alaska and Hawaii, and the District of Columbia. "Taxable year" means the twelve months ending December 31, excepting in the case of a corporation or partnership which has fixed its own fiscal year, in which case it means such fiscal year. "First taxable year" shall be the year ending December 31, 1917, except that in the case of a corporation or partnership which has fixed its own fiscal year it shall be the fiscal year ending during the calendar year 1917. "Pre-war period" means the calendar years 1911, 1912 and 1913, or if a corporation or partnership was not in existence or an individual was not engaged in a trade or business during the whole of such period then as many of such years during the whole of which the corporation or partnership was in existence or the individual was engaged in the trade or business. "Net income" in the case of a foreign corporation or partnership or a non-resident alien individual means net income received from sources within the United States.

PERSONS, CORPORATIONS, AND PARTNERSHIPS SUBJECT TO TAX.

The Tax, which is in addition to taxes under previously existing laws not hereby repealed, is assessed on the excess profits of corporations and partnerships, both domestic and foreign, and of individuals, residents or citizens of the United States, and non-resident aliens, with respect to their trades and businesses. For the purpose of this tax, a corporation or partnership is deemed to be in but one trade or business and all income is deemed to be received from such trade or business. The law applies to all trades or businesses of whatever description, including professions and occupations, whether carried on continuously or not, except:

1. In the case of officers and employés under the United States, or any State, Territory, or the District of Columbia, or any local subdivision thereof, the compensation or fees received by them as such officers or employés. 2. Income derived from the business of life, health, and accident insurance combined in one policy issued on the weekly premium payment plan.

CORPORATIONS, PARTNERSHIPS, AND INDIVIDUALS EXEMPT FROM TAX.

1. **Foreign Corporations or Partnerships or Non-Resident Alien Individuals,** the net income of whose trade or business during the taxable year from sources within the United States is less than $3,000;

2. **Corporations** exempt from the Federal Income Tax and partnerships and individuals engaged in the same business or coming within the same description.

DETERMINATION OF EXCESS PROFITS.

For the purpose of the determination of excess profits, corporations, partnerships and individuals may, for convenience, be divided into four classes:

Class 1.—Corporations or Partnerships in existence or individuals engaged in business during the whole of any one calendar year during the pre-war period shall determine their excess profits as follows:

Domestic Corporations—In the case of a domestic corporation, by deducting from net income the sum of (1) an amount equal to the same percentage of the invested capital for the taxable year which the average amount of the annual net income of the trade or business during the pre-war period was of the invested capital for the pre-war period, and (2) $3,000.

Domestic Partnerships and Citizens or Residents of the United States—In the case of a domestic partnership or a citizen or resident of the United States, by deducting from net income the same percentage of invested capital as in the case of a domestic corporation, but the specific exemption allowed shall be $6,000 instead of $3,000, as in the case of a corporation.

Foreign Corporations and Partnerships and Non-Resident Aliens—In the case of a foreign corporation or partnership or a non-resident alien individual, the tax shall be based on the income received from sources within the United States, and the deduction shall be an amount equal to the same percentage of the invested capital for the taxable year which the average net income received from sources within the United States during the pre-war period was of the average invested capital during the pre-war period. Invested

capital shall be that proportion of the entire invested capital which the net income from the trade or business within the United States bears to the entire net income.

Limitation on Deductions—The foregoing deduction shall be an amount not less than seven per centum nor more than nine per centum of the invested capital for the taxable year.

Inability to Determine Pre-War Income—If the Secretary of the Treasury is unable to determine the average net income for the pre-war period, the war profits shall be determined by the method prescribed for Class III., as below.

Class II.—Corporations or partnerships not in existence, and individuals not engaged in business, during the whole of any one calendar year during the pre-war period, shall determine their excess profits as follows:

Corporations—In the case of corporations, by deducting from net income 8 per cent of the invested capital for the taxable year, plus $3,000, in the case of a domestic corporation.

Partnerships and Individuals—In the case of a partnership or an individual, by deducting from net income, 8 per cent. of the invested capital for the taxable year, plus $6,000, in the case of a domestic partnership or resident or citizen of the United States.

Business a Continuation of Former Business—A corporation or partnership, although formerly organized on or after January 2, 1913, which is substantially a continuation of a trade or business carried on prior to that date, shall be deemed to have been in existence prior to that date and the net income and invested capital of its predecessor for the pre-war period shall be deemed to have been its net income and invested capital.

Class III.—Corporations, partnerships and individuals having no income, or having a subnormal income, during the pre-war period, shall determine their excess profits as follows:

If the Secretary of the Treasury, upon complaint, finds that during the pre-war period a domestic corporation or partnership or a resident or citizen of the United States had no income or had income which was low as compared with representative concerns engaged in a like business, by deducting from the net income for the taxable year, the sum of (1) an amount equal to the same percentage of its invested capital for the taxable year, as the average deduction (determined in the same manner as provided for in Class I. without including the exemption of $3,000 or $6,000) for the taxable year of representative concerns engaged in like business, is of their invested capital for such year, and (2), in the case of domestic corporations, $3,000 or, in the case of domestic partnerships, or citizens or residents of the United States, $6,000.

Determination by Commissioner—The percentage of the deduction to invested capital in each trade or business taxable under Class III. shall be determined by the Commissioner of Internal Revenue under regulations prescribed by him. In the case of a corporation or partnership which has fixed its own fiscal year as the taxable year, the percentage determined for the calendar year ending during such fiscal year shall be used as the basis.

Procedure for Assessment Under Class III.—The law provides that corporations, partnerships and individuals coming within the provisions of Class III., shall be assessed in the same manner as provided for corporations, partnerships or individuals under Class I. The benefit of the basis of assessment provided under Class III. may be claimed only by filing with the Collector of Internal Revenue at the time of filing return for the assessment of the tax, claim for abatement of the amount by which the tax assessed under Class I., exceeds the tax computed upon the basis of assessment provided for under Class III.

Class IV.—Corporations, partnerships, or individuals, in cases where the Secretary of Treasury cannot satisfactorily determine invested capital, shall determine their excess profits as follows:

The taxable war profits shall be determined by deducting from the net income for the taxable year the sum of (1) an amount equal to the same proportion of the net income of the trade or business received during the taxable year as the average deduction (determined in the same manner as provided in case of concerns falling under Class I., without including the $3,000 or $6,000 specific exemption) for the same calendar year of representative concerns engaged in same business, bears to the total net income of the business received by such concerns and (2) in the case of a domestic corporation, $3,000, or in the case of domestic partnership, or a citizen or resident of the United States, $6,000.

Determination by Commissioner—The proportion between the deduction of the net income in each trade or business shall be determined by the Commissioner of Internal Revenue. In case of a corporation or partnership which has fixed its own fiscal year, the proportion determined for the calendar year ending during such fiscal year, shall be used.

INVESTED CAPITAL DEFINED.

Domestic Corporations and Partnerships—In the case of a corporation or partnership, invested capital shall include: 1. Actual cash paid in. 2. Actual cash value of tangible property paid in other than cash, for stock or shares in such corporation or partnership, at the time of such payment (but in case such tangible property was paid in prior to January 1, 1914, the actual cash value of such property as of January 1, 1914, but in no case to exceed the par value of stock issued therefor), and 3. Paid in or earned surplus and undivided profits, used or employed in the business exclusive of undivided profits earned during the taxable year.

Patents and Copyrights—The actual cash value of patents and copyrights paid in for stock or shares of a corporation or partnership at the time of such payment, not to exceed the par value of such stock or shares, shall be included as invested capital.

Intangible Assets—Good will, trade marks, trade brands, franchises or other intangible property, shall be included as invested capital of a corporation or partnership, if bona fide payment therefor was made in cash or tangible property. The value included shall not exceed the actual cash or actual cash value of the tangible property paid therefor at the time of payment. Good will, trade marks, trade brands, franchises, or other intangible property, bona fide purchased prior to March 3, 1917, for and with interests or shares in a partnership, or in the capital stock of the corporation (issued prior to March 3, 1917), in an amount not to exceed on March 3, 1917, 20 per centum of the total shares of the stock of the corporation, shall be included in invested capital. Such value, however, shall not exceed the actual cash value at the time of purchase, and in the case of the issue of stock, shall not exceed the par value of such stock.

Residents or Citizens of the United States—In the case of individuals, residents or citizens of the United States, invested capital shall include: 1. Actual cash paid into the trade or business; 2. Actual cash value of tangible property paid into the trade or business, other than cash, at the time of such payment (but in case such tangible property was paid in prior to January 1, 1914, the actual cash value of such property as of January 1, 1914); and 3. The actual cash value of patents, copyrights, good will, trade marks trade brands, franchises, or other intangible property paid into the trade or business at the time of such payment, if payment was made therefor specifically as such in cash or tangible property, not to exceed the actual cash or actual cash value of the tangible property bona fide paid therefor at the time of such payment.

Foreign Corporations and Partnerships and Non-Resident Aliens—In the case of foreign corporations and partnerships and non-resident aliens, invested capital shall be that proportion of the actual invested capital, as defined above, which the net income from sources within the United States bears to the entire net income.

Monthly Average—Invested capital for any year means the average invested capital for the year, averaged monthly.

Capital Excluded—Invested capital does not include stocks, bonds (other than United States bonds),

or other obligations, the income from which is not subject to the Excess Profits Tax. Likewise it does not include money or other property borrowed.

Reorganization, Consolidation, or Change of Ownership of Business—In the case of the reorganization, consolidation or change of ownership of a business after March 3, 1917, if an interest of 50% or more remains in the control of the same persons, partnerships, or corporations, or any of them, no asset transferred or received from the prior business shall be allowed a greater value than would have been allowed such prior business, in determining invested capital, unless such asset was paid for in cash or tangible property, in which case the amount shall not exceed the actual cash or the actual cash value of the tangible property paid therefor at the time of payment.

RATES OF TAX.

The tax shall be collected on percentages of the net income as follows:

Net income (in excess of deduction) and not in excess of 15% of the invested capital for the taxable year, 20%.

Net income in excess of 15% but not in excess of 20% of invested capital, 25%.

Net income in excess of 20% but not in excess of 25% of invested capital, 35%.

Net income in excess of 25% but not in excess of 33% of invested capital, 45%.

Net income in excess of 33% of invested capital, 60%.

BUSINESS OR TRADE WITHOUT CAPITAL OR MERELY NOMINAL CAPITAL.

In addition to other taxes, a business or trade having no invested capital or merely a nominal invested capital, shall, in lieu of the excess profits tax, pay a tax of 8% on income derived from such trade or business in excess of $3,000, in the case of a domestic corporation, or of $6,000 in the case of a citizen or resident of the United States, or a domestic partnership.

NET INCOME.

Corporations—Net income of a corporation shall be determined as follows: For the years 1911 and 1912, upon the basis provided for under the Corporation Excise Tax Law, Section 38, Act of Congress, approved August 5, 1909, except that income taxes paid to the United States within such years shall be included. This makes the amounts of net income returned to the Treasury Department for the years of 1911 and 1912, for the purpose of the assessment of the Corporation Excise Tax, plus income taxes paid to the United States, the basis of the pre-war income for the years of 1911 and 1912. For the year 1913, upon the basis provided for under the Income Tax Law, Act of Congress, approved October 3, 1913 (net income as shown on the Income Tax Return filed for year 1913), except that income taxes paid to the United States shall be included and that dividends from stock of other corporations whose net earnings were subject to tax under the Act of October 3, 1913, received by the corporation, shall be deducted. For the taxable year, upon the basis provided for under the Income Tax Law of September 8, 1916, as amended, except that dividends from stock of other corporations, whose net earnings are subject to tax under the act of September 8, 1916, as amended, received by the corporation, shall be deducted.

Partnerships and Individuals—Net income of a partnership or individual for the pre-war period and taxable year, shall be determined upon the basis provided for under the Income Tax Law of September 8, 1916, as amended, except that the amount received as dividends from the stock of any domestic corporations whose net income is subject to tax under the Act of September 8, 1916, as amended, shall be deducted.

Deductions Allowed Domestic Partnerships—Domestic partnerships shall be entitled to the following deductions from gross income (allowed under Section 5, Subdivision (a) of the Act of September 8, 1916, as amended), in computing net income: 1. Necessary expenses actually paid in carrying on the business or trade. 2. Interest paid within the year on indebtedness, except on indebtedness incurred in the purchase of obligations or securities, the interest upon which is exempt from taxation as income. 3. Taxes paid within the year, other than those assessed against local benefits, and excess profits and income taxes. 4. Losses actually sustained during the year incurred in the business or trade arising from fires, storms, shipwrecks or other casualty or from theft, when not compensated for by insurance or otherwise. 5. Debts actually ascertained to be worthless and charged off within the year. 6. A reasonable allowance for exhaustion, wear and tear of property within the United States arising out of its use or employment in the business or trade: (a) in the case of oil and gas wells, a reasonable allowance for actual reduction in flow and production to be ascertained by the settled production or regular flow; (b) in the case of mines, a reasonable allowance for depletion thereof not to exceed the market value in the mine of the product thereof which has been mined and sold during the year for which the return and computation are made.

Deductions Allowed Foreign Partnerships—Foreign partnerships shall be entitled to the following deductions (allowed under Section 6, Subdivision (a) of the Act of September 8, 1916, as amended) from gross income in computing net income: 1. Necessary expenses actually paid in carrying on any business or trade conducted within the United States. 2. The proportion of all interest paid within the year on indebtedness which the gross amount of income for the year derived from sources within the United States bears to the entire net income. 3. Taxes paid within the year imposed under the authority of the United States, or its territories or possessions, or under the authority of any State or subdivision of any State, not including those assessed against local benefits or excess profits or income taxes. 4. Losses actually sustained during the year incurred in business or trade conducted within the United States, and losses of property within the United States arising from fires, storms, shipwrecks, or other casualty and from theft, when such losses are not compensated for by insurance or otherwise. 5. Debts arising in the course of business or trade conducted within the United States, actually ascertained to be worthless and charged off within the year. 6. A reasonable allowance for exhaustion, wear and tear of property within the United States arising out of its use or employment in the business or trade; (a) in the case of oil and gas wells, a reasonable allowance for actual reduction in flow and production to be ascertained by the settled production or regular flow; (b) in the case of mines, a reasonable allowance for depletion thereof not to exceed the market value in the mine of the product thereof, which has been mined and sold during the year for which the return and computation are made.

RETURNS.

Partnerships—Every foreign partnership having a net income of $3,000 or more for the taxable year, and every domestic partnership having a net income of $6,000 or more for the taxable year, must file a return of the income of the trade or business for the taxable year, setting forth specifically the gross income for the year and the deductions permitted under the law. The return shall be filed in the form prescribed by the Commissioner of Internal Revenue on or before March 1 of each year for the preceding calendar year, with the Collector of Internal Revenue for the district in which the office of the partnership or individual is located, or in which the individual resides. (Act September 8, 1916.)

Fixing Fiscal Year—A corporation or partnership may fix its own fiscal year as the taxable year. If a corporation or partnership prior to March 1, 1918, makes a return covering its own fiscal year, and includes therein the income received during that part of the fiscal year falling within the year 1916, the tax for the year 1917 shall be that proportion of the tax computed upon the excess profits during such fiscal year which the time from January 1, 1917, to the end of such fiscal year, bears to the full fiscal year.

The Excess Profits Tax Law, Title 2, Act of March 3, 1917, is repealed. Any amount which has been or hereafter may be paid on account of the tax as imposed under the excess profits tax law of March 3, 1917, shall be credited toward the payment of the tax imposed by this law, but if the amount so paid exceeds the amount due under this law, the excess shall be refunded.

REGULATIONS OF THE COMMISSIONER OF INTERNAL REVENUE.

The Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, is authorized to make all necessary regulations for carrying out provisions of this law and may require the production of facts and data necessary for the collection of the tax.

TAXES ON PUBLIC UTILITIES.

(Effective November 1, 1917.)

Express—From point in United States to another in United States, per each 20 cents paid therefor, tax, 1 cent.

Freight—From point in United States to another in United States, on amount paid therefor, tax, 3%.

Passenger Fares—From point in United States to another or to any point in Canada or Mexico, exclusive of commutation tickets or season tickets less than 30 miles, or transportation costing not to exceed 35 cents, on amount paid therefor, tax, 8%.

Pipe Line—For the transportation of oil by pipe line, on amount paid therefor, tax, 5%.

Seats, Berths or Stateroom Tickets, in Sleeping or Parlor Cars or on Vessels—On amount paid therefor, tax, 10%.

Telegraph, Telephone or Radio dispatches and messages, originating within the United States, each message or dispatch of 15 cents or more. (Only one payment required on each). On amount paid therefor, tax, 5 cents.

BEVERAGES.

(In effect October 4, 1917, unless otherwise stated.)

	Existing Tax.	War Tax.	Total Tax.
Ale, per bbl	$1.50	$1.50	$3.00
Beer, per bbl	1.50	1.50	3.00
Carbonic acid gas, in drums or other containers intended for use in manufacture of carbonated water and soft drinks, per lb	.....	.05	.....
Cordials and Liqueurs, per each one-half pint	.01½	.01½	.03
Cordials and Liqueurs in excess of 25 gallons, upon which existing tax has been paid, held for sale on October 3, 1917; per each one-half pint	.....	.01½	.....
Distilled Spirits—In bond, produced, or imported per proof gal., or per wine gal. when below proof, (fractional parts proportionately);			
For other than beverage purposes	1.10	1.10	2.20
For beverage purposes	1.10	2.10	3.20
Spirits in excess of 50 gals. held for sale by retailers, on October 3, 1917, upon which existing tax has been paid, per gal. (fractional parts proportionately);

For beverage purposes	.....	2.10	.....
Spirits held for sale on October 3, 1917, by others than retailers (except in custody of court of bankruptcy)—per gal. (fractional parts proportionately);			
For other than beverage purposes	.....	1.10	.....
For beverage purposes	.....	2.10	.....
Fermented Liquors—Beer, lager beer, ale, porter, and similar fermented liquors (containing ½ per cent. or more alcohol), per bbl. containing not in excess of 31 gallons and at a like rate for any other quantity or fractional parts	1.50	1.50	3.00
Grape Brandy, or Wine Spirits—Withdrawn for the fortification of sweet wine, per proof gal. (fractional parts proportionately)	.10	.20	.30
Used in the fortification of sweet wines held for sale October 3, 1917, per proof gallon (fractional parts proportionately)	.....	.10	.....
Withdrawn for the purpose of fortifying sweet wines, but not used prior to October 3, 1917, per proof gallon (fractional parts proportionately)	.....	.20	.....
Perfumes, containing distilled spirits, imported into U. S., per wine gal. (fractional parts proportionately)	.....	1.10	.....
Rectified Spirits (in possession of rectifier on October 3, 1917, or thereafter rectified) per proof gal. (fractional parts proportionately)	.....	.15	.....
Syrups and Extracts, for use in manufacture of soft drinks.			
If sold for not more than $1.30 per gal	.....	.05	.....
If sold for more than $1.30 per gal. and not for more than $2.00 per gal	.....	.08	.....
If more than $2.00 per gal. and not more than $3.00 per gal	.....	.10	.....
If more than $3.00 per gal. and not more than $4.00 per gal	.....	.15	.....
If more than $4.00 per gal	.....	.20	.....
Unfermented Grape Juice, soft drinks, artificial mineral waters (not carbonated), and fermented liquors containing less than ½ per centum of alcohol, sold by the manufacturer, producer or importer in bottles or closed containers, and ginger ale, root beer, sarsaparilla, pop or other carbonated waters or beverages, manufactured or sold by the manufacturer, producer or importer of carbonic acid gas used in carbonating same, per gal	.....	.01	.....
Waters—Natural, mineral or table waters, sold in bottles or other closed containers at over 10c. per gal.; artificial mineral water (not carbonated) or carbonated waters, per gal	.....	.01	.....
Wines—Still wines (including vermuth, artificial or imitation wines or compounds sold as still wine), in bond, produced, or imported, per wine gallon (fractional parts proportionately);			
Containing not more than 14 per cent. alcohol	.04	.04	.08
Containing more than 14 per cent. alcohol and not more than 21 per cent. alcohol	.10	.10	.20
Containing more than 21 per cent. and not more than 24 per cent. alcohol	.25	.25	.50
Still wines in excess of 25 gals. held for sale on October 3, 1917, upon which existing tax has been paid, per wine gallon (fractional parts proportionately);			
Containing not more than 14 per cent. alcohol	.....	.04	.....
Containing more than 14 per cent. alcohol and not more than 21 per cent. alcohol	.....	.10	.....
Containing more than 21 per cent. and not more than 24 per cent. alcohol	.....	.25	.....
Champagne and sparkling wines, in bond, produced or imported, per ½ pt. or fraction thereof	.03	.03	.06
Champagne and sparkling wines in excess of 25 gals. held for sale on October 3, 1917, upon which existing tax has been paid, per ½ pt. or fraction thereof	.....	.03	.....
Artificially carbonated wines in bond, produced or imported, per ½ pt. or fraction thereof	.01½	.01½	.03
Artificially carbonated wines in excess of 25 gals. held for sale on October 3, 1917, upon which existing tax has been paid, per ½ pt. or fraction thereof	.....	.01½	.....

CIGARS, CIGARETTES AND TOBACCO.

	Existing Tax.	War Tax	Total Tax.
Cigars—Manufactured, sold or removed for consumption. (Effective 30 days after passage of this act.)			
Weighing not more than 3 lbs. per 1,000; per 1,000	.75	.25	1.00
Weighing more than 3 lbs. per 1,000; retailing at 4c. each or more but not more than 7c. each, per 1,000	3.00	1.00	4.00
Retailing at more than 7c. each but not more than 15c. each per 1,000	3.00	3.00	6.00
Retailing at more than 15c. each but not more than 20c. each per 1,000	3.00	5.00	8.00
Retailing at more than 20c. each	3.00	7.00	10.00
Amount in excess of 1,000 held for sale on the day after the passage of this act, or removed from factory or custom house after the passage of this act but prior to the effective date, upon which the existing tax has been paid.			
Weighing not more than 3 lbs. per 1,000; per 1,000		.12½	
Weighing more than 3 lbs. per 1,000; retailing at 4c. or more but not more than 7c. each, per 1,000		.50	
Retailing at more than 7c. each, but not more than 15c. each, per 1,000		1.50	
Retailing at more than 15c. each, but not more than 20c. each, per 1,000		2.50	
Retailing at more than 20c. each		3.50	
Cigarette Papers and Tubes—Papers in packages, books or sets containing:			
Over 25 papers but not over 50 papers			.005
Over 50 papers but not over 100 papers			.01
More than 100 papers, for each 100 papers or fractional part thereof			.01
Tubes—per 100 or fraction thereof			.02
Cigarettes—Manufactured in or imported into the United States. (Effective 30 days after passage of this act.) Weighing not more than 3 lbs. per 1,000; per 1,000	1.25	.80	2.05
Weighing more than 3 lbs. per 1,000; per 1,000	3.60	1.20	4.80
Amount in excess of 1,000 held for sale on the day after the passage of this act, or removed from factory or custom house after the passage of this act but prior to the effective date, upon which the existing tax has been paid:			
Weighing not more than 3 lbs. per 1,000; per 1,000		.40	
Weighing more than 3 lbs. per 1,000; per 1,000		.60	
Tobacco and Snuff—Manufactured, sold or removed for consumption. (Effective 30 days after passage of this act.) Per lb.	.08	.05	.13
Amount in excess of 100 lbs. held for sale on the day after the passage of this act, or removed from factory or custom house after the passage of this act but prior to the effective date, upon which the existing tax has been paid, per 1,000		.02½	

STAMP TAXES.

(Under Schedule A.)

Bonds, Debentures, or Certificates of Indebtedness, issued on or after December 1, 1917, on each $100 or fraction of amount of bond, 5c.

Renewals are taxed as new issues. When bond is conditioned for payment of money in a penal sum greater than the debt secured, the tax shall be on the amount secured.

Bonds, indemnity and surety (except in legal proceedings and reinsurance), each, 50 cents. Where premium is charged per $1 premium or fraction, 1 cent.

Capital stock issue, with par value, each $100 face value or fraction, 5 cents. Without par value, actual value $100 or less, each share, 5 cents. Without par value, actual value over $100, each $100 or fraction, 5 cents.

Capital stock, sales or transfers type, with par value, each $100 face value or fraction, 2 cents. Without par value, actual value $100 or less, each share, 2 cents. Without par value, actual value in excess of $100 per share, each $100 or fraction, 2 cents.

Conveyances of real estate, by deed, instrument, or writing, (not to secure debt,) on consideration less encumbrances assumed by purchaser: Exceeding $100, not in excess of $500, 50 cents. Each additional $500 or fraction thereof, 50 cents.

Drafts or checks not payable at sight or on demand, per each $100 or fraction thereof, 2 cents.

Entry of merchandise at Custom House—on value of merchandise: Not exceeding $100, 25 cents. Exceeding $100 and not exceeding $500, 50 cents. Exceeding $500, $1.

Entry, for withdrawal of merchandise from customs bonded warehouse, 50 cents.

Parcel-post packages—for each 25 cents or fraction for transportation charged on packages upon which the charge is 25 cents or more, to be paid by consignor. (No package shall be transported unless stamps are attached), 1 cent.

Passage ticket, one way or round trip transportation by vessels from United States to destination not in the United States, Canada or Mexico: Not exceeding $30, $1. Exceeding $30 and not exceeding $60, $3. Exceeding $60, $5. (Tickets not in excess of $10—exempt.)

Playing cards, pack containing not over 54 cards, in addition to existing tax (effective October 3, 1917), 5 cents.

Power of attorney, except for use in government pensions, or in bankruptcy cases, 25 cents.

Promissory notes (except bank notes issued for circulation), and each renewal of the same, per each $100 or fraction thereof, 2 cents.

Produce, sales of, on exchange on each $100 in value or fraction thereof, 2 cents.

Proxies, except for use in religious, educational, charitable, fraternal or literary societies or public cemeteries, 10 cents.

ESTATES.

The amendment to the Federal estates tax law materially increases the rates of tax. All other provisions of the law of September 8, 1916, as amended by the act of March 3, 1917, remain in full force and effect, unchanged. The following schedule shows the rates effective on estates of decedents dying on and after October 3, 1917.

Net Estate After Specific Exemption of $25,000.	Existing Tax.	Additional Tax.	Total Tax.	Am'nt of Tax.	Net Estate After Specific Exemption of $25,000.	Existing Tax.	Additional Tax.	Total Tax.	Am'nt of Tax.
Next $50,000	1½%	½%	2%	$1,000	Next $1,000,000	10½%	3½%	14%	$140,000
" 100,000	3%	1%	4%	4,000	" 1,000,000	12%	4%	16%	160,000
" 100,000	4½%	1½%	6%	6,000	" 1,000,000	13½%	4½%	18%	180,000
" 200,000	6%	2%	8%	16,000	" 3,000,000	15%	5%	20%	600,000
" 350,000	7½%	2½%	10%	35,000	" 2,000,000	15%	7%	22%	440,000
" 1,000,000	9%	3%	12%	120,000	In excess of $10,000,000	15%	10%	25%	

The additional tax imposed shall not apply to the transfer of the estate of a decedent, dying while serving in the war.

MANUFACTURES.

Taxes on following articles are to be paid by users: Motor boats not over 5 net tons, with fixed engines, per year, $5. Yachts, pleasure boats, power boats, motor boats with fixed engines, and sailing boats, of over 5 net tons, not used exclusively for trade or National defense nor built according to plans approved by the Navy Department: Length not over 50 feet, per foot, per year, 50 cents. Length over 50 feet, not over 100 feet, per foot, per year, $1. Length over 100 feet, per foot, per year, $2.

Taxes on following articles are to be paid by the manufacturer, producer, or importer: Automobiles, automobile trucks, automobile wagons, and motorcycles, on selling price, 3 per cent. Cameras, on selling price, 3 per cent. Chewing gum, or substitute therefor, on selling price, 2 per cent. Films, moving picture, unexposed, per linear foot, 25-1000 of a cent. Films, moving picture, positive, containing picture ready for projection, per linear foot, 5-100 of a cent. Jewelry, real or imitation, on selling price, 3 per cent. Patent medicines pills, tablets, powders, tinctures, troches, or lozenges, syrups, medicinal cordials or bitters, anodynes, tonics, plasters, liniments, salves, ointments, pastes, drops, waters (not otherwise taxed), essences, spirits, oils and all medicinal preparations, compounds, or compositions and other patent or proprietary medicines or remedies, on selling price, 2 per cent. Piano players, graphophones, phonographs and talking machines; records, for player pianos, graphophones, phonographs, talking machines or musical instruments; sporting goods and games, tennis racquets, golf balls, baseball bats, lacrosse sticks, balls of all kinds, including baseballs, footballs, tennis, golf, lacrosse, billiard, and pool balls, fishing rods, reels and lines, billiard and pool tables, chess and checker boards and pieces, dice, games and parts of games except playing cards and children's toys and games, on selling price, 3 per cent Toilet articles, perfumes, cosmetics, essences, toilet waters, extracts, vaselines, petroleums, hair oils, pomades, tooth and mouth washes, dentifrices, aromatic cachous, tooth pastes, hair restorers, dyes and dressings, toilet soaps and powders and similar substances used for toilet purposes, on selling price, 2 per cent.

INSURANCE.

(Effective November 1, 1917.)

Life insurance (except policies for reinsurance, and except industrial policies of $500 or less on weekly payment plan, upon which tax shall be 40 per cent. of first premium), per $100 or fraction thereof of policy, 8 cents.

Marine, inland or fire insurance (except policies for reinsurance), per $1 or fraction thereof of premium, and casualty insurance (except life, marine and fire, and except policies for reinsurance), per $1 or fraction thereof of premium, 1 cent.

(All policies of insurance issued by a person, corporation or organization, exempt from Federal Income Tax, shall be exempt from taxes imposed by this law. Persons receiving pay for issuing insurance policies shall make return during the first 15 days of each month and pay tax to Collector of Internal Revenue.)

ADMISSIONS TO PLACES OF AMUSEMENTS.

Admissions (effective November 1, 1917). Persons over 12 years paying admission, except where maximum charge is 5 cents, per each 10 cents or fraction; persons admitted free, except employés, children under twelve years, and officers on official business, per each 10 cents charged for similar admissions; children under 12 years, where admission is charged—per admission, 1 cent. Cabarets or similar entertainments to which the charge for admission is wholly or in part included in the price paid for refreshment, service or merchandise, the amount to be computed by rules established by the Commissioner of Internal Revenue, per each 10 cents thereof, 1 cent.

Boxes or seats, for permanent use, on the amount for which a similar box or seat is sold for performance at which the box or seat is used or reserved, 10 per cent.

DUES.

Dues, or membership fees, in social, sporting, or athletic clubs which are in excess of $12.00 per year (including initiation fees), to be paid by members. (Effective November 1, 1917), 10 per cent.

MUNITIONS TAX.

Reduction of rate: The munitions tax for the year of 1917 is reduced from 12½ per centum to 10 per centum. The munitions tax law shall cease to be of effect on and after January 1, 1918.

ADMINISTRATIVE AND GENERAL PROVISIONS.

West Indian Islands—Articles coming into United States from West Indian Islands, acquired from Denmark, shall be subject to tax imposed on like articles by Internal Revenue Laws of United States, and exempt from tax under Internal Revenue Laws of Islands. Articles shipped from United States to West Indian Islands, acquired from Denmark, shall be subject to tax imposed on like articles by Internal Revenue Laws of Islands and exempt from tax under Internal Revenue Laws of United States.

Penalty for failure to make returns; false or fraudulent return; evasion or attempt to evade tax; failure to collect, account for or pay over tax, is fine not to exceed $1,000 or imprisonment not to exceed one year, or both, and, in addition thereto, a penalty of double the tax evaded.

Tax on contracts before May 9, 1917—If a bona-fide contract is made with a dealer prior to May 9, 1917, for the sale of beverages, cigars, cigarettes, tobacco, coffee, tea, sugar, chocolate, cocoa, saccharine, molasses, syrup, automobiles, cameras, boats, yachts, sporting goods, toilet articles, patent medicines and playing cards (or in the case of moving picture films, such a contract with a dealer for the sale or lease thereof), after the tax thereon takes effect, and if such contract does not permit the adding of the whole tax to the amount to be paid under the contract, the vendee, in lieu of the vendor, shall pay so much of the tax as is not permitted to be added to the contract price. Such taxes shall be paid to the vendor by the vendee, at the time the sale is consummated, and returned and paid to the United States by the vendor. The term "dealer" includes a vendee who purchases with intent to use the article in the manufacture or production of another article intended for sale.

Payment in advance—Income and excess profits taxes may be paid in advance either in instalments or in full.

THE AMERICAN NURSES' ASSOCIATION.

The principal activities of the association during 1917 were: An effort to secure a national charter; incorporation under the laws of the District of Columbia; promotion of interest in health insurance; endorsement of the President's attitude in regard to war; a request for rank for army nurses; efforts to secure the enrolment of all eligible nurses in the Red Cross Nursing Service; making of a survey of the nursing resources of each State, in order to meet war conditions

Officers: *President*—Annie W. Goodrich, R. N., Teachers' College, New York. *Secretary*—Katharine De Witt. R N., 45 South Union Street, Rochester, N. Y *Treasurer*—Mrs. C. V. Twiss, R. N., 419 West One Hundred and Forty-fourth Street, New York.

AMERICAN BAR ASSOCIATION.

Each State and Territory is represented by one Vice-President and one member of the General Council. Membership about 12,500. This association of lawyers of the United States was organized in 1878. Officers: *President*—Walter George Smith, Philadelphia, Pa. *Secretary*—George Whitelock, 1416 Munsey Building, Baltimore, Md. *Treasurer*—Frederick E. Wadhams, 78 Chapel Street, Albany, N Y. *Assistant Secretaries*—W. Thomas Kemp, Gaylord Lee Clark, 1416 Munsey Building, Baltimore, Md.

ESTIMATE OF RETURNS UNDER WAR REVENUE LAW.

THIS estimate has been made by the Treasury Department and is intended to cover the first year's operations under the new statute.

REVISED FIGURES.

Income tax	$851,000,000	Insurance policies	$5,000,000
Excess profits	1,000,000,000	Automobiles	40,000,000
Distilled spirits	135,000,000	Musical instruments	3,000,000
Rectified spirits	5,000,000	Moving-picture films	3,000,000
Fermented liquors	46,000,000	Jewelry	4,500,000
Wines	7,000,000	Sporting goods	1,200,000
Soft drinks, syrups, etc	13,000,000	Pleasure boats	500,000
Cigars	10,000,000	Perfumes and cosmetics	1,900,000
Cigarettes	21,500,000	Patent medicines	3,400,000
Tobacco	28,000,000	Chewing gum	400,000
Snuff	1,800,000	Cameras	750,000
Cigarette papers	100,000	Admissions	50,000,000
Freight transportation	77,500,000	Club dues	1,500,000
Express transportation	10,000,000	War-stamp taxes	29,000,000
Passenger transportation	60,000,000	Inheritances	5,000,000
Pipe lines	4,500,000	Virgin Island products	20,000
Seats and berths	4,000,000	First-class mail	70,000,000
Telegraph and telephone messages	7,000,000	Second-class mail	6,000,000

The new second-class mail rates do not begin until 1918.

STANDARD OIL WAR TAXES.

The Wall Street Journal estimates the War Revenue Tax on three of the largest companies in the Standard Oil group as follows: The three companies selected are Atlantic Refining Company, an eastern refining and marketing concern; Standard Oil of Indiana, which is engaged in the same branches of the oil business in the middle west, and Prairie Oil and Gas, a producing company. Following table shows the rate of earnings in 1916 on capital, plus surplus, as of December 31, 1915, for the companies in question, together with the amount of their capital and surplus as of December 31, 1916, and the estimated earnings for 1917 based on the assumption that the rate of earnings on their present capital investment is approximately the same this year as last:

	Per Cent. Earned 1916.	Capital and Surplus Dec. 31, 1916.	Net Earnings 1917.
Atlantic Refining Company	31.7	$38,976,190	$12,355,000
Standard of Indiana	52.8	83,236,660	43,948,000
Prairie Oil and Gas	27.9	65,197,160	18,190,000

It is not necessary to make pre-war comparisons, as all pre-war earnings were larger than the 9% exemption.

ATLANTIC REFINING—Disregarding the $3,000 exemption, the amount of tax would work out approximately as follows in the case of the Atlantic Refining Company, using round numbers, based on the amount of net capital employed, according to the balance sheet of December 31, 1916, and assuming the same rate of earnings as last year on capital investment. Estimated earnings at 32% on $39,000,000 capital would be $12,480,000. The first tax rate is 20% on the first 15% of earnings, less the exemption of 9%. Therefore:

	Amount Taxable.	Tax.		Amount Taxable.	Tax.
15% of 1917 capital ($39,000,000)	$5,850,000		35% on amt. bet. 20% and 25%	$1,950,000	$682,500
Less exemption of 9%	3,510,000		45% on amt. bet. 25% and 32%	2,730,000	1,228,500
20% on remainder, or	$2,340,000	$468,000	Excess subject to war tax	$8,970,000	$2,366,500
25% on amt. bet. 15% and 20%	1,950,000	487,500			

Percentage of tax on net earnings of $12,480,000 equals 22.9%.

STANDARD OIL OF INDIANA—For Standard of Indiana the result would be approximately as follows: Estimated earnings at 53% on $83,000,000 capital would be $43,990,000.

	Amount Taxable.	Tax.		Amount Taxable.	Tax.
15% of 1917 capital ($83,000,000)	$12,450,000		35% on amt. bet. 20% and 25%	$4,150,000	$1,452,500
Less exemption of 9%	7,470,000		45% on amt. bet. 25% and 33%	6,640,000	2,988,000
20% on remainder, or	$4,980,000	$996,000	60% on amt. bet. 33% and 53%	16,600,000	9,960,000
25% on amt. bet. 15% and 20%	4,150,000	1,037,500	Excess subject to war tax	$36,520,000	$16,434,000

Percentage of tax on net earnings of $43,990,000 equals 37.7%.

PRAIRIE OIL AND GAS—For Prairie Oil and Gas the result would be approximately as follows: Estimated earnings at 28% on $65,000,000 capital would be $18,200,000.

	Amount Taxable.	Tax.		Amount Taxable.	Tax.
15% of 1917 capital ($65,000,000)	$9,750,000		35% on amt. bet. 20% and 25%	$3,250,000	$1,137,500
Less exemption of 9%	3,850,000		45% on amt. bet. 25% and 28%	1,950,000	877,500
20% on remainder, or	$3,900,000	$780,000	Excess subject to war tax	$12,350,000	$3,607,500
25% on amt. bet. 15% and 20%	3,250,000	812,500			

Percentage of tax on net earnings of $18,200,000 equals 19.8%.

UNITED STATES INTERNAL REVENUE RECEIPTS.

SUMMARY OF INTERNAL REVENUE RECEIPTS FROM 1908 TO 1917, INCLUSIVE.

Fiscal Years.	Spirits.	Tobacco.	Fermented Liquors.	Income Tax.	Fiscal Years.	Spirits.	Tobacco.	Fermented Liquors.	Income Tax.
1908	$140,158,807	$49,862,754	$59,807,617		1913	$163,879,342	$76,789,424	$66,266,989	
1909	134,868,034	51,887,178	57,456,411		1914	159,098,177	79,986,639	67,081,512	$71,381,274
1910	148,029,311	58,118,457	60,572,288		1915	144,619,699	79,957,373	79,328,946	80,190,694
1911	155,279,858	67,005,950	64,367,777		1916	158,682,429	88,063,947	88,771,103	424,937,932
1912	156,391,487	70,590,151	63,268,770		1917	188,563,054	102,230,205	61,532,025	*359,681,227

Miscellaneous receipts of 1917, including those derived from oleomargarine, opium manufacturers, etc., playing cards, accepted offers in compromise, etc., $4,089,573. *Income tax from corporations, $179,539,631; from individuals, $180,108,340; from Alaska railroads, $33,256.

INCOME TAX.

The receipts of income tax from individuals for calendar year 1916 as classified to conform to the act of September 8, 1916, were as follows:

Income tax, normal	$55,742,230.89
Surtax:	
Net incomes exceeding $20,000 and not more than $40,000	6,969,051.71
$40,001 to $60,000	6,493,954.37
$60,001 to $80,000	6,071,465.16
$80,001 to $100,000	5,730,101.63
$100,001 to $150,000	11,099,321.57
$150,001 to $200,000	8,189,595.69
$200,001 to $250,000	6,241,807.10
$250,001 to $300,000	$5,196,876.83
$300,001 to $500,000	12,969,686.27
$500,001 to $1,000,000	14,501,213.51
$1,000,001 to $1,500,000	7,531,893.76
$1,500,001 to $2,000,000	4,888,040.10
Net incomes exceeding $2,000,000	16,145,856.30
Offers in compromise, etc	15,994.50
Total	$167,787,089.39

WITHDRAWALS FOR CONSUMPTION.

The quantities of distilled spirits, fermented liquors, manufactured tobacco, snuff, cigars, cigarettes, oleomargarine, etc., on which tax was paid are as follows:

Articles Taxed.	Fiscal Year Ended June 30. 1916.	1917.
Spirits distilled from apples, peaches, grapes, pears, pineapples, oranges, apricots, berries, prunes, figs, and cherries ... gals.	2,984,743	3,668,669
Spirits distilled from materials other than apples, peaches, grapes, pears, pineapples, oranges, apricots, berries, prunes, figs, and cherries ... gals.	133,241,785	160,996,577
Fermented liquors ... bbls.	58,564,508	60,729,509
Cigars, weighing more than 3 pounds per thousand ... number	7,390,183,170	8,266,776,593
Cigars, weighing not more than 3 pounds per thousand ... number	947,537,360	950,130,520
Cigarettes, weighing more than 3 pounds per thousand ... number	21,560,406	27,458,394
Cigarettes, weighing not more than 3 pounds per thousand ... number	21,066,196,672	30,501,735,144
Snuff ... lbs.	33,170,680	35,377,751
Tobacco, chewing and smoking ... lbs.	417,235,928	445,763,206
Oleomargarine ... lbs.	150,523,725	†232,643,176
Adulterated butter ... lbs.	192,222	147,552
Process or renovated butter ... lbs.	35,021,016	27,958,440

† Includes 4,577,168 pounds of the colored product, at 10 cents, and 228,066,008 pounds of the uncolored product, at one-fourth of 1 cent per pound. It does not, however, include certain oleomargarine withdrawn during various periods prior to July 1, 1914, taxpaid at one-fourth cent, and subsequently found on the market artificially colored, upon which the difference of 9¾ cents per pound has been assessed and the amounts thereof collected during the fiscal year.

NOTE—The foregoing table of "Withdrawals for Consumption" includes on account of Porto Rican products as follows: 111,722 gallons spirits distilled from materials other than fruit; 208,509,820 cigars, at $3 per thousand; 1,000,000 cigars, at 75 cents per thousand; 980,500 cigarettes, at $3.60 per thousand, and 6,811,920 cigarettes, at $1.25 per thousand; and on account of Philippine products, as follows: 166,547,493 cigars, at $3 per thousand; 10,155 cigarettes, at $3.60 per thousand; 6,271,264 cigarettes, at $1.25 per thousand, and 188 pounds manufactured tobacco, at 8 cents per pound.

The quantity of wine, liqueurs, cordials, etc., upon which tax was paid cannot be stated, for the reason that the rates of tax imposed by the acts of October 22, 1914, and September 8, 1916, varies according to kind of product and size of container; and, furthermore, as the stamps provided for same are interchangeable, the quantity is not indicated by the amount of the tax payment.

The quantity of mixed flour withdrawn cannot be stated in the foregoing table, owing to the variable number of pounds taxed.

There was no legitimate manufacture of smoking opium, but assessments made thereon under the act of January 17, 1914, amounting to $254.50, were collected during the year as compared with the collection of $175 during the preceding fiscal year.

WITHDRAWALS TAX PAID FOR CONSUMPTION OF SPIRITUOUS AND MALT LIQUORS AND MANUFACTURED TOBACCO PRODUCTS DURING THE LAST FIVE FISCAL YEARS.

Fiscal Year.	Distilled Spirits.	Fermented Liquors.	Cigars.	Cigarettes.	Tobacco, Chewing and Smoking.	Snuff.

* Includes $304.95 from sale of stamps affixed to Philippine products reported by the collector of the first district of California and $1.26 from similar sales reported by the collector of the sixth district of California. † Includes $33,256.83 income tax on Alaska railroads.

NOTE.—Alabama and Mississippi comprise the district of Alabama; Colorado and Wyoming, the district of Colorado; Connecticut and Rhode Island, the district of Connecticut; Maryland, Delaware, District of Columbia, and the counties of Accomac and Northampton, Va., the district of Maryland; Montana, Idaho, and Utah, the district of Montana; New Hampshire, Maine, and Vermont, the district of New Hampshire; New Mexico and Arizona, the district of New Mexico; North Dakota and South Dakota, the district of North and South Dakota; Washington and Alaska, the district of Washington; and Nevada forms a part of the first district of California.

The collections credited to Porto Rico were returned from the following districts, viz:

First district of New York	$122,893.87
Second district of New York	638,324.16
Total	$761,218.03

INTERNAL REVENUE RECEIPTS DURING THE LAST THREE FISCAL YEARS.

Comparison of internal revenue receipts from general sources for the fiscal years ended June 30, 1915, 1916, and 1917.

Receipts.	1915.	1916.	1917.
Ordinary only	$283,410,138.71	$303,507,733.03	$354,414,853.60
Emergency and other revenue	52,069,126.29	84,278,302.13	95,297,553.88
Corporation income	39,155,596.77	56,993,657.98	179,572,887.86
Individual income	41,046,162.09	67,943,594.63	180,108,340.10
Total	$415,681,023.86	$512,723,287.77	$809,393,640.44

UNITED STATES INTERNAL REVENUE RECEIPTS—*Continued.*

COST OF COLLECTION.

The cost of collecting the internal revenue for the fiscal year 1917 was approximately $9.53 per thousand dollars, or .95 per cent., which is the lowest annual cost of the bureau. The cost of collection the previous year, in which the largest sum was collected prior to the fiscal year 1917, was $14.04 per thousand dollars, or 1.40 per cent. The average cost of collection since the establishment of the bureau is $23.21 per thousand dollars, or 2.32 per cent.

EMERGENCY AND OTHER REVENUE EXCLUSIVE OF THE ORDINARY AND INCOME TAX.

The act of March 3, 1917, was to provide additional revenue to defray the expenses of increased appropriations for the Army and Navy and for other purposes. The revenue collected under this act and the prior act of September 8, 1916, and also the act of October 22, 1914, as extended by the joint resolution approved December 17, 1915, amounted to $95,297,553.88, which is included in the total of ordinary receipts, the sources from which and amounts realized being as follows:

Wines, champagne, liqueurs, cordials, etc.	$5,164,075.03
Grape brandy used in fortification of sweet wines	384,188.89
Fermented Liquors (additional 50 cents per barrel)	30,365,168.73
Special taxes relating to manufacture and sale of tobacco, cigars, and cigarettes	971,386.80
Special taxes, including corporations, bankers, brokers, theatres, bowling alleys, etc.	15,708,732.87
Schedule A (documentary stamps, etc.)	8,254,341.88
Schedule B (perfumery, cosmetics, etc.)	671,968.42
Excess profits tax	37,176.37
Estate tax	6,076,575.26
Munition manufacturers' tax	27,663,939.63
Total	$95,297,553.88

LIQUORS IN UNITED STATES SUBJECT TO WAR TAX.

THE amount of distilled spirits reported in industry and general bonded warehouses on August 31 1917, was 180,110,034 gallons.

The importation of distilled liquors for fiscal year ending June 30, 1917, amounted to 3,115,483 gallons. Of this amount there remained in warehouses on August 31, 1917, 1,014,102 gallons.

The production of beer for the fiscal year ending June 30, 1917, was 60,729,509 barrels.

The production of distilled liquors for the fiscal year ending June 30, 1917, was 164,665,246 gallons.

The 1914 Census report does not give the quantity of vinous liquors produced in that year, but gives the value of the products as $16,618,000. It states further that this report includes the manufacture of all kinds of wine, including champagne, port, sherry, claret, dry wine, white and red wines, sweet and sour wines, angelica, sparkling wines, etc. It is confined to a few States, California alone furnishing 68 per cent. of the total value of the products in the United States for the year 1914. Of the 318 wineries reporting in 1914, 84 reported a by-product of distilled liquor (chiefly brandy), of which the total value was $1,223,-906. In addition to the products covered by the above, wine to the value of $67,756, was reported by establishments assigned to other industries, principally distilled liquor.

PRODUCTION 1916-1917.

For the fiscal year ending June 30, 1917, the Internal Revenue reports show that 60,729,509 barrels of beer and 164,665,246 gallons of whiskey were produced in the United States. On August 31, 1917, there were somewhat more than 200,000,000 gallons of spirituous liquors in bond. On September 10, 1917, it is estimated that there were about 200,000,000 gallons of spirituous liquors in bond and about 80,000,000 gallons free, which make a total of at least 280,000,000 gallons. It is estimated that the production of beer for 1917 is 50,000,000 barrels. The estimated production of wine for 1917 is 50,000,000 gallons.

Very few of the whiskey distilleries, it is said, will be converted into plants for production of munition alcohol. This substance is of very high proof, generally running from 180 to 190 proof, which means that it is practically pure spirits, or ethyl alcohol. Whiskey at 100 proof consists of about 50 per cent. water and 49¼ per cent. ethyl alcohol and ¾ of 1 per cent. of by-products. In the munition alcohol the water and by-products are almost entirely eliminated. A few of the large plants will have advantage in producing munition alcohol, because of their control of dark molasses, which is imported from Cuba. This is more readily manufactured into alcohol of high proof, one gallon of molasses giving approximately ¾ of a gallon of alcohol. The quantity of alcohol depends upon how much of the saccharine content is eliminated in the process of distillation. There were 650 distilleries in the United States before Congress shut down on the production of liquor.

Secretary of the Treasury McAdoo announced, in November, the appointment of an Excess Profits Advisory Board, to assist the Government in administering the War Revenue Act. The following were named for the board: Representative Cordell Hull, a member of the House Committee on Way and Means; T. S. Adams, economist, of Yale University; Wallace D. Simmons, President Simmons Hardware Co., St. Louis and Philadelphia; J. E. Sterrett, of Price, Waterhouse & Co., accountants, New York City; S. R. Bertron, of Bertron, Griscom & Co., bankers, New York City; E. T. Meredith, editor, Successful Farming, Des Moines, Iowa; T. W. McCullough, editor, Omaha Bee, Omaha, Neb.; Stewart W. Cramer, of the National Council of Cotton Manufacturers, Charlotte, N. C.; Henry Walters, chairman of the board, Atlantic Coast Line and Louisville & Nashville Railways.

WINE PRODUCTION OF THE WORLD.

The following table shows estimates of wine production in gallons by the principal wine-producing countries according to the French publication *Moniteur Dinicole*, and is for the year 1916.

NEW YORK WAR SURTAX LIQUOR AND LOCAL OPTION LAWS, 1917.

(Summarized by Rollin O. Everhart.)

REGULATIONS OF SALOONS NEAR CANTONMENTS.

CHAPTER 521, signed by the Governor, and in effect May 16—Empowers the Excise Commissioner, with the approval of the Governor, on application of the Mayor of a city or the Town Board of a town, to suspend, during the present war, liquor tax certificates and prohibit or limit sales as he may deem proper in proximity to troop camps or barracks, munition factories or places producing munition material.

INCREASING THE EXCISE RATES.

Chapter 623, signed by the Governor, and in effect May 22—Specifies new rates for all forms of liquor tax certificates, graduating the prices according to the population of the political units in which they permit sales. Bar certificates to cost $1,500 in cities or boroughs of over 500,000; $1,200 in cities or boroughs of over 50,000 to 500,000; $1,000 in cities and villages of over 7,500 to 50,000; $800 in cities and villages of over 2,500 to 7,500; $700 in villages of over 1,000 to 2,500; provided no village certificate to cost less than one for rural part of the town in which it is, such rural bar permits to cost $900 in rural population of over 7,500; $800 in rural population of over 4,000 to 7,500; $600 in rural population of over 2,000 to 4,000; $350 elsewhere.

For trafficking in liquors in amounts less than five wine gallons and not to be drunk on the premises similar regrading of tax certificate costs; druggists' licenses raised to $10; steamboats and railroad cars to $375, and such certificates exempted from local option prohibitions; vehicle tax for sales of less than five wine gallons but not less than twenty-four pint bottles raised to $190 per vehicle; regrading costs of certificates to deal in alcohol only for medicinal, mechanical and scientific purposes; raising fruit growers' wholesale license to $100; provides increased costs of bar certificates in the boroughs of Queens and Richmond and part of Bronx Borough, and annually increasing costs till specified limits are reached; specifies annually increasing bottle house certificate costs for same boroughs and part of borough.

Where, in cities under 500,000 population and over 55,000, applicants for bar permits exceed one to 500 of population, additional tax of $100 to be assessed yearly till costs reach specified limits; and like annual increases for bottle house permits where ratio exceeds one to 5,000 people.

Provides for reduction of bar permits, except at summer hotels, in all places under 55,000 population to one for each 500 people on October 1, 1917, and specifies procedure for determination of places to be allowed to continue; no new bar licenses to be granted till license ratio exceeds one to 750 people, and no new bottle house licenses till ratio exceeds one to 7,500 people.

New certificates permitted under the law must be sold to highest bidders, subject to bids equalling prescribed rate.

Limits issuance of hotel certificates, in cities voting out other forms of bar sale, to places already holding hotel certificates, except to hotels of 150 rooms in a city or borough of 1,000,000, of 100 rooms in a city or borough of over 400,000 to 1,000,000, of 50 rooms in any other borough or city of the first or second class, of 20 rooms in a city of the third class; no new hotel certificates to be granted anywhere till traffic ratio exceeds one to 750 people.

Makes taxes payable September 15 for year beginning October 1.

Provides surtax of 2 per cent. on a place's gross business in excess of ten, but less than fifteen times the certificate's cost, and 5 per cent. surtax on gross receipts above fifteen times the certificate's cost, and requiring returns from dealers as to amount of business done.

Failure to pay taxes forfeits license rights.

Provides for cessation of mortgaging of tax certificates by 1925.

Defines residence property as property nine-tenths of the cubic space of which is occupied for residence purposes.

Adds prohibitions against selling, delivering or giving away liquor to person known to have been convicted of public intoxication within a year, or to person on parole with respect to whom written notice has been served by probation officer, or to any person on a car, train or boat, save as such liquor is sold under a public conveyance liquor tax certificate, or to any person believed to be getting the liquor for peddling purposes in violation of law.

Raises prohibited hours exception rate for clubs from $10 to $12.50 per day.

Prohibits sale or gift of liquors known or believed to be destined for sale or gift within dry city or town; and adds "bone-dry" provision prohibiting possession in any quantity or delivery in any quantity in any city or town which has voted out all three forms of public sale, viz., barroom sales, bottle store sales and druggists' sales; retention of any one of the three forms of sale making the "bone-dry" provision inoperative.

Makes court decision revoking license immediately effective no matter to whose hands transferred.

Makes conviction of an officer of a corporation holding a license a conviction of the corporation.

CITY LOCAL OPTION LAW.

Chapter 624, signed by the Governor, and in effect May 22—Constitutes each city in State, except New York City, local option territory, and provides, on proper petition of voters, for a referendum in New York City at special election the third Tuesday in April on question of becoming local option territory, a failure to carry barring a second referendum for five years.

Provides that in any other city, on proper petition of voters, special election shall be held the third Tuesday of April covering following questions:

1—Shall liquor be sold to be drunk on premises where sold?
2—Shall liquor be sold not to be drunk on premises where sold?
3—Shall liquor be sold, on prescription only, in drug stores?
4—Shall liquor be sold in hotels only?

Such elections to be not oftener than once in three years, except when, and in case, it is the city of New York, for which city the election period shall be five years.

Petitions to be signed by qualified electors to the number of 25 per cent. of votes cast in city at preceding general election, to be filed not less than thirty, nor more than forty-five days before the third Tuesday in April, no signature to have been affixed over four months before the third Tuesday in April, petition to be in prescribed form, with each sheet of signatures sworn to, and filed as a whole with the board or officer charged with duty of providing ballots for city election which is held at a time other than a general election; no signature to be added or withdrawn after filing.

Provides for publishing notices of elections, regulates conduct of such elections, empowers manufacturer in dry city to make and store for sales without the city or to pharmacists holding licenses, changes due to local option vote to take effect October 1 following.

Provides for second special election if proceedings were defective.

Empowers Attorney-General or District-Attorney to proceed against places of storage or sale in violation of the chapter as common nuisance.

WINE FOR SACRAMENTAL PURPOSES.

Chapter 814, approved by the Governor, and became law August 29 (passed in Extraordinary Session)—Amends Chapter 623, so as to permit shipment, delivery and possession in any otherwise wholly dry city or town, of wine for sacramental purposes and alcohol for pharmaceutical and manufacturing purposes.

THE AMERICAN RED CROSS—ITS WAR WORK.

(Furnished by that organization for THE ALMANAC and revised by the officers to November 1, 1917.)

On May 10, 1917, President Wilson, as head of the American Red Cross, appointed a "War Council" to direct the work of the Red Cross during the war. Henry P. Davison, of J. P. Morgan & Co., New York, was appointed Chairman. With him were associated Charles D. Norton of New York, Cornelius N. Bliss, Jr., New York; Edward N. Hurley, Chicago; Grayson M.-P. Murphy, New York, and ex-officio, William Howard Taft, Chairman, and Eliot Wadsworth, Vice-Chairman, respectively, of the Executive Committee. Mr. Hurley later resigned to become Chairman of the Shipping Board. His place was taken by John D. Ryan, of Butte, Mont.

By proclamation of President Wilson the week of June 18-25 was designated as Red Cross Week, during which a nation-wide campaign resulted in the pledging of a sum exceeding $100,000,000 for the war work of the Red Cross. In five months, May 1-October 1, the membership increased from 486,194 to nearly 5,000,000, while the number of chapters increased from 582 to 2,736.

The national administration of the Red Cross, centering at Washington, was also completely reorganized under the direction of a new executive officer, the general manager. Harvey D. Gibson, President of the Liberty National Bank of New York, was appointed to this position. The Director-General of Military Relief, the Director-General of Civilian Relief, and other executives, who supervise the national activities of the American Red Cross, are responsible to the General Manager.

The chapters of American Red Cross have been grouped in fourteen divisions, covering the nation. Each division has a manager, who, under the direction of the general manager, supervises all Red Cross activity in his own territory. Inquiries about the Red Cross should be addressed to the local chapter. The chapters in turn report to the division managers. The divisions and headquarters are as follows:

DIVISION MANAGERS.

New England—(Maine, Vermont, Massachusetts, Rhode Island), 755 Boylston Street, Boston; James Jackson, Manager.

Atlantic—(New York, Connecticut, New Jersey), 44 East Twenty-third Street, New York; Ethan Allen, Manager.

Pennsylvania—(Pennsylvania, Delaware), 1601 Walnut Street, Philadelphia; Charles Scott, Jr., Manager.

Potomac—(Maryland, District of Columbia, Virginia, West Virginia), 932 Fourteenth Street N. W., Washington; Henry White, Manager.

Southern—(North Carolina, South Carolina, Georgia, Florida, and Eastern Tennessee), 424 Healy Building, Atlanta, Ga.; Colonel William Lawson Peel, Manager.

Lake—(Indiana, Ohio, and Eastern Kentucky), 929 Garfield Building, Cleveland, Ohio; James R. Garfield, Manager.

Central—(Michigan, Wisconsin, Illinois, Iowa, Nebraska), 180 North Wabash Avenue, Chicago; Bruce D. Smith, Manager.

Gulf—(Mississippi, Alabama, Louisiana), Post-Office Building, New Orleans; Leigh Carroll, Manager.

Southwestern—(Kansas, Missouri, Arkansas, Oklahoma, Texas, and western Kentucky and Tennessee) 1617 Railway Exchange Building, St. Louis; George W. Simmons, Manager.

Northern—(Minnesota, North Dakota, South Dakota, Montana), Essex Building, Tenth Street and Nicollet Avenue, Minneapolis, Minn.; F. H. Stoltze, Manager.

Mountain—(Wyoming, Colorado, Utah, New Mexico), Fourteenth and Welton Streets, Denver, Col.; John W. Morey, Manager.

Northwestern—(Washington, Oregon, Idaho), White Building, Seattle, Wash.; C. D. Stimson, Manager.

Pacific—(California, Nevada, Arizona), 942 Market Street, San Francisco; Marshal Hale, Manager.

Insular and Foreign—(All chapters outside the continental area of the United States), Washington, D. C.; Otis H. Cutler, Manager.

CHAPTER WORK.

Under the direction of the division managers chapter workers are instructed to make those articles which are most needed for relief in this country and in Europe: Surgical dressings, hospital supplies, knitted garments and comfort kits. Raw materials are bought in large quantities by the Bureau of Supplies at national headquarters, distributed to the division warehouses and then sold to the chapters at cost price, plus cost of handling. When chapter products are completed they are shipped back to the division warehouses, from which they are collected as needed and transported to distribution points in this country or abroad.

The members of the war council, the division managers and most of the department heads of the Red Cross are serving wholly without expense to the Red Cross. The total number of full-time volunteers on October 1, 1917, was seventy-three. As a result of this mobilization of volunteer service and the regulation of salaries, the average salary paid at Red Cross headquarters has been kept at a low figure.

RELIEF WORK ABROAD.

The war council has based the work of the American Red Cross in foreign countries on the reports of special commissions composed of expert investigators and executives. Such a commission was sent to France, with Major Grayson M.-P. Murphy at its head, to have general supervision over all work of the American Red Cross in Europe. Headquarters were established in Paris, where this work has centered during the year 1917. The first responsibility of the American Red Cross in France is to serve the American Expeditionary Forces. This work is carried on in close co-operation with General Pershing, who has made Major Murphy a member of his staff. It is carefully co-ordinated, as well, with the programme of the Young Men's Christian Association. Rest stations and infirmaries have already been established along the route taken by the troops in moving from the port of entrance to the permanent camp. More than twelve base hospital units, recruited, organized and equipped by the Red Cross, and mustered into the United States Army Medical Corps, are now in service in France; over thirty more have been organized and are waiting to be called. Each unit has a minimum personnel of 241, in addition to officers detailed from the Army Medical Corps. This staff includes doctors and nurses recruited from American hospitals; the equipment provides for the care of at least 500 patients.

PRIMARY HOSPITAL UNITS.

The work of organizing these hospitals was begun two years before the United States entered the war. Six units, therefore, were able to sail for service within six weeks of the declaration of war. They were thus the first detachments of the American army to begin actual service with the Allies. A hospital supply service has been established in France which, with a chain of warehouses and a fleet of motor trucks, distributes surgical dressings and hospital supplies to about 3,500 war hospitals in France. The Red Cross has opened canteens for the use of the French and American armies at important railroad stations in France, where men going to and from the front are compelled to wait for trains. Here hot meals are served at a low price, and a soldier on leave, fresh from the hardships of the trenches, can bathe, disinfect his clothing and sleep comfortably while waiting for his train. American women are helping to operate these canteens.

The American Red Cross has also undertaken the relief of civilians in France and Belgium. Foodstuffs to the value of nearly $3,000,000 have been sent to France or purchased there for general relief.

Special work is being done for refugees, which include those who are repatriated after having been held prisoners behind the German lines. The Red Cross is assisting mutilated soldiers who need artificial limbs, and is aiding in the care of blinded soldiers who require re-education in order to become self-supporting.

In the parts of France devastated by the retreating Germans the American Red Cross is assisting the reconstruction of several of the destroyed villages. In each of these villages the refugees are furnished with clothing, building materials, hospital supplies, farm implements and farm animals in sufficient quantity to begin normal life again. The Red Cross does this work in co-operation with the French Government. The assistance is of a provisional character, the primary purpose of which is to tide these homeless and helpless families over the hard times which they must endure before they can become really independent.

The desperate condition of French children in the villages of the war zone has led to the establishment of shelters where orphans and refugee children can be decently housed and properly cared for under expert medical supervision. The alarming fall in the French birth rate, coupled with the need for repairing the losses wrought by war, has made it imperatively necessary to save the babies born in France. Three groups of children's specialists have, therefore, been sent to engage in a widespread campaign for the care and education of prospective mothers and the health of babies and children.

Before the war the birth rate and death rate in France were so nearly equal that publicists voiced their concern over the future of the national life. Last year, however, with the death rate probably over twenty per 1,000, not counting deaths of men in military service, the birth rate was officially estimated at only eight per 1,000. In New York State the birth rate is twenty-three or twenty-four per 1,000, the death rate about fourteen per 1,000. The total deaths in France in 1916 were about 1,100,000. Births numbered only 312,000. The net loss in population was 788,000, or nearly two per cent. of the whole. In Paris, where 48,917 babies were born in the year ending August 1, 1914, only 26,179 were born in the second year of the war ending August 1, 1916.

The number of destitute refugees in France, in March, 1917, was stated by the Ministry of the Interior to be 400,000, but there is reason to think that the number is much larger. The position of refugees is becoming more difficult as the cost of food rises. Their housing conditions are also bad in many instances, especially in the cities. The relief agencies report that in the cities an entire family often resides in a single room. When persons live under these conditions of bad housing and malnutrition, disease is sure to take hold and increase. Repatriated Frenchmen from the occupied regions of France are now being brought to France via Switzerland at an average of about a thousand a day. At Evian they are examined and those who are ill are put into hospitals, whence they are dispatched, either to a relative or to the town or village on which they are billeted. Large numbers come to Paris. They arrive from Germany in most cases insufficiently clad and in very bad physical and mental condition. The German Government has always been careful to keep as secret as possible its intention to return civilians. On more than one occasion as many as a thousand refugees have come over the frontier without notice. The effort of the Red Cross is to endeavor to separate the large number showing evidences of tuberculosis infection from the others, and to have them placed in special hospitals.

There are half a million cases of tuberculosis in France, it is estimated, resulting more or less directly from the hardships of trench life and exposure and malnutrition behind the lines. The American Red Cross is co-operating in the campaign of the Rockefeller Foundation for Medical Research for the prevention and cure of tuberculosis.

OCEAN TRANSPORT ARRANGEMENTS.

A Red Cross transportation service has accordingly been established to handle the vast quantities of medical and relief supplies now being shipped almost daily to France, Belgium, Serbia, Russia and other belligerent countries. This new branch of Red Cross activities was made possible through the co-operation of the French, British and Italian Governments, the United States Shipping Board and the leading steamship and railroad companies. President Wilson has taken a personal interest in the establishment of this service. His aid and that of Chairman Edward N. Hurley, of the Shipping Board, formerly a member of the Red Cross War Council, have been invaluable to its success.

Practically all the cargo space needed for the shipment of Red Cross supplies abroad has now been placed at the disposal of the war council . Much of it has been given free by the steamship companies and the Allied Governments. This will be used only for supplies most urgently needed abroad. The Red Cross will have cargo space on every steamer chartered by the United States Shipping Board. Army transports also will carry Red Cross supplies. Practically every line has made reductions in its passenger rates for Red Cross nurses and representatives travelling in Europe. In making its ocean shipping arrangements, it will be the policy of the Red Cross to distribute shipments among as many steamers as possible. By using all available lines losses at sea, if sustained, will not seriously interrupt the Red Cross work of mercy.

WAR WORK IN THE UNITED STATES.

The Red Cross has established a Camp Service which, when requested by the military or naval authorities, assists the army and navy by furnishing supplies which add to the comfort or welfare of men in camp. A Bureau of Sanitary Service co-operates with local authorities in maintaining safe sanitary conditions in the regions surrounding camps and cantonments, outside the zone of military control. Forty-five ambulance companies of 124 men each have been organized by the American Red Cross for service either abroad or in connection with camps in the United States. Several hundred Red Cross nurses have been assigned for service in army hospitals at the camps and cantonments and for visiting service in the civilian areas surrounding them.

The Red Cross is providing Home Service for the dependent families of men who are away in training or at the front. In many practical and friendly ways this service is designed to aid such families to maintain their normal standard of living. Financial assistance is secondary, although the Red Cross will hope to be of help in cases where Government allowances are not sufficient to keep the family from want. A series of institutes to train Red Cross chapter workers for home service were held during the autumn of 1917, and the whole welfare work for these families is under the supervision of experts in relief work.

WORK IN OTHER COUNTRIES.

In addition to the commission to France similar commissions were sent to Russia, headed by Dr. Frank Billings, of Chicago, and Mr. William B. Thompson, of New York; to Roumania, Henry Watkins Anderson, of Richmond, Va.; to Italy, George F. Baker, Jr., of New York, and to Serbia, Cordenio Arnold Severance, of St. Paul, Minn. A special department under the commission for Europe has also been created for Belgium, and a deputy commissioner has been sent to England. In Belgium, under the direction of Ernest P. Bicknell, the American Red Cross is co-operating with the King and Queen in the relief of families in the part of that country which is held by the Allies.

Each of the other commissions, when they went abroad, carried a relief fund and medical supplies for immediate use. Further relief work in these countries will be carried on in accordance with their recommendations. Already additional medical supplies and the material for an ambulance unit have been sent to Russia. Condensed milk has been sent to Serbia for military hospitals and, on behalf of the Serbian Government, the American Red Cross is purchasing food for Serbian prisoners in enemy countries.

For the relief of Armenian and Syrian refugees $1,800,000 has been appropriated, to be expended by the American Committee for Armenian and Syrian relief, through its agents in Asia Minor and elsewhere. At Berne, Switzerland, an organization has been built up for the relief of American prisoners in Germany. The American Red Cross will forward to them regular shipments of food and clothing, which are urgently needed. Most of these American prisoners are civilians taken off American merchantmen that have been

sunk by Teuton submarines. More recent arrivals in the prison camps had served as gun crews since the arming of our merchant ships.

Speedy provision for their relief and for those who may be taken prisoner is necessitated by the German policy of giving prisoners war food totally inadequate to keep men in good health. The extremely high death rate among Russian, Serbian and Roumanian prisoners in Germany and Austria (30 per cent. in the case of the Roumanians) has been largely due to the inability of Russia and the Balkan States to organize the rationing of prisoners of their nationalities from their home countries.

Malnutrition, no less than unsanitary conditions, produces these results. British, Canadian and Australian prisoners of war in Germany now depend exclusively upon food shipped to them from London, and generally give the prison camp ration to prisoners of other countries, who are, as a rule, less well provided. Bread is already being dispatched from Berne to the Americans in Germany, and arrangements have also been made for transmitting letters and money from their families and friends in this country.

By arrangement with Germany these food parcels are sent to the prisoners three times a fortnight. The parcels supplement the bread which is also regularly supplied, and each of them contains ten pounds of meat, butter, sugar, jam, coffee or tea, salt, rice and dried fruit. The American Red Cross is forwarding the Berne stocks of the same foodstuffs, as well as cheese, evaporated milk, codfish, and mixed biscuit. Tinned goods cannot be sent to prisoners, for Germany has made over the tin containers as hand grenades.

Ninety-five per cent. of the British packages sent into Germany, with postal card receipts to be mailed back by the prisoners, have been duly receipted for. The American Red Cross, also, will inclose postal cards, as a means of making sure that American prisoners do actually receive the food parcels.

In accordance with President Wilson's expressed desire that American war relief work should be concentrated in the Red Cross, in the interests of national efficiency, the Red Cross has entered into co-operative arrangements with a number of American relief societies. Among these societies are: The National Surgical Dressings Committee, the American Fund for French Wounded, the American Committee for the Relief of French War Orphans, the Needlework Guild of America, and the War Service League of the Salvation Army. In France the American War Relief Clearing House, the American Distribution Service, organized by Mrs. R. W. Bliss, and Les Tuberculeux de la Guerre, founded by Mrs. Edith Wharton, have been amalgamated with the Red Cross.

APPROPRIATIONS.

The total amount appropriated for the national work of the American Red Cross from the appointment of the War Council on May 10 to October 15, 1917, is as follows:

For work in France	$15,111,818.35	For work in the United States	$7,779,784.60
For work in other foreign countries	3,852,631.02		
		Total	$26,744,233.97

In a summary report to the public, dated September 1, 1917, the Red Cross appropriations for work in other than France were summarized as follows:

Russia		Condensed milk for Serbian military Hospital	$6,000.00
Drugs	$ 6,500.00	Expenses of commission to Serbia	16,500.00
Medical supplies	316,280.87	Total	222,500.00
Total	322,780.87	**England**	
Roumania		Surgical supplies sent to London Chapter American Red Cross	3,800.00
Relief fund and medical supplies	200,000.00	Expenses commission to Great Britain	5,000.00
Expenses of commission to Roumania	47,000.00	Total	8,800.00
Total	247,000.00	Other appropriations	
Italy		Armenian relief	600,000.00
Relief fund and medical supplies	200,000.00	Relief of Americans in Germany	26,000.00
Expenses of commission to Italy	10,000.00	International Red Cross Geneva	10,000.00
Total	210,000.00	Total	636,000.00
Serbia			
Emergency relief fund	200,000.00		

Most of these appropriations, it was stated, would be spent by November, 1917.

In an official report put forth on November 10, 1917, the Red Cross War Council announced from Washington that it had collected for its war fund up to November 1 a total of $79,895,355.68. A detailed financial statement was submitted, "in accordance with the policy of the Red Cross of keeping the public thoroughly informed on all of its activities." Of the total collections $9,129,389.21 is reserved for Red Cross chapters. The balance available for appropriation amounted to $70,765,966.47. The total appropriations actually made from the war fund amounted to $40,851,259.20, of which $26,934,416.86 was for foreign relief. The foreign relief appropriations were apportioned as follows: France, $19,581,240.47; Belgium, $720,001.00; Russia, $1,428,040.87; Serbia, $493,203.76; Roumania, $1,518,398.76; Italy, $214,000.00; Great Britain, $1,066,520.00; Armenian and Syrian relief, $1,800,000.00; foreign miscellaneous, $113,012.00.

There was appropriated for supplies, etc., to United States forces, $3,448,729; United States hospital work, $379,500; United States sanitary work, $379,500; United States sanitary service about cantonments, $183,500; United States miscellaneous items, $108,487.60—a total of $4,120,216.60. Other appropriations advanced for hospital funds amounted to $220,000. The appropriations for the purchase of articles for resale to chapters, principally materials to be worked into garments for soldiers and hospital supplies, amounted to $7,659,000, this sum eventually to be returned to the War Fund. An appropriation of $500,000 for automobiles was a bookkeeping entry to acknowledge a gift of that amount in the form of cars and automobile parts from the Ford Motor Car Company. In addition to the war fund appropriations specified, $1,417,625.74 was appropriated from the restricted funds—that is, from moneys which contributors have given to the Red Cross for specially stated purposes and which can be expended only for those purposes.

WAR RELIEF OF THE CHRISTIAN SCIENCE CHURCH.

(By the Christian Science Monitor.)

THE following statement has been issued by the treasurer of The First Church of Christ, Scientist, Boston, Mass., with reference to war relief activities: More than $300,000 has been collected and distributed for relief work by the Christian Science churches since the European war began, according to the treasurer of the Mother Church, and the work is being actively continued. We have established our own committees in the war-stricken countries of Europe and are reaching those who are in need of aid directly through this means. The work is conducted without expense to the fund itself, the committees giving their entire time to it without any compensation.

The fund has been dispensed in Armenia, Serbia, Poland, Lithuania, Belgium, Russia, Italy, Switzerland, Holland, France, England, Germany, Canada and Australia. In the countries where we have not had a committee of our own the money has been sent through the State Department at Washington or through duly accredited and authorized relief committees, where a minimum charge is made for administration. In this way we have been enabled to reach many of the unfortunate women and children who have been silent sufferers from the general devastation that has been wrought through many of the populous districts in which they live. The aid given is not confined to Christian Scientists, but is extended to people of all nationalities and regions who are worthy of help, especially to those who have been stricken in their homes through hunger and other forms of deprivation.

NAVAL CONSULTING BOARD.

(Contributed to THE ALMANAC by the Board.)

SINCE its formation in the latter part of 1915 the Naval Consulting Board, headed by Thomas A. Edison, and consisting of 24 scientists and inventors selected from 11 National technical societies, has performed various pieces of work, both through its original function as the official Civilian Advisory Board of the navy and in connection with numerous other duties and activities for the benefit of our Government, which have since accrued to it. Upon the board's recommendation, Congress in 1916 appropriated a million dollars for the establishment of a Naval Experimental and Research Laboratory, and a committee of the board, after extensive investigations, recommended Annapolis as its site. Foreseeing the inevitable entrance of this country into the war and the value in this event of a confidential industrial inventory of the manufacturing resources of the nation, the board's Committee on Production, Organization, Manufacture and Standardization undertook early in 1916 the task of taking such an inventory. Thirty thousand reports completely indexed for the use of the army and navy and covering the leading manufacturing concerns in this country, were thus turned over to the Council of National Defense This same committee has carried through in an equally successful manner other pieces of work of almost as great importance

Each of the board's technical committees is in constant touch and in closest co-operation with the corresponding bureau of the Navy Department, and as a result of the studies of these committees various recommendations have been made by the board to the depa tment Among these may be mentioned resolutions relative to the necessity of conserving the fuel oil reservat ons of the navy, the necessity of developing efficient means for extracting nitrogen from the air for use in the manufacture of high explosives and numerous recommendations in connection with the protection of our shipping. Perhaps the most important work of the board at the present time is that done in its capacity of Bureau of Inventions for the Council of National Defense. Thousands of inventions and suggestions in connection with every conceivable phase of military and naval activity are received by the board's offices in New York, Chicago and Washington. At the main office in New York every one of these is given careful consideration by a committee of examiners composed of technical men of high standing. Those having the least indication of possible value are forwarded to the various committees of the board dealing particularly with the special respective subjects, by whose members they are given exhaustive examination. If approved, they are incorporated in the reports of the committees and made the basis of suitable recommendations by the board as a whole. From the time they are first received every possible care is exercised in handling these letters, particular precautions as to secrecy being taken

In addition to the work of the board as a whole and of its committees, scientific work of inestimable value to the country has been done by many of its individual members and the technical men throughout the country whose co-operation they have secured Much of their work is of a confidential nature and cannot be disclosed. Through the board some of the greatest scientists and inventors of the country have been made acquainted with each other, and their work has been co-ordinated and directed to the single aim of improving the efficiency of our army and navy. The Naval Consulting Board was the first body to effectively bring to the assistance of our Government the knowledge and efforts of the great mass of scientific men in the country. Since its organization various other bodies modelled after it have been formed. It does not seem too much to say that the board was the pioneer in this country in securing the co-ordination between the military establishment and the great body of civilian workers which the nations at war have found so indispensable.

The following are the societies and their representatives making up the board:

American Chemical Society—W. R. Whitney and L. H. Baekeland.

American Institute of Electrical Engineers—Frank Julian Sprague and Benjamin G. Lamme.

American Mathematical Society—Robert Simpson Woodward and Arthur Gordon Webster.

American Society of Civil Engineers—Andrew Murray Hunt and Alfred Craven.

American Aeronautical Society—Matthew Bacon Sellers and Hudson Maxim.

Inventors' Guild—Peter Cooper Hewitt and Thomas Robins.

American Society of Automobile Engineers—Howard E. Coffin and Andrew L. Riker.

American Institute of Mining Engineers—William Lawrence Saunders and Benjamin Bowditch Thayer.

American Electrochemical Society—Joseph William Richards and Lawrence Addicks.

American Society of Mechanical Engineers—William Le Roy Emmet and Spencer Miller.

American Society of Aeronautic Engineers—Elmer A. Sperry and Bion J. Arnold.

The following committees have been formulated to deal with the various kinds of technical problems submitted by the Navy Department. The name of Chairman is given.

Aeronautics (including aero motors)—Elmer A. Sperry.

Internal Combustion Motors—Andrew L. Riker.

Electricity—Frank J. Sprague.

Mines and Torpedoes—Elmer A. Sperry.

Submarines—William Le Roy Emmet.

Ordnance and Explosives—Hudson Maxim.

Wireless and Communications—P. C. Hewitt.

Production, Organization, Manufacture, and Standardization—Howard E. Coffin.

Ship Construction—Frank J. Sprague.

Steam Engineering and Ship Propulsion—Andrew M. Hunt.

Life-Saving Apparatus — Spencer Miller.

Aids to Navigation—Elmer A. Sperry.

Food and Sanitation—L. H. Baekeland.

Public Works, Yards, and Docks—Alfred Craven.

Chemistry—W. R. Whitney.

Physics—A. G. Webster.

Transportation—A. L Riker.

Fuel and Fuel Handling—Spencer Miller.

Metallurgy—J. W. Richards.

Optical Glass—L. H. Baekeland.

Special Problems—B. G. Lamme.

THE SUBMARINE AND KINDRED PROBLEMS.

(Extracts from a booklet issued by the Naval Consulting Board for the guidance of inventors of the country.)

"The thousands of suggestions and plans presented to the Naval Consulting Board for assisting the Government in the present emergency indicate the patriotic fervor of the mass of our citizens. The board makes a careful examination of every proposal presented. To facilitate this work by suggesting the elimination of impractical ideas, the board calls to the attention of those who desire to assist it some of the popular misconceptions as to certain fundamental principles which are most frequently misunderstood by the layman."

The board goes on to state that no electro magnet, however powerful, has any attraction for metal it does not come into contact with—thus a magnet that will lift thirty tons of ore by touching it will not lift two pounds of ore that is two feet distant from the magnet and separated therefrom by the atmosphere. Then the board adds:

PROTECTION AGAINST SUBMARINE ATTACK.

"The subject, which is occupying the public mind as is no other, divides itself into a number of problems the most important being the following: (a) Means of discovering the approach of a hostile submarine and locating it so as to permit of prompt action for combating its attack. (b) Protection of cargo-carrying ships by nets, guards and screens. (c) Protection through decreasing the visibility of vessels. (d) Methods of destroying or blinding a hostile submarine. Submarines, to operate most effectively, must approach within close range of the vessel which is intended to be torpedoed. The installation of offensive weapons on the

merchant marine has increased the necessity for the utmost care being exercised by the submarine commander in remaining unseen by the officers on the vessel to be attacked.

"Reports from abroad indicate that in many cases submarines must have remained along certain lanes of travel for periods extending into weeks of waiting with the expectation of torpedoing certain vessels. Under certain favorable conditions, where the waters are less than 200 feet in depth, a submarine might lie at rest on the bottom, and if equipped with sensitive listening devices attempt to detect the approach of a vessel. As soon as this evidence was secured the submarine might come to the surface for a quick observation by means of the periscope and in this manner obtain the proper aim which would be required to register an effective hit. In case the water is more than 200 feet in depth a submarine must be kept in motion to obtain steerage way in order to hold its proper depth of submergence. This speed may not exceed 4 or 5 miles per hour, but to remain submerged, and at the same time unobserved, the water must be at least 60 feet deep.

"The latest type of submarine which is being used abroad has a surface speed of at least 17 knots per hour of probably less than 10 knots. The superior gun fire from the merchantman which has been properly equipped would make it necessary for the submarine commander to obtain his observations, such as would permit accurate aiming of the torpedo, during the very brief interval of time required to come to the surface for observation through the periscope and to again submerge. If running near the surface, the periscope might be raised, a quick observation taken, and lowered again within 30 seconds. If, however, the submarine is on the surface and hatches uncovered, from one to four minutes will be required to completely submerge, depending upon circumstances.

"A submarine of recent type probably has a total radius of action of as much as 8,000 miles when travelling at a moderate cruising speed of from 10 to 11 knots, and may remain away from its home-base for as much as one month without requiring either fuel or other supplies during this period. This type of submarine may have as many as three periscopes, two conning towers and two rapid-fire guns attached to the upper portion of its hull. The vessel is steered by very efficient gyroscopic compasses, which are unaffected by extraneous magnetic or electrical influences. A general understanding of the capabilities of the modern submarine for offensive operations will make it easier to appreciate the importance of the three problems which follow:

(a) MEANS FOR DISCOVERY.

"The Aeroplane. When the condition of sea and air are favorable, a submarine is readily discernible from an aeroplane flying at a sufficient height even though the submarine be submerged to a considerable depth. While aeroplanes have thus been used successfully in the English Channel, they are unable to fly far out to sea where the submarines are now most active. Mother ships for carrying and launching aeroplanes might be used in this connection, but there are only a small number of such ships in operation and the construction of others under present conditions is necessarily a slow process. Various sound-recording devices, intended to locate surface-vessels, submarines, and even moving torpedoes, are now being carefully tested. Water is an excellent conductor of sound, and the development and improvement of such apparatus offers a promising field for inventive endeavor to those who possess adequate scientific training and laboratory facilities.

"Many devices are suggested which depend upon optical means of detection, such as special forms of telescopes and field-glasses to be mounted on ships, or on scouting vessels. Many special forms of searchlights and projectors have been suggested. The fact that a moving torpedo leaves in its wake a stream of air-bubbles caused by the exhaust air from its propelling engines, offers, under favorable conditions, one means for discovering the approach of a torpedo. This evidence is, however, difficult to detect in a rough sea or at night, and, furthermore, the bubbles do not reach the surface of the water until after the torpedo has travelled onward a distance of from 50 to 200 feet toward its target.

"The dragging of trawls or nets, by special guardboats, not only with the view of locating submerged submarines, but also to sweep up floating and stationary mines, is frequently suggested. Under certain conditions this operation is practicable and effective. It will be seen that each of the above methods, however useful, has its limitations, and scientists and inventors should apply themselves not only to the task of improving these, but also of finding supplementary methods and devices.

(b) PROTECTION OF CARGO-CARRYING SHIPS BY NETS OR SCREENS.

"Many designs of such devices are suggested, and most of them are intended to be attached to the hull of the vessel to be protected. Many other suggestions along these lines, and differing only in some of their minor characteristics from the foregoing, have been received by the board. Up to the present time not one of these proposals involving screens of any kind has received the approval of the Navy Department or of the Merchant Marine. The principal objections offered to these devices are that they are heavy, difficult to hold in position, unmanageable in a heavy sea, and that they interfere with the speed and with the ability of the vessel to manoeuver. The undeniable evidence which has been accumulated during the past few months of submarine activity has demonstrated that the immunity of a vessel to submarine attack is dependent very largely on its speed and also its manoeuvring ability. The percentage of vessels having speeds of 15 knots or more which have suffered from submarine attack is very small, while the losses of slow vessels, whose speed is less than that of a submerged submarine, is practically one hundred per cent of those attacked. Many of the suggested devices would prevent the launching of life-boats or rafts from the vessel to be protected. It is barely possible, however, that there may be developed some form of this general plan which will be found practicable. In no other field have so many suggestions or so many duplicate inventions been presented to the board.

(c) PROTECTION THROUGH INVISIBILITY.

"The point of lookout on a submarine being close to the water, the position of a vessel at a distance can only be determined by observing its smoke, which floats high in the air. Improved smokeless combustion is therefore desirable. Relative invisibility may also be afforded by methods of painting. Suggestions as to any other methods of reducing the range of visibility will be of interest.

(d) DESTRUCTION AND BLINDING OF THE SUBMARINES.

"A rapid-fire gun is effective when the submarine is seen within accurate range of the gun; but the target is so small that it is difficult to hit. The powerful effect of any submarine explosion on all neighboring bodies provides a simple means of destroying or crippling an undersea boat. Once it has been even approximately located, the setting-off of a heavy charge of high explosive, well submerged in the vicinity of the submarine, will bring about this result. In certain areas, a quantity of heavy, black petroleum or similar substance which will float on the surface of the water has proved an effective means of clouding the optical glass in the periscope's exposed end.

"Under favorable conditions of wind and position, many vessels have saved themselves from torpedo attack by the production of a smoke screen. This may be formed either by incomplete combustion of the oil used for fuel by most naval vessels, or it may be created by burning chemicals, such as phosphorus and coal tar, or mixtures in which both of these and other materials are used.

MINES AND TORPEDOES FOR NAVAL OPERATIONS.

(a) MINES.

"Ever since the first use of gunpowder in the prosecution of war, mines and torpedoes have received great attention both from the warrior and the inventor. Mines are either fixed or floating. The fixed or stationary submarine mine is fired by contact, electricity, timing device or fuse. Such mines, which are extensively used by all navies, are rugged in design and may contain large charges of explosives. They are placed in position by especially equipped mine-laying vessels. Such a mine is provided with an anchoring device.

"Floating mines differ from fixed mines in that they are unanchored, and, unless guard boats are at hand to warn friendly vessels of their proximity, may be as dangerous to friend as to foe. Such mines must be, according to laws of war, designed to become inoperative within a few hours after being set adrift.

THE SUBMARINE AND KINDRED PROBLEMS—*Continued.*

(b) TORPEDOES.

"The modern submarine torpedo is about 20 inches in diameter and 20 feet in length: is self-propelled: is not steered by magnetic means: and keeps a fairly accurate course for several thousand yards at an average speed of more than 30 miles an hour. Its weight is approximately a ton and a quarter; and, when traveling at normal speed, possesses great momentum—in fact, in one case, when the high explosive charge in the 'warhead' failed properly to detonate, the body of the torpedo penetrated the steel hull of the ship attacked. Torpedoes are also provided with means to more or less effectively cut through screens, nets, or guards placed in their path. A torpedo is projected from a submarine or other vessel by means of a special form of tube or gun. A small charge of gunpowder or compressed air is employed to start the torpedo, after which—if of the usual self-propelling type—it is driven through the water by its own compressed air motor, the air being supplied from a strongly built reservoir within the body of the torpedo itself. The torpedo is kept upon its course by a gyroscope steering mechanism, which is immune to outside magnetic disturbances.

"The detonation of the torpedo is accomplished through a mechanism placed within its warhead; and if the torpedo is either abruptly diverted from its course or is checked in its forward motion, the firing device, which is operated by arrested momentum rather than by any form of a projecting firing-pin, instantly ignites the heavy charge of explosive contained within the warhead. The explosion, if it takes place within twenty feet of the vessel, will usually rupture the ship's plating, because of the terrific blow transmitted through the water from the point of the explosion to the ship's side. The depth at which a torpedo travels may be regulated and is usually between 12 and 15 feet below the surface.

CONFINING THE SUBMARINES.

"The question as to why submarines are not destroyed before they reach the open sea is a most natural one, and the best answer which it is possible to give, according to the officers of our Navy and those of the foreign commissions who have visited this country, is as follows: The submarine bases are very strongly protected by land batteries, aeroplane observers and large areas of thickly mined waters extending to such distances that the largest naval gun cannot get within range of the bases. In spite of these protections, there is now going on a continuous attempt on the part of the Allied navies to entrap or otherwise defeat the submarines as they emerge from the protected areas. Nets are laid and as promptly removed by the enemy, whose trawlers are in turn attacked by our destroyers.

"The design of these nets and the detailed arrangement of their fastenings and attachments offer a broad field for invention, but it should be remembered that they must be capable of being used in waters in which there is a tidal current running from two to five miles per hour. Many suggestions for "Bottling up" these bases have been offered, but, as will be realized, it is not desirable to publish information which would indicate even in the smallest degree this country's plans.

SHIPS AND SHIP BUILDING.

"Many suggestions are made for ships of unusual form to provide for safety in case of a torpedo or mine exploding near or against the hull. Most of these plans are an elaboration of the usual watertight bulkhead construction now required as structural design for all modern ships. The multiplicity of watertight compartments in any hull design tends to add to the vessel's safety. The modern tank steamer used to carry fluid cargoes, such as petroleum products or molasses, is a good example of this design, which has been in general use for many years. The explosion of a nearby submarine mine or torpedo frequently tears great rents in the ship's plating, in some cases opening a jagged hole ten feet or more across, but the destructive effect on the hull of a ship caused by the explosion of a mine or torpedo may be greatly diminished by special hull construction.

"From recent experiments and experience, it has been demonstrated that the average merchant steamer may be seriously damaged by the explosion of a torpedo thirty-five feet away from its hull, but the destructive effect at any given distance from the point of explosion depends to a large extent upon the design and condition of steel framing and plating. A vessel with a strongly built hull can withstand an explosion that would destroy a weaker vessel."

EIGHTEEN POUNDS OF METAL IN EQUIPMENT OF EVERY UNITED STATES INFANTRYMAN.

According to the Ordnance Bureau of the War Department the metal equipment carried by each infantry soldier weighs 294.65 ounces and an additional weight of 114.7 ounces is added by equipment of cotton, wool, leather and wood. The bureau, therefore, supplies each soldier with approximately 25 pounds of equipment, this being exclusive of that supplied by the Quartermaster Corps.

A "memorandum on materials entering into the composition of the articles of equipment of an infantryman furnished by the Ordnance Department, weight in ounces," is as follows:

Bacon can—6.4 ounce iron and steel and 8 ounces tin.
Bayonet—15 ounces iron and steel and 1 ounce wood.
Bayonet scabbard—2 ounces iron and steel, ½ ounce brass, 1 ounce aluminum, 0.3 ounce other metal, 1 ounce cotton, 2 wood and 0.7 leather.
Canteen—5 ounces aluminum and 1.8 ounces other metal.
Canteen cover—0.2 ounce brass, 3 ounces cotton and 1.8 ounces wool.
Cartridges (100)—47.4 ounces brass, 36.4 ounces metal in bullet, and 12 ounces explosive.
Cartridge belt—10 ounces brass and 14.1 ounces cotton.
Condiment can—4.35 ounces tin.
Cup—5.5 ounces aluminum and 0.6 ounce other metal.
Fork—1.5 ounces other metal.
Front sight cover—2 ounces iron and steel.
Gun sling—1 ounce brass, 7 ounces leather.
Haversack—1.8 ounces brass, 24 ounces cotton.
Knife—1 ounce iron and steel, 0.7 aluminum.
Meat can—0.3 ounce iron and steel, 12 ounces aluminum, 0.1 ounce other metal.
Oiler and thong case—1.5 ounces brass, 1.5 leather.
Pack carrier—0.3 ounce iron and steel, 6 ounces cotton and 1 leather.
Pouch for first-aid packet—0.3 brass and 1.6 ounces cotton.
Rifle—107 ounces iron and steel and 29 ounces wood.
Shovel—25 ounces iron and steel and 4 ounces wood.
Shovel carriers—5 ounces cotton
Spoon—1.7 ounces other metal.
The metal used in the bullet is a lead and tin composition inclosed in a jacket of cupro-nickel.

GERMAN CASUALTIES IN THE WAR.

In a statement before the Reichstag, October 30, 1917, Georg Ledebour, Independent Socialist, said: "We have had 1,500,000 dead, 3,000,000 or 4,000,000 wounded, of whom 500,000 are crippled for life and 2,000,000 absolutely invalided."

The British and French estimates follow: British estimate—Dead, 1,158,601; wounded, 2,922,320; crippled or invalided for life ——; prisoners, 710,454.

French Estimate—Dead, 1,056,975; wounded, 919,000; crippled or invalided for life, 3,000,000; prisoners 630,809.

ONE YEAR'S WAR EXPENSES OF THE UNITED STATES.

(By the Committee on Public Information, October, 1917.)

THE estimated ordinary expenses of this Government in the first year of its participation in the war is $12,067,278,679.07. This does not include a penny of what we have lent and are going to lend to our Allies. It is merely the sum to be spent, with no financial return, on the running of the Government in war time, including, of course, the expense of the greatly enlarged Army and Navy on the new war footing. This total for the present year is $27,807,000 more than the Government spent in the entire 17 years from the beginning of the present century to the present year.

Ordinary expenditures of this Government last year—that is, the fiscal year ended June 30, 1917—were $1,041,635,116, or about a tenth of what they are now estimated to reach in the present twelve-month. In addition, last year there were various extraordinary expenditures, such as $25,000,000 for the Danish West Indies, but they do not belong in the group of ordinary expenses to which the estimate of more than 10 billions is contrasted. Only once before in the history of the Government had the ordinary expenses exceeded a billion, and that was in the last year of the Civil War. In these totals of expenditures of previous years the deficits due to Postal Service and the expenditures for bond redemptions are not included, for those items are not included in the estimate of more than 10 billions for the current war year. Interest payments on bonds are included.

The Army and Navy expenditures for one year of this European war amount to $9,064,240,483, just about two and a half times as much as it cost to keep the Army and Navy going through practically 17 years of fighting in the five previous wars of this country which were of importance. In other words, the cost of both branches of the fighting service for the War of 1812, the second Seminole war, the Mexican War, the Civil War, and the Spanish War was, all told, $3,743,776,773.

Against this estimate of "ordinary" Government expenses for the year ending June, 1918, which, to be exact as to cents, is $12,067,278,679.07, there are, to offset it in estimated receipts on the basis of existing laws, $1,333,500,000; also $2,000,000,000 of the $5,538,945,460 bond issue authorized on April 27; and furthermore, $393,500,000 of the estimated ten billions of expenditures are reimbursable by bond issue. That is, there are $3,727,000,000 of receipts in sight, leaving an excess of estimated expenditures over receipts already assured of $7,008,807,000. From that excess there will be deducted later the amount to be raised by the War Revenue Bill.

APPROPRIATIONS BY ACTS OF MARCH 4, JUNE 15, AND OCTOBER 5, 1917.

The appropriations made in 1917 for the Naval Establishment and the objects to which they are applied are given in the following table:

Personnel—Pay, subsistence, clothing, training, transportation, recruiting, etc.	$217,819,366.16	Public works—New construction and improvements, repair, upkeep, and operation of public works	$69,163,755.01
Ships — Construction, purchase, equipment, repair, and operation of ships	805,277,583.00	Marine Corps	42,715,148.78
Ordnance — Guns, torpedoes, mines, ammunition, etc.	391,812,506.50	Miscellaneous	3,811,500.00
Aviation	62,133,000.00	Total	$1,592,732,859.45

COST OF FORMER WARS TO THE UNITED STATES.

(Compiled by the Treasury Department.)

WAR OF 1812 WITH GREAT BRITAIN, FROM JUNE 18, 1812, TO FEB. 17, 1815.

YEAR.	Total.	War.	Navy.
1812	$20,280,000	$11,817,000	$3,959,000
1813	31,681,000	19,652,000	6,446,000
1814	34,720,000	20,350,000	7,311,000
1815	32,943,000	14,794,000	8,660,000

WAR WITH MEXICO, FROM APRIL 24, 1846, TO JULY 4, 1848.

YEAR.	Total.	War.	Navy.
1846	$27,261,000	$10,413,000	$6,455,000
1847	54,920,000	35,840,000	7,900,000
1848	47,618,000	27,688,000	9,408,000
1849	43,499,000	14,558,000	9,786,000

CIVIL WAR, FROM 1861 TO 1865.

YEAR.	Total.	War.	Navy.
1860	$63,201,000	$16,472,000	$11,514,000
1861	66,650,000	23,001,000	12,387,000
1862	469,569,000	389,173,000	42,640,000
1863	718,733,000	603,314,000	63,261,000
1864	864,968,000	690,391,000	85,705,000
1865	1,295,099,000	1,030,690,000	122,617,000

SPANISH-AMERICAN WAR, FROM APRIL 21, 1898, TO DEC. 10, 1898.

YEAR.	Total.	War.	Navy.
1897	$365,774,000	$48,950,000	$34,561,000
1898	443,368,000	91,992,000	58,823,000
1899	605,071,000	229,841,000	63,942,000
1900	487,713,000	134,774,000	55,953,000

COST OF PRESENT EUROPEAN WAR TO AUGUST 1, 1917.

(By the Treasury Department.)

ENTENTE ALLIES.

EXPENDITURES.	Aggregate.	Present Daily.
United Kingdom	$26,705,000,000	$25,000,000
France	16,530,000,000	18,500,000
Russia	14,250,000,000	15,000,000
Italy	5,050,000,000	7,000,000
United States	1,629,000,000	19,100,000
Other Allies	3,250,000,000	5,000,000
Totals	$67,414,000,000	$99,600,000
Less advances to their allies and dominions	7,992,500,000	22,900,000
Net totals	$59,421,500,000	$76,700,000

TEUTONIC ALLIANCE.

EXPENDITURES.	Aggregate.	Present Daily.
Germany	$19,750,000,000	$25,000,000

Belgium—Unknown	.....	.....	.....
§Bulgaria	.....	.....	.....

* The Chancellor of Exchequer said when all instalments are paid and all conversions made the nominal amount of both issues will be $10,322,960,928. † *The London Economist* of August 4, 1917, gives total as $1,872,750,703. ‡ About. § A despatch from Berlin to Argentina early in 1917 said the Bulgarian debt had tripled during the war, being early in 1917 $193,366,700, its increase being represented largely by floating debt and advances from Germany. British war loans, 1914-17, total $28,460,000,000.

The Canadian Government issued three internal war loans as follows:

Issue.	Date of Issue.	Issue Price.	Amount.
5% loan, due Dec. 1, 1925	Nov., 1915	$97.50	$100,000,000
5% loan, due Oct. 1, 1931	Oct., 1916	97.50	100,000,000
5% loan, due March 1, 1937	Mar., 1917	96.00	150,000,000
			$350,000,000

All of the above loans were oversubscribed. It is estimated that from $25,000,000 to $30,000,000 of each of the above loans were taken by American investors.

Canada is floating a fourth war loan, for $150,000,000, at a rate of interest, the bonds to be sold at a discount, as in the case of the previous loans.

The following Canadian loans have been placed in the United States since the war:

Issue.	Date of Issue.	Issue Price.	Amount.
5% 1 year and 2 year notes, due Aug. 1, 1916, and Aug. 1, 1917	Aug., 1915	1 year, $100.00 2 year, 99.50	$25,000,000 20,000,000
5, 10 and 15 year 5% bonds, due April 1, 1921, 1926, 1931	April, 1916	5 year, 99.56 10 year, 97.13 15 year, 94.94	25,000,000 25,000,000 25,000,000
5% 2 year notes, due Aug. 1, 1919	Aug., 1917	98.00	100,000,000
			$220,000,000

Of the above, $45,000,000 has matured, leaving $175,000,000 outstanding.

In addition to the above, in March, 1915, £5,000,000 of 5 and 10 year 4½% bonds were issued at $99.50. At $5.00 to the pound sterling, this would amount to $25,000,000, which would make the total amount of loans raised in Canada, the United States and London $595,000,000.

					$107,063,000

* Converted at $4.8665. † This loan was reported over-subscribed, but the exact amount of subscriptions is not available.

The Union of South Africa seems to have issued but two war loans, the first as follows: 4½% debentures maturing July 1, 1925, redeemable after 1920 at the option of the Government. The loan was issued about May, 1915, at 98½ for £3,000,000, which converted at $4.8665 per pound, is equivalent to $14,599,500. In May, 1916, a 5% 20-year issue was brought out, maturing in 1936, but redeemable after 1921 on six months' notice. No specified amount was given, the issue being for an unlimited sum. Subscriptions closed August 29, but information as to just what they amounted to is not available. However, it was stated that to August 9, 1917, £7,444,720 had been subscribed, which converted at $4.8665, is equivalent to $36,229,730.

India has raised one loan of $500,000,000 and advanced the same to Great Britain.

ADVANCES TO ALLIES BY UNITED STATES GOVERNMENT.

SHORT WAR BOND ISSUES OF THE UNITED STATES.

THE only long-time issues of bonds by the United States in this war have been the Liberty Loans. The issues of Treasury certificates have been as follows:

March 27, 1917, 2%	$50,000,000	June 2, 1917, 3¼%	$200,000,000	Sept. 25, 1917, 4%	$400,000,000
April 19, 1917, 3%	268,000,000	July 3, 1917, 3½%	300,000,000		
May 3, 1917, 3%	200,000,000	Aug. 18, 1917, 3½%	250,000,000		$2,168,000,000
May 19, 1917, 3¼%	200,000,000	Sept. 4, 1917, 3½%	300,000,000		

The early issues of these have been paid off or converted into bonds.

THE SECOND LIBERTY LOAN.

AMOUNT asked, $3,000,000,000. Loan offered October 1, 1917, and subscriptions closed November 1. The bonds run for 25 years, at 4 per cent., and are redeemable 10 years after issuance. The right was reserved by the Secretary of the Treasury to allot additional bonds up to one-half the amount of any over-subscription.

Subscriptions totalling $10,202,150 were made to the second Liberty Loan by officers, enlisted men, and civil employees of the Navy, Navy Department and Marine Corps.

Navy Yards—Norfolk, Va., $272,500; Washington, D. C., $416,400; Boston, Mass., $441,450; Portsmouth, N. H., $325,150; Charleston, S. C., $178,950; Philadelphia, Pa., $222,150; New York, N. Y., $1,024,000; Mare Island, Cal., $584,700; Puget Sound, Wash., $384,150.

Naval Stations—San Francisco, $138,000; New Orleans, $66,500; Pensacola, $74,200; Key West, $38,750; Pearl Harbor, Hawaii, $25,850; Newport Torpedo, $38,000; Olongapo, $6,300; Cavite, $2,650; Guam, $15,000; Tutuila, $1,000; Great Lakes, $796,950.

Ships—Virginia, $1,850; Wisconsin, $7,150; Neptune, $14,000; Albatross, $2,600; Yorktown, $14,750; Ohio, $30,000; Bridgeport, $9,500; New Jersey, $36,000; Annapolis, $5,200; Prairie, $5,500; Michigan, $5,350; Kansas, $15,350; Fishhawk, $1,800; Pueblo, $50,000; Rhode Island, $8,400; Minnesota, $3,150; Missouri, $13,650; Aylwin, $3,900; Kearsarge, $5,500; Nevada, $12,000; Des Moines, $10,550; Darien, $1,650; Raleigh, $8,150; Nebraska, $17,500; Huntington, $37,800; Vestal, $2,700; North Dakota, $31,900; Connecticut, $6,150; Kentucky, $12,200; Texas, $107,350; Delaware, $2,100; Illinois, $4,150; Cyclops, $5,500; Dubuque, $1,500; Pensacola, $3,600; Culgoa, $3,100; Olympia, $5,800; Arkansas, $47,800; Monaghan, $800; Columbia, $7,150; Arizona, $1,550; Celtic, $5,000; George Washington, $13,950; New Orleans, $4,050; San Francisco, Patuxent, and Baltimore, $7,500; Uncas, $1,100; Minneapolis, $1,950; Florida, $32,750; Pennsylvania, $36,000; San Diego, $200; Jouett, $1,000; Hannibal, $7,600; Cleveland, $7,200; Roe, $1,700; Charleston, $24,500; Susquehanna, $500; South Carolina, $1,250; Jupiter, $8,900; Jason, $6,000; Montana, $3,500; Wyoming, $10,200; St. Louis, $3,350; Vermont, $3,250; Astoria, $20,500; Long Beach, $1,300; Chattanooga, $13,500; Dolphin, $1,700; Solace, $3,600; New Hampshire, $3,150; Buffalo, $3,600; Louisiana, $3,800; Vicksburg, $1,500; Fulton, $1,550; F-1 and F-2, $6,750; Don Juan de Austria, $650; Leonidas, $6,000; Massachusetts, $11,100; Oregon, $500; L-1, $1,800; L-2, $100; L-3, $350; L-4, $250; Yantic, $150; Salem, $8,050; Oklahoma, $1,100; Iroquois, $2,850; Utah, $7,950; Naushan, $6,500; Itasca, $1,000; North Carolina, $4,050; Wenonah, $2,000; Leviathan, $27,700; Rainier, $2,250; Surf, $11,350; F-3, $900; Saratoga, $5,050; Maine, $5,000; L-8, $800; Wanda, $100; Sachem, $1,000; Brooklyn, $2,600; Georgia, $2,600; New York, $13,350; Agamemnon, $2,250; Sqd. 2, cruiser force, $2,150.

WORK OF THE COMMISSION FOR RELIEF IN BELGIUM.

(Furnished by the Commission.)

THE Commission for Relief in Belgium was organized in London on October 22, 1914. Belgium was face to face with famine and prompt help had to be secured. A few resident Americans and leading citizens got together, the support of the American and Spanish Ministers was enlisted, and an undertaking was obtained from the invading army, which was later confirmed and enlarged by the German Government, to the effect that protection would be afforded if food were imported. Representatives were sent to London, and with the assistance of Ambassador Page, the consent of the British Government was secured, conditional on neutral control, as well as Washington's permission for American citizens to collaborate in relief measures. Asked to nominate the head of an organization to take the matter in hand, Mr. Page named Herbert C. Hoover, with whom he had throughout consulted on the subject, and whose marked capacity and resourcefulness as an organizer had been brought to his attention in connection with the American Relief Committee, which rendered such signal service in facilitating the return to America of th ousands of citizens stranded in London at the outbreak of the war.

Ambassador Walter Hines Page in London and Ministers Henry Van Dyke at The Hague and Brand Whitlock in Brussels were appointed Honorary Chairmen, as were, a little later on, the following: Senor Don Merry del Val, Spanish Ambassador in London; Marquis de Villalobor, Spanish Minister in Brussels; James W. Gerard, American Ambassador in Berlin; William Graves Sharp, American Ambassador in Paris, and Mynheer Jongkeer de Weede, Netherlands Minister to the Belgian Government at Le Havre.

Although only $500,000 was available and only emergency relief contemplated when the Commission was organized, it was decided to place orders for 20,000 tons of food per month. This meant an obligation of some $2,000,000. But the Commission believed in a generous response if the world were appealed to, and a generous response was in fact forthcoming. It soon became clear, however, that so great an undertaking could not be maintained on a basis of benevolence, and, with the assistance of the American Ambassador, Mr. Hoover brought the matter to the attention of the British Cabinet and secured the support of that Government and that of the French. The outcome was a monthly advance to Belgium for the account of the Commission of £500,000 from England and 12,500,000 francs from France. To this was later added 25,000,000 francs per month from French institutions in respect of the area occupied by the Germans in Northern France. Increased cost of supplies, coupled with greater requirements, rendered these resources inadequate, and a further appeal to the Governments concerned resulted in an increase of 50 per cent. in the advances to Belgium and of 40 per cent. in that to Northern France.

$299,000,000 UP TO JUNE 1, 1917.

Up to June 1, 1917, the Commission has had from the British Government, in round numbers, $89,500,000, and from the French Government $66,000,000 for relief in Belgium. In addition, $108,000,000 has been received from France for the relief of the occupants of her invaded territory. Charitable contributions amounted to over $30,000,000 in cash, food and clothing—to the same date—of which about $16,000,000 came from committees and individuals in the British Empire, about $11,500,000 from the United States, and some $3,000,000 from the rest of the world. Altogether, the Commission has had available for its work, up to June 1, 1917, about $299,000,000 in cash and in kind.

In June, 1917, the financing of the Commission for the succeeding six months both, as to Belgium and Northern France, was taken over by the American Government, through the granting of loans totalling $75,000,000 to the Governments of Belgium and France. This money is advanced in monthly instalments of $12,500,000—$7,500,000 to Belgium and $5,000,000 to France. The work of the Commission for Relief in Belgium has been the provisioning or revictualling of the whole of the civilian population of the occupied areas of Belgium and Northern France. This has involved five correlative lines of activity:

(a) The mobilization of the world's charity.

(b) The development of economic cycles through sales of food, to the well-to-do, exchange, loans, Government subsidies, etc.

(c) The purchase, transport and just distribution of imported food and clothing, of the character required to supplement native supplies to the endurance point.

(d) The supplying of the destitute not only with imported food but also with native food, clothing, housing and fuel under such conditions as will result in the least possible social demoralization and waste.

(e) The provision of resources to the middle classes in the form of direct or indirect loans.

The fundamental principle of the Commission's administration is a large measure of local autonomy, strengthened by stimulating inspection and supported by a strong central organization. In consequence, a total of some 7,000 to 8,000 committees for collection, distribution, finance, etc., has been created under the guidance and control of two great co-ordinated central organizations, namely, the Commission for Relief in Belgium and the Comite National de Secours et d'Alimentation, this latter a Belgian organization operating successively through Provincial, Regional, and Communal Committees, that total over 40,000 members. The Comite National includes in its membership the representatives of the Commission, and enjoys the patronage of the Spanish Ministers in Brussels and American and Dutch Ministers at Le Havre.

OFFICES OF THE COMMISSION.

The Commission for Relief in Belgium has its head office in London, No. 3 London Wall Buildings, E. C., with main branches at 165 Broadway, New York; 98 Haringvliet, Rotterdam, Holland; 36 bis Avenue de l'Opera, Paris; 226 Bartolome Mitre, Buenos Aires, Argentina, and 66 Rue des Colonies, Brussels, and it maintains a separate organization throughout Belgium, with branch offices in each province. Up to the time of the declaration of war on Germany by the Government of the United States, the Commission's organization in Belgium was composed mainly of Americans, but since that time it has been made up of citizens of Holland and Spain, appointed with the approval of their Governments and known as the Committee of Protection.

The first shipment of food, consisting of 2,500 tons, was made October 30, 1914, and since that time the Commission has purchased, shipped and distributed more than two and three-quarter million tons of foodstuffs.

Herbert C. Hoover continues as Chairman of the Commission; Alexander J. Hemphill as Treasurer, and William L. Honnold as Director in America. The Advisory Committee, named by President Wilson to co-operate with the Commission in America, consists of, in addition to Mr. Hemphill and Mr. Honnold, the following: S. Reading Bertron, C. A. Coffin, R. Fulton Cutting, Elbert H. Gary, J. F. Lucey, Henry L. Stimson, Oscar S. Straus, Frank Trumbull and Frank A. Vanderlip. Mr. Hemphill is Chairman of this committee.

AERONAUTICAL SOCIETY OF AMERICA.

Founded 1908. The objects of this society are to advance the science of aerial navigation and carry out public demonstrations of completed aircraft so as to keep the general public informed of the progress and advancement in aeronautics. The society maintains flying grounds at Oakwood Heights, Staten Island, N. Y. Officers: *President*—Frederick W. Barker. *Treasurer*—Francis T. Sanford. *Secretary*—Edward Durant. Offices, Engineering Societies Building, 29 West Thirty-ninth Street, New York City.

THE ROCKEFELLER FOUNDATION'S WAR ACTIVITIES.

(A Statement by the Board of Trustees.)

The Foundation expended in war relief from the beginning of the war to December 31, 1916, the sum of $2,588,620.18 This sum is the amount actually paid out. It does not include certain appropriations, as, for instance, for relief in Poland, which it was found impossible to carry out in full. The appropriations of the Foundation since January 1, 1917, total $6,426,872.

The appropriations made for these purposes follow:

Agencies working in and about the training camps for American soldiers: Young Men's Christian Association, $200,000; Young Women's Christian Association, $100,000; playground and Recreation Association, $20,000; American Social Hygiene Association, $20,000; Sex Education—Educational Department Young Men's Christian Association, $25,000; Committee of Fourteen of New York City, $5,000—$370,000.

Medical Work: Rockefeller Institute for Medical Research, to build, equip and run a hospital under the control of Dr. Carrel, to teach new methods of war surgery, $300,000; special research in war medicine and surgery, $25,000; preparations of serums for war relief, $25,000; for equipment for teaching military and naval surgeons in preparation for war relief work, $10,000; Yale University, for mobile hospital in France, in which clinical instruction to medical students will be continued, $25,000; National Committee for Mental Hygiene, for buildings for a naval psychiatric unit, $15,000; for expenses of Dr. Salmon's trip to Europe, $2,500—$402,500.

Humanitarian Work: American Red Cross, unconditional gift, $5,000,000; payment of "Red Cross dividends," $44,372; International Committee Y. M. C. A. for foreign military and prisoners-of-war work, $300,000. Commission for Relief in Belgium, for ration to Belgian children, $100,000; American Committee for Armenian and Syrian Relief, for relief work, $50,000; War Relief Commission, administration expenses in this country and abroad, $50,000; survey of Tuberculosis Conditions in France, $10,000; International Health Board of Rockefeller Foundation, for tuberculosis control in France in co-operation with French Government, $100,000—$5,654,372.

The State of New York granted a charter to the Rockefeller Foundation in 1913. Its endowment is $101,324,576.78. The incorporators are John D. Rockefeller, John D. Rockefeller Jr., Frederick T. Gates, Harry Pratt Judson, Simon Flexner, Starr J. Murphy, Jerome D. Greene, Wickliffe Rose, and Charles O Heydt. The officers are: *Chairman of the Board of Trustees*—John D. Rockefeller Jr. *President*—George E. Vincent. *Secretary*—Edwin R. Embree. *Treasurer*—L. G. Myers. *Comptroller*—Robert H Kirk *Assistant Treasurer*—L. M. Dashiell. *Members*—Wallace Buttrick, Simon Flexner, Harry E. Fosdick, Frederick T. Gates, A. Burton Hepburn, Charles E. Hughes, Harry Pratt Judson, Starr J. Murphy, John D. Rockefeller, John D. Rockefeller Jr., Wickliffe Rose, Julius Rosenwald, Martin A. Ryerson, Frederick Strauss, George E. Vincent. General offices, 61 Broadway, New York City.

WAR ACTIVITIES OF THE CARNEGIE ENDOWMENT FOR INTERNATIONAL PEACE.

By the unanimous vote of the Trustees of the Carnegie Endowment for International Peace at their annual meeting held at Washington, D. C., on April 19-20, 1917; it was: (1) Resolved, That the Trustees of the Carnegie Endowment for International Peace, assembled for their annual meeting, declare hereby their belief that the most effectual means of promoting durable international peace is to prosecute the war against the Imperial German Government to final victory for democracy, in accordance with the policy declared by the President of the United States. (2) Resolved, That, as an act of sympathy with the suffering which has fallen upon innocent and helpless non-combatants in the existing war, the sum of $500,000 be and it is hereby, appropriated as a separate fund, to be expended by the Executive Committee as speedily as may be, to aid in the reconstruction of homes in the devastated portions of France, Belgium, Serbia or Russia.

WAR WORK OF THE YOUNG WOMEN'S CHRISTIAN ASSOCIATIONS.

(By the National Board of the War Work Council.)

Executive Committee: *Chairman*—Mrs. James S. Cushman, New York City. *Vice-Chairmen*—Mrs. John R. Mott Montclair, N. J.; Mrs. John Meigs, Pottstown, Pa. *Treasurer*—Mrs. Henry P. Davison, New York City. *Secretary pro-tem*—Mrs. Howard Morse, Port Washington, L. I.

Chairmen of Committees—Mrs. E. R. L. Gould, New York City, Extension of Regular Work; Mrs. Francis DeLacy Hyde, Plainfield, N. J., New Centers of Work; Mrs. John R. Mott, Montclair, N. J., Work in Foreign Countries; Mrs. Robert Lovett, Locust Valley, L. I., Training of Workers; Mrs. Robert E. Speer, Englewood, N. J., Non-Equipment and Social Moral ty Work.

Workers Non-English Speaking Women—Miss Elizabeth French, Basking Ridge, N. J., Junior Council; Mrs. William Adams Brown, New York City, Co-operation and Publicity; Mrs. Herbert Pratt, Glen Cove, L. I., Finance.

Ex-Officio: *Chairman of Executive Committee of National Board*—Mrs. John French, New York City. *Executive, Field Work Department*—Miss Helen A. Davis, New York City. *General Secretary, National Board*—Miss Mabel Cratty, New York City.

The board's war activities are as follows:

1 Work for girls in communities adjacent to military camps, including club work, physical training and games and incitement to true patriotism.

2 Hostess houses for women visitors to the men in training camps, providing a suitable place for women in the camp to meet their relatives and friends.

3 Emergency housing for groups of girls employed either in or near military camps in telephone offices, laundries, shops, &c., for whom no one has made housing provision.

4 Providing lectures on sex education for mothers and daughters; fifteen competent physicians are on this staff.

5 Work for colored girls throughout the United States under the direction of national colored leaders along the same lines as that undertaken for white girls.

6. Foreign Service and Americanization Bureaus to care for non-English speaking women who visit their men in camps and who are working in large industrial enterprises.

7 For the women in Russia and France working with Russian and French Committees of women to care for the rest and eating places for the women in great industrial centres, and providing at the request of our workers and American nurses in France social huts at the base hospital units, and vacation homes for American nurses in France.

NATIONAL BOARD Y. W. C. A.

Officers: *President*—Mrs. Robert E. Speer. *Chairman Executive Committee*—Mrs. John French. *First Vice-President*—Mrs. James S. Cushman. *Second Vice-President*—Mrs William W. Rossiter. *Secretary*—Mrs. Thomas S. Gladding. *Treasurer*—Mrs. Samuel J. Broadwell. *General Secretary*—Miss Mabel Cratty

General office, 600 Lexington Avenue, New York City. National Training School, 135 East Fifty-second Street, New York City.

WAR ACTIVITIES OF THE WOMAN'S CHRISTIAN TEMPERANCE UNION.

Headquarters of the Woman's Christian Temperance Union are Washington, D. C., and Evanston, Ill. *President*—Mrs. Robert E. Speer. *Chairman Executive Committee*—Mrs. John French. *First Vice-President*—Mrs. James S. Cushman. *Second Vice-President*—Mrs. William W. Rossiter. *Secretary*—Mrs. Thomas S. Gladding. *Treasurer*—Mrs. Samuel J. Broadwell.

The war activities are thus stated by the organization:

"As one of the eighteen national temperance organizations comprising the United Committee on Temperance Activities in the Army and Navy, of which Miss Anna A. Gordon is Vice-Chairman, the W. C. T. U. has been assigned the work of providing sixteen stereomotorgraphs, one for each of the army cantonments this as its share of the $100,000 the committee is raising. Among the slides which these machines automatically display are cartoons and patriotic posters covering different phases of the liquor question in its relation to the individual as a man and a soldier. The cost of the machines is $500 each and they are being purchased by State W. C. T. U. organizations.

"Two white-ribbon ambulances have been presented to the Red Cross, one for service in France, the other in Russia. Systematic effort is being made to find homes in American families for orphaned French and Belgian children. The W. C. T. U., both as a national organization and as individuals, have subscribed generously to the Liberty Loan. Its National President, Miss Anna A. Gordon, is a member of the advisory committee of the Woman's Liberty Loan Committee, of which Mrs. McAdoo is Chairman.

"State and local organizations are responding enthusiastically to the call of the National W. C. T. U. to patriotic service under the following ten divisions: (1) Nation-wide prohibition as a war measure; (2) Soldiers and sailors; (3) Relief work; (4) Moral education; (5) Woman in industry; (6) Americanization; (7) Co-operation with the United Committee on Temperance Activities in the Army and Navy; (8) Community interest; (9) Finance; (10) Membership."

UNITED SOCIETY OF CHRISTIAN ENDEAVOR.

Headquarters, Mount Vernon and Hancock Streets, Boston. *President*—Rev. Francis E. Clark, D. D., LL. D. *Associate President and Citizenship Superintendent*—Daniel A. Poling, LL. D. *General Secretary*—William Shaw, LL. D. *Extension Secretary*—Ira Landrith, D. D., LL. D. *Editorial Secretary*—Amos R. Wells, Litt. D. *Southern States Secretary*—Karl Lehmann. *Treasurer and Publication Manager*—A. J. Shartle.

Special enlistment pledge of Christian Endeavorers and their friends: Believing that the present war puts a peculiar responsibility for larger and better service upon the Christians of America, and that it is possible for all to serve in some capacity, I will as a religious duty, and for the sake of my country and my fellow men, pledge myself to some or all of the following methods of universal service:

As a soldier or sailor, or in the hospital service, I will strive always to act as a Christian, loyal to God and country. I will, during the coming year, seek to increase in some measure the world's food supply. By food economy and by wise thrift I will strive to prevent needless waste, that others may have more. I will preserve, so far as I may, the fruits and produce of the soil for future use. I will engage in some form of Red Cross relief work, contributing money or making needed articles for those who are fighting our battles at the front. I will endeavor by sympathy, prayer, personal correspondence and in other ways to help one or more of the men with the colors. Realizing that there is especial need to keep the fires of religion burning brightly in these serious and critical days of war, I promise renewed allegiance to my church and to the meetings and work of my Christian Endeavor Society. I will strive to keep free from rancor and personal hate, and when the war is over I will do my utmost to promote the spirit of Christian fellowship among the denominations and the races in our own country and among the nations of the world.

YOUNG WOMEN'S HEBREW ASSOCIATION'S WAR ACTIVITIES.

Headquarters, 31 West One Hundred and Tenth Street, New York. *President*—Mrs. Israel Unterberg. *Honorary Vice-President*—Mrs. H. Pereira Mendes. *Vice-Presidents*—Mrs. A. N. Cohen, Mrs. Adolph Guggenheim, Mrs. Felix M. Warburg. *Treasurer*—Mrs. Simon Liebovitz. *Honorary Secretary*—Mrs. Samuel I. Hyman. *Superintendent*—Mrs. Ray F. Schwartz.

War activities are thus stated: "From the time of our entrance into the war we have responded with all our available force to service. The early calls for interpreters, census takers, clerical workers and local draft board assistants were heartily answered. Hundreds of our adult groups have been and still are busily knitting and sewing garments for the Army and Navy Departments in conjunction with Red Cross. Our juniors have also rallied to do their share, and they too are knitting and sewing for Red Cross. Entertainments, plays and dances are being given, the proceeds going to army and navy and to relief funds. We co-operated with the Woman's Liberty Loan Committee and sold $18,050 worth of first and second issues of Liberty bonds, representing the purchase of several hundred single bonds coming from our working girls. In our Employment Bureau we have connected with factories, railroads, business houses, getting the statistics, showing the vacancies through enlistment, and finding out also the trades where replacements can be made by women, and guiding untrained workers into new work. The problem of recreation for soldiers and sailors stationed here on their way to camp or training quarters has been met here by having a series of dances and entertainments on our roof and in our gymnasium. Services were held for men of our faith. The All Day Care of Children whose mothers have been called upon to do work outside of the home was also arranged for here. Recognizing the importance of food conservation, we have had a series of lectures and demonstrations, instructing our people in economy, preparation and value of foods. We are working with the Hoover Food Committee and are organizing the women into squads led by captains."

THE AMERICAN BIBLE SOCIETY AND THE WAR.

Headquarters, Bible House, Astor Place, New York. *President*—James Wood, New York. *Vice-Presidents*—District of Columbia; John R. Mott, LL. D., New York; Cyrus Northrop, LL. D., Minnesota; Charles W. Fairbanks, LL. D., Indiana; William P. Dillingham, Vermont; Captain Robert Dollar, California; E. E. Beard, Tennessee; Joshua Levering, Maryland; Merrill E. Gates, LL. D., District of Columbia; Simeon E. Baldwin, LL. D., Connecticut; William A. Robinson, Kentucky; James N. Gamble, Ohio; Frank E. Spooner, Illinois; Christopher Mathewson, Florida; George W. Watts, North Carolina; Judge Robert F. Raymond, Massachusetts; E. H. Shull, M. D., Alabama; B. Preston Clark, Massachusetts; W. T. Hardie, Louisiana; Gerard Beekman, New York; Charles E. Hughes, LL. D., New York; Churchill H. Cutting, New York; H. H. Seldonridge, Colorado. *Corresponding Secretaries*—Rev. John Fox, D. D., LL. D.; Rev. William I. Haven, D. D. *Assistant Corresponding Secretary*—Rev. Lewis B. Chamberlain, M. A. *Treasurer*—William Foulke. *Special Fund to Furnish Scriptures for Soldiers and Sailors*—David Hinshaw, Executive Secretary Special Fund.

The society has seen to the distribution, in round numbers, of one million copies of the Scriptures—Bibles, Testaments and portions—in European countries since the war began, of which between 500,000 and 600,000 were sent with money furnished by nickel gifts from American Sunday school children through the World Sunday School Association—American branch. Over 1,000,000 copies were circulated by the American Bible Society itself on the Mexican border. Since May 1, 1917, the society has printed and sent out over 700,000 Bibles, Testaments and portions for general use, and is now delivering as fast as they can be made 1,000,000 Testaments to the Y. M. C. A., free of charge, to be distributed by them to the soldiers and sailors of the United States.

ITINERARY OF THE UNITED STATES SPECIAL MISSION TO RUSSIA.

(Itinerary and personnel—prepared for THE WORLD ALMANAC, with the authority of the Department of State, by Basil Miles, Secretary to the Mission.)

The Special Diplomatic Mission of the United States to Russia left Washington May 14, 1917, sailed four days later in the army transport Buffalo for Vladivostok, and arrived in Petrograd June 13th. The Provisional Government had provided the imperial train to meet the Mission and bring the party over the Siberian Railway. A few days after the arrival of the Mission in Petrograd Admiral Glennon, with his aide, left to inspect the Black Sea Fleet at Sebastopol. On his return he inspected the Baltic Fleet at Riga and Helsingfors, and also visited the port of Archangel.

On June 21 the other members of the Mission, excepting Charles Edward Russell, who was detained by engagements in Petrograd, left for an official visit to Moscow, returning to Petrograd June 25th. The same evening Mr. Root and General Scott, with their aides, proceeded to Stavka, field headquarters, to confer with General Brussiloff, then Commander in Chief of the Russian Armies. Mr. Root returned on the 27th, and General Scott proceeded to the front into Roumania, where he delivered an address to the Roumanian Parliament.

On July 9 the Mission left for America by Vladivostok and Seattle, reaching Washington the morning of August 8th, using the same facilities for travel as on the outward journey. The entire journey from Washington to Petrograd and Moscow and return, some twenty-five thousand miles by land and sea, was accomplished without a single case of illness or any difficulty or embarrassment of any character whatever. While in Petrograd the Mission was lodged in the Winter Palace, and during its entire stay in Russia was the guest of the Provisional Government.

F. Eugene Prince, civilian aide and interpreter, joined the Mission at Vladivostok. The secretary had been on duty for a year in Petrograd, and joined the Mission at Ekaterinburg on the western border of Siberia. Willoughby Smith, American Consul at Tiflis, joined in Petrograd as an additional assistant secretary. The following gentlemen were attached to the Mission by the Provisional Government of Russia:

Foreign Office Aides—Baron de Pahlen, Mr. Weiner, Mr. Soldatenkov. *Military Aides*—Colonel Tchoubakoff, Captain Baron Ramsay. *Naval Aide*—Lieutenant Fedotoff.

The following is a list of the personnel of the Mission:

Elihu Root, Ambassador Extraordinary on Special Mission; Hugh L. Scott, Major General, Chief of Staff, United States Army, on Special Mission and Military Representative of the President, with rank of Minister; James H. Glennon, Rear Admiral, United States Navy, on Special Mission, Naval Representative of the President, with rank of Minister; John R. Mott, Charles R. Crane, Cyrus H. McCormick, Samuel R. Bertron, James Duncan, Charles Edward Russell, Envoys Extraordinary on Special Mission; Colonel R. E. L. Michie, United States Army, Aide to General Scott; Colonel William V. Judson, United States Army, Military Attache to Mission; Captain N. A. McCully, United States Navy, Naval Attache to Mission; Lieutenant Colonel T. Bentley Mott, United States Army, Aide to Mr. Root; Surgeon Holton C. Curl, United States Navy, Medical Aide to Mission; Lieutenant Alva D. Bernhard, United States Navy, Aide to Admiral Glennon; Basil Miles, Secretary of Mission; Major Stanley Washburn, United States Army, Assistant Secretary of Mission; Willoughby Smith, Assistant Secretary of Mission; F. Eugene Prince, Civilian Aide and Interpreter; James E. McKenna, Chief Clerk and Disbursing Officer; Clyde Stillwell, James F. O'Rourke, Way Keegan, Duane E. Washburn, Walter W. King, George D. Gregory, Stenographers; Sergeant P. Z. Randolph, Orderly; George E. Long, Messenger; James Dooley, Valet.

Mr. Root made a number of important addresses, notably, to the Provisional Government, the Russian American Society, the Moscow Duma, the Union of Zemstovs and Municipalities, the War Industries Committee, the organization of the Order of St. George; also, at a luncheon at the Foreign Office, given for the Mission by the Minister for Foreign Affairs. Other members of the Mission made public addresses, including Mr. Russell and Mr. Duncan to the Council of Workmen and Soldiers Deputies, and Mr. Mott to the National Church Congress at Moscow.

WAR MISSIONS TO THE UNITED STATES.

DURING 1917 this country was visited by several war missions, made up of representative men from countries allied with the United States in the conflict with Germany. Each of these missions was received by the President at the White House. The missions also were formally welcomed at the City of New York. The date of the arrival of these bodies in Washington and the personnel of each follow:

FRENCH MISSION (April 24)—Marshal Joseph Joffre, M. René Viviani, Rear-Admiral Chocheprat, Marquis de Chambrun, Emile Hovelaque, Viscount de Jean, Lieutenant-Colonel Fabry, Lieutenant-Commander George E. Simons and Lieutenant de Tessan.

BRITISH MISSION (April 21)—Right Honorable A. J. Balfour, Right Honorable Sir Eric Drummond, Ian Malcolm, M. P.; C. F. J. Dormer, Geofrey Butler, Lieutenant-General Bridges, Colonel Heron, Captain H. H. Spender-Clay, M. P.; Major L. W. B. Rees, Major C. E. Dansey, Rear-Admiral Sir Dudley R. S. de Chair, Fleet Paymaster-General V A. Lawford, Right Honorable Lord Cunliffe, Sir S. H. Lever, A. D. Patton and W. T. Layton.

ITALIAN MISSION (May 23)—The Prince of Udine (Ferdinand of Savoy), Enrico Arlotta, Marquis Luigi Borsarelli de Refreddo, Senator Guglielmo Marconi, Augusto Ciuffelli, Francesco Saverio Netti, Cavaliere de Parente, Lieutenant di Zara, General Guglielmotti and Aldo Cussutto.

BELGIAN MISSION (June 15)—Baron Ludovic Moncheur, General Leclercq, Major Osterrieth, Lieutenant Count Louis d'Ursel, Hector Cartier and Jean de Mertens.

RUSSIAN MISSION (July 6)—Boris A. Bakhmetieff, Lieutenant-General Roop, Professor Lomonosoff, Professor Borodin, M. Novitsky, Ivan Soukin, Eugene Omelchenko, Captain Chitt, Lieutenant Martinoff, Lieutenant Karpovich, Colonel Aranovsky, Captain Visotsky, Baron Ginsburg and Messrs. Lebedeff, Balkoff, Postnikoff, Zak, Pertzoff, Puskareff and Omelchenko.

JAPANESE MISSION (August 22)—Viscount K. Ishii, Almaro Sato, Vice-Admiral Takeshita, Major-General Sugano, Masanao Hanihara, Matsuzo Nagai, Commander Ando, Tadanao Imai, Tashira Owaku, Douglas L. Dunbar, Tokichi Tanaka, Captain Kichisaburo Nomura, Lieutenant-Colonel Takezo Mizumachi, Commander Viscount Masamichi Hotta, Minoru Fujii, Madame Fujii, Hiroshi Saito, Eishiro Nuida, Yoshio Iwato and Toshio Shiratori.

AMERICAN HISTORICAL SOCIETY.

Organized in September, 1884. Incorporated by Act of Congress, 1889. *President*—Worthington C. Ford, 1154 Boylston Street, Boston Mass. *First Vice-President*—William Roscoe Thayer, 8 Berkeley Street, Cambridge, Mass. *Second Vice-President*—Edward Channing, 74 Sparks Street, Cambridge, Mass. *Secretary*—Waldo G. Leland, 1140 Woodward Building, Washington, D. C. *Treasurer*—Clarence W. Bowen, 5 East Sixty-third Street, New York, N. Y *Secretary of the Council*—Evarts B. Greene, University of Illinois, Urbana, Ill. *Curator*—A. Howard Clark, Smithsonian Institution, Washington, D. C.

SIGNAL CORPS AVIATION FIELDS.

(They have been named in honor of fliers killed in accidents.)

FOLLOWING is a list of Signal Corps aviation fields, with a brief statement of how and why they received their names:

Call Field, Wichita Falls, Tex., is named for First Lieutenant Loren H. Call, who reported for aeronautical duty at College Park, Md., October 19, 1912. Lieutenant Call belonged to the Coast Artillery Corps, to which he was appointed from civil life. In the Winter of 1912-1913, he and Lieutenant E. L. Ellington were sent to Palm Beach, Fla., where they remained until the Spring of 1913, in charge of the Signal Corps Aviation Station at that place. From Palm Beach Lieutenant Call was ordered to Texas City, Tex., and it was there that he was killed in an airplane accident July 8, 1913. Lieutenant Call's home was in Washington, D. C.

Chandler Field, Essington, Pa., is named in honor of Second Lieutenant Rex Chandler, Coast Artillery Corps, who reported for aeronautical duty at the Signal Corps Aviation School, San Diego, Cal., March 15, 1913. On April 8, 1913, while making his first flight, the hydro-airplane in which he was a passenger fell into San Diego Bay and Lieutenant Chandler was caught under the machine and drowned.

Ellington Field, Houston, Tex., is named in honor of Second Lieutenant E. L. Ellington, a graduate of the United States Naval Academy, who transferred into the cavalry arm of the army and was detailed to aeronautical duty at the Signal Corps Aviation School, College Park, Md., November 14, 1912. In the Winter of 1912-1913, he and Lieutenant Call were at Palm Beach, Fla., in charge of the Signal Corps Aviation Station at that place and in the Spring of 1913 Lieutenant Ellington was ordered to the Signal Corps Aviation School at San Diego, Cal., where he was killed in an airplane accident November 24 of the same year. Lieutenant Ellington's home was near Raleigh, N. C.

Gerstner Field, Lake Charles, La., is named in honor of Second Lieutenant Frederick J. Gerstner, Tenth Cavalry, a graduate of the United States Military Academy, who reported for aeronautical duty at the Signal Corps Aviation School, San Diego, Cal., September 26, 1914. On December 21, 1914, he was drowned, swimming ashore from a floating airplane while participating as passenger in the annual Mackay trophy contest.

Hazelhurst Field, Mineola, Long Island, is named in honor of Second Lieutenant L. W. Hazelhurst, jr., a native of Georgia and a graduate of the United States Military Academy, who reported for aeronautical duty at the Signal Corps Aviation School, Augusta, Ga., March 2, 1912. On June 11, 1912, while making a flight at College Park, Md., as passenger in an airplane undergoing acceptance tests the machine crashed to the ground and the pilot and Lieutenant Hazelhurst were both killed.

Kelly Field, San Antonio, Tex., is named in honor of Second Lieutenant G. E. M. Kelly, Thirtieth Infantry, who, after a course of training at the Curtiss Aviation Camp, San Diego, Cal., was ordered to San Antonio, Tex. While attempting to land, in order to avoid running into a tent and thereby possibly injuring several others, he fell to the ground and was killed May 10, 1911.

Love Field, Dallas, Tex., is named in honor of First Lieutenant Moss L. Love, Eleventh Cavalry, a native of Fairfax Courthouse, Va. Lieutenant Love reported for aeronautical duty at Texas City, Tex., May 8, 1913, and was killed at San Diego, Cal., September 4, 1913.

Park Field, Memphis (Millington), Tenn., is named in honor of First Lieutenant Joseph D. Park, Fourteenth Cavalry, a native of the State of New Hampshire and a graduate of the United States Military Academy. Lieutenant Park reported for aeronautical duty at College Park, Md., and was killed near San Diego, Cal., May 9, 1912.

Post Field, Fort Sill, Okla., is named in honor of Second Lieutenant Henry B. Post, Twenty-fifth Infantry. Lieutenant Post reported for aeronautical duty at the Signal Corps Aviation School, San Diego, Cal., May 26, 1913. On December 18, 1913, he made an altitude record for the Army, attaining a height of 10,500 feet. On February 9, 1914, at San Diego, while attempting to make an American altitude record he was killed, having flown up 12,140 feet.

Rich Field, Waco, Tex., is named in honor of Second Lieutenant Perry C. Rich, Philippine Scouts, who reported for aeronautical duty at Fort William McKinley, P. I., March, 1913, and was killed by a fall into Manila Bay November 13, 1913.

Rockwell Field, San Diego, Cal., is named in honor of Second Lieutenant Lewis G. Rockwell, Tenth Infantry, who reported for aeronautical duty at College Park, Md., July 5, 1912, and was killed at that place September 28, 1912.

Selfridge Field, Mount Clemens, Mich., is named in honor of First Lieutenant Thomas Selfridge, Field Artillery, who was detailed for aeronautical duty in April, 1908. Previous to that time he had been assisting Prof. Alexander Graham Bell in his aeronautical experiments in Nova Scotia. On September 17, 1908, he was killed while flying as a passenger with Orville Wright at Fort Myer, Va.

Camp Taliaferro, Fort Worth, Tex., is named for First Lieutenant Walter R. Taliaferro, who was detailed for aeronautical duty from the infantry March 18, 1913. He held certificates as pilot, expert aviator, military aviator, and junior military aviator. On September 17, 1915, he made an American duration record for pilot alone, remaining in the air nine hours and forty-eight minutes. He was killed at San Diego, October 11, 1915.

Scott Field, Belleville, Ill., is named for Corporal Scott, who was killed at College Park, Md., on September 28, 1912, while flying as a passenger.

ZONES OF SILENCE.

(W. J. L. Kiehl in the *Scientific American*.)

PROF. VAN EVERDINGEN has published the preliminary conclusion arrived at in the Meteorological station of Utrecht about the area in the Netherlands where the bombardment of Antwerp was audible. More careful study has, however, to be given to the matter before it can be understood in all its phases, for instance the bearing thereon of the local weather conditions has still to be more especially investigated. The broad conclusions that could at a glance be deduced from the reports that came in from various places in Holland after each place where the bombardment had been heard had been marked on a map have absolutely confirmed the theory of the German scientist, Dr. Von dem Borne, who suggested that the phenomenon of zones of silence corresponds to a similar phenomenon in light, which produces the well known *fata morgana* of the desert. According to this theory the sound waves which are thrown upward do not lose themselves in infinity, but, after reaching a height of from sixty to eighty kilometers (thirty-seven to fifty miles) according to the greater or less density and dampness of the atmosphere are thrown back again or reflected toward the earth.

The area over which the sound of the bombardment was directly audible was a very wide one, about eighty-five kilometers in radius. Then follows a zone of silence of sixty kilometers broken only in one place. What local atmospheric condition caused this exception has not yet been ascertained. In the extreme north of the province of Groningen the sound of guns was heard coming from the northeast, and upon investigation it proved that simultaneously with the bombardment of Antwerp, October 7th to 9th, gun practice at Borkum was going on and also at Meppen, where Krupp gun ranges are situated. It is interesting to note that at Utrecht itself the sound of the bombardment of Antwerp was not heard; but when, later on, the fighting line in Belgium was removed to a distance of two hundred kilometers from Utrecht the sound of guns was plainly discerned, both by prof. van Everdingen himself and others of the observatory.

AMERICAN JEWISH WAR RELIEF.

(Summarized from the 1917-1918 American Jewish Year Book.)

At the outbreak of the present international struggle, more than nine and a half million of the 13,000,000 Jews in the world, or 73 per cent., inhabited the belligerent countries, over three and one-half million residing in the territory of the three Polands, the scene of the most sanguinary fighting. When the war opened, there were a million and a half Jews in Russian Poland and two million in Galicia, while Serbia had more than 30,000. As to Turkey in general and Palestine in particular, though they were not scenes of military operations during the first months of the war, it is important to note that there were 250,000 Jews in the Ottoman Empire, of whom 78,000 lived in the Holy Land. Due to a number of factors now familiar to all, the Jews of the British Empire not only needed no assistance, but were able to aid the Jews of the United States in relieving sufferers in Asia and on the Continent, especially in Russia. The Jews in France, comparatively a handful, were not faced, thanks to the freedom they enjoyed, with any special economic problem, and the same may be said of the 600,000 Jews in the German Empire. When we come to the other belligerent countries, however, we find a totally different state of affairs. The rapid march of the Russian armies into East Prussia and Galicia and of the Austrian troops into Serbia was followed by counter-attacks and counter-invasions, and all involved confiscation, expulsion, destruction, and devastation on a stupendous scale, to say nothing of the complete stoppage of productive industry.

Although Turkey did not become one of the belligerents until a number of months had passed, the situation of the Jews in Palestine became precarious almost immediately upon the outbreak of the war. The first call for help came from Palestine. In cablegrams addressed to Louis Marshall and Jacob H. Schiff, Henry Morgenthau, then Ambassador to Turkey, stated that thousands of indigent Jews, heretofore dependent for their subsistence on contributions from Jews in countries that had entered the war, were in great distress, the sum of $50,000 being immediately necessary to save them from actual starvation. Accordingly, at its meeting on August 31, 1914, the Executive Committee of the American Jewish Committee took the first step for the relief of Jews in warring countries by voting an appropriation of $25,000, upon the offer of Mr. Schiff to contribute $12,500 and the assurance that the balance of the $50,000 would be contributed by the Provisional Executive Committee for General Zionist Affairs. The money was sent by cable to Mr. Morgenthau, who appointed a committee in Palestine to administer it. The call from Palestine was followed by appeals from responsible organizations in every one of the belligerent countries. During the invasion of Belgium, the Jewish community of Antwerp, overwhelmed by the requests for assistance from Jewish fugitives from other cities, sent an appeal to the American Jewish Committee, which at once remitted $5,000 for the relief of the Belgian Jews. The Alliance Israélite Universelle and the Anglo-Jewish Association likewise turned to the American Jewish Committee asking its assistance in caring for the thousands of immigrants, who, at the outbreak of the war, were on their way to America, but were unable to continue their journey across the Atlantic. The Israelitische Allianz of Vienna called attention to the wretched situation of the thousands of Jews, who, having fled from Galicia upon the approach of Russian troops, were congesting the cities of Vienna, Prague, and Budapest. The chief rabbi of Salonica, Greece, which was not then a belligerent country, informed the American Jewish Committee that the situation of the Jewish community of that city, which had not yet recovered from the effects of the Balkan Wars, had on account of the outbreak of the European conflagration become increasingly critical.

In the meantime a number of individuals and organizations had begun to make appeals for funds. At the end of September, for instance, the Independent Order B'nai B'rith issued an appeal to its membership for funds to assist its lodges in Austria, Germany, and the Orient. About the same time the Union of Orthodox Jewish Congregations made a similar appeal through its constituent congregations. The collection of funds was undertaken also by several minor organizations of Jewish immigrants coming from various towns or villages in the Old World, especially in the case of Galicians and Poles. These funds were intended for the relief of Jews in the several places indicated. The feeling soon became widespread among American Jews interested in the fate of European Jewries that united action on the part of all the Jews of this continent was demanded by the stupendous emergency. The first attempt to organize a general committee was made at the instance of the Union of Orthodox Jewish Congregations. On October 4, 1914, as a result of a meeting at New York City, and attended in the main by representatives of orthodox congregations, the Central Committee for the Relief of Jews Suffering Through the War was organized. Up to July 15, 1917, this committee collected and turned into the treasury of the Joint Distribution Committee almost one and a half million dollars.

AMERICAN JEWS CO-OPERATE.

A few days after the meeting of the Central Committee, the American Jewish Committee issued an invitation to all national Jewish organizations in the United States, including the Central Committee, just organized, to send delegates to a conference to be held in New York. At the conference on October 25, 1914, forty organizations were represented. Under the presidency of Louis Marshall, the meeting authorized the appointment of a committee of five, to select a committee of one hundred upon which every Jewish organization, invited to the conference, was to be represented by at least one member of its own choosing. This general committee was then to elect from its members an executive committee of twenty-five. The committee of five consisted of Oscar S. Straus, Julian W. Mack, Louis D. Brandeis, Harry Fischel and Meyer London. In this way the American Jewish Relief Committee was organized, with Louis Marshall as President, Cyrus L. Sulzberger as Secretary, and Felix M. Warburg as Treasurer. Pending the organization of the American Jewish Relief Committee, the Central Committee had been engaged in collecting funds, and had already remitted $5,000 to the Israelitische Allianz in Vienna and $5,000 for distribution through suitable agencies in Palestine.

On November 22, 1914, at the meeting of the Committee of One Hundred of the American Jewish Relief Committee, it was announced that the American Jewish Committee had voted to transfer to the Relief Committee the sum of $100,000 from its emergency trust fund, and a great many of the persons present pledged additional amounts. It was decided to organize local committees in every city having a considerable Jewish population, and to stimulate the contribution of funds by means of personal appeals, mass meetings, and the like. Since its inception and up to July 15, 1917, the American Jewish Relief Committee has collected and turned into the treasury of the Joint Distribution Committee nearly six million dollars.

In August, 1915, another organization, the People's Relief Committee, came into being—Chairman, Meyer London; Vice-Chairmen, Sholom Asch, E. Elsberg, Jacob Panken; Treasurer, Isaac Goldberg; Secretary, B. Fingerhood. Its object is to reach persons who could afford to give only very small amounts, and who, it was claimed, were not responsive to the appeals of the existing relief committees. Since its organization and up to July 15, 1917, this committee has raised, mainly in very small sums, and has turned into the treasury of the Joint Distribution Committee, more than eight hundred thousand dollars.

In order to avoid duplication in the distribution of the relief funds collected in America, the two relief committees, namely, the American Jewish Relief Committee and the Central Relief Committee, organized, on November 24, 1914, a Joint Distribution Committee consisting of representatives of both organizations; and in November, 1915, the People's Relief Committee, which had been organized several months before, also sent representatives to the Joint Distribution Committee. This body, as its name implies, makes appropriations out of the funds received for the relief of Jews in the various countries. A special

sub-committee of eight, consisting of Paul Baerwald, Harry Fischel, Alexander Kahn, Arthur Lehman, Albert Lucas, J. L. Magnes, Morris Rothenberg, and Felix M. Warburg, assisted by Miss Harriet B. Lowenstein, receives and digests all reports concerning conditions abroad, and, on the basis of these reports, makes recommendations to the full committee, which decides the amounts that shall be allotted accordingly. The three relief committees work through local committees in every part of the country, and are now in touch with Jews in fifteen hundred places, and in every State in the Union, as well as in Cuba, Canada, Newfoundland, South America, Central America, Hawaii, and the West Indies. During the first year of their existence, or up to December, 1915, the three committees succeeded in raising one and a half million dollars. Then came reports from abroad indicating that the distress among the Jews was unparalleled, and at a mass meeting in New York December 21, 1915, over $400,000 in cash was collected, and in addition pledges amounting to over half a million dollars were received. Similar meetings were convened in other cities with similar results. In Baltimore, $64,000 was contributed; in Washington, D. C., $10,000; in Cincinnati, $60,000; in Philadelphia, $200,000; in Chicago, $350,000; in Buffalo, $50,000. Other cities were quick to follow these examples, considerable impetus being given to the movement by the designation by President Wilson, following the passage of a resolution, introduced in the United States Senate by Senator Martine of New Jersey, of January 27, 1917, as a special day for contributions to the Jewish relief funds. By the close of the year 1916 more than four and three-quarter million dollars was actually raised.

SOME FUNDS SENT INDEPENDENTLY.

While nearly all the relief funds have been distributed through the agency of the Joint Distribution Committee, a considerable amount of money has been remitted independently of that organization. For example, the Central Committee for the Relief of Jews Suffering Through the War has collected $2,047,122, of which it has turned over to the Joint Distribution Committee $1,401,230. There have also been made direct remittances totalling $49,947.23 for the relief of rabbis, teachers, and children in the Yeshibahs and Talmud Torahs abroad, while for general relief in Palestine, the committee has sent $13,659, and to institutions in the Holy Land have gone $8,315, besides $11,000 to the Palestine Fund. The Central Committee has in addition remitted $181,000 to institutions in Palestine designated specifically by contributors, and has sent to designated individuals over $147,000. Furthermore, $5,307 was used for general Jewish relief in Austria-Hungary prior to the entrance of the United States into the war. During the summer of 1916, the Joint Distribution Committee planned to send a commission to Europe, to investigate the workings of the committees through whose agency the American funds were being distributed, but because of various diplomatic difficulties, only one member of the commission, Dr. Judah L. Magnes, was allowed to go, and even he was not permitted to enter Russia. Upon his return to the United States, in the autumn Dr. Magnes stated emphatically that, although the utmost efficiency and sagacity were being employed in the work of relieving distress among the Jews of the war zones, even the large funds thus far raised in Europe and in America were utterly inadequate; and he suggested that, if the work thus far done was not to be in vain, the goal for the year 1917 ought to be ten million dollars. The various committees at once set out to raise this sum during 1917. On December 21, 1916, the anniversary of the first mass meeting, another was held in New York City under the auspices of the American Jewish Relief Committee, and it was followed by meetings in Philadelphia, Allentown, Charleston, S. C., Syracuse, Baltimore, Youngstown, Milwaukee, Dayton, Louisville, Columbus, Chicago, Pittsburgh, and other places. Great impetus was given to the movement by the offer of Julius Rosenwald of Chicago to give 10 per cent. of the total amount raised by November 1, provided this did not exceed ten million dollars. Mr. Rosenwald's example was followed in many communities, a number of persons offering to give 10 per cent. of the amounts raised in various cities or States. In one case the offer was 10 per cent. of the amount raised in several States together.

The two other committees are energetically co-operating in the effort to raise that sum. The People's Relief Committee held a mass meeting in New York City in March, 1917, and the Central Committee organized a series of thirty concerts of traditional synagogue music in various cities, the first of which was given in New York City in May, 1917.

The agent of the Joint Distribution Committee in Russia is the Jewish Colonization Association (ICA), which turns over the funds received to the Central Jewish Committee for the Relief of Sufferers in the War, with headquarters at Petrograd and local committees in almost one hundred and fifty centres of population. Up to July 15, 1917, the Russian Committee has received $2,532,300 from America. According to the latest available reports, there are in the Russian territory occupied by Germany about 1,760,000 Jews, of whom about three-quarters of a million, absolutely without means of self-support, are entirely dependent upon relief agencies. In this territory, until the United States became involved in the war, American funds were administered by the Jüdisches Hilfskomité für Polen (Jewish Relief Committee for Poland), which was formed shortly after the German occupation. This committee relied upon the Hilfsverein der Deutschen Juden for the transmission of funds to the various localities. Since the severance of relations between the United States and Germany, the American State Department has arranged for the transmission of the funds collected by the American Jewish Relief Committee, the Central Committee, and the People's Committee and paid into the Joint Distribution Committee, through the Dutch Ambassador at Washington, to Her Majesty the Queen of the Netherlands. The Dutch Government, on receipt of the funds, will in turn transmit them as apportioned to its diplomatic representatives in the different countries, who will turn the money over to the local committees of the Joint Distribution Committee, in each country, in the amounts for each city and town as fixed by the Committee of Dutch Jews that has been created for that purpose. Frederick Solomon Van Nierop, President of the Amsterdamsche Bank, is Chairman of the committee. Up to July 15, 1917, the Joint Distribution Committee has sent $2,522,434 for the relief of Jews in this territory.

The situation of the Russian Jews was duplicated in the case of the Jews of Galicia. This province of the Austro-Hungarian Empire was invaded by Russia at the very beginning of the war, and was for some time in the hands of the Russian forces. Hundreds of thousands of the inhabitants of Galicia, most of them Jews, fled from their homes into Hungary, Bohemia, Moravia, and Austria. The Austrian Government made efforts to care for these fugitives, placing them in concentration camps and appropriating money for their maintenance; but the greater mass of the Jews were unable to leave their homes. These had to be relieved by private agencies, and the work was undertaken by the Israelitische Allianz of Vienna, which organized committees in all large centres, that organization being selected by the Joint Distribution Committee as its agent for Austria-Hungary and Russian territory under Austria-Hungary's control. Up to July 15, 1917, $1,583,700 has been sent by the Joint Distribution Committee to the Israelitische Allianz.

REFUGEES FROM PALESTINE.

In Turkey, in Palestine, in Salonica, and in Alexandria, where a large number of refugees from Palestine are gathered, the American funds, which are sent periodically, are administered by local committees accredited by United States diplomatic officials. Besides appropriations which are made from time to time for Russia, Poland, Austria-Hungary, Turkey, Egypt, and Greece, the Joint Distribution Committee has rendered special aid also to Russian students at Swiss universities, Jewish prisoners of war, writers, rabbis, Turkish refugees in Spain, destitute families of Russian Jews in France, and has also made appropriations for Serbia, Roumania, Bulgaria, Tunis, Algiers, and Morocco. In almost every instance the Joint Distribution Committee extended the aid of American Jewry by the transmission of money, which was used according to the discretion of its agents abroad. There were, however, several departures from this prac-

tice. Thus, in March, 1915, nine hundred tons of provisions were purchased, and, through the courtesy of the Navy Department, were sent on the United States collier Vulcan to Palestine. In February, 1916, a consignment of drugs and other medical supplies, purchased at a cost of $15,944.37, was sent to Palestine on the United States collier Sterling.

About a month after the outbreak of the war and pending the organization of the American Jewish Relief Committee, there was organized by Miss Harriet B. Lowenstein a temporary bureau for the receipt of sums which individuals might desire to remit to relatives in the belligerent countries. This work was taken over by the Joint Distribution Committee upon its organization. Through the transmission bureau a great many persons who are willing to send funds to designated persons in the belligerent countries are thus enabled to do so without charge. This bureau has already forwarded such remittances to the amount of $500,000. As early as May, 1916, the sending abroad of a commission was taken under consideration. Dr. Magnes and Mr. Dushkin left the United States on July 26, 1916, and after short stays at Stockholm and Copenhagen, during which an ineffectual attempt was made to secure permission to enter Russia proper, they proceeded to Germany and visited Warsaw, Radzimin, Vilna, Kovno, Lodz, Lublin, Lemberg and Vienna.

Dr. Magnes investigated the charge against the leaders of the Hilfskomité für Polen, as to their having advocated a "Grenzsperre," and found it baseless. So also was found to be the fear that Russian Jews now under German rule would be in danger of being punished for receiving aid at the hands of German subjects. Further investigations led Dr. Magnes to conclude that, "if the work of Jewish relief was to be continued in Poland and Lithuania, it was possible only if there were a strong Jewish committee in Berlin as intermediary." He moreover reported that he found the existing Hilfskomité had been efficient and had consistently refrained from unduly dictating to local relief committees The territory under German occupation has been divided into two administrative districts: (1) 'General Gouvernment Warschau,' comprising the provinces formerly constituting the Grand Duchy of Poland, viz.: Grodno, Warsaw, Kalisch, Plotzk, Minsk, Lomza, Lukov, Siedlec, Petrikov; and (2) the 'Ober-Ost," comprising the conquered parts of Courland, Vilna, Suvalki, Grodno, and Bialistok. There are over 235,000 Jews in Ober-Ost and about 930,000 in General Gouvernment Warschau, making a total of 1,165,000. Of the two hundred and thirty-four communities investigated, one hundred and sixty-five, or over 70 per cent., have a Jewish population of less than 3,000, and one hundred and ninety-four, or more than 87 per cent., have a Jewish population of 5,000, or less. The significance of these figures lies in the fact that the problem of relief in small towns is much more acute than it is in larger cities or in rural communities. In the majority of the communities from 33 per cent. to 90 per cent. of the Jews are dependent upon relief agencies. In fifty-three of the centres, from 50 per cent. to 75 per cent. of the Jews are not self-supporting and are in need of relief. The average for the larger cities is about 36 per cent. who must be aided. In the entire territory about one-half million Jews depend for the daily necessaries of life upon the funds from America According to a report from the Hilfskomité, the total sum distributed in Poland up to April, 1916, was 2,500,000 marks for the two hundred and thirty-four communities reporting. The per capita amount is about one and one-third marks monthly. There is also a special class of Jews whose condition is even more wretched than that of the rest of the population, namely, the men, women, and children who have been driven from their homes because of evacuation orders, or who have voluntarily fled before the invader. It is estimated that there are in occupied Poland over 55,000 of this class, of whom more than 38,000 are women and children. These victims of the war are constantly moving from place to place, which makes it more than ordinarily difficult to relieve them.

Besides extending relief as outlined above, the Hilfskomité engaged in a number of auxiliary activities, the chief of which were the securing of information as to the whereabouts of friends and relatives in Poland, in reply to inquiries from persons in America, the transmission of appeals for help from the people in Poland to their relatives in this country, the locating of Russian-Jewish prisoners of war, and the general exchange of letters between individuals in America and others in Poland. It is variously estimated that in all between 750,000 and 1,250,000 Jewish refugees were spread over Russia and Southern Siberia. The work of aiding the sufferers is done by the Jewish Committee for the Relief of Sufferers from the War, with headquarters in Petrograd. The activity of this organization was at first centred on succoring the Jews in Poland, but with the conquest of that region by Germany the committee was obliged to leave the Polish situation in the care of the Hilfskomité, and to devote its attention to the many thousands of refugees who had gone into the interior provinces. The Petrograd committee is helped in its work by a number of territorial committees in the larger cities, such as Moscow, Kharkov, Kiev, and Odessa. This committee and the territorial committees act through local bodies, the organization and supervision of which are undertaken by experts employed by the central and territorial committees Assistance is rendered to the relief committees by several large Jewish organizations which existed before the war, and which, upon its outbreak, devoted themselves with increasing vigor to the pursuit of their benevolent aims. The most important of these organizations are: (1) The Society for Preserving the Health of the Jewish Population, which has a chain of subsidiaries in the provinces, and which extends medical and sanitary service and provides homes for the children of refugees; (2) the Society for Agricultural and Industrial Work Among Jews, which has established numerous branches and is helping refugees to find employment and also teaching them trades; (3) the Society for Spreading Education Among the Jews, which is looking after their educational and cultural needs.

ONLY 18,000 WERE SELF-SUPPORTING.

Otis A. Glazebrook, United States Consul, in a report received June 28, 1917, although dated Jerusalem, July 21, 1916, says that the actual Jewish population of Palestine, at that time, was about 82,000. Of this number only 18,000 were able to maintain themselves without applying to the committees in charge of the distribution of the money from America. The number of Jews in Turkey outside of Palestine is about 200,000, one-third of whom are in Constantinople. The military and naval operations in the Dardanelles, at Gallipoli, etc., in which many Jews were residents, and from which they either were driven out or fled, brought about a condition of abject poverty among these unfortunates, which resulted in the Joint Distribution Committee's sending large amounts, from time to time, to the United States Ambassador to be distributed under his direction. In Constantinople itself, Ambassador Morgenthau and his successor, Abram I. Elkus, reported that not less than 60,000 Jews were absolutely without means of self-support. For their relief soup kitchens were established, and other assistance was given through the aid of local committees of Jews. On December 18, 1914, seven hundred Russian Jews were expelled from Palestine. They arrived in Alexandria, Egypt, on the next day, having been transported by the United States cruiser Tennessee, and other ships of the United States Navy, whose commanders allowed their vessels to be used for this benevolent purpose. Since that time about 12,000 refugees from Palestine have landed in the Egyptian city, many having left of their own accord with means of their own, or with the assistance of relatives in America and elsewhere. About twelve hundred are still left in the care of the Jewish Community at Alexandria. When the war broke out, many Russian Jews took refuge in Bulgaria to which they were admitted on the promise of their co-religionists that they should not become public charges. The usual poverty in Tunis, Algiers, and Morocco has been accentuated by the fact that all business dependent upon visitors, tourists, etc., has come to an end. Hence the Jews in these countries have also received a small amount of relief, which up to date has totalled less than $10,000. The Russian students and writers who were in Switzerland seeking secular education in the various universities in that country found themselves, soon after the outbreak of the war, entirely cut off from their usual sources of income. Their appeal to the Joint Distribution Committee has been responded to by small appropriations ($6,000).

AMERICAN JEWISH WAR RELIEF—*Continued.*

JEWISH WAR RELIEF—FINANCIAL STATEMENT.

By Arthur Lehman, Treasurer of the Joint Distribution Committee—As of Sept. 15, 1917.

This body handles the funds collected by the American Jewish Relief Committee, the Central Relief Committee, and the People's Relief Committee.

THE COUNCIL OF NATIONAL DEFENSE.

(Prepared by the Committee on Public Information, at Washington, D. C.)

THE Council of National Defense was created under an act of Congress, approved August 29, 1916; and in the same act authority was granted for the creation of an Advisory Commission of seven persons to act with, under, and by the authority of the council. In the terms of the act the council is, among other things, charged with the "co-ordination of industries and resources for the National security and welfare," and with the "creation of relations which will render possible in the time of need the immediate concentration and utilization of the resources of the Nation."

In performing its functions the council is further charged with the following duties:

1. To supervise and direct investigation, and make recommendations to the President and the heads of executive departments as to—

(a) The location of railroads with reference to the frontier of the United States, so as to render possible expeditious concentration of troops and supplies to points of defense.

(b) The co-ordination of military, industrial, and commercial purposes in the location of extensive highways and branch lines of railroads.

(c) The utilization of waterways.

(d) The mobilization of military and naval resources for defense.

(e) The increase of domestic production of articles and materials essential to the support of armies and of the people during the interruption of foreign commerce.

(f) The development of seagoing transportation.

(g) Data as to amounts, location, method, and means of production and availability of military supplies.

(h) The giving of information to producers and manufacturers as to the class of supplies needed by the military and other services of the Government, the requirements relating thereto, and the creation of relations which will render possible in time of need the immediate concentration and utilization of the resources of the Nation.

2. To report to the President or to the heads of executive departments upon special inquiries or subjects appropriate thereto.

3. To submit an annual report to Congress, through the President, giving as full a statement of the activities of the council and the agencies subordinate to it as is consistent with the public interest, including an itemized account of the expenditures made by the council, or authorized by it in as full detail as the public interest will permit, providing, however, that when deemed proper the President may authorize, in amounts stipulated by him, unvouchered expenditures and report the gross so authorized not itemized.

The Council of National Defense is composed as follows:

Secretary of War Newton D. Baker, Chairman; Secretary of the Navy Josephus Daniels, Secretary of the Interior Franklin K. Lane, Secretary of Agriculture David F. Houston, Secretary of Commerce William C. Redfield, Secretary of Labor William B. Wilson.

The members of the Advisory Commission and the work of which they were put in particular charge were as follows:

Daniel Willard, Chairman, President of the Baltimore & Ohio Railroad—Transportation and communication.

Howard E. Coffin, Vice-President of the Hudson Motor Company—Munitions, manufacturing, including standardization and industrial relations.

Julius Rosenwald, President of Sears, Roebuck & Co.—Supplies, including clothing.

Bernard M. Baruch, financier—Raw materials, minerals, and metals.

Dr. Hollis Godfrey, President of the Drexel Institute—Engineering and education.

Samuel Gompers, President of the American Federation of Labor—Labor, including conservation of health and welfare of workers.

Dr. Franklin Martin, Secretary-General of the American College of Surgeons—Medicine, surgery, and sanitation.

The Director of the Council and Advisory Commission is Walter S. Gifford, and the Secretary of the Council and Advisory Commission is Grosvenor B. Clarkson; Richard H. Williams, Jr., Assistant to Director; Everett L. Crawford, Assistant to Director; Percy R. Pyne, 2d, Assistant to Director; George F. Porter, Assistant to Director; Preston Davie, Assistant to Director; Waddill Catchings, Assistant to Director; E. K. Ellsworth, Chief Clerk; Dr. Leonard P. Ayres, Statistician.

The work of the Advisory Commission is administered by seven distinct committees, with one of the commission members acting as chairman of each.

In addition to this system, the following sections and boards of the council may be considered as of primary importance and are closely correlated with the general committees, whose chairmen, in several cases, preside over the work of these boards.

The sections and boards are:

The General Munitions Board, Munitions Standard Board, Aircraft Production Board, Medical Section, Commercial Economy Board, Inter-Departmental Advisory Board, Co-operative Committees on the Purchase of Army Supplies (United States Chamber of Commerce), National Research Council, Committee on Shipping, Committee on Women's Defense Work, Committee on Coal Production, Section on Co-operation with States.

The Council of National Defense decided on July 28, with the approval of the President, to create a small body to be known as the War Industries Board. The War Industries Board, in addition to other duties, assumes those formerly discharged by the General Munitions Board. The new board is composed of seven members, working under the direction and control of the Council of National Defense and responsible through it to the President. Its members are direct representatives of the Government and of the public interests. They were, at first, Frank A. Scott, Chairman; Bernard M. Baruch, Robert S. Lovett, Robert S. Brookings, Hugh Frayne, Rear-Admiral Frank F. Fletcher and Lieut.-Col. P. E. Pierce. Mr. Scott resigned in the Fall, on account of ill health, and was succeeded by Daniel Willard.

The board acts as a clearing house for the war-industry needs of the Government, determines the most effective ways of meeting them, and the best means and methods of increasing production, including the creation or extension of industries demanded by the emergency; the sequence and relative urgency of the needs of the different Government services; considers price factors, and, in the first instance, the industrial and labor aspects of problems involved, and the general questions affecting the purchase of commodities. Mr. Baruch gives his attention particularly to raw materials, Mr. Brookings to finished products, and Mr. Lovett to matters of priority. These three members, in association with Mr. Hoover, so far as foodstuffs are involved, constitute a commission to arrange purchases in accordance with the general policies formulated and approved.

Advisory Commission—Daniel Willard, Transportation and Communication, Chairman; Howard E. Coffin, Munitions and Manufacturing; Julius Rosenwald, Supplies, including clothing, etc.; Bernard M. Baruch, Raw Materials, Minerals and Metals; Dr. Hollis Godfrey, Engineering and Education; Samuel Gompers, Labor, including conservation of health and welfare of workers; Dr. Franklin Martin, Medicine and Surgery, including general sanitation; Walter S. Gifford, Director of Council and Advisory Commission; Grosvenor B. Clarkson, Secretary Council and Advisory Commission, E. K. Ellsworth, Chief Clerk.

War Industries Board—*Purchasing Commission*—Bernard M. Baruch, Robt. S. Lovett, Robt. S. Brookings. *Storage Committee*—M. L. Cooke, Philadelphia, Pa., Chairman. *Committee on Priorities*—R. S. Lovett, Chairman; Major-Gen. J. B. Aleshire, George Armsby, Rear-Admiral N. E. Mason, Edward B. Parker, J. Leonard Replogle, Rear-Admiral A. V. Zane. *Committee on Emergency Construction*—Major W. A.

Starrett, Chairman; C. M. Lundoff, Crowell-Lundoff-Little Company of Cleveland; M. C. Tuttle, Aberthaw Construction Company, of Boston; Major William Kelley, Office of Chief of Ordnance; F. L. Olmstead, Landscape Architect; J. B. Talmadge, Secretary.

Director of Steel Supply—J. L. Replogle.

Commercial Economy Board—A. W. Shaw, President A. W. Shaw Company, Chairman; W. D. Simmons, Simmons Hardware Company; E. F. Gay, Dean of the Graduate School of Business Administration, Harvard University; George Rublee, Member of Eight-Hour Commission; Dr. Hollis Godfrey, Member ex-Officio; Henry S. Dennison, President Dennison Manufacturing Company.

Committee on Shipping—P. A. S. Franklin, President International Mercantile Marine; H. H. Raymond, President Coastwise Shipping Association; Eugene T. Chamberlain, Commissioner Bureau of Navigation; D. T. Warden, of the Standard Oil Company; L. H. Sherman, Vice-President W. R. Grace & Co.; E. M. Bull, Vice-President A. H. Bull & Co.; Frank C. Munson, President Munson Steamship Lines; Crawford H. Ellis, Vice-President United Fruit Company, New Orleans; M. J. McCrisaken, Secretary.

Committee on Women's Defense Work—Dr. Anna Howard Shaw, Honorary President of National American Woman Suffrage Association, Chairman; Mrs. Philip N. Moore, of St. Louis, President National Council of Women; Mrs. Josiah E. Cowles, of California, President General Federation of Women's Clubs; Miss Maude Wetmore, of Rhode Island, Chairman of National League for Woman's Service; Mrs. Carrie Chapman Catt, of New York, President of the National American Woman Suffrage Association; Mrs. Antoinette Funk, Lawyer, Chicago, Ill.; Mrs. Stanley McCormick, of Boston, Vice-President of the National Society of Colonial Dames; Mrs. Joseph R. Lamar, of Atlanta, Ga., President of the National Society of Colonial Dames; Miss Ida M. Tarbell, of New York, Publicist and Writer; Miss Agnes Nestor, of Chicago, Vice-President, International Glove Workers' Union; Miss Hannah J. Patterson; Mrs. Ira Couch Wood, Secretary.

Committee on Inland Water Transportation—Gen. W. M. Black, Chief of Engineers, Chairman; George E. Bartol, President Philadelphia Bourse; Captain J. F. Ellison, formerly Secretary National Rivers and Harbors Congress; Joy Morton, Director in many mercantile and transportation companies; James E. Smith, President Mississippi Valley Waterways Association; Walter S. Dickey, Manufacturer of Clay Products; President of Kansas City, Missouri River Navigation Company; M. J. Sanders, President New Orleans Board of Trade, Representative Harrison-Leyland Lines; Lt.-Col. C. Keller, Corps of Engineers, U. S. A., Secretary.

Section on Co-operation with States—George F. Porter, Director Chicago Transfer & Clearing Company, Director Judson Mining Corp., Chicago, Ill., Chief; William B. Hale, Kelly, Hale, Dammann & Coolidge, Chicago, Ill., Assistant Chief.

Committee on Coal Production—F. S. Peabody, President Peabody Coal Co., Chicago, Chairman; E. J. Berwind, President Berwind White Coal Mining Co., New York; W. W. Keefer, President Pittsburgh Terminal Railroad & Coal Company, Pittsburgh; Van H. Manning, Director United States Bureau of Mines, Washington; C. M. Moderwell, President United Coal Mining Company, Chicago; E. L. Pierce, Vice-President Semet Solvay Company, Syracuse; Erskine Ramsey, Vice-President Pratt Consolidated Coal Company, Birmingham; George Otis Smith, Director United States Geological Survey, Washington; James J. Storrow, Lee Higginson & Co., Chairman Massachusetts Committee on Public Safety, Boston; H. N. Taylor, Vice-President Central Coal & Coke Company, Kansas City; S. D. Warriner, President Lehigh Valley Coal & Navigation Company, Philadelphia; J. F. Wellborn, President Colorado Fuel & Iron Company, Denver; Daniel B. Wentz, President Stonega Coal & Coke Company, Philadelphia; George W. Elliott, of Gas and Electric Service Committee; John P. White, President United Mine Workers of America; Frank Hayes, Vice-President United Mine Workers of America; William Green, Secretary United Mine Workers of America; John L. Lewis, statistician United Mine Workers of America; James Lord, President of the Mining Department of the American Federation of Labor; John Mitchell, Chairman Industrial Commission of the State of New York; H. L. Kerwin, Secretary to the Secretary of Labor; Herbert Addison, Vice-President Big Horn Collieries, Wyoming; L. S. Storrs, President the Connecticut Company, New Haven, Ct.; George W. Reed, Secretary.

Committee on Engineering and Education—Dr. Hollis Godfrey, Drexel Institute, Philadelphia, Pa., Chairman; Dr. Henry E. Crampton, Columbia University, New York City, Vice-Chairman; Charles A. Stone, Stone & Webster, Boston, Mass.; Gano Dunn, J. G. White Corporation; Samuel M. Evans, Vice-President Eagle Picher Lead Company; Frederick W. Webster, Stone & Webster, Boston, Mass.; Van Rensselaer Lansingh, President, By-Lo Stores Co., Muncie, Ind.; H. A. Gardner, Institute of Industrial Research.

Subcommittee on Universities and Colleges—Dr. Hollis Godfrey, Chairman; Dr. Henry E. Crampton, Vice-Chairman; Edwin A. Aldermann, President University of Virginia; Guy Potter Benton, President University of Vermont; Kenyon L. Butterfield, President Massachusetts Agricultural College; Augustus S. Downing, Assistant Commissioner for Higher Education, University of the State of New York; Wilson Farrand, Head Master Newark Academy; Frank J. Goodnow, President Johns Hopkins University; Edward K. Graham, President University of North Carolina; Charles S. Howe, President Case School of Applied Science. Harry Pratt Judson, President University of Chicago; A. Lawrence Lowell, President Harvard University; Frank L. McVey, President State University of North Dakota; Alexander Meiklejohn, President Amherst College; Joseph A. Mulry, President Fordham University; John S. Nollen, President Lake Forest College; Raymond A. Pearson, President Iowa State College of Agriculture and Mechanic Arts, Ames, Iowa; Winthrop E. Stone, President Purdue University; Henry Suzzallo, President University of Washington; William O. Thompson, President Ohio State University; Robert E. Vinson, President University of Texas; Frederick C. Ferry; Dean Williams College, Secretary.

Subcommittee on Secondary and Normal Schools—Dr. Hollis Godfrey, Chairman; Dr. Henry E. Crampton, Vice-Chairman; Thomas Walter Butcher, Kansas State Normal School; Calvin Noyes Kendall, Commissioner of Education, Trenton, N. J.; Frank Thompson, Assistant Superintendent of Schools, Boston, Mass.; Charles A. Prosser, Director William Hood Dunwoodie Industrial Institute, Minneapolis, Minn.; Arthur David Dean, Supervising Officer of Vocational Education of the New York State Military Training Commission, New York; Robert Judson Aley, President University of Maine; Wilson Farrand, Head Master Newark Academy; John C. Garber, City Superintendent of Schools, Philadelphia, Pa.; J. H. Phillips, City Superintendent of Schools, Birmingham, Ala.; C. E. Chadsey, City Superintendent of Schools, Detroit, Mich.; J. D. Shoop, City Superintendent of Schools, Chicago, Ill.; R. J. Condon, City Superintendent of Schools, Cincinnati, Ohio; J. Y. Joyner, State Superintendent of Schools, Raleigh, N. C.; P. C. Cary, State Superintendent of Schools, Madison, Wis.; Payson Smith, State Superintendent of Schools, Boston, Mass.

Highways Transport Committee—Chairman, Mr. Roy D. Chapin, President Hudson Motor Car Company; Mr. Logan Waller Page, Director of the Office of Public Roads, Department of Agriculture; Mr. Henry G. Shirley, Chief Engineer Maryland State Roads Commission; Mr. George H. Pride, President Heavy Haulage Co., New York City.

Committee on Labor—Samuel Gompers, President American Federation of Labor, Washington, D. C., Chairman; William B. Wilson, Secretary, Department of Labor, Washington, D. C.; V. Everit Macy, President the National Civic Federation, New York City; James Lord, President Mining Department, American Federation of Labor, Washington, D. C.; Elisha Lee, General Manager Pennsylvania Railroad Company, Philadelphia, Pa.; Warren S. Stone, Grand Chief Brotherhood of Locomotive Engineers, Cleveland, Ohio; C. E. Michael, National Association of Manufacturers, President Virginia Bridge & Iron Company, Roanoke, Va.; Frank Morrison, Secretary American Federation of Labor, Washington, D. C.; Leo K. Frankel, Third Vice-President Metropolitan Life Insurance Company, New York City; James O'Connel, President Metal Trades Department, American Federation of Labor, Washington, D. C.; Louis B. Schram, Chairman Labor Committee United States Brewers' Association, Brooklyn, N. Y.; Ralph M. Easley, assistant to Samuel

Gompers as chairman of committee, New York City; James W. Sullivan, assistant to Samuel Gompers as member of Advisory Commission, Washington, D. C.; Miss Gertrude Beeks, New York City, Secretary.

Subcommittee on Mediation and Conciliation—V. Everit Macy, President the National Civic Federation, New York City, Chairman; Benjamin Ide Wheeler, President University of California, Berkeley, Cal.; H. B. F. MacFarland, Publicist, Washington, D. C.; Harry Pratt Judson, President University of Chicago, Chicago, Ill.; Edgar A. Bancroft, Attorney, Chicago, Ill.; Theodore Marburg, Publicist, Baltimore, Md.; John B. McPherson, Secretary of New England Civic Federation, Boston, Mass.; W. Z. Ripley, Professor of Political Economy, Harvard University, Newton Center, Mass.; Robert Bass, Peterboro, N. H.; John H. Finley, New York State Commissioner of Education, Albany, N. Y.; Jeremiah W. Jenks, Alexander Hamilton Institute, 13 Astor Place, New York City; William J. Schieffelin, Chairman Joint Board of Sanitary Control, 170 William Street, New York City; Ralph M. Easley, Chairman Executive Council National Civic Federation, New York City; Rabbi Stephen S. Wise, Fifty-Seventh Street and Seventh Avenue, New York City; Harden L. Crawford, Banker, 25 Broad Street, New York City; J. C. Walber, Secretary Bureau of Information of Eastern Railways, 5714 Grand Central, New York City; J. G. Schmidlapp, Cincinnati, Ohio; Myron T. Herrick, former Ambassador to France, Cleveland, Ohio; Clinton Rogers Woodruff, Secretary National Municipal League, Philadelphia, Pa.; Col. J. L. Spangler, Bellefonte, Pa.; Henry De Bardeleben, President Alabama Coal & Iron Company, Birmingham, Ala.; Joseph D. Grant, Burlingame, Cal.; William H. Crocker, President Crocker National Bank, San Francisco, Cal.; Harris Weinstock, President Weinstock, Nichols Company, San Francisco, Cal.; Isaac Ullman, President New Haven Chamber of Commerce, New Haven, Ct.; A. G. Haskell, E. I. du Pont de Nemours Powder Company, Wilmington, Del.; Charles P. Neill, Manager Bureau of Information Southeastern Railways, Room 616, Woodworth Building, Washington, D. C.; Hale Holden, President Chicago, Burlington & Quincy Railroad Company, 547 West Jackson Boulevard, Chicago, Ill.; J. W. Higgins, Secretary Western Presidents' Conference, Chicago, Ill.; Charles G. Dawes, President Central Trust Company of Illinois, Chicago, Ill.; B. A. Eckhart, President B. A. Eckhart Milling Company, Chicago, Ill.; H. M. Byllesby (substitute for G. H. Harries), 208 La Salle Street, Chicago, Ill.; Edward Hamlin, President Metropolitan Coal Co., Boston, Mass.; W. T. Barbour, Detroit, Mich.; August Belmont, August Belmont & Co., 43 Exchange Place, New York City; Nicholas F. Brady, President New York Edison Company, New York City; John D. Rockefeller, Jr., 26 Broadway, New York City; E. H. Outerbridge, President New York Chamber of Commerce, 53 Liberty Street, New York City; Emerson McMillan, President American Light & Traction Company, 120 Broadway, New York City; P. E. Rhode Island—Mrs. Rush Sturges, Greenwich; 110 Benevolent Street, Providence.
South Carolina—Mrs. F. Louise Mayes, Greenville.
South Dakota—Dr. Helen F. Peabody, Sioux Falls.
Tennessee—Mrs. George W. Denney, Knoxville.
Texas—Mrs. Fred Fleming, Dallas, 1934 North Carroll Avenue.
Utah—Mrs. W. M. Williams, Bishop Building, Salt Lake City.
Vermont—Mrs. John E. Weeks, 93 Maple Street, Middlebury.
Virginia—Mrs. B. B. Munford, Richmond, 503 East Grace Street.
Washington—Mrs. Winfield R. Smith, Cobb Building, Seattle.
Wisconsin—Mrs. Henry H. Morgan, State House, Madison.
Wyoming—Mrs. R. A. Morton, Cheyenne.
West Virginia—Mrs. J. G. Cochran, 1016 Market Street, Parkersburg.
Alaska—Mrs. Thomas J. Donohoe, Valdez.

THE PRESIDENT'S 1917 THANKSGIVING PROCLAMATION.

(Fixing the date as Thursday, November 29.)

IT has long been the honored custom of our people to turn in the fruitful Autumn of the year in praise and thanksgiving to Almighty God for His many blessings and mercies to us as a Nation. That custom we can follow now, even in the midst of the tragedy of a world shaken by war and immeasurable disaster, in the midst of sorrow and great peril, because even midst the darkness that has gathered about us we can see the great blessings God has bestowed upon us; blessings that are better than mere peace of mind and prosperity of enterprise.

We have been given the opportunity to serve mankind as we once served ourselves in the great day of our declaration of independence, by taking up arms against a tyranny that threatened to master and debase men everywhere and joining with other free peoples in demanding for all the nations of the world what we then demanded and obtained for ourselves. In this day of the revelation of our duty not only to defend our rights as a Nation, but to defend also the rights of free men throughout the world, there has been vouchsafed us in full and inspiring measure the resolution and spirit of united action. We have been brought to one mind and purpose. A new vigor of common counsel and common action has been revealed in us.

We should especially thank God that in such circumstances, in the midst of the greatest enterprise the spirits of men have ever entered upon, we have, if we but observe a reasonable and practicable economy, abundance with which to supply the needs of those associated with us as well as our own.

A new light shines about us. The great duties of a new day awaken a new and greater national spirit in us. We shall never again be divided or wonder what stuff we are made of.

And while we render thanks for these things let us pray Almighty God that in all humbleness of spirit we may look always to Him for guidance; that we may be kept constant in the spirit and purpose of service; that by His grace our minds may be directed and our hands strengthened, and that in His good time liberty and security and peace and the comradeship of a common justice may be vouchsafed all the nations of the earth.

Wherefore, I, Woodrow Wilson, President of the United States of America, do hereby designate Thursday, the 29th day of November next, as a day of thanksgiving and prayer, and invite the people throughout the land to cease upon that day from their ordinary occupations and in their several homes and places of worship to render thanks to God, the Great Ruler of nations.

In witness whereof I have hereunto set my hand and caused the seal of the United States to be affixed.

Done in the District of Columbia, this 7th day of November, in the year of our Lord, one thousand nine hundred and seventeen, and of the independence of the United States of America the one hundred and forty-second.

WOODROW WILSON.

By the President. ROBERT LANSING, Secretary of State.

JANUARY 6 IS BRITAIN'S DAY OF THANKSGIVING.

IN setting aside January 6, 1918, as the thanksgiving day throughout the British Empire, King George, in a proclamation on November 7, said:

"The worldwide struggle for the triumph of right and liberty is entering upon its last and most difficult phase. The enemy is striving by desperate assault and subtle intrigue to perpetuate the wrongs already committed and to stem the tide of a free civilization. We have yet to complete the great task to which more than three years ago we dedicated ourselves. At such a time I would call upon you to devote a special day to prayer that we may have the clear-sightedness and strength necessary to the victory of our cause."

THE RAILROADS' WAR BOARD.

(Prepared and Revised to November 30, 1917, by that Organization.)

ON April 11 of this year—five days after war was declared—the railroads of this country voluntarily agreed among themselves to merge competitive activities for the period of the war and subordinate all individual interests to service for the Nation. They agreed practically that all ownership names should be wiped out on the 260,000 miles of track owned by them and that their various lines should be operated as a single continental system, the operation to be directed by a committee of five known officially as the Executive Committee, but generally called the Railroads' War Board.

The War Board consists of Mr. Fairfax Harrison, of the Southern Railway; Mr. Howard Elliott, of the New York, New Haven & Hartford; Mr. Hale Holden, of the Chicago, Burlington & Quincy; Mr. Samuel Rea of the Pennsylvania, and Mr. Julius Kruttschnitt, of the Southern Pacific. Working with the War Board, are a number of subcommittees, some territorial to meet local problems as they arise, and others, like the War Board itself, national in scope and to handle such specific questions as car service, troop trains, military accounts, express service and the like. With the formation of the Railroads' War Board, a Nation-wide campaign of education was started to secure the co-operation of the shippers and the general public. What has been accomplished through this co-operation may be summarized as follows:

Freight congestion at many important shipping points has been averted by promptly moving empty cars from one railroad to another irrespective of ownership. Through the adoption of this policy, the railroads have been able to move more than 200,000 empty freight cars into districts where they have been most needed. Through the pooling of lake coal and lake ore, a saving of 52,000 cars in moving those commodities alone has been achieved. A further saving of 133,000 freight cars has been made possible by the pooling of tidewater coal. Approximately 30,000,000 miles of train service a year have been saved by the elimination of all passenger trains not essential to the most pressing needs of the country. This reduction of passenger service has released hundreds of locomotives and train crews and cleared thousands of miles of track that are absolutely needed in the freight service for the transportation of war-time necessities. In addition to maintaining the commercial life of the country at high pitch, the railroads have also delivered more than 100,000 carloads of supplies to the cantonments and other army training camps, and handled troop movements involving more than a million men. The complete freight statistics for 1917 were not available when THE WORLD ALMANAC went to press, but the records of the roads through October indicated that they would successfully handle at least 16 per cent. more freight in 1917 than in 1916; an increase equivalent to the combined freight traffic of Great Britain, France, Germany, Russia, and Austria.

Among some of the other things accomplished by the Railroads' War Board during the first eight months of its existence have been the designing of special equipment for hospitals and troop train service, the standardization of settlements between the Government and the railroads, eliminating a volume of correspondence, and red tape, and the creation of a Special Committee on Express Transportation composed of the Vice-Presidents of the American, Wells Fargo, and Southern Express Companies, to co-ordinate the work of the companies with the general problem of transportation.

Following is the full organization of the General Committee of the American Railway Association, which has been carrying on the war activities of the roads throughout the country:

General Committee—Fairfax Harrison, General Chairman; George Hodges, Assistant to General Chairman; J. E. Fairbanks, Secretary.

Northeastern Department—J. H. Hustis, Receiver, Boston and Maine, Boston, Chairman; H. M. Biscoe, Vice-President, Boston and Albany; Howard Elliott, Chairman, Committee on Intercorporate Relations, New York, New Haven & Hartford, *ex-officio*, E. J. Pearson, President, New York, New Haven & Hartford; Morris McDonald, President, Maine Central.

Eastern Department—L. F. Loree, President, Delaware & Hudson Company, New York, Chairman; Elisha Lee, Acting Vice-President, Pennsylvania; W. G. Besler, President & General Manager, Central of New Jersey; Samuel Rea, President, Pennsylvania, *ex-officio;* A. H. Smith, President, New York Central Lines; A. W. Thompson, Vice-President, Baltimore & Ohio.

Southeastern Department—W. J. Harahan, President, Seaboard Air Line, Norfolk, Va., Chairman; E H Coapman, Vice-President, Southern Railway; Lyman Delano, Vice-President, Atlantic Coast Line; R. V. Taylor, Vice-President and General Manager, Mobile and Ohio; W. A. Winburn, President, Central of Georgia.

Central Department—R. H. Aishton, President, Chicago & Northwestern, Chicago, Chairman; E. E. Calvin, President, Union Pacific; Hale Holden, President, Chicago, Burlington & Quincy, *ex-officio;* C. H. Markham, President, Illinois Central; H. V. Mudge, President, Denver & Rio Grande; G. L. Peck, Fourth Vice-President, Pennsylvania Lines West of Pittsburgh; E. D. Sewall, Vice-President, Chicago, Milwaukee & St. Paul; G. T. Slade, First Vice-President, Northern Pacific.

Southern Department—W. B. Scott, President, Southern Pacific, Texas-Louisiana Lines, Houston, Chairman; B. F. Bush, Receiver, Missouri Pacific; Julius Kruttschnitt, Chairman, Executive Committee, Southern Pacific, *ex-officio*, C. E. Schaff, Receiver, Missouri, Kansas & Texas; T. M. Schumacher, President, El Paso & Southwestern.

Western Department—Wm. Sproule, President, Southern Pacific Company, Pacific, San Francisco, Chairman; J. D. Farrell, President, Oregon-Washington Railroad and Navigation; C. M Levey, President Western Pacific; L. C. Gilman, President, Spokane, Portland & Seattle; R. S. Lovett, Chairman, Executive Committee, Union Pacific; E. P. Ripley, President, Atchison, Topeka and Santa Fé.

SUBCOMMITTEES.

Commisston on Car Service—C. M. Sheaffer, General Superintendent Transportation, Pennsylvania, Washington, Chairman; W. L. Barnes, Superintendent Transportation, Chicago, Burlington and Quincy; W. C. Kendall, Superintendent Transportation, Boston & Maine; G. F. Richardson, Superintendent Transportation, Southern Pacific; J. A. Somerville, General Superintendent Transportation, Missouri Pacific; D. E. Spangler, General Superintendent Transportation, Norfolk and Western; C. B. Phelps, Superintendent Transportation, Louisville & Nashville.

Military Equipment Standards—J. T. Wallis, General Superintendent Motive Power, Pennsylvania, Altoona, Chairman; C. E. Chambers, Superintendent Motive Power, Central of New Jersey; C. A. Lindstrom, Assistant to President, Pressed Steel Car Company; F. W. Mahl, Director of Purchases and Mechanical Engineer, Southern Pacific; Peter Parke, Chief Engineer, the Pullman Company; R. E. Smith, General Superintendent Motive Power, Atlantic Coast Line; C. B. Young, Mechanical Engineer, Chicago, Burlington and Quincy.

Military Transportation Accounting—A. H. Plant, Comptroller, Southern Railway System, Washington, Chairman; M. P. Blauvelt, Comptroller, Lehigh Valley; G. R. Martin, Vice-President, Great Northern; A. D. McDonald, Vice-President, Southern Pacific; C. B. Seger, Vice-President and Comptroller, Union Pacific; C. I. Sturgis, General Auditor, Chicago, Burlington & Quincy; John Carstenson, Vice-President, New York Central.

Military Passenger Tariffs—E. L. Bevington, Chairman, Transcontinental Passenger Association, Chicago, Chairman; F. C. Donald, Commissioner, Central Passenger Association; W. H. Howard, Chairman, Southeastern Passenger Association; C. L. Hunter, Vice-Chairman, Trunk Line Association; W. L. Pratt, Chairman, New England Passenger Association.

Military Freight Tariffs—L. Green, Vice-President, Southern Railway, Washington, Chairman; E. B. Boyd, Chairman, Western Trunk Line Association; L. E. Chalenor, Chairman, Southeastern Freight As-

THE RAILROADS' WAR BOARD—*Continued.*

sociation; R. H. Countiss, Chairman, Transcontinental Freight Bureau; F. A. Leland, Chairman, Southwestern Tariff Commission; C. C. McCain, Chairman, Trunk Line Association; E. Morris, Chairman, Central Freight Association.

Material and Supplies—H. B. Spencer, Vice-President, Southern Railway, Washington, Chairman; W. E. Hodges, Vice-President, Atchison, Topeka and Santa Fé; F. W. Mahl, Director of Purchases and Mechanical Engineer, Southern Pacific; W. H. Myers, Vice-President, Pennsylvania; J. W. Taylor, Assistant to President, Chicago, Milwaukee and St. Paul; George G. Yeomans, Purchasing Agent, New York, New Haven and Hartford.

Express Transportation—D. S. Elliott, Vice-President, American, Washington, Chairman; J. B. Hockaday, Vice-President and General Manager, Southern; F. S. Holbrook, Vice-President, Wells Fargo; H. E. Huff, Vice-President, Adams.

THE WORLD'S FOOD NEEDS.

(Official data by the Department of Agriculture.)

To supply the estimated needs of the United States, the Allies, and in part the neutral nations of Europe, the farmers of the United States must plant for 1918 about 238,000,000 acres of land to staple food crops. This is 22 per cent. more than the 195,000,000 acres which represent the ten-year average plantings, and 4.5 per cent more than the large acreage—227,000,000—of 1917. Compared with 1917 these acreages represent increases of 22 per cent. for Winter wheat, 15 per cent. for all wheat, 51 per cent for rye and 5 per cent. for oats and decreases of 6 per cent. for barley and of 8 per cent. for corn. Compared with the preceding ten-year average the proposed acreages represent 43 per cent. for Winter wheat, 5 per cent. Spring wheat, 29 per cent. all wheat, 124 per cent. rye, 7 per cent. barley, 27 per cent oats, and 7 per cent. corn.

The following table made public in October by the Food Administration shows the normal peace sources of the annual supplies of France, Italy, the United Kingdom and Belgium, being an average of the three-year pre-war period:

Commodity.	Production.	Imports From United States.	Imports From Canada.	Net Imports, Other Sources.	Consumption.
	Bushels.	*Bushels.*	*Bushels.*	*Bushels.*	*Bushels.*
Wheat	590,675,000	79,426,000	112,900,000	188,478,000	974,485 000
Corn	121,109,000	10,811,000	.....	135,675,000	266,596,000
Oats	570,890,000	6,783,000	16,580,000	88,612,000	682,865,000
Barley	125,201,000	4,946,000	6,660,000	63,030,000	199,793,000
Rye	78,573,000	567,000	60,000	11,309,000	90,537,000
Total	1,486,448,000	102,533,000	136,200,000	487,134,000	2,214,276,000

The normal imports of wheat are 381,000,000 bushels and of other cereals 345,000,000 bushels. The estimate of the 1917 harvest in the allied countries is as follows:

Commodity.	1917 Production.	Average Normal Production.	Deficiency in Production Due to War.	Commodity.	1917 Production.	Average Normal Production.	Deficiency in Production Due to War.
	Bushels.	*Bushels.*	*Bushels.*		*Bushels.*	*Bushels.*	*Bushels.*
Wheat	393,770,000	590,675,000	196,905,000	Barley	93,585,000	125,201,000	31,616,000
Corn	94,464,000	121,109,000	26,645,000	Rye	41,732,000	78,573,000	36,841,000
Oats	337,235,000	570,890,000	233,655,000	Total	960,786,000	1,486,448,000	525,662,000

In order to provide normal consumption it would be necessary to import in the next twelve months a total of 577,000,000 bushels of wheat and 674,000,000 bushels of other cereals. North America in 1917 will have an apparent surplus of wheat of 208,000,000 bushels and of other cereals of about 950,000,000 bushels.

Commodity.	United States 1917.	Av'ge Normal United States Consumption.	Probable United States Surplus.	Add Possible Canadian Surplus.
	Bushels.	*Bushels.*	*Bushels.*	*Bushels.*
Wheat	678,000,000	509,304,000	88,000,000	120,000,000
Corn	3,124,000,000	2,653,698,000	470,000,000	62,000,000
Oats	1,453,000,000	1,148,713,000	304,000,000	30,000 000
Barley	214,000,000	178,829,000	35,000,000	9,000,000
Rye	56,100,000	35,866,000	20,200,000	18,000,000
Total	5,525,100,000	4,607,410,000	917,200,000	239,000,000

After the 1917 grain harvests were over the International Institute of Agriculture, Rome, Italy, estimated the 1917 world yield as follows: Wheat in Algeria, 29,715,000 bushels, or 101.9 per cent. of the 1916 crop, and 94.5 per cent. of a five-year average, 1911-1915; barley in Algeria, 33,208,000 bushels, or 92.3 per cent. of the 1916 crop, and 85 per cent. of a five-year average, 1911-1915. Oats in Scotland, 49,528,000 bushels; in Ireland, 93,244,000 bushels; and in Algeria, 18,946,000 bushels, or 144.2 per cent. of the 1916 crop. The 1917 production of wheat in Spain, France, Scotland, Ireland, Switzerland, Canada, United States, India, Japan, and Algeria was given as 1,665,489,000 bushels, or 103.3 per cent. of the 1916 crop, and 88.6 per cent. of a five year average, 1911-1915. The 1917 production of rye in Spain, Ireland, Switzerland, Canada, and United States was put at 89,950,000 bushels, or 110.7 per cent. of the 1916 crop, and 126.8 per cent. of a five year average, 1911-1915. The 1917 production of barley in Spain, Ireland, Scotland, Switzerland, Canada, United States, Japan, and Algeria was given as 464,289,000 bushels, or 102.4 per cent. of the 1916 crop, and 98.4 per cent. of a five year average, 1911-1915. The 1917 production of oats in Spain, Switzerland, Canada, and United States was set at 1,995,504,000 bushels, or 119.9 per cent. of the 1916 crop, and 118.1 per cent. of a five year average, 1911-1915. The 1917 production of corn in Spain, Switzerland, and United States was put at 3,273,996,000 bushels, or 125.3 per cent. of the 1916 crop.

A United States Government estimate of the world's food animal increase or decrease in the past year is as follows:

In October, 1917.	Increase (+) or Decrease (—), United States.	Decrease, Western Allies.	In October, 1917.	Decrease in Other Countries, Including Enemies.	Total Net Decrease.
Cattle	+7,090,000	8,420,000	Cattle	26,750,000	28,080,000
Sheep	—3,000,000	17,500,000	Sheep	34,000,000	54,500,000
Hogs	+6,275,000	7,100,000	Hogs	31,600,000	32,425,000
Total	.....	33,020,000	Total	92,350,000	115,005,000

Co-operative steps have been taken by the Seed Stocks Committee of the United States Department of Agriculture and the Food Administration Grain Corporation to assure the holding of sufficient good seed wheat and rye to sow next year's war crops. The corporation exempted from its thirty day storage limitation lots of grain examined by the committee and found to be good for use as seed.

UNITED STATES CROPS IN THE CIVIL WAR.

(Showing the average yield per acre of the crops of 1863, and the average prices per bushel for them in the month of November, 1863.)

THE COUNTRY'S RICE STORAGE CAPACITY.

THE total storage capacity of rice mills, elevators, and warehouses, three-fourths of which is in the South, is 37,619,000 bushels, according to the Bureau of Markets of the United States Department of Agriculture. Not counting the warehouses used by rice importers, brewers, jobbers, or wholesale merchants, and therefore restricted largely to storages at points of production for domestic rice available as food, the figures show that the largest storages exist in Louisiana and Texas, with California and Arkansas the only other States having storages of 3,000,000-bushel capacity. The States rank as follows: Louisiana, 19,894,000 bushels; Texas, 10,476,000; California, 3,870,000, Arkansas, 3,079,000; Tennessee, 250,000; South Carolina, 50,000. Of the 233 warehouses, Louisiana has 133, storing 19,869,000 of the 36,529,000 bushels capacity of this form of storage.

WHAT NEW YORK CITY EATS IN A WEEK.

A special committee of the Chamber of Commerce has found that this is what New York City must have each week to keep from going hungry: Grain and flour, 2,160 carloads; milk, 2,000; vegetables, 1,636; dairy products, 760; fruits, 750; meats, 660; live stock, 518; groceries, 324; poultry, 215; canned goods, 206; sea food, 32; total, 9,261 carloads.

BANKING AND INSURANCE IN JAPAN.

(From Report of the Bank of Japan, covering year ending August, 1917.)

At the end of the period the bank's note issue was $302,050,147. Against this the bank held specie reserve at $242,530,250, and securities at $59,519,897, which total $302,050,147. Fixed loans amounted to $3,474,545, but advances to exchange banks came to $59,973,923. Rediscounts and other loans came to $24,583,780 and $254,542, respectively. The bank held at the end of the period Government deposits to the amount of $228,242,870, and private deposits to the amount of $13,065,010, exclusive of miscellaneous deposits. The surplus, or net profit for the term, was $2,338,942, and was distributed as follows: Ordinary dividends at 6 per cent. per annum, $560,812; reserve, $249,250; depreciation in properties, $4,985; bonuses and social expenses for officers, $90,727; secondary dividends at 6 per cent. per annum, $560,812; carried forward to next term, $872,356; total, $2,338,942.

According to the Department of Agriculture and Commerce, in July the insurance companies of Japan held 3,629,955 policies, amounting to $2,818,344,992. The numbers and amounts in gold dollars in each class were: Life insurance, 1,948,815 policies, $608,852,930; conscription insurance, 306,402, $25,331,716; accident insurance, 14,762, $13,113,066; fire insurance, 1,252,117, $1,736,559,669; marine insurance, 61,603, $415,495,416; freight insurance, 6,850, $9,255,212; miscellaneous, 39,406, $9,736,983; total, 3,629,955 policies, $2,818,344,992.

RETAIL PRICES OF FOOD FOR SEVERAL YEARS.

(By the United States Department of Labor.)

FAT—A NECESSARY CONSTITUENT OF THE DIETARY.

(By the New York City Health Department.)

Among the many contributions to our knowledge made by the war, none are of greater interest or more important than those made in the domain of dietetics. This is due largely to the economies enforced in almost all the warring countries because of diminished available supplies of certain staple foodstuffs. So far as the fat content of the diet is concerned, the feeding of the civilian Belgium population, for example, showed, according to Mr. Hoover, that health could be maintained by a daily ration providing 40 grams of fat. The present German ration provides but little over 30 grams of fat, while the consumption of fat by the American people is over 150 grams per person per day. At one time it was thought that fat and carbohydrate, both being fuel foods, could be substituted one for the other in the diet, merely making the appropriate allowance as based on the caloric value of the food. This is now known not to be the case; a certain amount of fat in the diet is indispensable. According to Mr. Hoover, an increase in tuberculosis manifested itself among the Belgian children when the fat ration was reduced too low. A more striking effect of a restricted fat ration is afforded in what has become known in Germany as "Kriegsoedem" (war-oedema). This is a peculiar disease which appears to have become widespread in Germany during the present year, and which, according to the scientists over there, is distinctly a nutritional disorder.

SEED PLANTING IN THE UNITED STATES.

(Compiled from reports of the Department of Agriculture.)

NEW ENGLAND.

Kind of Crop.	Date of Planting.	Best Soil.	Amount of Manure per Acre.	Amount of Seed per Acre (1).	Weeks to Maturity.
Corn	May 10 to 30	Sandy or clay loam	8 to 12 tons	8 to 12 qts	14–17

Rye	Sept. to Oct	Clay loam (2)	10 tons	1½ bush	43
White beans	Mar. to May	Light loam	8 tons	1 to 2 bush	7–8
Cabbage	Oct., Mar. to May	Light loam	6 to 10 tons	¼ to ½ lb	14
Watermelons	Mar 1 to May 10	Rich, light loam	5 tons; 300 lbs. fer	2 to 7 lbs	16–20
Onions	Feb. 1 to Apr. 10	Loam or muck			16–24
Potatoes	Jan., Feb. to Apr	Light, loose loam	8 to 12 tons	8 to 10 bush	11–15
Sweet potatoes	May to June	Sandy loam		10 to 12 bush	12–15
Pumpkins	Apr. 1 to May 1	Rich, light loam		4 to 7 lbs	17–20
Tomatoes	Jan. 1 to Feb. 19	Rich, sandy loam		4 to 9 oz	14–20
Turnips	Feb., Aug., Apr	Rich, light loam		2 to 6 lbs	8–12
Tobacco	Seed bed, Mar	Sandy loam	8 to 15 tons	oz. to 6 sq. rd.	18–20
Cow peas	May 1 to July 15	Sandy loam	200 to 300 lbs. phos.	2 to 5 pecks	6–8

(1) The standard varieties of seed planted in the several sections of the United States are as follows: Corn—New England, leaming, sanford; flint; Middle States, leaming, white dent, yellow dent; Central and Western States, leaming, sanford, flint, white dent; Southern States, hickory king, goard-seed, Cox prolific. Wheat—Middle States, fultz; Central and Western States, fultz, poole, fife; Southern States, fulcaster. Oats—New England, white; Middle States, white, black; Central and Western States, gray Norway silver mine, Russian; Southern States, Texas rustproof. Barley—Middle States, mansbury; Southern States, Tennessee Winter. Rye—New England, white; Middle States, white, Winter; Central and Western States, Winter; Southern States, excelsior Winter. Buckwheat—Middle States, silver hull; Central and Western States, silver hull. Potatoes—New England, green mountain, carmen 3, rose; Middle States, rose, carmen 3, rural 2; Central and Western States, hebron, rural, early rose, early Ohio. Tobacco—Central and Western States, yellow prior, Spanish, white burley. Hay, clover—Middle States, medium red. Sweet Potatoes—Middle States, yellow Jersey; Southern States, yellow Jersey. Cotton—Southern States Texas stormproof. Spring wheat is to some extent grown in Ohio, Indiana, Illinois and many other States. It matures in eighteen to twenty weeks.

(2) In Texas the black loam is a good soil for cotton, corn, wheat and most other field crops.

AMERICAN WOOL PRODUCTION.

(Government estimate.)

THE production of raw wool in 1917 in the United States is about 245,573,000 pounds, which is 683,000 pounds more than in 1916. These estimates do not include pulled wool, which amounted to about 43,600,000 pounds in 1916. The average price of wool to producers on August 15, 1917, was about 54.8 cents per pound, compared with 29 cents on August 15, 1916.

* No. 2 cash wheat. † The Leiter "corner" figure.

The above table was compiled by Charles B. Murray, Cincinnati, Ohio.

The high and low prices of wheat in the Chicago market in 1917, for future delivery, on the last ten days before future trading was suspended by the Board of Trade:

	SEPTEMBER.			SEPTEMBER.	
	High.	Low.		High.	Low.
August 15, 1917	206	200	August 21, 1917	210	207
" 16, "	200	199¼	" 22, "	210	204
" 17, "	201	200	" 23, "	207	204½
" 18, "	202¾	202	" 24, "	212	208
" 20, "	205	205	" 25, "	213	210½

The range of price of wheat for delivery during the month of September, 1917, in August was $1.99¾ to $2.31 per bushel.

WHEAT RANGE.	WHEAT RANGE.	WHEAT RANGE.	WHEAT RANGE.

THE NATIONAL SECURITY LEAGUE.

ORGANIZED December 1, 1914, in response to a call issued by S. Stanwood Menken, Herbert Barry, George Haven Putnam, Lawrence F. Abbott, J. Mayhew Wainwright, Charles E. Lydecker and Franklin Q. Brown.

Immediately after this organization, a campaign was conducted to bring to the American people a realization of our lack of national defense and it was largely through the efforts of the league that Congress enacted measures strengthening the Army and Navy. As soon as the United States declared war against Germany the league undertook to bring to the American people better understanding of the issues involved in the war and the direct personal interest of each individual in its vigorous and successful prosecution. A campaign of patriotic education was inaugurated and is being conducted upon a broad scale. State-wide speaking campaigns have been held in New York, New Jersey, Vermont, Kentucky, and many other States, while plans are now in progress in twenty-four States. Nearly one thousand men volunteered their services as speakers. Co-operation has been secured from over one hundred colleges and universities and many State Councils of Defense, while Federal and State officials are giving their support to the movement.

Enormous quantities of literature, explaining why the United States is in the war, are being distributed throughout the country. The League is giving practical assistance to the Food Administration Bureau and the Liberty Loan Committee, and has been instrumental in forming Home Defense Leagues in many cities. The League is developing a working organization of over one hundred thousand members in all States, and with nearly three hundred branches and committees.

In connection with its work of patriotic education the League is conducting a vigorous campaign for the establishment of a Universal Military Training and Service as the permanent principle of national defense and not merely as an emergency measure. It is also advocating Government efficiency, industrial preparedness, country above party and a unified national spirit.

The League is incorporated under the laws of the State of New York, and its officers are:

Honorary President—Elihu Root. *Honorary Vice-President*—Alton B. Parker. *President*—S. Stanwood Menken. *Secretary*—Herbert Barry. *Treasurer*—Edward H. Clark. *Executive Secretary*—Henry L. West. Headquarters, 31 Pine Street, New York.

HOGS IN THE UNITED STATES

THE total number of stock hogs in the United States September 1, 1917, and 1916, is estimated as follows:

NEW AMERICAN MEAT-PACKING PLANT IN BRAZIL.

(From United States Consul-General Alfred L. Moreau Gottschalk, Rio de Janeiro.)

ARMOUR & CO., of Chicago and Buenos Ayres, are erecting a very large plant four miles from Sao Paulo on the Sao Paulo and Sorocobana Railway. The company handles 2,000 cattle, 3,000 hogs, and 2,000 sheep a day when running at full capacity, and will have over 3,000 employés on its pay roll. The company already has a plant at Santa Anna do Livramento, a station on the Brazil Railway close to the Uruguayan frontier. One of the plans of the company is the establishment of a breeding department that will be stocked with high bred cattle, hogs, and sheep. It is proposed to institute an active campaign of education among breeders and to loan them stud animals when necessary, as well as to sell breeding animals practically at cost.

AMERICAN SOCIETY OF LANDSCAPE ARCHITECTS.

Officers: *President*—James Sturgis Pray, 50 Garden Street, Cambridge, Mass. *Vice-President*—Harold A. Caparn, 220 West Forty-second Street, New York City. *Treasurer*—Henry V. Hubbard, 101 Tremont Street, Boston, Mass. *Secretary*—Alling S. DeForest, 222 Sibley Block, Rochester, N. Y.

THE AMERICAN PEDIATRIC SOCIETY.

President—L. E. La Fétra, M. D., New York City. *Vice-President*—H. M. McClanahan, M. D., Omaha, Neb. *Secretary*—Howard Childs Carpenter M D., 1805 Spruce Street, Philadelphia, Pa. *Treasurer*—Charles Hunter Dunn, M. D., Boston Mass.

HIGH QUOTATIONS FOR RAW AND REFINED IN 1917.

The "high" price of raw sugars in 1917 was reached on August 9, when sales were made of August-September shipment at 6 3-4c. and f. or 7.78c. per pound, landed at New York, duty paid. Previous high prices were:

Raws, duty paid—1889, 8.025c.; 1881, 8.765c.; 1869, 14.50c.

Raws, cost and freight—1889, 5.785c.; 1881, 5.955c.; 1869, 11.00c.

The "high" quotation reached for refined sugar in 1917 by any one refiner was Arbuckle's price of 9.15c. less 2 per cent. (8.967c. net cash) in August, but at the same time sugars were obtainable in a limited way as low as 8.40c. by the American and 8.50c. by the National. These prices compared with the highest level of 9.375c. in 1889, 10.42c. in 1881, and 16.75c. in 1869. Hawaii, St. Croix and Porto Rico sugars all come to the United States, while Cuba ships to various other countries, the largest importers being the United States and England.

COFFEE TRADE OF THE UNITED STATES.

(Official data of the Department of Commerce.)

STATISTICAL returns relating to the coffee trade of the United States show the record-breaking figure 1,319,870,802 pounds as the quantity imported in the 12 months ended June 30, 1917—an amount which maintains the 100,000,000 pounds a year increase that has marked the American imports of coffee since the outbreak of the war in Europe, and which exceeds by about 250,000,000 the former high records of 1,049,-868,768 pounds imported in 1909 and 1,091,004,250 pounds in 1902. Deducting re-exports of 51,848,440 pounds would leave a net importation of 1,268,022,362 pounds, an increase of 12 per cent. over the net imports in 1916.

Largely increased cargoes were received during the last fiscal period from Brazil, Colombia, Salvador, Guatemala, Mexico, Cuba, Hayti, Costa Rica, Ecuador, Nicaragua, Panama, Chile, the Dutch West Indies, and British Guiana, the imports from these countries showing, in the aggregate, a gain over 1916 of 145,000,000 pounds. With the exception of Canada, Honduras, the Netherlands, and British East Africa, the imports of coffee into the United States from all other countries declined in the fiscal year 1917, as the following table discloses:

STATISTICS OF COFFEE IMPORTS.

Imported From—	Fiscal Year Ended June 30— 1912.	1913.	1914.	1915.	1916.	1917.

TRADE AT NEW YORK, NEW ORLEANS, AND SAN FRANCISCO.

The European war has resulted in sending Brazilian coffee over new trade routes to different markets. New York and London are now the chief distributing centres for the world's trade in this commodity, the latter having become the market for the Brazilian coffee formerly shipped to Havre and Hamburg. New Orleans and San Francisco remain, respectively, the second and third coffee-importing cities of the United States. The quantities imported at the three leading American ports and the share each had in the total trade during the last five years were:

Fiscal Year Ended June 30—	Total Imports (Pounds).	New York.		New Orleans.		San Francisco.	
		Pounds.	Per Cent.	Pounds.	Per Cent.	Pounds.	Per Cent.
1913	863,130,757	554,571,449	64.2	263,382,962	30.5	36,067,073	4.2
1914	1,001,528,317	633,400,209	63.2	308,008,145	30.8	46,721,824	4.6
1915	1,118,690,524	758,160,133	67.8	307,868,932	27.5	45,844,060	4.1
1916	1,201,104,485	814,394,074	67.8	308,513,290	25.7	71,346,788	5.9
1917	1,319,870,802	932,098,113	70.6	274,989,692	20.8	97,821,069	7.5

A gain of 26,474,281 pounds in the arrivals at San Francisco was a feature of the 1917 trade. This upward trend is continuing in the current fiscal year, as two of the largest single consignments of coffee ever received at San Francisco arrived in July, consisting of 106,000 and 102,004 bags, respectively.

SHIPMENTS TO FAR EAST—EXPORT OUTLOOK FOR NEW YEAR.

The official figures of the exports of foreign coffee from the United States for the last six years follow:

Exported To—	Fiscal Year Ended June 30— 1912.	1913.	1914.	1915.	1916.	1917.

COFFEE TRADE OF THE UNITED STATES—*Continued.*

Asiatic Russia received large stocks of foreign coffee from the United States in the fiscal year just ended, but the closing of the port of Vladivostok may interfere to a considerable extent with the regular receipt of future supplies. In this connection, however, the remarkable increase in the exportation of foreign coffee from the United States to Japanese China, Hongkong, Japan, and Russia in Asia during 1917, these shipments aggregating 24,715,182 pounds, against 493,258 pounds in the preceding fiscal twelve-month, should be noted, with the equally striking advance from 234,174 pounds in 1916 to 4,468,183 pounds exported to China in 1917, or a total exportation last year to the Far Eastern countries named of 29,183,365 pounds—nearly three-fifths of the total American exports of foreign coffee. All this is a distinctly new departure, for the United States has sent only negligible quantities of coffee to these countries for a period of years past.

Using the foregoing figures, the average prices per pound at port of shipment in 1917 varied only by a fraction of a cent from those for 1916, which were 15 cents for green or raw and 20 cents for roasted or prepared coffees. The average value per pound of the re-exported foreign coffee in 1917 was 13.3 cents, as contrasted with 11.6 cents in 1916, 11.3 cents in 1915, 13.3 cents in 1914, and 11.6 cents in 1913, showing slighter fluctuations than might have been expected since the beginning of the war. Current market reviews indicate that the prices of coffee in the producing countries have declined slightly.

Computations of the trade press give the quantity in stock in the United States the first week of August, 1917, as 2,891,891 bags. The closing of European markets to the coffee of Central and South America has apparently not greatly retarded the growth of the industry in the Latin Republics, Guatemala especially showing a large gain in coffee culture. Increased acreage devoted to the cultivation of this staple in French Indo-China, a record yield promised in Brazil, 200,000,000 pounds of Java that press reports state are now held in Batavia awaiting transportation, and large crops in Arabia and Abyssinia insure an abundant world supply for 1918.

FEDERAL FARM LOANS MAY REACH $200,000,000.

(By the United States Farm Loan Board.)

More than 4,000 farm-loan associations are in the process of organization in the United States to borrow money under the Federal farm-loan act. Twelve hundred are already completely organized and chartered and loans are being made to the farmers who compose these associations at a remarkable rate. The amount borrowed by each association is approximately $50,000, and should all of the 4,000 associations now organizing borrow at the same rate as those already chartered, $200,000,000 will have been loaned by the 12 Federal land banks within a year. The total amount of loans actually paid out to farmers is $7,716,-133. This represents approximately three months of actual lending. Approximately $25,000,000 of loans which have been approved by the Federal Farm Loan Board are awaiting abstracts to be supplied by the borrowers.

The total amount of loans closed, up to September 1, 1917, was as follows:

MILK AS A FOOD.

The following table, compiled by specialists of the United States Department of Agriculture, show the quantities of various foods needed to supply as much protein or energy as 1 quart of milk.

PROTEIN.		ENERGY.	
1 quart of milk:		1 quart of milk:	
7 ounces of sirloin steak.	4.3 eggs.	11 ounces of sirloin steak.	8½ eggs.
6 ounces of round steak.	8.6 ounces of fowl.	12 ounces of round steak.	10.7 ounces of fowl.

Another method of comparison is shown by the table below, in which the relative value of certain foods as economical sources of protein is given:

TO SUPPLY PROTEIN AT EQUAL COST.

Milk at—	As cheap as—		Milk at—	As cheap as—	
	Sirloin Steak at—	Eggs at—		Sirloin Steak at—	Eggs at—
Cents a quart.	*Cents a pound.*	*Cents a dozen.*	*Cents a quart.*	*Cents a pound.*	*Cents a dozen.*
7	16.3	17.6	10	23.3	25.1
8	18.6	20.1	12	27.9	30.2
9	21.0	22.6	15	34.9	37.7

According to this table, if milk is selling at 10 cents a quart sirloin steak must sell as low as 23.3 cents a pound and eggs at 25.1 cents a dozen to supply protein at equal cost.

TO SUPPLY ENERGY AT EQUAL COST.

Milk at—	As cheap as—		Milk at—	As cheap as—	
	Sirloin Steak at—	Eggs at—		Sirloin Steak at—	Eggs at—
Cents a quart.	*Cents a pound.*	*Cents a dozen.*	*Cents a quart.*	*Cents a pound.*	*Cents a dozen.*
7	9.9	9.3	10	14.2	13.2
8	11.3	10.6	12	17.0	15.9
9	12.8	11.9	15	21.3	19.8

In comparing foods it is necessary to consider both the protein and the energy furnished. Neither one alone can properly be used as a basis of comparison, nor is there any correct way to reckon the value of a food by considering the total amount of nutritive elements. In addition to being an economical food, milk is usually easily digested and requires no cooking or other preparation for the table. Specialists of the department have found, also, that it is digested better when taken with other foods.

AMERICAN MATHEMATICAL ASSOCIATION.

Society was reorganized July, 1894. Object—To encourage and maintain an active interest in and to promote the advancement of mathematical science. Officers: *President*—L. E. Dickson. *Secretary*—F. N. Cole. *Treasurer*—J. H. Tanner. *Librarian*—D. E. Smith. Offices, 501 West 116th Street, New York City.

To pounds and bushels barrels and tons as they appear in the table the figures 000 are to be added.

Winter wheat production in 1917 is estimated at 417,347,000 bushels, rye at 56,044,000 bushels.

Rice production in the United States in 1917 is estimated by the Department of Agriculture at 32,237,000 bushels; flaxseed at 10,957,000 bushels; sugar beets at 7,945,000 tons; sorghum syrup at 18,496,000 gallons; onions, 13,890,000 bushels; cabbage, 767,340 tons.

ARGENTINE MEAT EXPORTS FOR SIX MONTHS.

(Government figures.)

FOREIGN meat shipments during the first six months of 1917 show a slight falling off in comparison with the corresponding period of 1916.

Shipping Company (Packing House).	January-June, 1916.			January-June, 1917.

Total	1,122,221	2,697,095	469,016	937,493	2,582,025	376,983

To the figures above for the shipments of sheep and frozen beef in the 1917 period should be added the exports of the Anglo-South American Meat Co., amounting to 54,597 carcasses of sheep and 78,484 quarters of frozen beef, making these totals 992,090 and 2,660,509, respectively This company did not ship any during the first six months of 1916.

COMMERCE OF ALASKA WITH THE UNITED STATES.

(Government figures.)

THE movement of merchandise between Alaska and the United States reached its highest record in the fiscal year ended June 30, 1917, aggregating practically $100,000,000 in round numbers. The exact figures are $99,765,908 in 1917, exceeding the trade in 1916, the previous high year, by 23½ million dollars, and more than double the trade in 1915, which amounted to $48,702,387. The shipments of merchandise to the United States were valued at $60,773,850, of which $60,135,205 was of domestic and $638,645 of foreign production. The shipments of merchandise from the United States to Alaska amounted to $38,992,049, of which $38,427,618 represented domestic production and $564,431 foreign. The merchandise shipped from the United States to Alaska represents a per capita purchasing power of $600 based on the estimated population of 64,828 in 1916. The shipments from the United States to Alaska exceed the exports to China, which has a population of 336,000,000. The exports to China in 1917 were about $35,000,000, only 10½ cents per capita.

Copper ore, matte, and regulus represented more than one-half of the value of shipments to the United States and canned salmon more than one-third. The value of domestic copper shipments to the United States for the year ended June 30, 1917, was $33,098,190 against $5,182,004 for 1915, an increase of almost $28,000,000 in two years. Canned salmon shipments were 231,372,337 pounds valued at $21,195,612 in 1917, against 192,254,877 pounds valued at $17,590,317 in 1916. The shipments of canned salmon to the United States in 1917 averaged more than 2¼ pounds per capita. Besides canned salmon, Alaska sold to the United States other salmon valued at $1,034,112; fresh fish, $764,320; cured fish, $183,773; kippered herring, $112,254; pickled fish, $253,469; and all other fish—chiefly shrimp and oysters—valued at $290,122. In 1917, 7,061 sealskins valued at $211,830 were shipped from Alaska to the United States against 2,884 skins valued at $115,360 in 1915, an increase of 145 per cent. in the number of skins shipped in 1917 compared with 1915. The average value per skin was $30 in 1917 against $40 in 1915. Other principal commodities shipped to the United States in 1917 were fertilizers valued at $28,959; gypsum, $62,000; antimony ore, $178,215; lead ore, $95,593; tin ore, $54,147; tungsten ore, $54,870; and stone, $110,101.

The principal shipments to Alaska from the United States were breadstuffs, $1,303,218; cars and automobiles, $721,358; cotton manufactures, $1,530,197; explosives, $1,278,026; fiber manufactures, $865,150; fruits and nuts, $842,876; manufactures of iron and steel, $10,141,416, in which are included 38,828,357 pounds of tin plates valued at $2,501,759; meat and dairy products, $3,493,876; mineral oils, $1,385,186; paper manufactures, $740,971; tin manufactures, chiefly tin cans, nested cans and tin-can tops $3,894,165; tobacco manufactures, $802,730; vegetables, $829,498; and manufactures of wood, $1,822,459. Gold ranks third in value of Alaskan products shipped to the United States in 1917. The gold shipments amounted to $15,409,529, and the silver shipments to $683,824. The gold and silver shipments from the United States to Alaska during last year amounted to $1,698,065.

CUBA'S NEW TAXES.

AMONG the provisions of the law of July 31, 1917, are the following relating to the collection of new taxes beginning September 1, 1917: On cattle hides not intended for tanneries or establishments manufacturing leather articles, a tax of 50 cents per 100 pounds is to be collected; articles included under tariff numbers 25 and 26 are subject to an additional tax equal to the amount of duty; for articles included under tariff numbers 30 and 297 an additional tax of 25 per cent. of the duty is prescribed. The following extract from the customs tariff of Cuba shows the articles affected by the above provisions and the rates of duty to which they are subject under the tariff, without the new surtaxes:

TARIFF No.	Articles.	General Rate.	Reduction to United States.	Rate to United States.
25	Gold and platinum, or alloys thereof in the form of jewelry, with or without precious stones or pearls; silver jewelry with precious stones or pearls; and precious stones, pearls, and seed pearls not set (net weight)	*Per hectogram.* 9.375	*Per cent. of duty.* 20	*Per hectogram.* 7.50
26	Gold, platinum, or alloys thereof in any other form (net weight)	3.50	20	2.80
30	Gold and silver plated ware of all kinds, and jewelry made of metal, gold or silver plated, with or without precious stones or imitations thereof	*Per cent. ad val.* 32.5	30	*Per cent. ad val.* 22.75
	All articles plated with gold or silver by any process or in any proportion, or washed with silver, however slightly, No. 30			
	Compasses of all kinds, gold or silver plated, No. 30.			
	Safety razors and steel blades for the same, whether the latter come with the razors or as extra parts, No. 53c; when gold or silver plated, No. 30			
297	Trinkets and ornaments of all kinds (except those of gold or silver, gold or silver plated, and those in which the component substance of chief value is amber, jet, tortoise shell, coral, ivory, meerschaum, mother-of-pearl, horn, whalebone, celluloid, bone, or imitations thereof) (net weight)	*Per kilo.* $0.975	20	*Per kilo.* $0.78
	Pins of iron or steel, with glass head, spherical or otherwise, of any color, No. 297			

THE SOCIETY OF AMERICAN INDIANS.

This society is a national organization of persons of Indian blood and their friends and associates among the whites. The purpose of the organization is to uplift and advance the scattered remnants of the Indian people and to stimulate industrial progress. It co-operates with the Government and private associations and missions. The membership is about 3,000, together with an associate division of some 1,500. During 1917 the society launched a campaign to secure subscriptions for the Liberty Loan. Several millions were secured from Indians, especially in Oklahoma, by the Vice-President on Education, Hon. Gabe E. Parker, formerly Register of the Treasury. The society sought to induce Indians to enter the United States army and argued against separate Indian regiments. During the period of the war the society will suspend its annual meetings, because of the large proportion of its members and officers in Federal service.

The society publishes The American Indian Magazine. The society was organized at the Ohio State University in April, 1911. Headquarters, Barrister Building, Washington, D. C. The officers are: *President*—Arthur C. Parker, University State of New York, Albany, N. Y. *Vice-President*—Lieut. John M. Oskinson, Collier's Weekly, New York City. *Secretary*—Gertrude S. Bonnin (Zitkala-Sa), Washington, D. C. *Executive Council*—Rev. Sherman Coolidge, President; W. A. Durant, First Vice-President; Estaiene De Peltquestangue, Vice-President on Membership, Henry Roe-Cloud, Vice-President on Education; T. L. Sloan, Vice-President on Legislation; Arthur C. Parker, Secretary; Marie L. B. Baldwin, Treasurer; Prof. F. A. McKenzie, Associate Chairman; Dr. Thomas C. Moffett, Associate Secretary.

CANADA'S WOOD PULP INDUSTRY.

The following table shows the quantity and value of the pulp wood used by Canadian mills during the last nine years:

Years.	Cords.	Value.	Years.	Cords.	Value.
1908	482,777	$2,931,653	1913	1,109,034	$7,243,368
1909	622,129	3,464,080	1914	1,224,376	8,089,868
1910	598,487	3,585,154	1915	1,405,836	9,426,217
1911	672,288	4,338,024	1916	1,764,912	13,104,458
1912	866,042	5,215,582			

Of the five provinces engaged in this industry, Quebec, Ontario, and British Columbia increased their production and New Brunswick and Nova Scotia declined.

As in the past, spruce headed the list in the kinds of wood used with 68.2 per cent. of the total, followed by balsam fir with 24.5 per cent. Each of the remaining woods, hemlock, jack pine, and poplar, formed less than 5 per cent. of the total.

The Canadian pulp mills in 1916 consumed 1,764,912 cords, valued at $13,104,458, while 1,068,207 cords, valued at $6,866,669, were exported; the total production, therefore, was 2,833,119 cords, valued at $19,971,127. This represents an increase of 25.5 per cent. in pulp wood production and 28.1 per cent. in value as compared with 1915. The average value of the pulp wood at the mill increased 71 cents per cord over that of 1915.

About 1,296,000 tons of air-dry pulp were made in Canada in 1916. This estimate is made on the basis that 1 cord of wood produces 1 ton of ground wood pulp or one-half ton of chemical fibre. This is a total increase of 20.6 per cent. over 1915. Spruce and balsam fir are used in all provinces and all processes. Hemlock and poplar are not reported from New Brunswick and Nova Scotia. Jack pine was used only in Ontario and Quebec, and most of it was used in the sulphate process.

CANADIAN BANK CLEARINGS.

The following statement of bank clearings at leading centres maintaining clearing houses in Canada was compiled by the Secretary of the Canadian Bankers' Association:

City.	1914.	1916.	1917, to August 31.	City.	1914.	1916.	1917, to August 31.

There was a marked gain in the imports from the United States for the March quarter, as compared with last year, or any other previous March quarter; but the June quarter shows a substantial loss, owing largely to the lack of shipping space.

THE ENGLISH INCOME TAX.

a Net Increase.

CANADA'S MINERAL PRODUCTION.

(Monetary Times of Canada.)

ACCORDING to the preliminary report of the Department of Mines, Ottawa, the mineral production of Canada in 1916 was $177,417,574, as against $137,109,171 in 1915. The previous maximum production was $145,634,812 in 1913.

The following table shows the quantity and value of the different mineral products of 1916 in Canada:

PRODUCTS.	Quantity	Value.
METALLIC.		
Antimony ore (exports)....s. t.	794	$48,158

CANADA'S 1917 GRAIN CROPS.

(From an Official Estimate of September 20.)

THE Canadian wheat crop approximates 249,164,700 bushels from 14,755,800 acres, with average yield per acre of 16.88 bushels as compared with 17 bushels in 1916 and 29 bushels in 1915. This represents an increase of 19,851,700 bushels or 8 per cent. over the crop of 1916.

The total yield of oats in 1917 is estimated at 399,843,000 bushels from 12,052,000 acres harvested, as compared with 365,553,000 bushels from 10,178,000 acres in 1916. The yield per acre of the harvested area (after deduction for areas not ripened into grain) for all Canada is 33.18 bushels as compared with 35.91 bushels in 1916 and 45.84 bushels in 1915.

The estimate for rye is 4,194,950 bushels from 211,870 acres as compared with 2,967,400 bushels from 148,620 acres in 1916, the yield per acre being nearly 20 bushels in both years. The estimate for barley is 59,318,400 bushels from 2,392,200 acres as against 42,647,000 bushels from 1,703,700 acres in 1916. The total yield of flaxseed is placed at 10,067,500 bushels from 1,242,000 acres as compared with 7,316,300 bushels from 622,000 acres harvested in 1916, the average yield per acre being 8.11 bushels in 1917 and 11 3-4 bushels in 1916.

THE MORRIS PLAN.

THE Morris Plan of industrial loans and investments—named for its originator, Arthur J. Morris—has been in operation in Norfolk, Va., since March, 1910, and to-day is operated in nearly one hundred cities throughout the country. Loans are usually made in the amount of $50 or multiples thereof. They are based on character and earning capacity, and are secured only by the borrower's note indorsed by two co-makers. If a loan is granted a small fee is charged toward the cost of investigation, and the note is discounted at the legal rate of interest. At the same time the borrower subscribes for one or more of the lending company's certificates of investment for an amount equal to his loan, and in purchase thereof pays $1.00 a week for fifty weeks on each $50 borrowed. At the end of the year he can cash in his certificate and with the money thus obtained redeem his note. To encourage the habit of saving, Morris Plan companies sell certificates of investment, either for cash or on the instalment plan, to others than borrowers. These certificates begin to bear interest at 4 per cent. when twenty-five payments have been made, and at 5 per cent. when they are full paid. Holders of interest-bearing certificates can borrow on them, without indorsements or other securities, an amount equal to the total payments they have made in purchase of the certificates.

At the close of the year 1917 over $53,500,000 had been lent to about 360,000 borrowers on the Morris Plan in sums averaging less than $135. The subscribed capital of Morris Plan companies exceeds $11,300,000. The largest auxiliary institutions are The Morris Plan Co. of New York (Equitable Building), of which Henry R. Towne is President, and The Chicago Morris Plan Bank, each capitalized at $1,000,000.

These companies are organized throughout the United States by the Industrial Finance Corporation (52 William Street, New York), which has a subscribed capital of $3,700,000. Officers—Clark Williams, President; Arthur J. Morris, Vice-President; Charles H. Sabin, Treasurer; Joseph B. Gilder, Secretary.

AUSTRALIAN TRADE, 1916-1917.

(By Commercial Attaché Philip B. Kennedy, Melbourne.)

STATISTICS issued by the Department of Trade and Customs for the fiscal year ending June 30, 1917, show that the adverse trade balance of the previous year has been converted into a favorable one. For the year ending June 30, 1916, exports were valued at $311,837,598 and imports at $372,801,653, resulting in an adverse balance of $60,964,055. For the fiscal year 1917 exports became $418,059,333 and imports $366,752,950, giving an export surplus of $51,306,383. The values of the chief articles entering into this trade in the last two fiscal years were:

The States of New South Wales, Victoria, and Western Australia have been granted $13,800,000 by the Federal Government to erect country grain elevators, this money being taken temporarily from war-loan funds on hand. This construction, which is to be started at the earliest possible time, is practically assured. Shipbuilding will not be undertaken unless some 52 trade unions agree to certain terms for the period of the war.

NEW ZEALAND'S 1917-18 BUDGET ESTIMATES.

ACCORDING to the third war budget submitted to the New Zealand Parliament it is proposed to ask for an additional 4½ per cent. war loan of $116,796,000; one-half to be issued at once and the balance as need may require. Heavy additional income taxes are proposed, with increased revenue from land taxes ($6,083,125 as compared with $3,470,389 for the fiscal year 1916-17). It is also proposed to increase Customs duties. The Minister of Finance of New Zealand has made the following estimate of Government receipts for the fiscal year 1917-18 (figures for the two preceding years being added for comparison):

SOURCES OF REVENUE.	1915-16.	1916-17.	1917-18.	SOURCES OF REVENUE.	1915-16.	1916-17.	1917-18.
Customs	$16,381,471	$18,734,443	$14,258,845	Amusement tax	.....	.....	$389,320
Railways	21,823,025	23,535,731	20,439,300	Marine	$224,969	$212,870	214,126

Registration and other fees	517,129	525,796	486,650				

Expenditures for 1917-18 are estimated at $78,266,469, which will leave a balance of $5,840,279, contrasted with a balance of $31,509,877 for 1916-17 and one of $10,541,214 for 1914-15. The unusual balance of last year was the result of higher taxes.

THE AMERICAN PHYSICAL SOCIETY.

President—Prof. R. A. Millikan, University of Chicago, Chicago, Ill. *Vice-President*—Prof. H. A. Bumstead, Yale University, New Haven, Conn. *Secretary*—Prof. A. D. Cole, Ohio State University, Columbus, Ohio. *Treasurer*—Prof. J. S. Ames, Johns Hopkins University, Baltimore, Md. Membership 725.

President—Dr. W. H. Wilder, Chicago, Ill. *Vice-President*—Dr. Lucien Howe, Buffalo, N. Y. *Secretary-Treasurer*—Dr. William M. Sweet, 1205 Spruce Street, Philadelphia, Pa. The fifty-fourth annual meeting will be held at the Hotel Griswold, Eastern Point, New London, Ct., July 9 and 10, 1918.

FOOD AND COAL PRICES IN ENGLAND.

THROUGHOUT the Fall of 1917 England was confronted with the problem of rising costs of staple foodstuffs. With the appointment of Lord Rhondda as Food Controller, the prices of sugar, coal, meat, and other necessities were fixed on sliding scales which in most cases brought reductions. Some of the prices that prevailed at the time THE ALMANAC went to press follow:

Beef, per pound—Sirloin, 1s., 9d.; wing ribs, 1s., 9d.; middle cut, 1s., 9d.; topside middle cut, 1s., 11d.; Mutton—Leg, 1s., 4½d.; loin and saddle, 1s., 6½d.; best end of neck (whole), 1s., 3½d.; forequarter, 1s., 2½d.; hindquarter, 1s., 5½d.; shouider, 1s., 3d.

The order regulating the prices of meat went into effect September 3.

On September 17 bread prices were fixed along with the rate on flour. A slight increase in the prices indicated was permitted if the dealer was asked to deliver or to extend credit to a customer.

Bread—4-lb. loaf, 9d.; 2-lb. loaf, 4½d.; 1-lb. loaf, 2½d. Flour—Sack of 280 lbs., or half sack of 140 lbs., 50s. per sack (sack extra); 7 lbs. or more, but less than half a sack, 2s., 8d. per 14 lbs.; quartern (3½ lbs.), 8½d.; half-quartern (1¾ lbs.), 4½d.; 1 lb., 2½d.; self-raising flour, 3½d. a lb.

Wholesale prices for flour were fixed September 17. Wheat meal and flour manufactured in the United Kingdom was sold at 44s., 3d. per sack of 280 lbs. at the mill door, subject to a discount of 6d. a sack for cash within seven days. Imported flour was sold at higher prices according to quality.

Here is a statement of the prices for jam and jellies as fixed by Lord Rhondda in the early Fall of 1917:

	1 Lb.		2 Lbs.		3 Lbs.		4 Lbs.		7 Lbs.	
	s.	d.	s.	d.	s.	d.	s.	d.	s.	d.
Apricot, cherry, black currant, pineapple, strawberry, pineapple and apricot	X		1	10½	2	9	3	8	6	5
Peach, raspberry	11¼		1	9½	2	7½	3	8	6	1½
Raspberry and red currant	11		1	8½	2	6	3	4	5	10
Blackberry, greengage, loganberry, red currant, raspberry and gooseberry, strawberry and gooseberry	10½		1	7½	2	4½	3	2	5	6½
Apricot and apple, gooseberry, raspberry and plum	10		1	6½	2	3	3		5	3
Damson, plum, blackberry and apple, black currant and apple, raspberry and apple, strawberry and apple, plum and apple	9½		1	5½	2	1½	2	10	4	11½
Plum and apple, any other	9		1	4½	2		2	8	4	8

The Royal Commission on Sugar Supply issued sugar cards to control the consumption. In a report they said:

"It would be no serious privation if the domestic consumption of sugar were to be limited to three-quarters of a pound per head per week of the population. To provide this allowance for the whole civil population of the United Kingdom would not require more than a weekly issue of 14,000 tons. But the weekly issues through the Sugar Commission have during the period of greatest restriction never averaged less than 24,000 tons per week, thus leaving an ample margin for the supply of the naval and military forces and for manufacturing purposes.' How vast the operations of the commission were is shown by the fact that up to the end of November, 1916, it had spent £81,097,000 in the purchase of 3,951,349 tons of sugar. By that date the receipts for sales were £75,263,000, and it was estimated that when the stocks in hand were disposed of there would be a profit of about £2,000,000, or about one-eighteenth of a penny per pound on the sugar supplied.

During the greater portion of the commission's activities the selling price of sugar in Great Britain has been below that of sugar in New York.

Over 2,000 local food committees superintended the distribution of sugar cards. About 17,000,000 were issued in English and 100,000 in Welsh; and in connection with the whole scheme of sugar distribution the Ministry of Food has circulated 56,500,000 separate printed documents or articles. Retailers were registered. The use of the sugar card went into effect December 30.

Milk was fixed in September at 8d. a quart for the ensuing five months.

By reason of the shortage, the ruling on the use of coal was drastic. Under the coal order, if cinders were found in the dustbin the person who placed them there was liable to six months' imprisonment. The same sentence was given to any consumer who ordered his coal or coke from more than one coal merchant. No consumer (including hospitals and business houses not requiring coal for manufacturing purposes, bakeries, theatres, baths and clubs) could consume more than 22½ tons per year without a special permit.

The winter ration scale was:

Up to 4 rooms, 2 cwt. per week; 5 to 6 rooms, 3 cwt. per week; 7 rooms, 1 ton per month; 8 rooms, 1 ton, 3 cwt. per month; 9 to 10 rooms, 1 ton, 7 cwt. per month; 11 to 12 rooms, 1 ton, 10 cwt. per month; 13 to 15 rooms, 2 tons per month; more than 15 rooms, 2 tons, 10 cwt. per month.

The summer ration is half the winter ration. If a householder's ration was 9 tons a year and he took 10 into store he was liable to prosecution. A coal dealer (small shopkeeper) could not sell more than 2 cwt. in one transaction. A coal merchant could sell more or less than 2 cwt.

On August 14, the prices fixed on grain for future delivery were:

FOR DELIVERY.	Wheat and Rye, Per 504 Lbs.		Oats, Per 336 Lbs.		Barley, Per 448 Lbs.		FOR DELIVERY.	Wheat and Rye, Per 504 Lbs.		Oats, Per 336 Lbs.		Barley, Per 448 Lbs.	
	s.	d.	s.	d.	s.	d.		s.	d.	s.	d.	s.	d.
Before Dec. 1, 1917	73	6	44	3	62	9	In Feb. or March, 1918	75	6	46	3	62	9
In Dec., 1917, or Jan., 1918	74	6	45	3	62	9	In April or May, 1918	76	9	47	3	62	9
							After May, 1918	77	9	48	6	62	9

Where oats are bought by a miller to manufacture for human consumption 3s. per quarter may be added. Where barley is bought by a licensed manufacturer for the purpose of his business 5s. 3d. per quarter may be added. In the case of damaged wheat or rye or tailings and dressings 7s. per quarter shall be deducted from the standard rate; in the case of barley 7s. 9d. per quarter; and in the case of improperly cleaned oats or tailings and dressings 5s. per quarter. Certain other conditions are laid down which may be found in the order itself. By the barley (restriction) order, 1917, after September 1 no barley other than damaged barley, tailings, or screenings must be used except for the purpose of seed or for milling, and no barley flour must be used except as human food.

LORD RHONDDA ON FOOD CONTROL.

In Great Britain there was as little compulsory rationing as possible imposed upon the general public. But there is a far-reaching and rigid supervision of all food articles by regulating the manufacturers and merchants, by the establishment of maximum prices, and on December 30 rationing cards were issued for sugar.

In a statement by Lord Rhondda, the British food controller, in November, 1917, describing the British system of food control, he said: "My aim is to safeguard the interests of the consumer, to do away with profiteering altogether, and to prevent excessive profits of any kind. The framework of our machinery is formed on the civil service. They are the administrators, but in all cases we secure the best available

FOOD AND COAL PRICES IN ENGLAND—*Continued.*

business men to advise them, as well as a number of expert committees dealing with almost every food commodity. The policy is to limit profits at every step from the producer to the consumer, and at the same time to regulate supply.

"A costings department under the direction of chartered accountants has been set up, through which the profits made by any manufacturer or retailer of food can be ascertained. The country has been divided into separate areas, in each of which a leading firm of accountants has been appointed by this department to do the necessary work. Reasonable profit based on pre-war rates is added to the present cost, and price limits agreed on that basis after consultation with the representatives of the trades concerned.

"Decentralization is obtained by dividing Great Britain into sixteen food divisions, consisting of as many counties. Each division is under the superintendence of a commissioner appointed by the food controller. In each of these divisions the borough, urban, or rural district councils or other local authorities appoint local food committees, with limited powers and certain discretion, to carry out such regulations as regards price and distribution as may be issued from headquarters.

LOCAL TRADESMEN REGISTERED.

"Local tradesmen are registered with their local committees, and if any tradesman does not carry out regulations and orders he may be struck off the register and prevented from further trading. The various orders fixing or amending the maximum prices of meat, milk, potatoes, bread, etc., are communicated to the local committees, and the trades and public are informed through the daily and trades press. A staff of inspectors is kept at headquarters, and a number of sentences have been imposed by magistrates throughout the country for contravention of the regulations. The general penalty is a fine not exceeding £100, or a term of six months' imprisonment with or without hard labor, or both. This punishment may be inflicted for every several offense.

"While the prices of practically all essential foods are now under control, no compulsory rationing is imposed on the general public, although all public eating places are rationed as to the amount of meat flour, bread, and sugar which may be used in every week on the basis of an average for each meal. After December 30 only a half pound of sugar per capita will be permitted. This will be obtainable through a system of each consuming householder or consumer registering with a specified retailer and securing from the local food committee a card entitling his household or himself to the ration. The retailer will keep a record of his deliveries to insure his not supplying any one customer in one week with more than the proper allowance. Arrangements for the issue of these cards are in progress, and they will form the groundwork should it become necessary later on to ration other foodstuffs.

"There are many restrictions in manufacturing. Flour made from wheat must be straight run flour, milled to 81 per cent. extraction, and it is compulsory to mix in 20 per cent. of flour from other cereals and pulse, and permissible to mix in up to 50 per cent., while no bread may be sold unless twelve hours old. Following on restrictions of 50 per cent. and 40 per cent., manufacturers are now restricted to the use of only 25 per cent. of the amount of sugar they used in 1915. Speaking generally, the use of foodstuffs for industrial purposes and for the feeding of animals has been either restricted or prohibited. Waste of bread is a criminal offense.

LONDON EXPORTS TO THE UNITED STATES FOR NINE MONTHS OF 1917.

(Consul General Robert P. Skinner, London, England.)

THE total value of the declared exports from London to the United States for the nine months ended September, 1917, was $108,853,760, compared with $120,676,332 in the same period in 1916. The principal articles comprised in the aggregates were:

Articles.	Nine Months Ended September.		Articles.	Nine Months Ended September.	
	1916.	1917.		1916.	1917.
Rubber	$28,348,145	$39,451,586	Furs	$4,737,624	$5,097,827
Precious Stones	14,433,084	13,218,484	Tea	3,861,409	747,058
Tin	8,086,976	8,860,260	Indigo	2,540,440	1,124,838
Art	5,678,241	4,272,878	Wool	1,262,267	929,047
Hides	4,682,463	2,641,630			

GLASGOW'S EXPORTS TO UNITED STATES.

The total value of declared exports from Glasgow, Scotland, to the United States for the first six months of 1917 amounted to $5,240,804, as compared with $4,740,239 for the like period of the preceding year, an increase of $500,565. The principal articles of export, with their value, during the half year were:

Articles.	Jan.-June 1916.	Jan.-June 1917.	Articles.	Jan.-June 1916.	Jan.-June 1917.
Acids, miscellaneous	$39,161	$142,283	Jute, manufactures of	$21,099	$23,647
Ammonia, sulphate of	99,254	11,461	Leather, manufactures of	47,495	8,581
Carpets	90,537	163,426	Machines, sewing	36,886	43,431
Corundum	14,470	42,536	Machinery, miscellaneous	48,826	11,312
Cotton manufactures	1,808,450	1,596,169	Magnesite, calcined	16,651	46,032
Creosote	54,024	3,922	Paper stock	235,169	241,408
Cyanide of sodium		283,767	Paper, wall	56,827	40,446
Fertilizers	2,669	58,284	Skins, rabbit	2,451	71,560
Fishing tackle	12,033	43,144	Whisky	943,596	920,566
Flannels	76,918	88,805	Wool, manufactures of	54,234	1,487
Flax, manufactures of	254,382	24,933	Wool, raw		824,838
Herring, pickled	286,499	14,286	All other	339,665	341,173
Hides, horse, calf	113,157	11,109			
Hollands	85,786	113,898	Total	$4,740,239	$5,240,804

For the six months ended June 30, the declared exports from Bradford, England, to the United States amounted to $8,840,313, as compared with $7,384,742 in the same period in 1916.

EFFECTS OF THE WAR ON THE DUTCH MERCHANT FLEET.

(Consul General Soren Listoe, Rotterdam.)

THE effects of the war on the Dutch merchant fleet were more noticeable during 1916 than at any time since the beginning of hostilities. The total result of the year 1914 was favorable, in regard to tonnage, because an increase of 80,000 tons was recorded at the end of the year, due to the number of ships built or purchased. The adverse effects of the war were more evident in the year 1915. Although 73,000 tons of new cargo space were added to the register, 47,000 tons of space were sold to foreign purchasers. The sales, combined with the losses at sea, resulted in an increase of only 13,328 tons during 1915. The year 1916 was the first in which the tonnage of the Dutch mercantile fleet decreased. The additions to the fleet amounted to only 65,000 tons, while 77,000 tons had to be written off for various reasons. The ship-export law was put into force to prevent the sale of ships to foreign countries unless permission was granted by the Government. The year 1915 was the first when an unusual demand for ships became manifest, and during the year many ships were sold abroad, particularly to Norway, at very high prices. Even the oldest vessels met with a ready sale. From sales alone thirty-four Dutch ships, with a total tonnage of 46,000, left the country. Even if no sales had been made during the year to foreign purchasers, the tonnage would not have increased more than 60,000, which is 10,000 to 20,000 tons less than the normal increase of the fleet in recent years. By the sales and changes that took place during 1915 many shipowners improved their financial condition and at the same time succeeded in replacing old ships by those of newer construction.

The large decline of shipping at most Dutch ports can be attributed to the war. The Amsterdam port statistics show a steady decrease in the number of arrivals. The number of ships arriving at the port of Rotterdam showed a gain in 1915 but a decrease in 1916. Another feature that has been noticed as the war progressed is that the size of the ships entering the various ports of Holland is smaller than the average in normal times. The large decline of traffic on the New Waterway, which in normal times amounts to about 220 ships a week, is due to the decreased export trade from the port of Rotterdam. Since the ruthless submarine warfare was inaugurated, on February 1, 1917, the losses suffered by the Dutch merchant fleet have been large. Although a number of new ships have been completed in the Dutch shipbuilding yards this year, and several more will be finished before the end of the year, the outlook as affecting the tonnage of the mercantile fleet is not favorable. The prospect is that the year 1917 will show another decrease in merchant tonnage, especially as many deliveries are now being delayed because of the lack of raw material.

INDIA'S 1916-17 WHEAT CROP.

THE final official forecast of the area sown to wheat for the 1916-1917 season, based on revised returns of acreage and outturn received from districts comprising 98.5 per cent. of the total wheat area in India, places the acreage under this grain at 32,940,000, as against 30,320,000 acres a year ago, an increase of nearly 9 per cent. The total yield is estimated at 10,158,000 tons (47,404,000 quarters of 480 pounds each) as against 8,652,000 tons (40,376,000 quarters) in 1915-1916, or an increase of 17 per cent.

NORWAY'S WAR PROSPERITY.

FROM CONSULAR SOURCES.

DURING the past year there was much prosperity in Bergen. Fire destroyed a large part of the business section in January, 1916, and nearly 60,000 tons of locally owned shipping was lost, mainly during the latter part of the year; but these reverses were more than offset by the profits of the ship owners and of the exporters of fish and fish products. A comparison of tax figures evinces the increase of wealth. In 1913-1914 capital assessments were 167,000,000 crowns ($44,756,000); in 1914-1915, 190,000,000 crowns ($50,920,000); in 1915-1916, 207,000,000 crowns ($55,476,000); and in 1916-1917, about 350,000,000 crowns ($93,800,000). The assessed value of income advanced from 50,000,000 crowns in 1913-1914 to about 130,000,000 crowns in 1916-1917 ($13,400,000 to $34,840,000). The banks had a very good year. The Privatbank at the end of 1916 had a capital stock of 25,000,000 crowns ($6,700,000), fully paid in; at the end of 1914 it was only one-fifth of that amount. The dividend for 1916 was 12 per cent. The Kreditbank's capital stock was 20,000,000 crowns ($5,360,000) at the end of the year, against 7,000,000 crowns two years before; it paid a dividend of 10 per cent.

The profits of shipping, Bergen's principal source of wealth, have been more widely distributed among the population than might be supposed. Besides the long-established concerns, many new stock companies have been started. The rise in shipping stocks has resulted in much speculation, but the large returns derived by Bergen from advanced ocean freights and from the high prices of fish products have brought many advantages. Local capital has been available to develop local industries to a greater extent; many large donations have been made for educational, charitable and other public purposes, better houses supplied with modern comforts have been built, more automobiles are being used; needed public improvements will be made; better wages are being paid; and the standard of living is rising. At the outbreak of the war Bergen had about 316,000 net tons of shipping; at the end of 1916 it had about 356,000. The earnings of the tramp steamers of Bergen, exclusive of those of the Bergenske Dampskibsselskab, were before the war about 10,000,000 crowns a year. In 1915 they amounted to 47,700,000 crowns ($12,783,600) and in 1916 to 104,000,000 crowns ($27,872,000).

Unofficial statistics show for Bergen's shipping during 1916 a net increase of thirteen ships, with a gross tonnage of 40,330, notwithstanding the loss of thirty-five vessels of 56,000 tons. The total number of Norwegian ships of over 100 tons lost from war causes in 1916 was 186 and their combined tonnage 260,000, of which 109 ships of 149,000 tons were lost in the last quarter of the year.

The ten largest banks in Christiania received deposits during the first half of 1917 aggregating $157,000,000, or 43 per cent. more than in the corresponding period of last year. New corporations to the number of 288 have been organized with a combined capital of $24,000,000, besides a capital stock increase of ninety-seven old companies amounting to $16,000,000. Det Nordiske Export and Import Company, which was organized in Christiania in January, 1917, with capital stock of $134,000, has increased its capital to $884,000. A new forwarding company named "Intersped" has been incorporated in Christiania with capital stock of $268,000. N. M. Nillsen is President.

NORWAY'S CODFISH AND OIL TRADE.

(Canadian Department of Trade and Commerce.)

The Spring cod fishery of the Finmarken coast closed on June 23. The returns for the season are 17,056,550 kilos (calculated at 6,317,240 cods), as against 26,854,600 kilos (9,946,150 cods) in 1916, 43,279,200 kilos (16,020,330 cods) in 1915, 63,612,650 kilos (23,560,240 cods) in 1914, and 93,923,800 kilos (34,787,000 cods) in 1913. The very poor returns this year are caused chiefly by the uncertain conditions, great parts of the fishing districts lying inside of the German "danger zone." The returns of the cod fisheries and their products up to June 26, 1915, June 25, 1916, and June 23, 1917, respectively, were as follows: Cods, 66,800,000, 51,300,000, and 27,700,000; steamed medicinal oil, 50,918 hectoliters (1 hectoliter = 26.4 gallons), 60,068 hectoliters, and 37,129 hectoliters; raw liver for making oil, 8,871 hectoliters (1 hectoliter = 90.8 quarts), 5,375 hectoliters, and 6,824 hectoliters. As the fish ruled fat the quantity of oil was comparatively large. In Lofoten 100 liters of liver yielded an average of 51 liters of steamed medicinal oil, as against 49 liters last year. The fish also ruled somewhat larger than last year. The quantity of roe was small.

NUMBER OF WOMEN IN MEN'S JOBS IN BRITAIN.

(Government summary of the position as regards the employment of women, April, 1917.)

Occupation.	Estimated Number of Females Employed in July, 1914.	Increase (+) or Decrease (—) in the Employment of Females Since July, 1914.		Direct Replacement of Men by Women.	
		Number.	Per Cent. of Those Employed in July, 1914.	Number	Per Cent. of Those Employed in July, 1914.
Industries*	2,184,000	+ 453,000	+ 20.7	438,000	20.1
Government establishments†	2,000	+ 198,000	+9,404.9	187,000	8,926.0

Total	3,298,000	+1,240,000	+ 37.6	1,256,000	38.1

* Including controlled firms, but excluding all kinds of Government establishments. † Including arsenals, dockyards, and national shell, filling, and projectile factories. ‡ Estimated figures.

Since the war about 1,240,000 additional females, or 37.6 per cent. of the number employed in July, 1914, have been drawn into the various occupations included in the table above. This figure does not, however, represent the net increase in the number of women employed in all occupations, since casual agricultural laborers, domestic servants, and women employed in very small workshops and workrooms in the dressmaking trade are excluded, as well as women at work in military, naval, and Red Cross hospitals. Under the last head there has been an increase in the numbers of women employed equal to 36,000 full-time workers. On the other hand, the number of female casual laborers in agriculture has fallen by 13,000 since July, 1914, owing to seasonal variations, while from small workshops and domestic service it is estimated that there has been a displacement of 300,000 women. Taking these figures together, the net result gives an increase of 963,000 women employed in occupations outside their own homes.

BRITAIN'S WAR HOLD ON HER COAL MINES.

(Summarized by the United States Federal Trade Commission.)

The British Government early in 1917 took control of all the coal mines in the United Kingdom. The owners operate the mines. All dividends paid to stockholders of mining companies and other distribution of profits must be approved by the Government. All wage agreements entered into between operators and mine workers must be approved by the Government. In the Welsh mines wage scales have been adjusted principally with regard to the selling prices of coal, and to some extent with regard to the cost of food and living expenses. In the northern fields, wage agreements have been principally adjusted with respect to the cost of food and living expenses. The cost of food and other necessities of living has advanced 94 per cent. since the war began. To arrive at a maximum or "limitation" price for coal, to the average prices for coal which were received by any producing company for its fiscal year ended either December 31, 1913, or June 30, 1914, there was added 4 shillings (about $1) per ton. No advances in these prices could be made unless the advances were approved by the Board of Trade. After the first "limitation" prices were made effective, the Board of Trade authorized one advance amounting to 2 shillings 6 pence (about 60 cents) per ton. "Limitation" prices are confined to consumption within the British Isles, or domestic consumption.

Army requirements, navy requirements, and all other Government industries, including munition plants and railroads, are given priority in the distribution of coal and in the allotment of coal cars. The railroads are still receiving the best grades of coal, and it is being supplied largely by mines which formerly supplied it to them. In order to arrive at the basis for war taxes or excess profit taxes, each producer of coal was permitted to report profits for any two of the three calendar years, 1911, 1912, or 1913. The profits for the two years selected were added together and divided by 2. The result so obtained has been deducted for the profits of each coal producer for each year during the war, and any profit earned over and above the figure so arrived at is subject to a 50 per cent. excess profit tax. The years 1912 and 1913 were the two most profitable years in the history of the British coal industry. When the war began there were about 1,000,000 mine workers in England. Two hundred and forty thousand of them promptly enlisted. Production of coal became so curtailed that the Government tried to return some of the enlisted men to the mines, but only between 15,000 and 20,000 men were sent back. No mine worker in Great Britain can enlist in the army or navy unless his enlistment is certified to by local tribunals which have been formed in each district. These tribunals are composed of mine workers, operators, and Government officials. When it became known that mine workers would not be enlisted, men employed in other trades, in stores, and in various other occupations sought employment in the mines. This class of men has been largely drafted into the army and navy through the district tribunals.

BRITAIN'S REVENUES IN 1917.

The British Treasury has issued a return setting forth details of the revenue of the United Kingdom during the present financial year, showing, among other things, that the revenue for the quarter ended September 30, 1917, was £139,262,754, as compared with £91,239,901 for the corresponding quarter of last year, or an increase of £48,022,853. The principal items which account for the increases are:

Property and income tax (including super-tax), £11,961,000.

Excess profits duty (including munitions levy), £21,002,000; miscellaneous, £21,125,248.

The principal decreases are: Excise, £4,873,000; estate duties, £959,000; receipts from loans, £1,281,395.

For the six months from April 1 to September 30 the revenue was £255,222,040, as compared with £163,922,899 for the corresponding period of last year, a net increase of £91,299,141. The total increase amounted to £99,871,238 for the half year, the principal items in which are customs, £2,539,000; property and income tax (including super-tax), £15,712,000; excess profit duty (including munition levy), £55,949,000, and miscellaneous, £25,435,238. The decrease of £8,572,097 is chiefly accounted for by a falling off of £7,330,000 under the heading of excise, and of £1,001,097 in respect of receipts from loans.

INCREASED COST OF LIVING IN NORWAY.

The following table sets forth the estimated annual cost of living of a family in Norway with an average income of 1,500 crowns ($402) in 1914 based on the prices of July, 1914, December, 1916, and March and May, 1917.

[Sociale Meddeleiser utgit av Departementet for Sociale Saker, Christiania, 1917.]

HOLLAND. WAGES AND COST OF LIVING DURING WAR.

(Official Dutch Government Bulletin in May, 1917.)

Out of 336,000 work people employed in private industrial undertakings, 76,750 had their wages increased by (or received war bonuses amounting to) 1 to 10 per cent., 133,700 by 11 to 20 per cent., 73,150 by 21 to 30 per cent., and 34,000 by over 31 per cent. The general average increase among these 336,000 industrial work-people is estimated at 13 per cent. The following table shows the number of persons covered by the inquiry in each group of trades and the percentage of these who received increases (or war bonuses) of varying amounts:

Trade Group.	Number of Work-People Covered by the Returns.	Per Cent. of Work-People Whose Wages Were Increased by or Who Received War Bonuses Amounting to—				
		1 to 10 Per Cent. of Wages.	11 to 20 Per Cent. of Wages.	21 to 30 Per Cent. of Wages.	Over 31 Per Cent. of Wages.	Total.
Building	84,500	30.8	54.4	11.8	0.6	97.6
Mining and turf getting	30,000	....	....	40.0	60.0	100.0
Metal	44,700	14.1	43.4	24.2	6.0	87.7
Textile	29,900	35.1	24.4	33.4	6.7	99.6
Clothing and cleaning	22,300	22.4	58.7	7.2	5.4	93.7
Printing	15,700	7.6	27.4	54.8	10.2	100.0
Paper making	4,200	11.9	16.7	64.3	....	92.9
Woodworking	18,400	9.2	40.8	24.5	20.1	94.6
Chemical	7,000	37.2	28.6	17.1	15.7	98.6
Pottery, glass, etc.	22,500	24.0	30.1	10.7	3.6	68.4
Baking	3,700	16.2	67.6	8.1	....	91.9
Flour milling	500	10.0	80.0	10.0	....	100.0
Dairying	2,900	10.3	55.2	27.6	3.5	96.6
Tobacco	17,800	25.3	59.5	15.2	....	100.0
Other food	11,200	30.4	39.3	19.6	9.8	99.1
Gas and electricity	6,000	8.3	83.4	8.3	....	100.0
Leather, oilcloth, and rubber	6,200	1.6	32.3	43.5	19.4	96.8
Diamond working	8,000	100.0	....	....	....	100.0
Art	500	20.0	20.0	20.0	....	60.0
Total	336,000	22.8	39.9	21.7	10.1	94.5

The difference between the figure shown in the "total" column and 100 indicates the proportion of the 336,000 work-people who either received no increase in wages (or war bonus) or whose wages were reduced. The number of these was 18,400, or 5.5 per cent. of the total.

LIVE STOCK IN DENMARK.

A special census was taken of the live stock in the Kingdom of Denmark on February 20, 1917. The number of horses and colts was 538,000, as against 515,000 at the same period last year. There were 2,453,000 head of cattle, as compared with 2,290,000 the previous year. The number of swine was reported as 1,981,000, while in the spring of 1916 the total was 1,983,000. Sheep and lambs totalled 270,000 head, as against 254,000 last year. The statistics for 1914 and 1915 show that at these same periods the kingdom had over 500,000 of those animals. The number of chickens in the kingdom was 8,250,000.

LIVE STOCK IN THE NETHERLANDS.

Official figures published in August, 1917, giving the result of an enumeration of cattle, sheep, and swine in the Netherlands during March and April show number of cattle, all kinds and ages, was 2,301,532; in 1910 it was 2,026,943—a gain of 13.5 per cent. in 1917. The number of sheep counted this year was 520,275; in 1910 it was 483,082—a gain of 7.7 per cent. The number of swine counted this year was 1,185,438; in 1910 it was 1,259,844, showing a loss of 5.9 per cent. during the seven years. During the period of six years from 1904 to 1910 the number of cattle increased 20 per cent. and swine 25 per cent.

FARM MARKETING OF FOOD.

(From a Bulletin of the Department of Agriculture.)

FARMERS' creameries and cheese factories and farmers' elevators are the leading types of co-operative purchasing and marketing enterprises among farmers in the United States, according to a careful survey by the Office of Markets and Rural Organization. The number of farmers' purchasing and marketing bodies in the United States is placed at about 12,000. Of these 5,424 gave reports of their activities. The creameries and cheese factories reporting numbered 1,708. They do an annual business of $83,360,648, and have an average membership of eighty-three farmers. The 1,637 farmers' grain elevators and warehouses reporting were located in twenty-three States, doing a total annual business of $234,529,716. They have an average membership of 102 farmers. The 871 fruit and produce organizations do an annual business of $140,629,918. The annual volume of business of 213 cotton organizations is $34,392,258; of 275 co-operative stores, $14,552,725; of forty-three tobacco organizations $6,746,270; of ninety-six live-stock associations, $9,482,592. The gross volume of business for all organizations reporting was $625,940,448.

Minnesota leads the States in the number of purchasing and marketing organizations among farmers. Of the total number reporting, 18 per cent. were located in that State. Iowa stood second, Wisconsin and North Dakota next in order. Farmers' elevators, creameries and cheese factories and live-stock shipping associations are the principal types of co-operative effort in these States. Fruit and produce associations are the chief forms of co-operative activity in Oregon, Washington, Idaho and Montana. The farmers' grain companies are next in rank. In California 60 per cent. of the organizations handle fruit and produce. Cotton associations lead in Texas, North Carolina, South Carolina, and Georgia, fruit and produce organizations second. Tobacco associations are found chiefly in Kentucky. Creameries form the larger share of farmers' co-operative enterprises of the New England States.

WEST INDIAN FLOUR SUBSTITUTES.

(By Consul Henry D. Baker, Trinidad, British West Indies.)

THE Trinidad products that yield useful meals are: Unripe bananas and plantains, all varieties, including the real banana or red fig, which is not generally used here for human food; tannias, dasheens, sweet potatoes, yams, and breadfruit. The yield of meal ranges from 20 per cent. (breadfruit) to about 33 per cent. (dasheen) of the weight of the raw product. All the meals can readily be prepared by simple methods and without the use of any expensive machinery, so that their manufacture is practicable in any household. The cost of preparation of the meals (labor only) is about 1½ cents to 2½ cents per pound; these figures are for making the meals on a small scale. In the preparation of the meals there is a preliminary stage in which they are in the form of thin, dry slices known as "chips." Dasheen and sweet potatoes can be kept in this form for several months and recooked as vegetables after soaking the "chips" in water.

Banana bread is dark in color, or lighter according to the amount of wheat flour added. A certain proportion of wheat flour is necessary to give the bread the proper consistency. Occasionally for some reason a little difficulty is found in getting the banana meal to rise, when the dough is made with yeast, and it has been recommended to set the doughs separately and combine them when kneading. A similar process is to make the bread with baking powder, when it never fails to rise, but to take care in mixing, however, not to make the flours too wet, as the banana meal is not capable of taking up so much moisture as the wheat flour. It is said that banana meal cooked and eaten as oatmeal porridge is an excellent food and should entirely replace oatmeal on the breakfast table at the present time. In cakemaking the same proportions of banana meal can be used as in the making of bread. Used in the form of a milk pudding made in the same way as a rice pudding it is also very palatable. Banana biscuits can also be made from the meal; in fact, they have been known in Europe as a fancy biscuit for a long time.

Large quantities of sweet potatoes are planted in Trinidad. Peeled, sliced, dried, and milled in the same way as dasheen they can be made into good bread used with wheat flour in the proportion of half and half. The percentage of flour produced as compared with dasheen is low, it being only 22.72, or roughly four pounds of potatoes make one pound of meal.

PROSECUTIONS UNDER FEDERAL FOOD AND DRUGS ACT.

(Data furnished by William M. Williams, Solicitor, Department of Agriculture.)

THE figures cover the fiscal year ending June 30, 1917. Some 782 cases were transmitted to the Department of Justice, in 424 of which criminal proceedings and 358 of which seizures were recommended. The 424 criminal cases embraced 735 alleged violations of the Food and Drugs Act. At the close of the fiscal year 1916, 377 cases were pending, of which 200 were criminal prosecutions and 177 were seizures. Two hundred and ninety-two cases pending at the close of the fiscal year 1916 and 555 reported during the fiscal year 1917, in all 847, were terminated in 1917. Of those terminated 412 were criminal and 435 were civil.

In 340 of the 412 criminal cases fines were imposed, the fine being the costs of the proceedings in 1 case; in 1 an appeal taken by a defendant was dismissed; in 1 the court refused leave to file the information; in 4 sentence was suspended; in 1 a demurrer to the indictment was sustained, and the case is now pending in the Supreme Court of the United States on the Government's writ of error; in 6 there were acquittals; 20 were nol. prossed; and 39 were withdrawn, dismissed, or barred by the statute of limitations In a majority of the cases in which fines were imposed pleas of guilty, nolo contendere, or non vult were entered. In 14, pleas of not guilty were entered, and the defendants were convicted after trial, and in 1 of these the judgment of conviction of the lower court was affirmed. In the criminal cases in which convictions were obtained the fines were as follows:

No.	Amount.	Total.	No.	Amount.	Total.	No.	Amount.	Total.
1	$2.00	$2.00	66	$50.00	$3,300.00	1	$199.00	$199.00
26	5.00	130.00	2	55.00	110.00	13	200.00	2,600.00
1	6.00	6.00	1	60.00	60.00	4	250.00	1,000.00
37	10.00	370.00	1	70.00	70.00	1	275.00	275.00
1	12.50	12.50	5	75.00	375.00	1	280.00	280.00
4	15.00	60.00	1	95.00	95.00	3	300.00	900.00
23	20.00	460.00	27	100.00	2,700.00	1	398.00	398.00
82	25.00	2,050.00	1	110.00	110.00	1	500.00	500.00
8	30.00	240.00	1	135.00	135.00	2	600.00	1,200.00
2	35.00	70.00	1	140.00	140.00			
9	40.00	360.00	8	150.00	1,200.00			$19,677.50
2	45.00	90.00	1	180.00	180.00			

In addition to the fines imposed, costs were generally assessed. Of the 435 civil cases terminated during the year, decrees of condemnation and forfeiture were entered in 411, of which 7 were decided favorably to the Government after contest; in 3 the libels were dismissed; in 21 the packages were broken or disposed of before seizure could be made. In the 411 cases in which decrees of condemnation and forfeiture were entered the goods were destroyed in 201, released on bond or otherwise in 196, and sold in 14. In many of the cases in which the product was released, the decree of the court provided that the product should be sorted and that that portion found unfit for food should be destroyed. At the close of the year 313 cases were pending, of which 213 were criminal prosecutions and 100 were seizures.

In addition to the cases reported by this department to the Department of Justice the food and

PROSECUTIONS UNDER FEDERAL FOOD AND DRUGS ACT—*Continued.*

drugs officials of the various States and of the District of Columbia, collaborating with the department in the enforcement of the act, reported 29 cases to the United States Attorney for action. Of these, 15 were criminal cases and 14 were seizures. In all of the criminal cases there were convictions. In all of the seizure cases decrees were entered and the products either released on bond or sold. Decrees were entered in 3 cases reported prior to this fiscal year and the products released on bond. The fines in the 15 criminal cases totalled $295. Five hundred notices of judgment were published during the year.

EDIBLE FRUITS OF FOREST TREES.

(From the Forest Service, United States Department of Agriculture.)

It is said that Daniel Boone and some of our other early pioneers could go into the wilderness with only a rifle and a sack of salt and live in comfort on the game and other wild food which the woods afforded. While few people want to try that sort of thing nowadays, persons who know the food value of the fruits of our native trees and shrubs are, according to foresters, able to use them to good advantage in supplementing other foods. Aside from the numerous edible mushrooms, roots, fruits of shrubs and smaller plants, the trees of our forests afford a large variety of edibles which are highly prized by woods connoisseurs. First in importance, of course, are our native nuts—beech nuts, butternuts, walnuts, chestnuts and chinquapins, hazel nuts, and several kinds of hickory nuts, including pecans. The kernels of all of these are not only toothsome but highly nutritious and are used by vegetarians to replace meat. The oil of the beech nut is said to be little inferior to olive oil, while that of butternuts and walnuts was used by some of the Indians for various purposes. The Indians, it is said, also formerly mixed chestnuts with cornmeal and made a bread, which was baked in corn husks, like tamales. In parts of Europe bread is made from chestnuts alone.

The chestnut crop in this country is being reduced each year by the chestnut blight disease, which in some sections is gradually killing out the tree. Acorns are commonly thought to be fit only for feeding hogs, but many kinds of them can be made edible and nourishing for people as well. The Indian custom was to pound or grind the acorns up and leach out the tannin, which makes most of them unfit for eating when raw, by treating the pulp with hot water. The resulting flour, which contained considerable starch, was made either into a porridge or baked in small cakes of bread. As a rule, the acorns of the various white oaks having less tannin are the ones best suited for food, but Indians also used those of the black oaks, even though they contain much tannin. The acorns of the basket or cow oak, the chinquapin oak, shin or Rocky Mountain oak, live oak, and of several other species, are sweet enough to be eaten raw.

Another nut which is not suited for eating raw, but from which a palatable food is said to have been prepared by the Indians is the buckeye. The kernels of these nuts were dried, powdered, and freed of the poison which they contain when raw by filtration. The resulting paste was either eaten cold or baked. Several Western pines have seeds which play an important part in the diet of the local Indians. Perhaps the best known of these is the fruit of the nut pine or pinon, which forms the basis for a local industry of some size. Not only is it extensively eaten by local settlers and Indians, but large quantities are shipped to the cities where the seed is roasted and sold on the street. The similar seed of the Parry pine and the large Digger pine seeds are eagerly sought by the Indians. The latter tree is said to have gained its name from its use as a food by the Digger Indians. The seeds of the long-leaf pine are edible and are improved by roasting. Indeed, it may be said that most nuts are more digestible when roasted than if eaten raw.

One of the best known fruits, the foresters say, is the persimmon, which is edible only after it is thoroughly ripe. As this is usually not until late in the fall, it is commonly thought that the fruit must be frost-bitten. If the persimmon is eaten before it is well ripened, the tannic acid which the fruit contains has a strongly astringent effect, which justifies the story of the soldier in the Civil War who said he had eaten green persimmons so as to shrink his stomach up to fit his rations. The pawpaw, or custard apple, is also best when thoroughly ripe. The fruit of some species of haws is eaten or preserved in different parts of the country, while those of several different kinds of wild cherries have a food value and are used for various purposes. Wild plums are abundant in certain sections and occur in particularly plentiful quantities along the streams in the Eastern and Middle Western States.

Several varieties of wild crab apples make delicious jellies. Some of the largest, which attain the size of small apples, are more or less abundant throughout Eastern North Carolina. Elderberries are frequently used for pies and for sauce. Those found in the West are sweeter and have a better flavor than the Eastern varieties. The berries of the hackberry, or sugar berry, as it is called in the South, are dry, but have an agreeable taste. Those of the mulberry are sweet and juicy when ripe. The mulberry is valued in some sections for feeding hogs and poultry, and some species are occasionally cultivated.

Many people like the fruit of the shad bush, "sarvice" berry, or June berry, as it is variously called. In parts of the country this fruit is used to make jelly. The French Canadians are said to use the acid flowers of the redbud, or Judas tree, in salads, while the buds and tender pods are pickled in vinegar. Honey locust pods, often locally called "honey shucks," contain a sweetish, thick, cheeselike pulp, which is often eaten. Those of the mesquite furnish the Mexicans and Indians with a nutritious food. The Creoles of Louisiana, famous for their cookery, are reported to use the young buds of the sassafras as a substitute for okra in thickening soups.

WINE PRODUCTION IN AUSTRALIA.

(Weekly Bulletin, Canadian Department of Trade and Commerce, Ottawa.)

In almost any part of New South Wales, except the subtropical part and the higher portions of the mountain ranges, grapevines thrive well and bear large crops, equal in size, appearance, and flavor to the products of Europe. The principal vineyards, where grapes are grown for wine-producing purposes, are situated in the valleys of the Hunter and Murray Rivers. The former is about ninety miles from Sydney and the latter about 250 miles. The Hunter River vineyards produce the best table wines grown in Australia, both the red and the white wines being excellent. A really good white wine from this district can be favorably compared with the best Rhine wine and is reputed to be the most creditable of all Australian wines. The red wines are said to compare favorably with French Burgundies. The amount of wine produced in New South Wales during 1917 was about 600,000 gallons, of which 500,000 gallons were dry wines of the hock and claret types. Several vineyards in New South Wales have stocks of 500,000 bottles of wine up to seven years old, and smaller quantities are available up to thirty years old.

Australians as a rule prefer sweet wines. These are named after the European varieties, such as port, sherry, and muscatel. Wine merchants take the European wines as the standard types and make their wines approach those types as closely as possible. In recent years sweet wines have improved greatly, owing largely to the wine expert of the State of Victoria, who was sent to Europe to study the most modern methods of viticulture and wine making. For some years a good market for wines has been found in England, and the increasing exports show a growing appreciation. In 1913 the quantity of red and white wines shipped from New South Wales to England was 280,000 gallons. The demand from England has been very active, notwithstanding the fact that it cannot be retailed under 2s. 6d. (sixty-one cents) per reputed quart bottle. After the war wine merchants are anticipating that a considerable trade will be done with the home market. The more delicate wines come from New South Wales. The states of Victoria and South Australia produce large quantities of a heavier type, much of which is shipped abroad. The states of Queensland and West Australia produce small quantities of a very poor quality, the climate in those states being unsuitable for the production of good wines.

UNITED STATES FOOD ADMINISTRATION.

(Created by Act of Congress, August 10, 1917. Data Revised to November 15.)

Herbert Hoover was named by President Wilson as National Food Administrator. On taking the place he made the following announcement as to the plans for the control of wheat, flour, and bread:

1. As a result of the isolation of certain of the world's wheat-producing countries by either belligerent lines or short shipping the normal determination of the price of wheat by the ebb and flow of commerce is totally destroyed.

2. In order to control speculation and to secure more equitable distribution of the available wheat and flour between their countries, the allied Governments have placed the whole purchase of their supplies in the hands of one buyer. Also the European neutrals are now buying their wheat through single Government agents instead of in the normal course of commerce. Therefore the export price of wheat and flour, and thus the real price, if not controlled, will be subject to almost a single will of the foreign purchaser.

3. In normal times American wheat moves largely to Europe in the fall months. This year the shortage of shipping necessitates its distribution over the entire year. Therefore there is danger of a glut in our warehouse system over a considerable period.

4. There are large stocks of wheat which cannot be drawn upon by the allies during the war, but in the event of peace or defeat of the submarines, these would be available and might seriously demoralize the demand for American wheat.

5. It must be clearly understood that the guaranteed minimum price of $2 per bushel for wheat, set out in the food bill, does not apply to the 1917 harvest, but only to the 1918 harvest, and then under conditions which must be elaborated. The result of this situation is that the normal price-making machinery is entirely broken down unless some efficient Government action is brought into play, either (a) the American producer may face a slump in wheat, possibly below his production cost, and (b) the export price of wheat, which ultimately determines the real price, is at the will of a single agency; (c) some one must buy the surplus wheat at any given moment, and if the surplus passes into speculative hands it will be held for higher prices later in the year; (d) with stabilized prices, extra hazards are introduced into all distribution links which must be paid for by the consumer. It must be evident that the United States Government can more justly deal with the situation than any of the agencies mentioned.

COURSE DETERMINED BY FOOD ADMINISTRATION.

Therefore the Food Administration has determined to take the following course: First—In order to eliminate speculation in wheat and flour all elevators and mills over 100 barrels daily capacity will be required to take out a Government license and the conditions of this license to be—That only reasonable and customary charges shall be made for warehouse service; that no wheat shall be stored for more than 30 days without the approval of the Food Administration; that certain information as to receipts and shipments shall be supplied regularly. The grain exchanges are being asked to suspend all dealings and quotations in future wheat. These regulations will come into force September 1. While farmers' co-operative elevators are excepted by the food bill, this, however, only applies to mutual concerns and not to stock companies, and in any event under the advantages of joining the plan none are likely to stand out.

In substitution of the broken-down marketing machinery, the Food Administration proposes to open agencies for the purchase of all wheat at the principal terminals, carrying on its transactions with the usual dealers, and is prepared to ta e the whole harvest if necessary in order to maintain a fair price, and will resell wheat for export in such quantities as we can afford to part with in protection of our own people on one hand and to sell on the other to the millers for domestic consumption. The administration will make no charge except a nominal percentage to cover costs of the operation, and arrangements will be made which will assure the Government against loss. Upon the determination of a fair basis, it is the intention of the Food Administration to use every authority given it under the bill and the control of exports to effect the universality of this fair basis throughout the whole of the 1917 harvest year without change of fluctuation.

It should thus be clear that it will not be to the advantage of any producer to hold back his grain in anticipation of further advance, for he will do so only at his own cost of storage and interest, and if it is necessary for the Government to buy the entire wheat harvest in order to maintain this fair price in protection of the producer, we intend to do so. Furthermore, the holding of wheat or flour contracts by persons not engaged in the trade, and even when in trade, in larger quantities than is necessary for the ordinary course of their business is unlawful under the act, and such cases will be prosecuted with vigor. And we would advise such holders to liquidate their contracts at once.

TO STABILIZE THE PRICE OF WHEAT.

By the above arrangement, we believe that we shall stabilize the price of wheat throughout the year; that the hazards of operation due to fluctuating prices which are imposed upon our milling and distributing community will be eliminated, and therefore their business can return to the normal lines and the normal margins of profit, and that we shall not only have stabilized the price of wheat, but stabilized the price of flour, and that it should enable us to arrive at a stabilized price of bread. The Food Administration has had patriotic co-operation of the leading millers of the country and these millers have organized, at the request of the Food Administration, a committee to represent the entire trade. Under this arrangement the public will be assured an equitable and stabilized price of flour based upon the cost of raw material, and we confidently expect the volunteer arrangement with the mills which will give satisfaction to the public.

The universal endeavor over the country to reduce consumption of wheat breadstuffs in order that we may have the requisite exports with which to carry the Allies over the forthcoming winter will result in a largely increased amount of wheat available for export. If it were exported as wheat, it would result in diminution of employment in our mills, and of equal importance, curtailment of supply of mill feed for our dairy cattle. Therefore the Food Administration will stipulate for a large proportion of export of flour instead of wheat and as the export orders for flour will be given subject to the approval of the Food Administration, those mills who co-operate with the administration will be given the benefit of the exports employment. By thus encouraging the home production of flour the manufacturing cost will be reduced and therefore the American public will receive indirect benefit in lowered margins of cost in distribution.

FAIR-PRICE COMMITTEE.

Following the above statement by Mr. Hoover, President Wilson summoned into existence a National Fair-Price Committee, constituted as follows:

President H. A. Garfield, of Williams College, *Chairman;* Charles J. Barrett, president Farmers' Union, Union City, Ga.; Wm. N. Doak, vice-president Brotherhood of Railroad Trainmen, Roanoke, Va.; Eugene E. Funk, president National Corn Association, Bloomington, Ill.; Edw. F. Ladd, president North Dakota Agricultural College, Fargo, N. Dak.; R. Goodwyn Rhett, president Chamber of Commerce of the United States, Charleston, S. C.; J. W. Shorthill, secretary National Council of Farmers' Co-operative Association, York, Neb.; James W. Sullivan, American Federation of Labor, Brooklyn, N. Y.; L. J. Tabor, master Ohio State Grange, Barnesville, Ohio; Frank W. Taussig, chairman Federal Tariff Commission, Washington, D. C.; Theo. N. Vail, president American Telephone & Telegraph Co., New York City; Henry J. Waters, president Kansas State Agricultural College; associated with Department of Agriculture, Manhattan, Kans.

The wheat-purchasing division of the Food Administration was made up of the following-named executive officers:

Chairman, Herbert Hoover, San Francisco, Cal.; *President,* Julius Barnes, Duluth, Minn.; *Treasurer,* Gates W. McGarrah, New York City, president Mechanics and Metals Bank; *Vice-President,* F. G. Crowell, Kansas City, Mo.; *Transportation Director,* Edw. Chambers, Chicago, vice-president Santa Fé Railway; *Counsel,* Judge Curtis H. Lindley, San Francisco; *Secretary,* J. W. Shorthill, York, Neb., secretary National Council of Farmers' Co-operative Associations.

UNITED STATES FOOD ADMINISTRATION—*Continued.*

The following were named to represent the grain divisions at the various terminals:

E. M. Flesh, St. Louis; M. H. Houser, Portland, Ore.; C. B. Fox, New Orleans; H. B. Irwin, Philadelphia; P. H. Ginder, Duluth, Minn.; F. L. Carey, Minneapolis; G. S. Jackson, Baltimore; H. B. Jackson, Chicago; Charles Kennedy, Buffalo, N. Y.; R. A. Lewin, San Francisco; D. R. Piazzek, Kansas City, Mo.; C. T. Neal, Omaha, Neb.

Next came the formation of a $50,000,000 Food Administration Grain Corporation with all the stock owned by the United States Government. The allied Governments agreed to purchase all wheat products which the Food Administration considered could be spared from American consumption at the cost to the corporation, and thus the corporation was secured in its operations from any possible loss. The United States Millers' Committee, then was appointed to co-operate with the Food Administration in negotiating voluntary regulation of the milling industry. It comprised: *Chairman*, James F. Bell, Minneapolis, Minn.; *Secretary*, A. P. Husband, Chicago, Ill.; *Northwest*—Albert C. Loring, Minneapolis, Minn.; *Southwest*—Andrew J. Hunt, Arkansas City, Kans.; *Southeast*—E. M. Kelly, Nashville, Tenn.; *St. Louis and Illinois*—Samuel Plant, St. Louis, Mo.; *Ohio Valley*—Mark N. Mennel, Toledo, Ohio; *Chicago and Milwaukee*—Bernard A. Eckhart, Chicago, Ill.; *North Pacific Coast*—Theo. B. Wilcox, Portland, Ore.; *South Pacific Coast*—S. B. McNear, San Francisco; *Eastern Division*—F. J. Lingham, Lockport, N. Y.

The Millers' Committee's division of the country into territory of jurisdiction was as follows:

MILLING DIVISION.

General Offices: 42 Broadway, New York.

Division 1, Eastern Division—All of the New England States, New York, Pennsylvania, New Jersey, Delaware, Virginia, Maryland and the District of Columbia.

Division 2, Southeastern Division—North and South Carolina, Kentucky, Tennessee, Georgia, Alabama, Mississippi, Louisiana and Florida.

Division 3, Central Division—Ohio, Indiana, West Virginia and Michigan (excepting the "Northern Peninsula").

Division 4, Chicago-Wisconsin Division—All of Wisconsin (except Douglas County), Illinois, nor of and including the following counties: Adams, Brown, Cass, Menard, Logan, Macon, Piatt, Champaign, Vermillion, and the "Upper Peninsula" of Michigan.

Division 5, Northwestern Division—Montana, North Dakota, South Dakota, Wyoming, Minnesota, Iowa, and Douglas County, Wisconsin.

Division 6, Missouri Division—Arkansas, Missouri (except Buchanan and Jackson Counties), Illinois, south of but not including the following counties: Adams, Brown, Cass, Menard, Logan, Macon, Piatt, Champaign, Vermillion.

Division 7, Southwestern Division.—Kansas, Oklahoma, Nebraska, Colorado, Texas, New Mexico, and Buchanan and Jackson Counties, Missouri.

Division 8, North Pacific Coast—Idaho, Washington, Oregon, Nevada, Arizona.

Division 9, South Pacific Coast—California, Nevada, Arizona.

The Fair Price Committee fixed basic producers' prices on wheat, flour, and other classes of food as well as coal. In co-operation with the meat packers and other manufacturers, a lowered and stabilized scale of wholesale prices was agreed on and established on practically the whole range of edible and other necessaries.

FEDERAL FOOD ADMINISTRATORS.

Following is an official list of the Federal Food Administrators in the various States.

State.	Name.	Address.	State.	Name.	Address.
Alabama	Richard M. Hobbie	Montgomery	Nebraska	Gurdon W. Wattles	Omaha
Arizona	Timothy A. Riordan	Phoenix	Nevada	Henry M. Hoyt	Reno
Arkansas	Hon. Hamp. Williams	Little Rock	New Hamp.	Huntley N. Spaulding	Concord
California	Ralph P. Merritt	San Francisco	New Jersey	Hon. James F. Fielder	Jersey City
Colorado	Thos. B. Stearns	Denver	New Mexico	Ralph C. Ely	Santa Fé
Connecticut	Robert Scoville	Hartford	N. Y. City	Arthur Williams	N. Y. City
Delaware			N. Y. State	C. E. Treman	Ithaca
Dist. Colum.	Clarence R. Wilson	Washington	No. Carolina	Henry A. Page	Raleigh
Florida	Braxton Beacham	Orlando	No. Dakota	Dr. Edwin F. Ladd	Fargo
Georgia	Andrew M. Scule	Athens	Ohio	Fred C. Croxton	Columbus
Hawaii	J. F. Childs	Hawaii	Oklahoma	Dr. Stratton D. Brooks	Norman
Idaho	R. F. Bicknell	Boisé	Oregon	W. B. Ayer	Portland
Illinois	Harry A. Wheeler	Chicago	Pennsylvania	Howard Heinz	Philadelphia
Indiana	Dr. Harry E. Barnard	Indianapolis	Porto Rico	Albert E. Lee	San Juan
Iowa	J. F. Deems	Burlington	Rhode Island	Alfred M. Coats	Providence
Kentucky	Fred. M. Sackett	Louisville	So. Carolina	David R. Coker	Columbia
Kansas	Dr. Henry J. Waters	Manhattan	So. Dakota	Hon. Chas. N. Herreid	Aberdeen
Louisiana	Jno. M. Parker	New Orleans	Tennessee	Prof. H. A. Morgan	Nashville
Maine	Dr. Leon S. Merrill	Orono	Texas	E. A. Peden	Houston
Maryland	Edwin G. Baetjer	Baltimore	Utah	W. W. Armstrong	SaltLakeCity
Massach'ts	Henry B. Endicott	Boston	Vermont	James Hartness	Springfield
Michigan	George A. Prescott	Lansing	Virginia	Col. E. B. White	Richmond
Minnesota	A. D. Wilson	St. Paul	Washington	Charles Hebberd	Spokane
Mississippi	P. M. Harding	Vicksburg	W. Virginia	Earl W. Oglebay	Wheeling
Missouri	Fred. B. Mumford	Columbia	Wisconsin	Magnus Swenson	Madison
Montana	Prof. Albert Atkinson	Bozeman	Wyoming	Theodore C. Diers	Sheridan

According to the Food Administration, the weekly ration allowed the German people and the civilian population of the occupied portions of Northern France and Belgium is as follows, the amounts being those allowed per person per week: Flour, 3.45 pounds; potatoes, 7.05 pounds; cereals, (oats, beans and peas), 7 ounces; meat, 8.8 ounces; sugar, 3 ounces; butter and margarine, 2.8 ounces; and other fats, 2.8 ounces. Stated in terms of American housekeeping these items amount to sufficient flour to bake 4½ pounds of bread; one-half peck of potatoes; a cupful of beans, peas, and oatmeal; one-half pound of meat; 12 dominoes of sugar; 6 individual patties of butter; and an equal amount of other fats.

For the population of that portion of Northern France occupied by the Germans the allowance is as follows: Sufficient flour for 5 pounds of bread; one-fifth peck of potatoes; one cupful of cereals; 12½ ounces of bacon and lard; and 10 dominoes of sugar. The ration for the civilian population of the occupied portion of Belgium is similar to that of Northern France, except bacon and lard are replaced by meat and butter. The German ration, compared with the ration used as standard for purposes of comparison by the Food Administration, shows that in body-building protein the Germans have 0.41 of a pound and the standard ration 1.08 pounds. In fats the German ration contains 0.43 of a pound, as compared with standard 0.7 pound. In carbohydrates the German ration contains 4.17 pounds, as compared to 9.9 pounds for the standard ration. In total calories the German ration aggregates 10,542, as compared to 24,000 in the standard ration.

BREAD STANDARDIZATION.

When President Wilson, in November, issued his proclamation for the standardization of bakers' bread loaves, the Food Administration announced that its inquiries, through the Federal Trade Commission, indicated seven cents as a fair average retail price for a one-pound loaf. This statement was added:

The bread of the United States is approximately 40 per cent. baked in bakeries, and 60 per cent. in the homes. The object of standardization is to reduce the cost of public baking and distributing bread, to reduce the waste of flour, and to limit the use of sugar and lard in the preparation of bakery bread. By fixing the weight of bread at 1 pound minimum loaf, with 1½ pound, 2 and 4 pound loaves, and with a stabilized price of flour, the present variables in bread will be largely eliminated and competition will be centralized upon price. The Administration has no power to fix the price. There are grocery stores in many cities whose whole business is conducted upon a basis where the consumer pays cash and carries the goods home and who conduct their own bakeries. It is anticipated that a standard 1-pound loaf of baked bread can be put before the public from these groceries at about 7 cents. The other type of grocers doing business upon a credit and delivery basis must charge more.

The bread business of the country is of three different commercial types. The first is the wholesale baking of bread; its resale by the wholesale baker to the retailer, who is chiefly the grocery man; and the distribution by the grocery man largely by delivery to the household, with credit extended through periodic collections of bills. This system is the most prevalent, and bread thus distributed at the present time costs the consumer from 9 to 15 cents per pound, the average being about 11 cents. The system contains a great number of economic wastes, particularly in selling costs and too frequent deliveries.

	Per Cent.		Per Cent.
Whole baking cost and profit	67	Retailer's cost and profit	20
Wholesale baker's cost of selling and delivery to the retailer	13	Total	100

The costs worked out by the Federal Trade Commission, to which are added the Food Administration figures of distribution and profit per pound of baked bread, indicate the following on $11 flour:

	Lowest Territory.	Highest Territory.	Average of Whole U. S.
	Cents.	*Cents.*	*Cents.*
Wholesale baker's cost and profit	7.26	8.25	7.98
Retailer's cost and profit	2.00	2.00	2.00
Total	9.26	10.25	9.98

The above price of flour should be somewhat less in many sections. The second commercial type of bakeries is represented by the bakeries of the "cash and carry" stores, who order for their own retail distribution. Here advertising, commissions, returned breads, deliveries, and credit costs are greatly reduced. This type shows a variation in costs and profits from:

	Lowest Territory.	Highest Territory.	Average of Whole U. S.
	Cents.	*Cents.*	*Cents.*
Baker's cost, profit, and distribution to stores	5.15	6.37	6.35
Retail distribution and profit	1.00	1.00	1.00
Total	6.15	7.37	7.35

These amounts are also subject to reduction under the standardization plan proposed, and in localities of cheaper flour and labor. The third type is the small baker, who delivers his own product directly to the consumer. These bakers have the difficulty of being unable to buy flour quite as cheaply as the large bakers, but the difference is inconsequential except in times of widely fluctuating prices, in which case they are unable to protect themselves by carrying any considerable stock of flour, and high peaks of price render them unable to compete with the large baker. The Federal Trade Commission has completed its investigation in the cost and practices, wholesale, in bread baking. The following is a summary of the report:

The average cost for wholesale bakers was as follows for a pound of bread baked. For the purpose of computation, flour at $11 per barrel was used as a basis.

	Wholesale Bakers.			Chain Store Bakers.		
	Lowest Territory.	Highest Territory.	Average.	Per Cent.	Average.	Per Cent.
Flour	$0.038768	$0.039440	$0.039453	52.7	$0.038576	65.9
Other ingredients	.006064	.008400	.006822	9.1	.007328	12.5
Manufacturing costs	.009408	.012288	.011236	15.0	.007024	12.0
Overhead	.003024	.004016	.004595	6.1	.001552	2.6
Total cost at baker's door	.057296	.064160	.062107	82.9	.054512	93.1
Cost of salesmen's salaries and commissions and delivery to retailers	.010352	.012756	.012784	16.9	.003952	6.7
Total	.067664	.076832	.074855	100.0	.058494	100.0

The above does not include bakers' profits nor retailers' charges.

	Cost per Lb.		Cost Per Lb.
Bakeries over 20,000 pounds per diem	$0.073766	Bakeries under 5,000 to 20,000 pounds per diem	.069268
Bakeries from 5,000 to 20,000 pounds per diem	.072299		

The different localities show a variation in cost from $0.067664 in the Potomac division of Maryland, Delaware, Virginia, and West Virginia to $0.077528 in the central division of Illinois, Missouri and Iowa.

BREAD STANDARDIZATION—*Continued.*

GENERAL RULES FOR BAKERS.

Some of the general rules and regulations governing all licensees manufacturing bakery products are announced by the United States Food Administration. They are:

"The licensee shall not buy, contract for, sell, store, or otherwise handle or deal in any food commodities for the purpose of unreasonably increasing the price or restricting the supply of such commodities, or of monopolizing, or attempting to monopolize, either locally or generally, any of such commodities. The licensee shall not destroy any bakery products and shall not knowingly commit waste, or wilfully permit preventable deterioration in connection with the manufacture, distribution, or sale of any bakery products. The licensee shall not accept returns of bread or other bakery products, nor make cash payments, nor allow credit, to any retailer for any unsold bread or other unsold bakery products, nor shall the licensee exchange any bread or bakery products for other bread or bakery products which he has sold."

These special rules and regulations governing licensees manufacturing bread and rolls are made public: 1. The licensee shall manufacture bread and offer it for sale only in the following specified weights, or multiples thereof, which shall be net weights, unwrapped, twelve hours after baking: Sixteen-ounce units (not to run over seventeen ounces), twenty-four-ounce units (not to run over twenty-five and one-half ounces). Where twin or multiple loaves are baked, each unit of the twin or multiple loaf shall conform to the weight requirements of this rule. 2. The licensee shall manufacture rolls and offer them for sale only in units weighing from one to three ounces, but no rolls shall be manufactured or offered for sale which shall weigh, unwrapped, twelve hours after baking, less than one ounce or more than three ounces. 3. The standard weights herein prescribed shall be determined by averaging the weight of not less than twenty-five loaves of bread of any one unit, or five dozen rolls of any one unit, and such average shall not be less than the minimum nor more than the maximum prescribed by these rules and regulations for such units. The licensee in mixing any dough for bread or rolls shall not use the following ingredients in amounts exceeding those specified below, per unit of 196 pounds of any flour, or meal, or any mixture thereof:

Sugar—Not to exceed three pounds of cane or beet sugar or, in lieu thereof, three and one-half pounds of corn sugar. Where sweetened condensed milk is used, the licensee, in determining the permitted amount of sugar, shall deduct the added sugar content of such condensed milk from the net amount of other sugar, of the kinds herein designated.

Milk—Not to exceed six pounds of fresh milk from which the butter fats have been extracted, or the equivalent thereof.

Shortening—No shortening shall be used except as follows: Not to exceed two pounds of "compounds" containing not more than 15 per cent. of animal fats. In lieu of such "compounds" the licensee may use not to exceed two pounds of vegetable fats. The licensee in making any bread or rolls shall not add any sugars or fats to the dough during the process of baking or to the bread or rolls when baked.

The Administrator urges wholesale bakers to establish as the wholesale prices of their products the prices at which they will offer such products for sale in lots of twenty-five pounds or more, unwrapped, for cash, at the bakery door, the prices so established to be subject to such additional charges as may be fair for wrapping and delivering when such services are performed by the baker. The Food Administrator requests that when such wholesale prices are established the licensee report this fact and state such prices to the Federal Food Administrator in the State where his bakery is located. Inasmuch as some wholesale bakers in certain communities are now retailing bread at their plants direct to the consumer, unwrapped, undelivered, and for cash, at wholesale prices, the United States Food Administrator recommends that this practice be extended wherever bakers find it possible to do so, adding only sufficient extra charge to cover extra expense. The Administrator, believing that frequent deliveries are uneconomical and tend to enhance prices, urges all bakers to reduce deliveries wherever possible to one a day over each route, and to consolidate deliveries or zone their territories in order to reduce the expense of deliveries as far as possible.

SAVING WHEAT IN NEW YORK HOTELS.

The saving of wheat and meat in the larger hotels and restaurants in New York City has been yielding a thousand barrels of flour a week and more than a thousand tons of meat. Actual figures received show that in the hotels and restaurants of New York City on Tuesday, November 13, the saving in meats amounted to 193,545 pounds or 96.75 tons. The saving of wheat flour on Wednesday, November 14, was 101,295 pounds or 50.6 tons or 517 barrels. Through taking certain meats from their daily menus and refusing to serve meats at banquets a further conservation was effected by hotels and restaurants, swelling the total quantity of meats saved by them in New York during the whole week of November 12 to 232,254 pounds or 116.12 tons. By the use of whole or partial substitutes for wheat flour, particularly in bread and pastries, the saving in wheat flour for a week is increased to 121,554 pounds or 60.8 tons, or about 620 barrels.

A firm selling in several States to a great variety of trade reports the following decrease in Tuesday orders since the adoption of meatless days: In hotels, 30%; in restaurants, hospitals, and institutions, 25%; in schools, 25%; to retail trade and homes, 12½%.

EFFECT OF PEACE ON WHEAT.

Mr. Hoover said, in a statement explaining $2 wheat, late in October: "If ample shipping existed there would be no need for saving or increased production of wheat on the part of the American people But, on the other hand, if we can produce such economies in consumption and such stimulation of production in the United States and Canada as will enable us to feed the Allies absolutely from this continent, and thus enable them in the final analysis to live without sending a ship further afield than our Atlantic seaboard, we can resist the submarine indefinitely. There is, however, another phase to this accumulation of wheat in isolated markets.

WITH PEACE FOREIGN WHEAT MARKETS VANISH.

"With the stimulation of $2 wheat, we are going to have a very much increased acreage in 1918. If climatic conditions are right, we should have 1,000,000,000 bushels. If the war continues, this wheat will be vitally necessary; but if the war should come to an end, there will be no foreign market for at least 400,000,000 bushels of this wheat. The Government must then take over the wheat and probably find a market for it at a very great loss. I should anticipate that the Government may lose from $300,000,000 to $500,000,000 on this wheat guarantee if peace arrives before the 1918 harvest is marketed. And, now, I would like to say frankly that I have felt from the beginning that the stimulation of the production of wheat for 1918 could have been obtained in perfect justice to the farmer if the guarantee had been given simply on the basis of a return on capital and labor, so that the price would depend upon the character of the harvest.

"This does not mean that the farmer would not receive more than the minimum in case war continued; but, in case of a good harvest, and peace intervened, the Government would have been saved several hundreds of millions of dollars if the guarantee had been placed on this footing, and justice would still have been done to the farmer. However, the guarantee has been fixed. It is an insurance against the submarine, and any estimate of what it may cost we must leave to the future. We may summarize the bread-grain position by saying that for the 1917 harvest we must economize in consumption, and for 1918 we have an assurance as far as law can give it, of large production. Every indication of the planting of winter wheat points to a large increase next year."

EFFECT OF DECREASED LAKE TONNAGE ON GRAIN CARRYING.

(By the Department of Commerce.)

THE data was prepared by Capt. A. A. Poland, U. S. A., for the Council of National Defense, and indicates the outlook for the New York Barge Canal traffic in 1918.

The clearances from Chicago via lake for 1914, 1915, 1916, and the first half of 1914, 1915, 1916, and 1917, respectively, are shown in the following table:

Flour and grain cleared from Chicago via lake.

GRAINS.	1914.	1915.	1916.	To June 30, 1914.	To June 30, 1915.	To June 30, 1916.	To June 30, 1917.

NEW YORK STATE FOOD COMMISSIONS.

There have been a number of these bodies created, as follows:

The Committee on Patriotic Agricultural Service, appointed April 17, 1917, pursuant to the provisions of Chapter 205 of the Laws of 1917: S. J. Lowell, Fredonia; Fred. W. Sessions, Utica; R. D. Cooper, Little Falls; Seth J. T. Bush, Morton.

The above Commission was abolished by the enactment of Chapter 813 of the Laws of 1917.

The State Council of Defense, appointed May 17, 1917, pursuant to the provisions of Chapter 369 of the Laws of 1917: Charles S. Whitman (Governor), Albany; William W. Wotherspoon, Albany; Frank M. Williams, Albany; Charles S. Wilson, Albany; Charles H. Sherrill, New York City.

The State Food Commission, appointed October 2, 1917, pursuant to the provisions of Chapter 813 of the Laws of 1917: Jacob Gould Schurman, Ithaca; Charles A. Wieting, Cobleskill; John Mitchell, Mount Vernon.

State Council of Farms and Markets, appointed October 30, 1917, from the State at large, pursuant to the provisions of Chapter 802 of the Laws of 1917: *Chairman*, John Mitchell, Mount Vernon; First District Herbert L. Pratt, New York City; Second District—James G. Killough, Brooklyn; Third District—Charles A. Wieting, Cobleskill; Fourth District—Lyman M. Wright, Hartford; Fifth District—Frank M. Howe, Syracuse; Sixth District—Floyd M. Shoemaker, Elmira; Seventh District—Frank M. Jones, Webster; Eighth District—Ira T. Gleason, Buffalo; Ninth District—Otis H. Cutler, Suffern.

NEW YORK STATE WAR FOOD LAWS OF 1917.

(A Brief Summary by George W. Perkins.)

Chapter 205 of the Laws of 1917 created a commission known as the "New York State Food Supply Commission" for the purpose of increasing the production of foodstuffs in the State. It had an appropriation of $500,000, but was abolished by Chapter 813 of the Laws of 1917, and all its powers conferred on the new State Food Commission, created by Chapter 813.

Chapter 802 of the Laws of 1917, known as the "Farms and Market Law," placed the existing State Department of Agriculture and the State Department of Foods and Markets in one department, to be known as the "Department of Farms and Markets." This department is administered by a Council of Farms and Markets, similar to the State Board of Regents. One member is appointed to the council from each of the judiciary districts of the State, and the Commissioner of Markets for New York City is an ex-officio member of the council. Chapter 802 also gives each city in the State the right to establish a market department, under the control of a Commissioner of Markets. New York City has established such a department, and Henry Moskowitz has been appointed Commissioner. The powers of the Department of Farms and Markets, under Chapter 802, are not very broad.

Chapter 813, passed at the Extraordinary Session of the Legislature, created a State Food Commission for the period of the war, and gave the Commission certain powers in relation to food. It prohibited such acts as destroying or monopolizing food, engaging in unfair and wasteful practices, etc. It prohibited the hoarding of food, and gave to the Commission the power when food was hoarded to have the hoarded goods sold, and to prevent the person guilty of hoarding from doing any more business within the State. It gave the Commission the power to license all dealers in food and to prescribe the conditions under which licenses could be issued.

It provided that in case of actual or anticipated emergency on account of a deprivation of necessaries, any municipality in the State might buy, store and sell food and fuel, provided the State Commission gave the municipality permission to do so. The Commission is also empowered to compel railroads to give preference to the transportation of food, to act as representative of the President for the National Food Administration in the State. The Commission is directed to publish weekly reports, showing the cost of food products to the producer, and the wholesale and retail prices of such foodstuffs in the cities of the State.

A million dollars is appropriated for the work of the State Food Commission. Chapter 813 also provides that under certain conditions, the cost of erecting public markets in cities is to be born equally by the city and by the State.

END OF SUMMARY—EXTRACTS FROM THE LAW.

The State Food Commission, created by Chapter 813 of the Laws of 1917, has control not only over food, but also over necessaries, defined as follows, in the statute itself:

"The word 'necessaries' as used in this act shall be deemed to include foods, feeds, seeds, fuel, including fuel oil, fertilizers and fertilizer ingredients, tools, utensils, implements, machinery and equipment required for the actual production of foods, feeds and fuel, except gas, natural or artificial. The word 'person' wherever used in this act, shall include individuals, partnerships, associations and corporations. When construing and enforcing the provisions of this act, the act, omission or failure of any official, agent, or other person acting for or employed by any partnership, association or corporation within the scope of his employment or office shall, in every case, also be deemed the act, omission or failure of such partnership, association or corporation, as well as that of the person."

Hoarding is thus described: "Necessaries shall be deemed to be hoarded within the meaning of this act when either (a) held, contracted for or arranged for by any person in a quantity in excess of his reasonable requirements for use or consumption by himself and dependents for a reasonable time; (b) held, contracted for or arranged for by any manufacturer, wholesaler, retailer or other person in a quantity in excess of the reasonable requirements of his business for use or sale by him for a reasonable time, or reasonably required to furnish necessaries produced in surplus quantities seasonally throughout the period of scant or no production; or (c) withheld, whether by possession or under any contract or arrangement from the market, by any person for the purpose of unreasonably increasing or diminishing the price:

"Provided, however, that this section shall not include or relate to transactions on any exchange, board of trade or similar institution or place of business that may be permitted by the President of the United States pursuant to authority conferred upon him; and provided, further, that any accumulating or withholding by any farmer, or gardener, co-operative association, corporate or otherwise, of farmers or gardeners, including live stock farmers and fruit growers, or any other person, of the products of any farm, garden or other land owned, leased or cultivated by him or by the members of any such association shall not be deemed to be hoarding within the meaning of this act.

"Whenever any necessaries shall be hoarded as defined in this section, it shall be the duty of the Food Commission of this State to report the same immediately to the Food Administrator of the Federal Government at Washington, with all the facts and evidence relating to the case, and to aid and assist in any manner desired by the Federal Government or its representative in the prosecution thereof."

ICE ONE OF THE NECESSARIES.

Ice is included in the "necessaries" subject, in an emergency, to the control of the Commission.

As to auctioning hoarded necessaries, the law says: "The Commission may in its discretion if an emergency exists requiring the sale and distribution of necessaries so hoarded for the purpose of relieving public necessity, cause the fair value thereof to be ascertained by a board of appraisers, consisting of one member to be appointed by the Commission, one by the owner of the property and one by the appraisers so appointed. If the appraisers appointed by the Commission and the owner of the property shall fail for three days to agree upon the third member of said board of appraisers, then on request of the Commission, or such owner, such third member shall be selected within five days by a judge of a court of record

NEW YORK STATE WAR FOOD LAWS OF 1917—*Continued.*

in the judicial district in which such property is located. If such owner fail or refuse to appoint a member of such board of appraisers, such value shall be ascertained by the Commission. The members of such board of appraisers, for the purpose of making such appraisal, shall have access to any place in which such necessaries are kept or stored. Such board of appraisers shall file its report in the office of the Commission within five days after the appointment of the third member of such board. If such report shall not be filed within such five days the Commission shall appraise such necessaries.

"Upon the determination by such appraisers or by the Commission, as the case may be, the Commission, if funds be available to the amount of such appraised value, may seize such necessaries and shall pay such appraised value thereof to the person entitled thereto. If the compensation so paid be unsatisfactory to the owner of such necessaries, he shall be entitled to file his claim in the court of claims for such further sum as added to the amount so paid shall amount to just compensation for such necessaries. The court may make such award upon any such claim as it deems just and proper and render judgment therefor as against the State, provided that such claim be filed within three months from the time it accrued. Claims filed under this section shall have preference in the hearing thereof over all other claims pending in such court. Necessaries seized by the Commission pursuant to this section shall be sold at public auction in such manner as to provide the most equitable distribution thereof."

CONTROL FEATURES ACCORD WITH FEDERAL ACT.

In its "control" features, the new State law is modelled on the National Food Control Law, printed elsewhere in THE ALMANAC. In both, farmers are exempted from the provisions. Thus the State law says:

"Provided that this section shall not apply to any farmer, gardener, co-operative association, corporate or otherwise, of farmers or gardeners, including live stock farmers and fruit growers, or other persons with respect to the products of any farm, garden or other land owned, leased or cultivated by them, nor to any retailer with respect to the retail business actually conducted by him, nor to any common carrier; provided further that for the purposes of this act a retailer shall be deemed to be a person, partnership, corporation or association not engaged in the wholesale business whose gross sales do not exceed one hundred thousand dollars per annum. No such license shall be required as to any person until the plan of such license system shall have been submitted by the Commission to the Federal Food Administrator and a period of ten days shall have elapsed without action by the Federal Government as to licensing the persons to be affected by licenses issued under the plan proposed.

"No license shall be required of any person licensed by the Federal Government and any license issued under this act shall be superseded by any similar license issued to such person under the authority of the United States."

FOOD GAMBLING.

The act says: "If the Commission becomes satisfied that there is any practice or practices of trades including speculation or gambling, detrimental to the public interest in dealing by wholesalers, retailers or any other person in the necessaries of life which interfere with the distribution or sale of such necessaries or any of them at a reasonable price, the Commission may enact and publish such rule or rules as in it, judgment will provide for the correction or discontinuance of such practices. The Commission may in its discretion appoint an advisory committee or committees to aid it in the formation of such rules, in which case one or more members of such committee shall be from the line of trade in which such practice prevails. Such rule or rules shall be published in at least two newspapers in the county in which such practice or practices prevail, so as to give reasonable notice thereof and any person who thereafter violates any such rule shall be deemed guilty of a violation of this act."

HOTELS AND RESTAURANTS.

They are under the new law, which says: "Whenever it shall have been certified to the State Commission by the President of the United States or his duly authorized administrators that the public interest requires the regulation of the service of meals in hotels, restaurants and public places where meals are served, the State Commission may make and promulgate rules therefor by such publication as in their judgment will give proper notice thereof, and any violation of rules so promulgated shall be deemed a violation of this act."

When cities are authorized by the Commission to buy and sell food and fuel, they may issue special revenue bonds to finance the undertaking.

FISH AND GAME.

The act says the Commission shall have power, with the consent of the State Conservation Commission, "to permit the sale under such rules and regulations as the Commission may prescribe of fish and game which may be lawfully taken, but may not, prior to the enactment of this act, be lawfully sold. Such rules and regulations shall be so made as, in the judgment of the Commission and the Conservation Commission, will be consistent with the general policy of this State of conserving fish and game."

STATE AID FOR PUBLIC MARKETS.

This is forthcoming only to the extent of one-half the cost, and then only on the application of the community. The law says:

"The Commissioner of Public Markets of a city, in which a department of markets shall have been heretofore or shall hereafter be established as provided in this article, may, when authorized by the city, submit to the Council of Farms and Markets a proposal for the location and construction, repair or improvement of one or more public markets in such city with storage facilities for such market or markets and request that State aid be given for such purpose. The portion of the expenditures for the acquisition of lands for public markets and for the construction, repair and improvement of public markets, which is to be paid by the State shall be paid to the city by the State Treasurer out of moneys appropriated or available therefor, upon the certificate of the Council of Farms and Markets on the warrant of the Comptroller. The moneys so paid shall be applied by the city exclusively for the payment of the cost of the acquisition of the lands acquired by the city and dedicated for public markets, and for the construction, repair and improvement of public markets thereon."

Towns or villages of 10,000 or more population may establish a Department of Markets and build, with the aid of the State, as in the case of cities.

The Commission ceases, automatically, to exist one year after the publication of a peace treaty between the United States and Germany.

NEW YORK STATE LAW FOR EMPLOYMENT OF CHILDREN IN AGRICULTURAL PURSUITS.

(Passed by the Legislature and Signed by the Governor May 29, 1917.)

SECTION 1. The provisions of article Twenty-three of the education law, relative to the compulsory education of children, may, in the discretion of the Commissioner of Education, be suspended for the period between the first day of April and the first day of November of each year, or any portion thereof, during the time that this act shall remain in effect, for the purpose of aiding and performing labor in the cultivation, production and care of food products upon farms and gardens within the State. Such suspension shall be subject to such conditions, restrictions and limitations as may be imposed by the Commissioner of Education, and shall be subject to rules and regulations to be prescribed by him. In case of any such

WAR LAW FOR CHILDREN ON FARMS—*Continued.*

suspension provision shall be made for the welfare and protection of the children affected thereby, and during the period of such suspension and while engaged in such work they shall be under the supervision and direction of the school authorities of the city or district in which they reside.

SECTION 2. The Board of Education of a union free school district or the trustee of a common school district may appropriate and expend district funds for the purpose of carrying out the provisions of this act and of the rules and regulations of the Commissioner of Education, without the vote of a district meeting, and such amount may be raised by tax in the same manner as for other school expenditures. The Board of Education or other proper authorities of a city shall provide for the raising of money for the purpose of providing for the supervision, protection and welfare of the children of the city during the time that they are engaged in the work authorized by this act, and the amounts expended therefor shall be a charge against the city and shall be paid in the same manner as other charges against the city are paid.

SECTION 3. The expenditures of the Commissioner of Education in carrying into effect the provisions of this act shall be paid out of the sums appropriated by the State for National or State defence, upon the certificate of the Governor that in his opinion there is necessity for using a portion of the sums so appropriated for such purpose. The Commissioner of Education may apportion to the cities and school districts of the State, out of funds available therefor, a sum not exceeding twenty-five per centum of the amount expended by any of such cities or districts in providing for the supervision, protection and welfare of children who are engaged in the work authorized by this act. The Board of Education or trustees of a city or district may accept a gift, transfer, devise or bequest of property or money, to be used or applied for the purpose of carrying into effect the provisions of this act and of the rules and regulations of the Commissioner of Education in such city or district, and for the purpose of providing for the proper supervision, protection and welfare of the children of such city or district who may be engaged in such work.

SECTION 4. A pupil in the public schools or in any State school or institution who is relieved from school work and is engaged satisfactorily in agricultural service during the present school year shall be given credit for the work of the present term without examination, on the certificate of the person in charge of such school or institution that his work therein up to the time of engaging in such service is satisfactory. A pupil in any such school or institution who engages in such service during the present school year shall not incur any loss of standing or credit on account of such service. All pupils in public schools who are candidates for college entrance diplomas or other credentials to be issued to them at the close of the present school year shall be granted such diplomas or credentials on the certificate of the principal of the school that their work up to the time of engaging in such service is satisfactory. The regents of the university shall make rules for the purpose of giving credit to pupils in the public schools who have been in attendance at school during the present school year and who have left the schools for the purpose of rendering agricultural or industrial service.

Where the holders of university scholarships awarded as provided in Sections Seventy to Seventy-seven, inclusive, of the education law as amended, shall be absent from the colleges or universities where they are in attendance, because of the performance of military service or of agricultural or industrial service, they shall be entitled to an extension of the period covered by such scholarships, upon presentation of evidence satisfactory to the Commissioner of Education, that they have been engaged in such service; but in no case shall the holder of such a scholarship be entitled to receive more than the sum of one hundred dollars each year for a period of four years, to aid him in the completion of a college education.

SECTION 5. The Commissioner of Education shall cause appropriate certificates or badges to be prepared and issued to pupils in the schools of the State who shall perform satisfactory agricultural or industrial service under rules and regulations of the Commissioner of Education.

SECTION 6. This act shall take effect immediately and shall continue in full force and effect until the end of the present war and for a period of two months thereafter.

HOW TO SELECT FOODS.

To help the housewife group foods in a simple and effective way, the nutrition specialists of the United States Department of Agriculture have published the following suggestive grouping in Farmers' Bulletin 808, on how to select foods.

Without these the food would be lacking in mineral substances needed for building the body and keeping it in good working condition; in acids which give flavor, prevent constipation, and serve other useful purposes; and in minute quantities of other substances needed for health. By giving bulk to the diet they make it more satisfying to the appetite.

Foods depended on for mineral matters, vegetable acids, and body-regulating substances: Fruits—Apples, pears, etc.; berries; oranges, lemons, etc.; bananas; melons, etc. Vegetables—Salads—lettuce, celery, etc.; green peas, beans, etc.; tomatoes, squash, etc.; potherbs, or "greens;" potatoes and root vegetables.

These are sources of an important body-building material, protein. In the case of children part of the protein food should always be whole milk: Milk, skim milk, cheese, etc.; poultry, eggs, meat, fish, dried peas, beans, cowpeas, etc.; nuts.

Cereals (wheat, rice, rye, barley, oats, and corn) and potatoes (white and sweet). Cereals come near to being complete foods, and in most diets they supply more of the nourishment than any other kind of food. It is not safe, however, to live only on cereals. Cereal grains, meals, flours, etc.; cereal breakfast foods; bread; macaroni and other pastes; crackers, cakes, cookies, starchy puddings, etc.; potatoes and other starchy vegetables.

Unless some of the fuel is in this form the diet is likely to be lacking in flavor: Sugar, molasses, syrups, honey, candies; sweet cakes and desserts; fruits preserved in sugar; jellies, and dried fruits.

These are important sources of body fuel. Without a little of them the food would not be rich enough to taste good: Butter and cream; lard, suet, and other cooking fats; salt pork and bacon; table and salad oils.

Cottage cheese is one of the important meat substitutes say specialists of the United States Department of Agriculture. For supplying protein, one pound of cottage cheese equals: 1.27 pounds sirloin steak; 1.09 pounds round steak; 1.37 pounds chuck rib beef; 1.52 pounds fowl; 1.46 pounds fresh ham; 1.44 pounds smoked ham; 1.58 pounds loin pork chop; 1.31 pounds hind leg of lamb; 1.37 pounds breast of veal.

On the basis of energy supplied, one pound of cottage cheese equals: 8½ ounces sirloin steak; 11¼ ounces round steak; 11¼ ounces chuck rib beef; 10¾ ounces fowl; 5½ ounces fresh ham; 5 ounces smoked ham; 6 ounces loin pork chop; 7½ ounces hind leg of lamb; 12¾ ounces breast of veal.

CHURCH TEMPERANCE SOCIETY.

Headquarters, 1 Madison Avenue, New York. *President*—Rt. Rev. Frederick Courtney, D. D *Treasurer*—William Jay Schieffelin. *General Superintendent*—Rev. James Empringham, S. T. D. The society was organized within the Protestant Episcopal Church in 1881. Its activities at the present time are chiefly concentrated on a nation-wide campaign for national prohibition for the period of the war or longer. The society works on the lines of moral, as well as of legal suasion, and its practical objects are: (1) Training the young in habits of temperance; (2) Rescue of the drunkard; (3) Restriction of the saloon by legislation; (4) Counteractive agencies, such as iced water fountains, lunch wagons, coachmen's and firemen's coffee vans, coffee houses, workingmen's clubs, reading rooms, and other attractive, wholesome resorts. It has established the Squirrel Inn Free Reading Room, 131 Bowery, New York, and the Longshoremen's Rest, 164 Eleventh Avenue, New York.

CHRONOLOGY OF THE WAR.

(Included in this record are all the steps taken by the President, Congress and other United States Government agencies in preparing for and participating in the great conflict.)

1916.

Dec. 12—The French Premier, Aristide Briand, reconstructed his Cabinet and created a War Council of five members; Gen. Robert Georges Nivelle was chosen to command the French armies in France, while Gen. Joffre became President of the Allied Military Council.

—The French commander of the Allied squadron in Greek waters, Vice Admiral du Fournet, was replaced by Admiral Gaucher.

—Archduke Charles Stephen of Austria was selected to be Regent of Poland.

—An insurrection broke out in Portugal, but was put down by Government troops.

Dec. 14—In the British Commons Bonar Law received a war credit of $2,000,000,000; the grand total of war credits to date is $17,660,000,000.

—A German report stated that all of Great Wallachia (Roumania) south of the railroad from Bucharest to Cernavoda had been occupied.

—The British horse transport Russian was sunk in the Mediterranean by a submarine, seventeen American muleteers losing their lives.

Dec. 15—The Russian Duma unanimously favored "a categorical refusal by the Allied Governments to enter under present conditions into any peace negotiations whatever."

—At Verdun the French recaptured two miles of territory on a front of seven miles, taking 11,000 prisoners.

Dec. 18—German estimates put the captured in Roumania at 120,000 men and 3,000 cannon since their offensive began.

Dec. 19—Lloyd George, as new British Premier, answered the German peace proposal; he declared that peace in Europe cannot be obtained and maintained until Germany is prepared to accede to the Allies' original terms—complete restitution, full reparation, and effectual guarantees.

—Germany stated that the American steamship Columbian was sunk (on November 6) because of assistance given to the enemy by wireless.

Dec. 20—Washington made public the text of President Wilson's so-called peace note to the nations.

—Count Clam-Martiniz (former Minister of Agriculture) became Premier of Austria upon the failure of Alexander Spitzmueller to form a Cabinet.

—The British Chancellor announced that the tax on excess profits yielded $368,495,000 between April 1 and December 16.

—Germany declared that the French battleship Suffren was sunk by a German submarine on November 26 northwest of Lisbon.

Dec. 21—Secretary of State Lansing declared that the rights of the United States as a neutral were so involved that "we are drawing nearer the verge of war," and "are entitled to know what each belligerent seeks in order that we may regulate our conduct in the future."

Dec. 23—German reports indicated that the Russians, under Gen. Sakharov, had been swept out of the Dobrudja district of Roumania, with the exception of about 200 square miles in the northwestern corner.

—Baron Burian was succeeded as Minister of Foreign Affairs in Austria-Hungary by Count Czernin von Chudenitz.

Dec. 26—Germany replied to President Wilson's note to the belligerents, and proposed "an immediate meeting of delegates of the belligerent states at a neutral place."

Dec. 27—After a five-day battle in eastern Wallachia, Roumania, the Russians were forced to retreat further north, losing 7,600 prisoners.

—The French armored cruiser Gaulois was torpedoed and sunk in the Mediterranean; the crew was saved.

—Norway, Sweden and Denmark sent notes to the belligerents, hoping that President Wilson's proposals would have a result.

Dec. 30—The reply of the Entente Allies to the German peace note was made public at London and Paris. It restated the efforts of England, France and Russia to avert war, referred at length to the Belgian invasion and continued suffering, and refused to "consider a proposal which is empty and insincere."

—Spain sent a note to the United States declaring that at the present time peace efforts would not be "useful or efficacious."

1917.

Jan. 1—Turkey declared itself a completely independent nation. Germany and Austria recognized it as such.

—The British transport Ivernia, a Cunard liner, was sunk by a submarine in the Mediterranean.

Jan. 2—Italy declared officially that since entering the war she had taken 500 square miles of territory and 85,000 Austrian prisoners.

—The Russians were driven entirely out of the Dobrudja district.

Jan. 4—The United States Reserve Board estimated that the national debt of Great Britain, France, Russia, Germany and Austria-Hungary had been increased $49,455,000,000 since the beginning of the war.

Jan. 5—The Russians commenced an attack against the Germans in the Riga district.

Jan. 6—Representatives of the Allies met in Rome for a war council with Italian officials.

Jan. 8—Focsani, on the Putha River, was captured by von Mackensen.

—Canadian war losses in twenty-nine months to the end of the year were announced as follows: Killed and died of wounds, 14,864; died of sickness, 484; wounded, 48,454; missing, 4,078; total casualties, 68,290.

Jan. 9—The Premier of Russia, Alexander Trepoff, resigned, Prince Golitzine succeeding him.

—The British battleship Cornwallis was sunk by a submarine in the Mediterranean.

Jan. 10—The Entente Allies replied to President Wilson's note of December 18 regarding peace term.

Jan. 11—Germany sent a note to neutrals stating that the form of the Entente reply to peace proposals excluded an answer.

Jan. 17—British Foreign Minister Balfour's note, supplementing the Allies' reply to President Wilson's note regarding peace terms, was received at Washington.

—J. P. Morgan & Co. announced that the British Government had arranged a new $250,000,000 loan.

Jan. 20—Germany defended its deportation of Belgians in a note to the United States.

Jan. 21—Official figures from Washington showed that in two and a half years of the war the United States exported to the Allies cartridges to the value of $85,000,000; firearms, $60,000,000; gunpowder, $350,000,000; other explosives, $475,000,000.

Jan. 22—President Wilson made his "Peace Without Victory" address to the United States Senate. He stated through that medium to the country what part the United States should take in the world war.

Jan. 24—The Germans, on Riga front, retook ground previously yielded to Russians.

Jan. 25—The liner Laurentic, in the British naval service, was sunk by a mine off the Irish coast.

—In the region of Verdun the Germans gained ground.

Jan. 29—The House of Representatives passed the Fortifications Bill appropriating $51,000,000.

Jan. 31—Germany announced that from February 1, 1917, sea traffic would be stopped without warning in certain zones.

Feb. 1—The Canadian Parliament voted a war credit of $550,000,000.

Feb. 3—The United States demanded the release of sixty-two Americans captured on British vessels in the South Atlantic and held as prisoners by the Germans.

—President Wilson addressed Congress in the House, reviewing the submarine controversy.

—The United States severed diplomatic relations with Germany.
—The American steamship Housatonic was sunk by a German submarine after warning, the crew being saved.
Feb. 4—President Wilson announced to the neutral nations his belief that it would make for the peace of the world if they would take action against Germany similar to that taken by the United States.
Feb. 7—The British forced the Germans to withdraw from Grandcourt, a fortress protecting Bapaume on the west.
—The Senate indorsed the President's action in breaking off diplomatic relations with Germany.
—The British liner California was sunk without warning off the Irish coast. One life was lost.
Feb. 10—Ambassador Gerard left Germany for the United States via Switzerland.
Feb. 11—The British advanced on the Tigris front.
Feb. 12—The Mexican Government proposed to the United States that neutrals end the war by stopping all trade with belligerents.
—The United States refused Germany's request to discuss matters of difference, unless Germany withdrew from the stand it took in its ruthless warfare proclamation of January 31.
Feb. 13—Denmark, Norway and Sweden presented an identical note to Germany, refusing to recognize the submarine blockade as legal.
Feb. 14—The German Ambassador, von Bernstorff, sailed from New York for home by way of Halifax and England.
—German steamship Walkure, scuttled in Papette, Tahiti, ordered raised and named Republic.
Feb. 15—Germany released the American seamen taken from the Yarrowdale.
Feb. 16—Great Britain announced modifications of the mine zone in the North Sea.
—The British advanced their positions on both sides of the Ancre 1,000 yards on a mile and a half front.
Feb. 17—The British announced the capture of 2,000 Turks on the Tigris.
Feb. 23—Premier Lloyd George announced drastic measures to increase home production and curtail imports as a result of the submarine warfare.
Feb. 25—The Germans in the Ancre district withdrew toward Bapaume after weeks of British pressure.
—Kut-el-Amara, on the Tigris, was captured from the Turks by the British under Gen. Maude.
—The Cunard liner Laconia was sunk without warning off the Irish coast, two American women being among those drowned.
Feb. 26—President Wilson appeared before Congress and asked authority to arm American merchantmen on the high seas.
—The summer resorts of Broadstairs and Margate, on the English coast, were bombarded by German destroyers.
Feb. 27—Chancellor von Bethmann-Hollweg addressed the Reichstag regarding the break with the United States.
Feb. 28—The United States Government made public a note from German Foreign Secretary Zimmerman to Herr von Eckhardt, German Minister to Mexico, through Count von Bernstorff, reading: "Berlin, Jan. 19, 1917.—On February 1 we intend to begin submarine warfare unrestricted. In spite of this, it is our intention to endeavor to keep neutral the United States of America. If this attempt is not successful we propose an alliance on the following basis with Mexico: That we shall make war together and together make peace. We shall give general financial support, and it is understood that Mexico is to reconquer the lost territory in New Mexico, Texas and Arizona. The details are left to you for settlement. You are instructed to inform the President of Mexico of the above in the greatest confidence as soon as it is certain that there will be an outbreak of war with the United States and suggest that the President of Mexico, on his own initiative, should communicate with Japan, suggesting adherence at once with this plan. At the same time, offer to mediate between Germany and Japan. Please call to the attention of the President of Mexico that the employment of ruthless submarine warfare now promises to compel England to make peace in a few months. Zimmermann."
March 1—The House passed the bill empowering the President to arm merchant ships.
March 2—The Japanese Minister of Foreign Affairs stated that no proposal had been made to Japan to join in a possible war against the United States.
—The city of Hamadan, Persia, near the Turkish frontier, was captured by the Russians.
March 5—The Swedish Cabinet under Premier Hammarskjold resigned, following the refusal of Parliament to grant an appropriation of 30,000,000 crowns for the preservation of neutrality.
March 6—Austria-Hungary, in reply to an inquiry from the United States, justified the claim of Germany that neutrals should not use enemy ships and that a general warning is sufficient.
—The United States Supreme Court decided that the British steamer Appam was brought into an American port by a German prize crew in violation of American neutrality.
March 8—A British special commission which investigated the disastrous Dardanelles campaign made its report.
March 9—President Wilson called the Sixty-fifth Congress to meet in extra session on April 16.
March 10—The Chinese Senate and House approved the severance of relations with Germany.
March 11—Bagdad was captured by the British under Gen. Maude.
—A revolutionary movement started in Petrograd.
March 12—The Russian Duma met in defiance of the Czar's decree of dissolution.
—The United States formally notified all nations that it had decided to place an armed guard on all American merchant vessels sailing through the areas barred by Germany.
March 14—China broke off diplomatic relations with Germany, the German reply to China's submarine protest having been unsatisfactory.
March 15—Czar Nicholas II. abdicated the throne of Russia; a new Cabinet was formed.
March 16—The United States informed President Carranza of Mexico that it could not participate in his plan of an American refusal to sell munitions to the warring nations of Europe.
March 17—Bapaume was recaptured from the Germans by the French and British.
—The French Cabinet under Premier Briand resigned after attacks on its economic policy in the Chamber of Deputies.
March 18—Alexandre Ribot formed a new French Ministry, Paul Painleve becoming Minister of War.
—Foreign Minister Milyokoff announced that the new regime in Russia would fight with the Entente Allies against the Teutonic allies until the end.
March 19—President Wilson authorized the Secretary of the Navy to spend the $115,000,000 emergency fund authorized by Congress.
March 21—President Wilson summoned Congress to meet in extra session April 2, two weeks in advance of the date first set.
—Russian forces crossed the Persian border into Turkish territory south of Baneh.
—The American oil steamer Healdton was torpedoed at night without warning while in the safety zone off the coast of Holland.
March 22—The United States formally recognized the new Government of Russia.
March 24—The United States ordered the withdrawal from Belgium of Minister Brand Whitlock and the members of the American Relief Commission, the relief work to be taken over by subjects of Holland.
—Gen. M. V. Alexieff became Commander-in-Chief of the Russian armies.
March 27—The British expedition into the Holy Land, under Gen. Murray, defeated a Turkish army of 20,000 men near Gaza.
March 31—The British captured six villages north of St. Quentin.
April 2—President Wilson asked Congress to declare that acts of Germany constituted a state of war.
—The American steamer Aztec was sunk without warning by a submarine off the coast of France.

—The French and British pushed forward toward St. Quentin.

April 4—The United States Senate passed the resolution declaring a state of war existed with Germany.

—German troops crossed the Stokhod River in Volbynia, inflicting heavy losses on the Russians.

April 5—The Germans launched an attack northwest of Rheims in an effort to relieve the pressure on St. Quentin.

April 6—The House of Representatives passed the Senate war resolution.

—President Wilson signed the joint resolution of Congress declaring a state of war existing through the acts of the German Government.

April 7—Cuba entered the war against the Teutonic allies.

April 8—The Austrian Government informed the American Charge d'Affaires of its severance of diplomatic relations with the United States.

April 9—The British launched an offensive against the German line at Arras, carrying Vimy Ridge and taking more than 6,000 prisoners.

—The United States seized fourteen Austrian ships interned in American ports.

April 10—The British made gains at Arras.

April 11—The Brazilian Government severed diplomatic relations with Germany.

April 12—The British pierced the Hindenburg line at Arras.

April 13—Bolivia severed diplomatic relations with Germany.

April 14—The House passed the bill authorizing a $7,000,000,000 bond and note issue, $3,000,000,000 to be loaned to the Entente Allies.

—President Wilson created a Committee on Public Information, with functions of censorship and publicity, with George Creel as civilian chairman.

April 15—Theodore Roosevelt asked permission to raise an army division for service in Europe.

—The British transport Arcadian was sunk in the Mediterranean; 279 lives lost.

—The American steamer Missourian, unarmed, was sunk by a submarine without warning near Genoa, Italy; no lives lost.

April 16—The French advanced an average of two miles, between Soissons and Rheims, against the German line along the Aisne.

—The British transport Cameronia was sunk by a submarine in the Mediterranean with the loss of 140 lives.

April 17—The Senate passed the House bill authorizing a national loan of $7,000,000,000.

—The commander of the destroyer Smith reported an attempt to torpedo his vessel—the first shot in the war between Germany and the United States.

April 19—The United States steamer Mongolia fired upon a submarine while approaching the British coast, the submarine probably being destroyed.

April 20—Turkey severed diplomatic relations with the United States.

April 28—Both houses of Congress passed Selective Conscription bills for the raising of an army of 500,000 men.

—The British advanced on a front of ten miles in the Arras battle, capturing Arleux-en-Cohelle.

—Guatemala broke off diplomatic relations with Germany.

April 29—The French Government appointed Gen. Petain Chief of Staff in the War Department.

May 1—The American steamer Rockingham, armed, was sunk by a German submarine off the British coast, two of the crew being lost.

May 2—Secretary of the Treasury McAdoo offered the first $2,000,000,000 of the War Loan at popular subscription.

May 3—Fresnoy village was captured by the British in the battle of Arras.

May 4—The House of Representatives passed the Administration's espionage bill, after modifying the censorship provision.

May 5—An Allied war conference was held at Paris which included Admiral Sims of the United States Navy.

May 6—French troops completed their occupation of the entire Craonne Ridge, south of Laon, taking more than 6,000 prisoners in three days and advancing on a front of twenty miles.

—Germany agreed to assume the war expenses of Bulgaria and Turkey in the coming year.

—American oil tank steamer Montano was torpedoed without warning by a German submarine, twenty-three lives being lost.

—American trade figures for the year ending June 30, 1917, showed imports totalled $2,659,000,000, and exports of $6,294,000,000, being 35 per cent. in excess of the previous year.

Aug. 1—The Senate adopted a resolution for submitting a prohibition amendment to the Federal Constitution, the article to be inoperative unless ratified within six years.

Aug. 2—Gen. Korniloff became Commander in Chief of the Russian Armies.

—Consul General Robert P. Skinner of London reported that the British Finance Act of 1917, dated August 2, continues the customs duties imposed by Part I of the Finance Act, 1915, provides an increase of entertainments duty, fixes the income tax for the year beginning April 6, 1917, at 5s in the £—that is to say, 25 per cent.—plus supertaxes as established last year, and increases the excess profits duty to 80 per cent. on and after January 1, 1917.

—The Senate requested the President to seek permission from foreign Governments to apply the Selective Draft law to their citizens in the United States.

—German raider Seeadler stranded and a total loss off Mopeka Island, South Pacific Ocean.

—The Senate and House conferees, in an agreement on the Food Administration Bill, dropped the Senate provisions for a three-man Food Control Board and for a Congressional War Expenditures Board.

Aug. 3—The Root mission to Russia returned to the United States.

—Czernowitz, capital of Bukowina, was occupied by Austro-German forces.

—The Russian Provisional Government declared illegal Finland's declaration of independence.

—The Russian Foreign Minister, Terestschenko, resigned; the Military Governor of Petrograd, Gen. Erdelli, was assassinated.

—The House adopted conference reports on the food administration of the Food Survey Bills.

Aug. 5—National Guard passes into Federal service. Number of men approximately 300,000.

Aug. 6—The War Revenue Bill reported by the Senate Finance Committee for second time. The measure as re-introduced would yield $2,006,970,000, an increase of $337,000,000 over the old figures.

—Richard von Kuehlmann became Minister of Foreign Affairs in the German Cabinet.

—The American oil tank steamer Campana was sunk by a German submarine off the west coast of France.

—The War Revenue Bill, yielding $2,006,970,000, was reported by the Senate Finance Committee.

—The Texas House of Representatives began investigation of alleged improper acts by Gov. Ferguson.

Aug. 7—Liberia, the Negro Republic on the west coast of Africa, declared war on Germany.

—Austro-German forces under Field Marshal von Mackensen began an offensive against Russo-Roumanian troops near Folkshani.

—The Senate adopted the conference reports on the Food Control and the Food Survey Bills.

Aug. 9—Enlistments in the Regular Army reached the authorized maximum of 300,000; since April 1 recruiting totalled 184,000.

Aug. 10—The British captured the Village of Westhoek, in Flanders.

—Six hundred delegates of the British Labor Party voted to participate in Stockholm Inter-

national Socialist Conference, reversing a former decision.
—President Wilson signed the Food Control Bill and appointed Herbert Hoover as Food Administrator.
Aug. 11—Arthur Henderson, Secretary of the British Labor Party, resigned from the British War Cabinet owing to the Government's dissatisfaction with his support of the Stockholm Socialist Conference.
—Senator La Follette demanded a "restatement of Allied peace terms based on a disavowal of advantages either in the way of indemnities, territorial acquisitions, commercial privileges, or economic prerogatives."
Aug. 12—Twenty German airplanes dropped bombs on towns along the east coast of England, killing thirty-two persons.
—Food Administrator Hoover announced the price of wheat would be stabilized.
—United States Government fixed the price of anthracite coal at $5.85 to $6.05 a ton f. o. b. Jersey City. The price of bituminous coal was fixed at $2 a ton at the mines in Pennsylvania. Prices of bituminous coal in other regions vary somewhat from the Pennsylvania price.
Aug. 13—Japanese Mission to the United States, headed by Viscount Ishii, arrived at a Pacific port.
—British delegates were denied permission to attend the Stockholm Conference.
—War Department ordered the mobilization of the new National Army in four increments, the first to entrain on Sept. 5.
Aug. 14—China declared war on Germany and Austria.
—Nicholas, deposed Czar of Russia, was removed to Siberia.
—Secretary of the Treasury McAdoo stated the war needs would require a bond issue of $9,000,000,000 (in addition to the $7,000,000,000 already authorized), and taxation revenue $1,000,000,000 in excess of the $2,000,000,000 provided for in the revenue measure then pending.
Aug. 15—The Food Administration formed a $50,000,000 corporation, the purpose of which is to buy and sell wheat for the Government.
—A peace appeal to the belligerents by Pope Benedict was made public at London.
—Canadian troops captured Hill 70, dominating important French coal city of Lens and declared by the Germans to be impregnable.
—Herr von Waldow became Food Controller in Germany, succeeding von Batocki.
—Dr. Jean Adolphe Sulzer, new Swiss Minister, arrived in the United States.
Aug. 16—Premier Lloyd George announced the destruction of British vessels by German submarines and mines had decreased from 560,000 tons in April and 320,000 tons in June to an estimated loss of 170,000 during August.
—French and British drove Germans from the Village of Langemarck in Flanders.
Aug. 17—One hundred and eleven French airplanes dropped 14 tons of projectiles behind the German lines.
Aug. 18—It was officially stated that since the beginning of the offensive on July 19, 42,000 Russian prisoners were taken by Austro-Germans.
—It was officially announced that the armed forces of the United States include: Regular Army 305,700, National Guard 311,000, Reserve Corps 93,000, total land forces 710,024; sea forces 233,117; grand total 943,141.
Aug. 19—Italian activity on a large scale was renewed on the Julian and Carso fronts.
—Merchant ships sailing across the Atlantic were required to be armed, painted to reduce visibility and provided with smokeless fuel and equipped with appliances for producing smoke clouds to escape torpedo attack.
—Army authorities at Spokane, Wash., arrested local officials of the Industrial Workers of the World, charging them with ordering strikes in the lumber and fruit industries and preaching sedition.
Aug. 20—Judge Robert S. Lovett of the War Industrial Board of the Council of National Defense was appointed administrative officer under the provisions of the Priority Shipments Act.
—The Sixty-Ninth Regiment left for the training camp at Mineola.
—Marshal Haig continued his drive into German lines northeast of Ypres.
—Gen. Purgasoff reported beaten to death by his own soldiers.
—Gen. Petain won a victory before Verdun. He captured German defenses on both sides of the Meuse and broke the enemy line to a depth of a mile and a quarter at several points. More than 4,000 prisoners were taken.
Aug. 21—French capture new positions along Meuse. Canadians drive Germans from trenches at Lens by bayonet attack.
—Chancellor Michaelis told the Main Committee of the Reichstag that Germany could not again offer peace proposals in the face of rejection of previous proffers.
Aug. 22—British continue successes at Ypres. Counter attacks by German Crown Prince repulsed.
—Secretary of State Lansing welcomed the Japanese War Commission headed by Viscount Ishii.
—Eleven persons killed and thirteen wounded in air raid on London.
Aug. 23—Steamship Devonian sunk by U boat.
—Dr. Richard von Kuehlmann, German Foreign Secretary, in his maiden speech before the Reichstag said: "A policy based on might alone and not on right is doomed to failure from the beginning."
Aug. 24—Gen. Petain praised the Lafayette squadron for its spirit of courage and self sacrifice.
—French take Hill 304 and enlarged Verdun gains. British lost some ground east of Ypres.
—The New York World staff presented a fully equipped war ambulance to the United States Army Medical Corps.
Aug. 25—Italian Second Army broke through Austrian line on the Isonzo front with Austrian Army in retreat: Monte Santo, 2,245 feet high, captured by Italians, giving them command of the Gorizia plains.
Aug. 26—Germans dropped bombs from airplanes on American base hospitals near Verdun.
—Over 40,000 persons witnessed the review of the "Rainbow Division" at Camp Mills, L. I.
Aug. 27—President Wilson placed an embargo on all articles of commerce to enemy countries and on all foods, cotton and other articles contributing to American defense, for all other countries. The President's proclamation explained the purpose was primarily to control commerce and legitimate shipments would be licensed as requested.
Aug. 28—President Wilson forwarded to Rome a rejection of Pope Benedict's peace plea.
—Berlin agreed to pay Argentina for loss of ships by U boat.
—Austrians gave way before Italian offensive before Gorizia. Civilian population was ordered to leave Trieste.
Aug. 29—Belgian Relief Ship Kongsli sunk by U boat off Norway coast.
—The Twenty-seventh Division U. S. A. (formerly the New York National Guard) paraded in review down Fifth Avenue, New York City.
—Capt. Giulio Laurence of Italian Aviation Corps established a new world's record in a flight from Turin to Naples and return—920 miles. He left Turin 10.07 A. M. and returned 8.40 P. M.
Aug. 30—President Wilson fixed $2.20 a bushel as the price the Government would pay for 1917 wheat.
—The New York World won its fight to save medical students from the war draft.
Aug. 31—The Shipping Board contracted for three new shipyards, to cost $35,000,000. Two hundred new vessels were planned.
—Italians gained a foothold on the slopes of Mount San Gabriele.
—The President sent a letter to Samuel Gompers, Chairman of the American Alliance for Labor and Democracy, in which he said: "While our soldiers and sailors are doing their manful work to hold back reaction in its most brutal and aggressive form, we must oppose at home the

organized and individual efforts of those dangerous elements who hide disloyalty behind a screen of specious and evasive phrases. No one who is not blind can fail to see that the battle line of democracy for America stretches to-day from the fields of Flanders to every house and workshop where toiling, upward-striving men and women are counting the treasures of right and justice and liberty which are being threatened by our present enemies. May not those who toil and those who have made common cause of the larger hope for the masses of mankind take renewed heart as they think on those days when America has taken its stand for the rights of humanity and the fellowship of social and international justice?"

Sept. 1—The Export Board disapproved of a plan to release grain in Dutch cargo ships held in New York Harbor.

—British destroyers sunk four German mine sweepers.

—Reported from Petrograd that Czar Nicholas had taken up a 14-room apartment in an old-fashioned house in Tobolsk, Siberia.

—French advanced three-quarters of a mile in the Hurtebise region.

Sept. 2—German aeroplanes raided East Kent on the English coast.

—Kerensky, the Russian leader, arrested many well known officers, civilians and politicians in Moscow in an effort to crush a revolutionary plot.

Sept. 3—Riga abandoned by Russians and Germans entered the place without resistance.

—Soldiers of the National Army were welcomed into the Nation's service by President Wilson with a message in which he said: "You are undertaking a great duty. The heart of the whole country is with you. Everything that you do will be watched with the deepest interest—and with the deepest solicitude not only by those who are near and dear to you, but by the whole Nation besides. For this great war draws us all together, makes us all comrades and brothers, as all true Americans felt themselves to be when we first made good our national independence. The eyes of all the world will be upon you because you are in some special sense the soldiers of freedom. Let it be your pride, therefore, to show all men everywhere not only what good soldiers you are, but also what good men you are, keeping yourselves fit and straight in everything and pure and clean through and through. Let us set for ourselves a standard so high that it will be a glory to live up to it and then let us live up to it and add a new laurel to the crown of America. My affectionate confidence goes with you in every battle and every test. God keep and guide you!"

Sept. 3—The United States defeated two of Senator La Follette's amendments to the Revenue Bill to increase the levies on war profits. The first, to tax war profits 70 per cent., was beaten 55-20; the second, 65 per cent., was rejected 53-17.

Sept. 4—Following was the message of the President of the United States to New York's accepted men of the National Army, read by Mayor Mitchel at the Polo Grounds: "Please say to the men on Sept. 4 how entirely my heart is with them, and how my thoughts will follow them across the sea, with confidence and also with genuine envy, for I should like to be with them on the fields and in the trenches where the real final battle for the independence of the United States is to be fought, alongside the other people of the world struggling, like ourselves, to make an end of those things which have threatened the integrity of their territory, the lives of their people and the very character and independence of their Governments. Bid them godspeed for me from a very full heart."

—The first of New York's quota for the new National Army marched in review down Fifth Avenue.

—Germans retired from a broad belt east of Ypres.

—German aeroplanes again raided London.

—German warships shelled Riga.

Sept. 5—German Army pushes 33 miles beyond Riga.

—A war profits levy of $1,060,000,000 was adopted by the United States Senate.

—30,000 members of the conscript army left for the several cantonments.

Sept. 6—Without a roll call and with no dissenting voice, the $11,538,945,460 war bond and certificate bill passed the House.

—United States agents raided offices of alleged seditious journals in Chicago.

—German warships destroyed mine fields before the port of Riga and their airmen shelled the Vandelaincourt Hospital in the region of Verdun, killing nineteen and wounding twenty-six. Shelling lasted six hours.

—Austrians again drive the Italians from the summit of Mount San Gabriele.

—Celebrating the anniversary of the battle of the Marne, Premier Ribot of France demanded the return of Alsace without parley.

Sept. 7—Reports through Rome indicated losses of 120,000 in the battles in and about Gorizia.

—In a speech at Birkenhead, Lloyd George declared: "The Central Powers are dealing, and they know it, with a country (America) that has never yet been beaten, a country with infinite resources, a country where you have qualities that make for enterprise and endurance."

—Secretary of State Lansing and Viscount Ishii conferred in Washington on Japan's assistance in the war.

—The Income Surtax Bill, a provision of the war revenue measure, passed the United States Senate.

—President Wilson placed an embargo, effective September 10, on all gold exports.

Sept. 8—The Russian Army made a stand near Riga, forming a new line.

—The State Department at Washington announced that it was in possession of evidence showing that Sweden had been acting as Germany's secret agent against Argentina, thus violating her neutrality. The famous Luxburg note "Spurlos Versenkt" (sunk without a trace) was made public.

Sept. 9—Twenty-three American ambulance men were awarded the French War Cross for valor.

Sept. 10—Gen. Korniloff, head of reorganized Russian Army, demanded control of Government.

—The steamer Vanadis, formerly a private yacht and purchased by the Russian Government for a patrol boat, was sunk in midocean by an internal explosion.

—Viscount Ishii, in the name of the Mikado, pledged Japan's support to Russia.

Sept. 11—Russia's Council of Workmen's and Soldiers' Deputies voted to support Kerensky. Gen. Korniloff's Generals were ordered arrested.

—Herr Scheidemann, Vice Presidnt of the German Reichstag, in an article in the Berlin Vorwaerts, pleaded for "peace without a knockout."

—The British reported an advance of over 400 yards on the Somme front.

—The Seventh Regiment of New York left for Camp Wadsworth, Spartanburg, S. C.

Sept. 12—Anti-German riots occurred in Buenos Ayres.

—Secretary of War Baker in a statement issued at Washington declared the "Liberty Motor," America's new standardized aeroplane motor, had been perfected.

Sept. 13—The State Department at Washington made public the second chapter of the history of the intrigue between Germany and Sweden.

—Korniloff's counter revolutionary army in Russia surrendered.

Sept. 14—Elihu Root, speaking to the National Security League of Chicago, denounced the war opponents as traitors to the United States.

—The Twelfth Regiment, New York, Col. Reginald L. Foster commanding, left for Camp Wadsworth, Spartanburg, S. C.

—The Italian Army regained the summit of Mount San Gabriele.

Sept. 15—The United States Senate passed the $11,538,000,000 bond bill.

Sept. 16—Russia proclaimed a new republic by a

pronouncement issued by Minister Kerensky of the Provisional Government.

—The "Rainbow Division" of the United States Army was reviewed for the first time on dress parade at Camp Mills, L. I.

Sept. 17—Twenty-five thousand workers engaged in war emergency construction struck at San Francisco, demanding a 50 per cent. increase in wages.

Sept. 18—The War Deficiency Bill was unanimously adopted by the House, carrying provisions for the expenditure of $7,000,000,000.

Sept. 19—Secretary Baker told the Senate Finance Committee that the War Department planned for an army of 2,300,000 men.

—Secretary Baker requested $277,416,000 from Congress for emergency appropriations to equip an army of 2,300,000 men.

—The Argentine Senate voted to sever diplomatic relations with Germany by a vote of 23 to 1.

—Great Britain reported the sinking of large British ships—eight for the week—the smallest total since ruthless submarine warfare was begun.

Sept. 20—Gen. Haig smashed for a mile through the German line east of Ypres.

—War Department at Washington announced the formation of a regiment to specialize in the use of war gases and other such devices.

Sept. 21—Germany and Austria in separate notes indicated their willingness to accept the Pope's peace proposals.

—United States soldiers were reported just back of British firing line.

—Viscount Ishii in Washington told of a German propaganda in Japan which he said "has been going on for years."

—Gen. Alexieff resigned as Chief of Russian Army. Gen. Haig took 3,000 German prisoners at Ypres.

—The Secretary of State made public the following message from Ambassador Bernstorff to the Berlin Foreign Office, dated Jan. 22, 1917: "I request authority to pay out up to 50,000 (fifty thousand) dollars in order as on former occasions to influence Congress through the organization you know of, which can perhaps prevent war. I am beginning in the mean time to act accordingly. In the above circumstances a public official German declaration in favor of Ireland is highly desirable, in order to gain the support of Irish influence here."

—Emperor William of Germany and Emperor Charles of Austria-Hungary replied to Pope's peace note.

—Gen. Tasker H. Bliss was named as Chief of Staff, United States Army, to succeed Gen. Hugh L. Scott, retiring.

—The Secretary of State issued the following statement with reference to message, made public by him, of Count von Bernstorff to the German Foreign Office last January, in which the Ambassador asked for authority to spend $50,000 "to influence Congress": "If there is any misunderstanding I wish to say very emphatically I do not see how the Bernstorff message in any way reflects upon Congress or any member. Apparently, it was the purpose to employ agencies to influence them of which they would have no knowledge and in case they were influenced would be entirely innocent. I do not know what the organization was. This expose is apropos of German methods of peace propaganda, and there is no intention of casting suspicion on Members of Congress."

Sept. 22—The Government announced that it had found among cipher documents seized at Wolf von Igel's office, 60 Wall Street, in August, 1914, secret messages purporting to be from John Devoy, Supreme Court Justice Daniel F. Cohalan and other Irish-Americans, addressed to the Kaiser's higher officials and urging Germany to cause a revolution in Ireland. Cohalan issued a denial.

—Argentina sent Berlin a U boat ultimatum.

—Maximilian Harden declared in a speech that if Germany gives no designs on Belgium peace will come.

Sept. 23—Secretary of War Baker reviewed the "Rainbow" Division at Camp Mills.

—Berlin in a note to Argentina repudiated the Luxburg note.

—Steel prices to continue until January 1 were fixed by the War Industries Board and approved by President Wilson. The prices call for steel bars at $58 and plates at $65 for the Government, the Allies and the private consumer. They provide for a saving of $95 a ton over recent prices on steel plates and of $52 on bars.

—The following table of prices per ton were given out by the War Industries Board: Coke, $6; pig iron, $23; steel bars, $58; shapes, $60; plates, $65.

—When Admiral Dewey was in Manila Bay, Senator Lewis told the Senate, Capt. von Goetzen of the German Asiatic Fleet outlined to the Admiral a plan of world conquest by Germany to begin in about fifteen years from that time, 1898.

Sept. 24—Germans made an air attack on London; six were reported killed.

—Argentina mobilized her navy. The army was announced ready for service.

—United States Government set steel prices.

—French repulsed German attacks at Verdun.

—The Urgent Deficiency Bill, appropriating $5,606,906,827 and authorizing an additional $2,385,458,393, passed the Senate without a roll call. An appropriation of $500,000 was added for the Employment Bureau of the Department of Labor. Senator Martin, in charge of the bill, opposed the amendment on the ground that about $20,000,000,000 already had been appropriated by Congress, and expressed fear that next year's total might be $50,000,000,000.

—The expulsion of Senator La Follette from the United States Senate was demanded in a petition addressed to the United States Senate by the Minnesota Public Safety Commission. La Follette was accused of making an address of a disloyal and seditious nature at the Non-Partisan League Convention at St. Paul.

Sept. 25—Capt. Guynemer, French airman, was killed in battle.

—Lieut. Vosse, German airman, was killed in battle with his fiftieth adversary.

—Kaiser Wilhelm denounced in a speech King Ferdinand of Roumania (a member of the house of Hohenzollern) as a renegade.

Sept. 26—Gen. Haig took Zonnebeke, pierced the German line and reached the Tower Hamlet spur; 1,000 prisoners were taken by the English.

—Secretary of State Lansing stated that: "In view of inquiries which have been made as to whether Count Bernstorff knew of the purpose of his Government to renew relentless submarine warfare when he sent his message of January 22, 1917, asking authorization to expend $50,000, I can state that the Department of State possesses conclusive evidence that on or before January 19 Count Bernstorff had received and read the Zimmerman telegram to Minister von Eckhart in Mexico which contained the following: 'We intend to begin on the 1st of February unrestricted submarine warfare. We shall endeavor in spite of this to keep the United States of America neutral.' Count Bernstorff was, therefore, fully advised of the intentions of the Imperial Government at the time when he asked for authority of Berlin to employ funds for an organization to influence Congressional action in favor of the continued neutrality of this country."

—Gen. Sukhomlinoff, former Russian Minister of War, was sent to Siberia for life for treason. His wife was acquitted.

—In a general round-up in Greater New York over seventy-five alien enemies were seized and locked up.

Sept. 27—German counter attacks at Verdun were repulsed.

—Japanese War Mission arrived in New York City.

—Secretary of the Treasury McAdoo announced a second Liberty Loan of $3,000,000,000 or more, to be offered to the public on October 1, at 4 per cent., due November 15, 1942, subject to redemption on and after November 15, 1927.

Sept. 28—Over 100 arrests of I. W. W.'s were made in Chicago, including William D. Haywood, Secretary of the National Organization of

the Industrial Workers of the World. A blanket indictment charged seditious conspiracy in an effort to thwart war plans of the United States Government.

—Chancellor Michaelis stated to the Reichstag that Germany "calmly awaited the arrival of the American armies."

—Viscount Ishii, speaking before the Japan Society of New York, said: "The agent of Germany in this country and in ours has had as his one purpose the feeding of our passions, our prejudices and our distrust on a specially prepared German concoction, until, drugged and inflamed, we might have taken the irrevocable step over the edge, and at his leisure the vulture might have fattened upon our remains."

Sept. 29—German Secretary of Foreign Affairs von Kuehlmann in a speech to a committee of the Reichstag declared that the German people back up the governmental policies.

—Japan's promise not to take territory from China or "despoil her rights," coupled with an announcement that the Island Empire proposes to set up a "Monroe Doctrine" in the Far East, was voiced by Viscount Ishii, head of the Japanese Imperial Commission, at New York's official banquet to the envoys.

Sept. 30—United States Fuel Administrator Garfield fixed the price of coke and coal, in keeping with President Wilson's proclamation of August.

—German airships raided London—the fifth attack within a week. No casualties were reported.

—Riots occurred in Russian towns and mobs destroyed crops.

—German attacks on Marshal Haig's lines on the Ypres front were repulsed.

Oct. 1—The heaviest air raid to date was made upon London; ten killed, thirty-eight injured. Enemy planes were repulsed by barrage fire. Citizens urged the Government to make reprisals.

—The Fourteenth Regiment of New York departed for Spartanburg, S. C.

Oct. 2—Germans made a mass attack on the British lines between Polygon Wood and the Menin Road. The Germans were mowed down by rifle and machine gun fire with heavy losses.

—French airmen attacked Frankfort, Coblenz, Treves and Stuttgart in reprisal for raid on Dunkirk.

—British cruiser Drake was announced sunk off the Irish coast by a German submarine. Loss, one officer and eighteen men.

—The United States Senate adopted the conference report on the $2,535,000,000 War Revenue Bill. It was the largest revenue bill ever passed.

Oct. 3—The lowest record of weekly sinkings since unrestricted U boat warfare began was reported by the British Admiralty—thirteen vessels. Eleven of more than 1,600 tons and two smaller craft.

—The New York State Attorney General, Merton E. Lewis, sent to the French Ambassador, through Secretary of State Lansing, documents intending to show that the German Imperial Government had intrusted to Paul Bolo, known as Bolo Pasha, arrested in Paris in September, vast sums of money in New York banks to corrupt the French press and influence French public opinion in the cause of peace.

—The Democratic Congress in Petrograd, after having declared itself in favor of a Coalition Government by a vote of 766 to 688, completely reversed its decision, and by a vote of 813 to 180 announced its overwhelming opposition to the coalition idea.

—American schooner Annie F. Coulan was sunk by submarine. No lives lost.

Oct. 4—More than 3,000 prisoners were taken by the British in a new drive east of Ypres. All the objectives of the British were won, including positions characterized by Field Marshal Haig's report from headquarters as of "great importance."

—The Navy Department at Washington reported the sinking of three American vessels by the German sea raider Seeadler in South Pacific waters. This is the raider stranded on Mopeha Island August 2 and which became a total wreck.

—The United States Senate passed, as a rider to the Soldiers' and Sailors' Insurance Bill, an amendment conferring the rank of full General for the period of the war on the Chief of Staff and the commander of the American forces in France, Major Gens. Bliss and Pershing, respectively. The amendment also made Lieutenant Generals of all commanders of armies or army corps organized or authorized and confers the rank of Major General on all heads of departments and bureaus. Generals and Lieutenant Generals are to receive $10,000 and $9,000 a year, respectively, with allowances.

Oct. 5—Field Marshal Haig announced that his drive at Ypres had netted to date 4,446 prisoners and was developing into one of the great battles of the war.

—A loyalty rally in Madison Square Garden, New York City, was addressed by Theodore Roosevelt and Mayor Mitchel of New York.

Oct. 6—The special war session of Congress ended. The President met Secretaries Lansing and Redfield and Postmaster General Burleson at the Capitol and signed bills. Among these were the Urgent Deficiency Bill, carrying $7,758,124,000; the Trading With the Enemy Act and the soldiers' and sailors' insurance measure.

—A semi-official statement from Berlin indicated that the bread ration would be again cut on November 1 and a corresponding amount of potatoes supplied instead, and that a four-pound rye loaf would cost 83 instead of 75 pfennigs, and a wheat loaf 90 instead of 82 pfennigs.

—French Socialists began a national conference in Bordeaux.

—Official announcement was made of the sinking of a German submarine by a United States destroyer by the use of a "depth bomb."

Oct. 7—Uruguay broke diplomatic relations with Germany.

—French artillery joined the British in assault on German lines in Flanders.

—Austria was reported as seeking separate peace negotiations.

—The "Rainbow Division," 27,000 strong, was reviewed at Camp Mills, L. I., by Major Gen. W. A. Mann.

Oct. 8—In an address at the White House to the newly formed League for National Unity, representing church, political, labor, agricultural and other organizations, the President expressed the belief that American public opinion, although understanding the war's causes and principles, needs guidance to remember that the war should end only when Germany is beaten and Germany's rule of autocracy and might are superseded by the ideals of democracy.

—Eighteen thousand coal miners in southeastern Kentucky and Tennessee, who had been on strike, returned to work.

—The Navy Department authorized the announcement that an American patrol vessel fired upon an Italian submarine by reason of identity signals not being answered, killing one officer and one seaman. Secretary of the Navy Daniels sent a letter of regret to the Italian Minister of Marine.

Oct. 9—Field Marshal Haig captured Poelcapelle and advanced two miles northwest. The French troops took the Villages of St. Jean de Mangalaere and Veldhoek and held their new line on the edge of Houtholst Forest.

—It was reported in the Deutsche Tageszeitung of Berlin that Germany would make a new peace offer abjuring territorial aggrandizement and agreeing to the surrender of captured Belgium and French territory.

—Chancellor Michaelis, addressing the Reichstag Main Committee, declared that "all political propaganda would be excluded from the army." The supplementary estimates for the army were adopted without alteration.

—An official statement of the situation on the west front, authorized by the French High Commission and sent to Washington, states that Germany had passed the climax of her military strength.

—The New York World first displayed its "service flag" of seventy-five stars on a white field with red border, in honor of the employees who

have enlisted in various branches of the United States Army and Navy for the war.

Oct. 10—The German Chancellor asserted that peace was "impossible as long as Germany's enemies demanded any German soil or endeavored to drive a wedge between the German people and their Emperor." Foreign Secretary von Kuehlmann said there was no impediment to peace, no question which could not be solved by negotiations, except for the French demand for Alsace-Lorraine.

—Mutinies were reported on board German warships at Wilhelmshaven. The Emperor, according to cables, went to Wilhelmshaven and ordered that one out of every seven mutineers be shot. Chancellor Michaelis objected and as a result three were shot and the others sentenced, collectively, to 200 years' penal servitude.

—German attacks forced back the advanced British troops on a 2,000-yard front in Flanders and established a foothold in portions of the French first line on the right bank of the Meuse.

—New York police made three arrests on charges of conspiracy to place bombs on board of outgoing steamships from New York to European ports.

—Secretary of State Lansing gave out copies of three cablegrams disclosing that more than a year before submarine piracy drove America to war, the Berlin Government was instructing Ambassador von Bernstorff to arrange for destruction of Canadian railroads and to use Irish-Americans in carrying on sabotage. They showed that von Bernstorff was then seeking authority to support a campaign to influence Congress.

—President Wilson took steps to prevent the monopolization, hoarding, injurious speculation, manipulation or control of foodstuffs by issuing a proclamation for the licensing of producers and dealers in food products that are necessities.

Oct. 11—Emperor William arrived in Sofia, Bulgaria, on his first visit.

—The German Reichstag passed a bill providing for the rebuilding of the German merchant fleet. Both Socialist Parties voted against it.

—Count Karl von Luxburg, the former German Minister to Argentina, was taken into custody but was later released.

—French troops in Belgium broke up a German attack delivered east of Draeibank against positions between Victoire Farm and Pategoet Farm. On the Aisne front an enemy patrol seeking to approach lines in the region of Cerny was dispersed.

—The Navy Department stated that one member of the armed guard, J. E. McNeil, seaman; W. J. Watkins, the master; seven members of the crew and the French pilot were lost in the sinking of the American steamer Lewis Luckenbach.

Oct. 12—Commissioner Colby of the United States Shipping Board announced that the Government would requisition all American ocean-going steamers of 2,500 tons dead weight, to become effective at noon October 15. The order, he added, applied to 468 ships, aggregating 2,878,000 tons, and the Government would also take over the employment of labor for loading and operating the vessels.

—Vice Admiral von Cappelle, the German Minister of Marine, resigned.

—Vincent Astor's offer of his $8,000,000 5,000-acre country estate at Rhinecliff, N. Y., for a war hospital was accepted by the United States Government.

—Slight advances all along the Flanders front were made by Marshal Haig, resuming his offensive.

—Nine new members of the War Cabinet were sworn into office at Ottawa, Ont.

—Admiral Henry T. Mayo returned from a war mission in Europe.

Oct. 13—Germans landed on the Islands of Dago and Oesel, taking from the Russians commanding positions on the Gulf of Riga.

—Henry L. Morgenthau, former American Ambassador to Turkey, in a signed statement to The World asserted that the Kaiser planned the great war weeks before the actual beginning of hostilities. War was decided upon, according to the Ambassador, at a conference held in Berlin early in July, 1914, between the Kaiser and his military advisers.

—Admiral von Tirpitz, formerly Minister of the German Navy, in an interview in the Brunswick Landeszeitung was quoted as saying: "We are now at the fateful hour of our existence. Germany cannot maintain her position as a world power against England unless her position is founded on might."

—Marshal Haig's men continued to advance their new lines in Flanders.

Oct. 14—President Wilson in an official proclamation designated October 24 as Liberty Loan Day. In the proclamation he said: "The might of the United States is being mobilized and organized to strike a mortal blow at autocracy in defense of outraged American rights and of the cause of liberty."

—Under power conferred by the Trading With the Enemy Act President Wilson named the members of the War Trade Board, composed of members of the Exports Administration Board, which it replaces. The board: Vance C. McCormick, Chairman, representing the Secretary of State; Dr. Alonzo E. Taylor, representing the Secretary of Agriculture; Thomas D. Jones, representing the Secretary of Commerce; Beaver White, representing the Food Administrator; Frank C. Munson, representing the Shipping Board, and a representative of the Secretary of the Treasury. The board licenses exports and exercises control over imports.

—Premier Kerensky appealed to the Baltic Fleet to defend the Fatherland. "Tell the redoubtable Baltic Fleet," he said, "that the hour of trial has arrived. Russia expects for her safety a valiant effort by the navy."

—Field Marshal Haig's troops repulsed Germans north of Poelcapelle and west of Becelaere.

—Dutch shipping to England was stopped pending adjustment of differences between Great Britain and Holland.

Oct. 15—Germans landed on the Russian Island of Oesel, in the Gulf of Riga, and occupied Arensburg, the capital of the island.

—Belgian troops defeated the Germans at Dixmude.

—Mata Hari, a Dutch dancer, convicted of espionage, was shot as a German spy at Vincennes, France.

—The United States Government took over 468 American ships aggregating 3,000,000 tons.

Oct. 16—Germans occupied the Islands of Runo and Abro, in the Gulf of Riga.

—Field Marshal Haig resumed his offensive in Flanders. French troops were reported successful in several attacks on the German lines at Verdun.

Oct. 17—The Navy Department announced the torpedoing of a United States destroyer in the U boat zone, the first "hit" made by German torpedoes on an American fighting ship. One man was killed and five wounded. The destroyer was badly damaged, but made port.

—Twenty-five German airplanes were reported destroyed by the French in air battles.

—Germans in concentrated attack failed to pierce the French lines in the Champagne district and on the Aisne.

—Fuel Administrator Garfield served notice on the miners and coal operators that unless they adjusted their differences the Government would take drastic action.

—Holland offered to the United States the use of 200,000 tons of Dutch shipping held in American ports in exchange for money, food and raw material.

—United States troop transport Antilles was sunk by German submarine. Seventy lives were lost.

Oct. 18—Moon Island, in the Gulf of Riga, was captured by the Germans. The Russian battleship Slava was sunk in a general engagement between Russian and German naval vessels.

—It was reported at Washington that mutinies had broken out in the German Navy and that

at Ostend sailors refused to board a submarine and threw overboard and drowned an officer, and that at Pola there were clashes between Austrian and German sailors.

Oct. 19—Announcement was made by M. Kishkin, Minister of Public Welfare, that the Russian Government would remove from Petrograd to Moscow. The evacuation of the fortified port of Reval, at the entrance to the Gulf of Finland, has begun.

—German airships raided the eastern and northeastern counties of England. A few bombs fell in the area of London. Twenty-seven persons were killed and fifty-three wounded.

—French troops penetrated the German lines along the Aisne.

—The Food Administrator at Washington said that the German food ration at date was about one-half of normal need.

—Cable advices stated that former Czar Nicholas of Russia, living as a private citizen at Tobolsk, has to procure food for his family through the use of rationing cards, the same as ordinary people.

Oct. 20—Four Zeppelins which took part in the British raid on October 19 were shot down in France.

—German warships bombarded Dunkirk. There were no civilian casualties reported.

—German raiders sunk two British destroyers and nine merchant steamers in the North Sea between the Shetland Islands and the Norwegian coast.

—President Wilson in a proclamation specifying Sunday, October 28, as a day of prayer for war success asked his "countrymen to observe the appointed day, according to their several faiths, in solemn prayer that God's blessing may rest upon the high task which is laid upon us, to the end that the cause for which we give our lives and treasure may triumph and our efforts be blessed with high achievement."

Oct. 21—British troops attacked the Turks northwest of Bagdad, the Turks retreating. The British captured a number of prisoners and much ammunition.

—Allied warships bombarded Ostend.

—A bolt of the Bolshevik extremists marked the first session of the Russian Preliminary Parliament at Petrograd. Following a speech by their leader, Leon Trotzky, they left the asembly hall in a body with cheers for a democratic peace.

Oct. 22—The War Department made known the list of dead on the transport Antilles, sunk by a German submarine.

—Kaiser Wilhelm refused to accept the resignation of his Minister of Marine, Vice Admiral von Cappelle.

—In a speech in Albert Hall, London, Lloyd George said: "There will be no peace in the world until the shrine of the war spirit in Potsdam is shattered and its priesthood is dispersed and discredited forever."

—The Germans carried their invasion in the Gulf of Riga to the mainland by seizing the Werder Peninsula. This strip of land is opposite Moon Island. The village of Werder was taken by the Germans. Werder is about twenty-five miles south of Hapsal. The Russians began evacuating Reval.

—British attacks in Belgium in the neighborhood of Poelcapelle and, in conjunction with the French, south of Houthoist Forest, were reported by Field Marshal Haig as "highly successful." All the objectives were captured.

Oct. 23—A plot to bring about another rebellion in Ireland, to ship to Germany large sums of money for the purchase of German bonds by Turks residing in New York, was disclosed by the Department of Justice. Baron Max von Recklinghausen, a German to whom Count von Bernstorff had given authority to act as secret envoy in the United States, was arrested as the leader. He was taken to Ellis Island.

—Attacking northeast of Soissons on a six-mile front Gen. Petain drove a wedge two miles deep into the German line nearest Paris. More than 7,500 prisoners and twenty-five heavy guns were captured. Three villages and Malmaison Fort fell into French hands.

—The Austro-Swiss frontier was closed, due to serious internal situation in Austria. Several munition factories were wrecked. Many women were reported killed in food riots in Austrian towns.

—The Russian Admiralty stated that its forces had put out of action in an engagement in the Gulf of Riga two German dreadnoughts, one cruiser, twelve torpedo boats and one transport.

Oct. 24—Germans began a new offensive along the Isonzo front. Official reports from Berlin stated that thousands of Italian prisoners had been taken.

—Germans withdrew on a wide front between the Bay of Riga and the Dvina.

—The French in their advance northeast of Soissons against the German Crown Prince took over 8,000 prisoners, including 160 officers, and also seventy heavy guns, thirty-nine mine throwers and eighty machine guns.

—Arthur Williams was appointed Federal Food Administrator for the City of New York.

Oct. 25—The French, under Gen. Petain, continued their drive against the German line on the Aisne front northeast of Soissons. At date over 12,000 prisoners have been taken and about 120 cannon captured.

—Berlin official reports stated that the Germans and Austrians captured over 10,000 Italians in an attack near Flitsch and Tolmino.

—British airmen dropped five tons of explosives in and about Saarbrucken, Germany, in reprisal raids, causing much damage.

—Russian troops were reported as having massacred German inhabitants of the town of Wendel on the retreat from Riga. The massacre was prompted, it was stated, by snipers firing on the retreating troops.

—The American steamer Luckenbach fought off for four hours an attack by a German submarine. The vessel managed to make port.

Oct. 26—The Brazilian Chamber of Deputies declared a state of war between Brazil and Germany.

—The steamer on which were United States Senators John D. Kendrick and William S. Kenyon and Representatives John J. Rogers and James S. Parker was attacked by a German submarine off the coast of Wales. The gunners opened fire and the submarine submerged before launching a torpedo.

—Field Marshal Haig and Gen. Petain renewed their drive in Flanders, further setting back the German line.

—The Italians, falling back before the renewed Austro-German offensive, began the evacuation of the Bainsizza-Heiligengeist Plateau.

—Frank A. Scott of Cleveland resigned, on account of sickness, as Chairman and member of the War Industries Board.

—Premier Boselli announced the resignation of the Italian Cabinet.

—The President, by proclamation, forbade, on and after November 15, 1917, and during the war with Germany, the manufacture, distribution and storage, use or possession of explosives or ingredients thereof, except as provided in the Act of October 6, 1917, regulating those matters.

Oct. 27—It was formally announced that American troops in France had fired their first shot in trench warfare. American artillerymen using a French "75" opened fire on the German lines 500 yards distant. The shell case was preserved, to be sent to President Wilson.

—The German-Austro offensive along the Isonzo front continued. The Italians made a stand, holding the enemy in check in the passes west of the Isonzo River leading to the Venetian Plains. To date the Germans claimed the capture of 60,000 prisoners and 500 big guns. Five hundred thousand Austrians and Germans were reported facing the Italian lines.

—French troops, under Gen. Petain continued to press back the Germans in Flanders.

—The last day of the Second Liberty Loan. An

official estimate placed the total of the second loan at $5,400,000,000.

—President Wilson granted an increase of 45 cents a ton in the price of bituminous coal at virtually all mines in the country, effective October 29. The new price will absorb wage raises recently agreed upon between operators and miners in the central competitive and other fields.

Oct. 28—The Austro-German offensive against Gen. Cadorna's troops on the Italian front continued. The Austrians and Germans negotiated the mountain passes, and Gorizia, captured by the Italians August 9, 1916, was retaken. Gen. Cadorna's Second Army was reported in full retreat and the Third Army was reported falling back to a new line of defense. Berlin reported the total capture of Italians as 100,000, with over 700 guns.

—Striking in co-operation with the French, the Belgian troops won back from the Germans all of the Merckem Peninsula, about two miles south of Dixmude. The territory restored is about four miles long and from four-fifths of a mile to a mile and three-quarters wide.

—Dr. Dumba, former Austro-Hungarian Ambassador to the United States, in a speech in the Reichsrat, asserted that the giant naval programme of the United States was mostly bluff.

—More than 1,000 Jews from all parts of the country, representing all shades of religious and political beliefs, met in New York to discuss ways and means to complete by January 1 the $10,000,000 fund for Jewish war sufferers. They pledged loyalty for the Jews of the United States to the Government.

—The American Ambassador at Rio de Janeiro reported that at Florianapolis the German Club was wrecked. The German Shooting Club was set on fire and destroyed. At Pelotas the equipment of the newspaper Deutsche Wacht was burned. The German Shooting Club was also burned.

—First Lieut. De Vere H. Harden, Signal Officers' Reserve Corps, was the first American wounded after part of Gen. Sibert's forces entered the trenches. The War Department stated that Lieut. Harden received a moderate shrapnel wound in his left leg.

Oct. 29—The Italian Isonzo front collapsed and the Austro-German army reached the outposts before Udine, where the Italian headquarters were located. Cormons on the plains about seven miles west of Gorizia, was captured and the armies of the Central Powers approached the frontier of the Italian coastal region.

—The first war prisoner—a German—taken by the United States expeditionary forces died in an American field hospital in France from wounds inflicted by a United States patrol.

—The Food Administration at Washington made public a regulation, effective November 1, that: "No retailer or other dealer who, in violation of the Food Control Act puts excessive prices on necessary foods will be able to obtain supplies, and no manufacturer, wholesaler or other handler of food will be allowed to sell to any retailer anywhere in the United States who makes unreasonable profits or buys large quantities of foods for speculative purposes." The regulation will be incorporated in the licensing system.

Oct. 30—According to reports from Berlin, Udine was taken by German troops of the 14th Army. An official report from Vienna stated that the Italian Carnic front had collapsed.

—Fire, declared to be the work of German spies, destroyed $5,000,000 worth of war material on the waterfront at Baltimore, Md., intended for Gen. Pershing's troops in France.

—Ten million dollars more was advanced to France as a loan by the United States.

—Italy formed a new Cabinet, headed by Prof. Vittorio Orlando as Premier.

—The village of Passchendaele was captured by the British, according to a Berlin official report, but was later evacuated on severe counter attack by the Germans.

—In a declaration before the Reichstag, Ledebour, the Independent Socialist, said: "We have had 1,500,000 dead, 3,000,000 or 4,000,000 wounded, of whom 500,000 are crippled for life, and 2,000,000 absolutely invalided. That makes altogether 6,000,000 men lost during three years."

—Secretary of the Treasury McAdoo turned over to the Italian Government an additional credit of $230,000,000.

Oct. 31—An official report from Berlin on the offensive against the Italians said: "There have been successful engagements on the Tagliamento Plain. The number of Italian prisoners has increased to more than 120,000. The number of guns captured is more than 1,000."

—Germans in Brazil were reported in revolt. The Brazilian Army was mobilized to handle the situation.

—Chairman Hurley of the United States Shipping Board promised that the United States would have ready during 1918 6,000,000 tons of shipping.

Nov. 1—Wholesalers and other large food distributing agencies doing business of over $100,000 a year were placed under license by the Federal Food Administration. The licensing system was designed to limit the prices of food to a reasonable amount over expenses, forbid the acquisition of speculative profits, and to keep all food commodities moving to the consumer as directly and as quickly as practicable.

—Sir Eric Geddes, First Lord of the Admiralty, addressing Parliament, declared that between 40 and 50 per cent. of the German submarines operating in the North Sea, the Atlantic and the Arctic Oceans had been sunk. He said that during the last quarter the enemy had lost as many submarines as during the whole of 1916.

—Berlin announced officially that the Austro-Germans stormed the crossings of the Tagliamento and took 60,000 more prisoners.

—It was reported officially at Washington that British and French troops had arrived at the Italian front to strengthen Gen. Cadorna's lines that had been beaten back by the Germans and Austrians.

—Secretary of State Lansing made public the actual text of the Luxburg notes, as follows: "No. 63. July 7, 1917. Our attitude toward Brazil has created the impression here that our easy-going good nature can be counted on. This is dangerous in South America, where the people, under thin veneer, are Indians. A submarine squadron with full powers to me might probably still save the situation. I request instructions as to whether after a rupture of relations legation is to start for home or to remove to Paraguay or possibly Chili. The Naval Attache will doubtless go to Santiago de Chili. (Signed) LUXBURG."

"No. 89, August 4, 1917. I am convinced that we shall be able to carry through our principal political aims in South America, the maintenance of open market in Argentina and the reorganization of South Brazil equally well whether with or against Argentina. Please cultivate friendship with Chili. The announcement of a visit of a submarine squadron to salute the President would even now exercise decisive influence on the situation in South America. Prospect excellent for wheat harvest in December. (Signed) LUXBURG."

—The United States Food Administrator named 6.35 as the price for 96 degree test raw sugar at New Orleans and seaboard refining points.

—The first battalions of Americans in the trenches were relieved by others.

—Thirty airplanes in seven groups took part in an air raid on London, killing eight and wounding twenty-one. Only three machines penetrated to the heart of the city. Material damage was slight.

—Non-partisan and Conservative Socialist groups won victories over the Radical Bolsheviki candidates in the municipal elections in most Russian cities, reports from 643 towns indicated. In the larger towns the average Bolsheviki vote was only 7 per cent., while in the smaller towns it was 2.2 per cent.

—Count Georg von Hertling accepted the Imperial

Chancellorship and office of Premier of Prussia. Vice Chancellor and Minister of the Interior Helfferich and President von Waldow of the German Food Regulation Board resigned. Vice Admiral von Capelle's resignation as Minister of the Navy was not accepted.

Nov. 2—Austro-German patrols advanced to the banks of the Tagliamento River.

—Eight men lost their lives when the army transport Finland was torpedoed homeward bound from a French port. The Navy Department gave out the casualty list as follows: Naval gun crew, James W. Henry, Harrison, N. J.; Newton R. Head, Cleveland, Ga.; Porter Hilton, Toccoa, Ga.; crew of Finland, M. Cardoza, J. Hanslo, W. F. Phillips, Jose Cuevas; army, Lester Hickey, Chicago; Charles H. Maxwell, Concord, N. C.

—The Germans retreated from points along the Chemin-des-Dames in the Aisne sector of the front in France.

—Gen. von Berrer, commanding the Wurttemberg Armies on the northeast front, was shot dead while visiting the trenches near Riga.

Nov. 3—The British Admiralty gave out the following statement: "An attack was made on our vessels patrolling the Belgian coast by an electrically controlled high speed boat. The boat was destroyed."

—The Navy Department announced officially that a picket boat of the U. S. S. Michigan patrolling in home waters foundered on Oct. 30, drowning twelve. The crew was: Joseph J. Schultz, Fort Wayne, Ind.; Joseph H. Henderickson, York, Pa.; Roscoe Scott, Denver, Col.; Stanley J. Wing, Detroit, Mich.; Austin Atwood, Sandusky, O.; Arthur A. Flow, Mecklenburg County, N. C.; Andrew F. Meister, Wilkes-Barre, Pa.; Walter H. Fischer, Chicago; Clarence L. Jones, Bucksport, Me.; Edmund L. Tamillo, Chicago; James P. Young, George M. Hilmarch jr.

—British destroyers sank the German auxiliary cruiser Marie of Flensburg and ten patrols in the Cattegat and the Skagerrak.

—An official report from Berlin on the operations on the Italian front said: "More than 200,000 prisoners and more than 1,800 guns have been taken."

—The Brazilian steamships Acary and Guarahy were torpedoed in European waters. Two men were killed and four injured.

—After November 3 the United States Food Administration arranged to handle all exports of flour to European countries.

—President Wilson promulgated regulations for governing the handling of foods in connection with the licensing of importers, manufacturers, wholesalers, canners, packers and large retailers. The New York Port War Board was organized with Secretary McAdoo as Chairman. Irving T. Bush, founder and head of the Bush Terminal Company, later accepted the post of Chief Executive Officer. The purpose of the War Board is to co-ordinate all the facilities of the ports of New Jersey and New York toward the speedy handling of freight and munitions of war.

—A small detachment of American infantrymen was attacked in the front line trenches by a superior force of Germans. The Americans were cut off by heavy barrage fire in their rear. The fighting was hand-to-hand. Three Americans were killed and five wounded. A Sergeant and Corporal and ten men were taken prisoners. Two French soldiers in the trenches were killed. The enemy lost some men. It was the first engagement in which American troops figured. The casualty list of Americans follows: Killed, Corpl. James B. Gresham, Evansville, Ind.; Private Thomas F. Enright, 6641 Premo Street, Pittsburgh, Pa.; Private Merle D. Hay, Glidden, Ia. The dead were buried on the slope of a hill overlooking a small village "somewhere in France." Simple markers were placed upon the graves, recording the name, company and regiment of each of the Americans buried there, and in a wreath of native flowers hung within the inclosure was inscribed in French the following:

"Here lie the first soldiers of the great Republic of the United States who died on the soil of France for justice and liberty, Nov. 3, 1917."

Nov. 4—Uniform minimum wage scales for the Pacific Coast shipbuilding yards were announced by the United States Shipbuilding Labor Adjustment Board. The decision effected an increase of from 10 to 30 per cent.

—At a congress held in Paris the League of the Rights of Man came out for a society of nations. The league comprises many members of the Chamber of Deputies.

—More than 1,000,000 families were added to the Food Administration's pledge enrolment. The total as officially recorded stands at 6,469,467.

Nov. 5—The Italian War Office announced officially that the Austro-Germans crossed the Tagliamento River. The Berlin report of the engagement said: "From the Italian brigades defeated in this engagement more than 6,000 prisoners and a number of guns have been taken."

—The German authorities in Belgium imposed a fine of $2,500,000 on the Province of East Flanders because it failed to place 40,000 laborers at the disposal of the Germans Nov. 1.

—The American patrol boat Alcedo was torpedoed and sunk by a German submarine. One officer and twenty men are missing. The ship sank in four minutes.

Nov. 6—The Italians retreated along a 150-mile line. The Austro-Germans crossed the Tagliamento River along the whole front.

—British and Canadian forces advanced 800 yards northeast of Ypres and passed beyond the centre of Passchendaele.

Nov. 7—Secretary of State Lansing announced the safe arrival at a British port of Col. E. M. House to take part in war conferences. Accompanying Col. House were: Admiral W. S. Benson, Chief of Naval Operations; Gen. Tasker H. Bliss, Chief of Staff, United States Army; Oscar T. Crosby, Assistant Secretary of the Treasury; Vance C. McCormick, Chairman of War Trade Board; Bainbridge Colby, United States Shipping Board; Dr. Alonzo E. Taylor, representing the Food Controller; Thomas Nelson Perkins, representing Priority Board, and Gordon Auchincloss as Secretary.

—Under orders of the Maximalist Committee an armed naval detachment seized the offices of the official Petrograd telegraph agency, the Central telegraph office, the State Bank and Marine Palace, where the Preliminary Parliament had been in session. Parliament suspended its sittings. Premier Kerensky placed guards about the public buildings. Small guards were put at the embassies. The women's battalion was drawn up in the square in front of the Winter Palace.

—The British forces under Gen. Allenby advanced within thirty-three miles of Jerusalem. The British occupied Khuweilfeh. Tell Abu Harere and Tell Esch Sheri'ah, about twelve miles northwest of Beersheba, were also taken. Gaza fell before troops advancing up the Mediterranean Coast. Gaza is about fifty miles southwest of Jerusalem.

—Nine million three hundred and six thousand persons subscribed to the Second Liberty Loan, totalling $4,617,532,300.

—King George proclaimed Sunday, Jan. 6, 1918, as a day of prayer and thanksgiving.

Nov. 8—United States Marshal McCarthy took possession of the Hamburg-American Line steamship offices at No. 45 Broadway.

—Austro-German troops forced their way across the Livenza River and won a victory on the middle Tagliamento front. During the engagement 17,000 Italians, with 80 guns, surrendered.

—The Maximalists deposed Premier Kerensky of Russia and took possession of the Government at Petrograd.

—Lieuts. Hans Berg and Loescher, who escaped from the internment camp at Fort McPherson, Ga., on October 23, were captured on the Rio Grande at Laredo, Tex., as they were trying to get across the river into Mexico.

Nov. 9—A permanent Inter-Allied Military Committee was created at a conference of English,

French and Italian representatives. Gen. Cadorna, who had been in supreme command, was placed on the new committee. Gen. Diaz was appointed first in command, with Gen. Badoglio second and Gen. Giardino third.

—A report given out by the United States Hydrographic Office said that an American steamer was torpedoed and sunk off the Canary Islands and another American ship was torpedoed off the Algerian coast.

—Gen. Allenby, commanding the British expedition advancing against the Turks before Jerusalem, reported capturing many prisoners and a transport. Mounted troops reached the south bank of the Wadi Hesu, eleven miles north of the old Turkish front. The northern bank of the Wadi Hesu and Harbieh was taken. The Turkish coastal railhead at Beit Hanun was also captured. The whole Turkish Army retreated toward the north. More than forty guns were captured.

—German troops landed on the Island of Aland, in the Baltic Sea, at the mouth of the Gulf of Bothnia between Sweden and Finland.

Nov. 10—The All-Russian Congress of Workmen's and Soldiers' Delegates (the Maximalists) named a new Cabinet to succeed the Kerensky body, deposed. Lenine was named as Premier with Leon Trotzky as Minister of Foreign Affairs.

—Helsingfors, the capital of Finland, was reported occupied by the Germans.

—Secretary of War Baker announced that up to about June 1 the losses of the British Expeditionary Forces in deaths in action and deaths from wounds were about 7 per cent. of the total of all the men sent to France since the beginning of the war.

—British field batteries took up positions along the Italian front line of defence supporting the Italian rear guard in an effort to stay the Austro-German advance. The Sugano Valley on the Trentino front was occupied by the Germans and the town of Asiago taken.

—British troops in Flanders set the German line back one-half mile on a front of a mile and a quarter near Passchendaele.

—German aviators threw down fifty bombs in the region of Dunkirk. Three persons were killed and three wounded. The hospital at Zuydecoote was attacked. German aviators threw down incendiary bombs, killing nine persons.

—Vice Chancellor Helfferich of Germany resigned and was succeeded by Freidrich von Payer.

—Boris Bakhmeteff, Russian Ambassador, repudiated the Maximalist Government.

—Admiral Washington L. Capps was superseded by Charles Piez, a Chicago production engineer, as head of the Emergency Fleet Corporation.

Nov. 11—United States Secret Service agents said they discovered $38,496,742 worth of food hidden in storage warehouses in New York City not indicated in warehouses reports.

—Food Administrator Hoover announced that "war bread" would be a fact in the United States after Dec. 10 made from unmixed wheat flour, skimmed milk and less sugar and lard.

—A state of war was declared in Finland. The Provisional Soldiers' Committee appointed a Commissary of Finland in place of Gov. Gen. Nekrasoff. The Diet voted to elect a State Directorate with supreme power.

Nov. 12—Stockholm reported a battle between Russian troops headed by Kerensky and the Bolshevik forces at Gotchina, thirty miles southwest of Petrograd.

—President Wilson at Buffalo addressed the National Convention of the American Federation of Labor. He said: "Any man in America or anywhere else who supposes that the free industry and enterprise of the world can continue if the Pan-German plan is achieved and German power fastened on the world is as fatuous as the dreamers of Russia."

—Two aviators—Second Lieut. R. L. Johnson of the Canadian Royal Flying Corps and Sergt. Malloy of the United States Aviation Section—were killed by a fall near Fort Worth, Tex.

—Premier Lloyd George said in Paris that half the men who fell in vain on the western front in September, 1915, could have saved Serbia that year and completed the blockade of Germany.

—Fuel Administrator Garfield ordered that the display lighting of "The Great White Way" (Broadway, New York City) be permitted only between 7.45 and 11 P. M., the order to continue in effect during the war.

—President Wilson proclaimed 35,000 bakers in the United States under license after Dec. 10, 1917, under penalty of $5,000 fine or two years in prison for violation of the provisions.

Nov. 13—Premier Painleve of France and his Cabinet resigned following their defeat in the Chamber of Deputies by a vote of 277 to 186.

—Austro-German troops crossed the Lower Piave at the point nearest Venice. Italian troops strongly counter-attacked them and drove them back toward the river. On the Trentino front the Italians counter-attacked and repulsed the enemy in the Asiago region.

—Twenty-four survivors arriving at an American port reported the sinking on Oct. 27 of the steamer D. N. Luckenbach in the Bay of Biscay. Five of the crew were killed.

Nov. 14—Premier Lloyd George made public the provisions of the agreement made by the British, French and Italian Governments for the Inter-Allied War Council to act as a unit.

—In a speech before the Investment Bankers' Association at Baltimore, Secretary McAdoo stated that the Government expenditures were running far below estimates given Congress and predicted that the amount of money to be raised for the fiscal year ending June 30, 1918, would not exceed $10,000,000,000.

—American troops ambuscaded a number of Germans on patrol in "No Man's Land in France, killing and wounding a number of them. One non-commissioned American officer was killed in action.

—Premier Kerensky's forces were defeated by the Workmen's and Soldiers' forces between Tsarkoe Selo and Pulkova, twelve miles from Petrograd.

—Lieut. Gen. Oshima, the Japanese Minister of War, said that the despatch of troops to Europe was an impossibility owing to the cost and the lack of tonnage.

—Provost Marshal General Crowder made public the "questionnaire" for the second quota of the draft.

—A cable despatch to Copenhagen stated that Siberia had declared its independence and proclaimed former Emperor Nicholas of Russia as Emperor.

Nov. 15—President Poincare of France appointed Georges Clemenceau Premier.

—Jerusalem was cut off from the port of Jaffa, thirty-two miles to the northwest. The railroad connecting these two cities was seized by Gen. Allenby's British forces.

—The White Book issued by the Norwegian Government showed to July 1, 1917, the country lost 586 ships of 855,657 tons and 625 sailors. Losses during July, August and September brought the total of vessels lost to 660 of 1,020,000 tons and the number of sailors to 713. Of the vessels lost seventy-six were destroyed by explosions due, it is believed, to bombs placed aboard them by German spies, resulting in the loss of 306 lives.

—By direction of the United States Food Administration all speculation in butter and eggs was stopped by the exchanges and will not be resumed until the war ends.

—The New York Diocesan Convention of the Protestant Episcopal Church declared its approval and support of such measures as the Government shall see fit to take to secure the establishment of National Prohibition during the war.

Nov. 16—Viscount Cowdray, Chairman of the British Air Board, resigned as a consequence of Lord Northcliffe's letter to Premier Lloyd George. Lord Cowdray was appointed Chairman of the board on Jan. 2, 1917, succeeding Lord Sydenham.

—Premier Clemenceau made public the names of the new French Cabinet.

—In a cablegram to King Albert of Belgium, congratulating him on his birthday, President Wilson said: "The people of the United States were never more in earnest than in their determination to prosecute to a successful conclusion this war against that power to secure for the future obedience to the laws of nations and respect for the rights of humanity."

—Col. House stated in London that America would not be represented on the political end of the Supreme Allied War Council and whether she would be represented on the military end remained for President Wilson to decide.

—Henry Ford was made assistant general manager of the United States Emergency Fleet Corporation.

—Concerning the Austro-German offensive on the Italian front the French War Office said: "The Germans have greatly exaggerated the importance of the Italian defeat. The Italian Armies are far from being defeated. The Second Army only has seriously suffered. On the 24th of October a violent offensive of the Germans between Prezzo and Tolmino took the positions of the Kolovist and gained the high valleys of Judrio and Natisone. On the 25th and 26th, after the loss of Matajur and Mont Magior, the Second Army fell back, first on the Tagliamento, then on the Piave. The line of the Piave is actually solidly held."

Nov. 17—Prof. Jan Kucharzevski, historian, was appointed first Premier of the new Polish state.

—The Government of Brazil proclaimed a state of siege in the Federal District and in the States of Rio Janeiro, Sao Paulo, Parana, Santa Catharina and Rio Grande de Sol.

—Washington reported an American soldier of Gen. Pershing's forces found guilty by court martial of assaulting and murdering a French woman was executed by a firing squad.

—British and German light cruisers came into action off Heligoland. The British Admiralty reported one German light cruiser afire and sinking and one mine sweeper sunk.

—Peace between the revolutionists was declared in Moscow, with victory for the Bolsheviki, cables from Petrograd stated. The White Guard and the Military Cadets were disarmed.

Nov. 18—The Department of Communication of Japan announced that the negotiations with the United States, by which Japan was seeking to have the American embargo on steel raised to a certain extent in Japan's favor, had been broken off.

—Disorders were reported in Zurich, Switzerland, prompted by pacifist organizations. The use of machine guns and sabres was required to break up the mobs.

—The City of Jaffa on the Mediterranean coast, thirty-two miles northwest of Jerusalem, was occupied by the British Army in Palestine.

Nov. 19—One hundred and forty Germans found on River Street, Hoboken, N. J. (barred area), were arrested and interned for the period of the war.

—In the House of Commons Lloyd George stated that five submarines had been destroyed on one day, Nov. 17.

—President Wilson issued a proclamation requiring all alien enemies to register and barring them from airships, balloons, flying machines, and any ocean, bay, river, or other waters within three miles of the shore line of the United States except on public ferries; also from the District of Columbia and the Panama Canal Zone.

—R. F Howe of New York, a director in the International Harvester Company, was made civilian member of the Aircraft Board.

—Daniel Willard, President of the Baltimore and Ohio Railroad, was appointed by President Wilson Chairman of the War Industries Board, succeeding Frank A. Scott, resigned.

Nov. 20—The Navy Department announced the sinking by collision with the transport Rose of the United States destroyer Chauncey. Lieut. Commander Walter E. Reno, who was in command; his two junior officers, Lieut. Charles F. Wedderburn and Ensign Harry G. Skinner Jr., and eighteen enlisted men were lost.

—After conference of the American War Mission and the British War Cabinet Premier Lloyd George said that the collapse of Russia and the reverses in Italy "make it even more imperative than before that the United States send as many troops as possible across the Atlantic as early as possible. Assuming that the submarine situation does not get worse, the easing of the position of the Allies depends entirely upon the dates on which the American programme of launching 6,000,000 tons of shipping promised for 1918 comes into practical effect."

—The French Chamber of Deputies gave a vote of confidence to M. Clemenceau, the new Premier, 418 to 65.

—Malcolm Gifford, twice tried without result on a charge of killing his chauffeur near Troy, N. Y., April, 1913, was killed in action in France, serving with the Canadian troops.

Nov. 21—British troops under Lieut. Gen. Byng smashed the Hindenburg line on a thirty-mile front from Arras to St. Quentin, to a depth of one to five miles, the British foremost lines reaching to within four miles west of Cambrai, a railway centre of German communication. At one point the British advanced more than five miles beyond the German first line. Thirteen villages and more than 9,000 prisoners were taken by the British.

—The House of Commons, 209 to 171, adopted an amendment to the Electoral Bill disfranchising conscientious objectors to war.

—British forces in Palestine advanced five miles northwest of Jerusalem.

Nov. 22—Col. E. M. House with others of the American War Mission arrived in Paris.

—Louis Weiderhold jr. of the Underwriters' Association announced in Philadelphia that beginning Nov. 23 insurance rates on buildings and their contents would be advanced from 10 to 30 per cent., due to the many fires caused by German plotters. The advanced rates are effective in Pennsylvania, New Jersey, New York, Maryland, Virginia, Delaware and part of West Virginia.

—The Admiralty announced that a British airplane flew from England to a British base in the Mediterranean and dropped bombs in the vicinity of Constantinople. The trip of 2,000 miles was made in a series of eight flights.

—Germany declared a new barred zone, including the Azores and the remaining channel in the Mediterranean, which had been left open to Greece.

—Gov. Keith Neville of Nebraska resigned to take into Federal service the 7th Regiment, Nebraska National Guard, of which he has been made Colonel.

—The British Government proposed war decorations for the following United States naval officers: Distinguished Service Order, Lieut. Com. Charles A. Blakely and Lieut. Com. George F. Neal; Distinguished Service Cross, Lieut. Franklin Loftin and Ensign Henry N. Fallon; Distinguished Service Medal, Quartermaster First Class W. H. Justice and Chief Machinist's Mate R. G. McNaughton.

—The French estimate of the German forces on the western front during 1917 was: On the Aisne-Champagne line, 57; Aisne-Vigny and Messines, 78; Verdun, 21; Lens, 7; Flanders, 90; Aisne, October 1917," 13. Total, 266 divisions. A German army division consists of about 14,000 men; a total of 3,724,000 Germans on the western front.

—Rear Admiral Washington L. Capps resigned as general manager of the Emergency Fleet Corporation.

Nov. 24—The Navy Department announced that an American destroyer had captured a German submarine. All of the crew were taken prisoners. The U boat sank.

—Leon Trotzky, the Bolshevik Foreign Minister, published the text of confidential papers which he said passed between the Russian Foreign Office and foreign Governments, and showed, he added, that Czar Nicholas had demanded that the Allies keep hands off Poland and claimed Constantinople as a Russian port.

—New York Harbor and its shipping facilities

were ordered placed under military control to the end of the war, taking effect midnight Nov. 25, 1917. United States Regulars to act as guards.

—Operation of all railroads east of Chicago as one transportation unit was decided on between officials of the roads and the Government. The trackage, equipment and labor of every road to be pooled for the period of the war.

—The British War Office announced 100 big guns had been captured in the operations about Cambrai.

—Ambassador Bakhmeteff of Russia formally rejected the authority of the Bolsheviki in control of Petrograd.

—Rear Admiral Frederic R. Harris was appointed General Manager of the Emergency Fleet Corporation.

Nov. 25—U. S. Ensign Kenneth Smith, Frank J. Brady, gunner, and I. F. Wilkensen, mechanician, were rescued off the French Coast from a disabled hydroplane to which they had been clinging for sixty hours.

—Col. House, Gen. Bliss, Admiral Benson and the other members of the American Mission visited the Picpus Cemetery and placed on the tomb of Lafayette a floral wreath bearing the inscription, "From the American War Mission, in grateful remembrance."

—Pope Benedict announced through Cardinal Gibbons the appointment of Bishop Patrick J. Hayes, Auxiliary Bishop of New York, as Military-Bishop of the Catholic priests in the United States Army and Navy here and abroad.

Nov. 26—The British advanced their line before Bullecourt and captured a number of German trenches.

—French-British infantry and artillery reached the Italian northern line after an eight-day march, covering fifteen miles a day.

—President Wilson ordered that the alcoholic content of beer be cut to 3 per cent. and the volume of grain used cut to 70 per cent.

—A Presidential proclamation barred enemy aliens from within 100 yards of the New York City waterfront.

—France and Italy ordered their Swiss frontiers closed for an indefinite period.

—British cavalry captured Bittir Station three and one-half miles west of Jerusalem.

—Secretary of the Treasury McAdoo announced that the business of all insurance companies, except life, incorporated under the laws of enemy or ally of enemy countries, must be liquidated.

Nov. 27—Austria and Germany closed their Swiss frontiers.

—London reported the torpedoing of the American steamer Actaeon (a seized German liner, formerly the Adamsturm) off the Spanish coast; thirty-seven men were reported missing.

Nov. 28—Representatives sent by Ensign Krylenko, the Bolshevik Commander in Chief of the Russian Armies, were received in the German lines and informed that the Germans had consented to negotiate Dec. 3 for an armistice.

—Cardinal Gaspari, Papal Secretary of State, said: "The Holy Father is not preparing any new appeal looking toward peace."

—Using two fresh divisions the Germans recaptured part of the village of Fontaine Notre Dame. Gen. Byng's troops held the Bourlon Wood line and took 500 prisoners.

—The Kings of Norway, Denmark and Sweden met in Christiania to confer on the German threat to invade Denmark.

—Complete results of the elections in Petrograd for the Constituent Assembly showed that the Bolsheviki head the poll with over 400,000 votes; the Cadets, 250,000; and the Social Revolutionaries, 150,000. Six seats go to the Bolsheviki, four to the Cadets, and two to the Social Revolutionaries. The Bolsheviki have Lenine, Zinoviev, Trotzky, Kamenev, Kollontay, and Stalin; the Cadets, Milinkov, Vinaver, Kutler, and Rodichev, and the Social Revolutionaries Chernov and Kamkov.

Nov. 29—Lord Lansdowne in a letter to a London newspaper renewed his peace proposal.

—A German destroyer struck a mine off Westkappelle, Holland, and sank. Only two of her crew were saved.

—The first session of the Inter-Allied Conference on war measures was held in Paris.

—Applications for life insurance received by the Military and Naval Bureau of War Risk totalled to date $1,032,938,000; number of applications, 120,290; average insurance, $8,567.

Nov. 30—The British Government disclaimed any connection with Lord Lansdowne's peace suggestion.

—Negotiations were concluded between the United States and Holland by which the former was to have the use of the Dutch shipping tied up in American ports.

—"Rainbow Division," U. S. A., of which the 69th Regiment, New York, was a unit, reached France. Every State in the Union is represented in the division.

—The Germans retook ground in the Cambrai salient between Bourlon and Moeuvres.

—The stamp tax provisions of the United States War Revenue Act became effective.

Dec. 1—The British regained much of the ground lost to the Germans on the drive of Nov. 30. Berlin claimed 4,000 prisoners taken in three days' fighting.

—The Kings of Norway, Denmark and Sweden agreed: first, irrespective of the length of the war, to stick together; second, to maintain neutrality toward all belligerent powers.

—The Reichstag voted a credit of 15,000,000,000 marks ($3,000,000,000), two Independent Socialists voting in opposition.

—The text of an alleged secret agreement among France, Great Britain, Russia and Italy was published at Petrograd by the Bolshevik Government. The document, it was stated, was signed in London April 26, 1915, by Viscount Grey, former Foreign Secretary; Paul Cambon, French Ambassador to Great Britain; and Count Benckendorff, the Russian Ambassador to Great Britain. Italy was to have the assistance of the French and British naval forces. After peace Italy was to receive the Trentino, the Southern Tyrol to the Brenner Pass, Trieste and Istria and Dalmatia. Italy was to govern the foreign relationships of Albania if that country became an autonomous Government. France, Great Britain and Russia were to support Italy in preventing the Papal influence from ending the war and in regulating questions concerning the war. Italy's cooperation was to begin one month after the ratification of the agreement.

—Since the United States entered the war 1,394 men in various branches of the military service have died, been wounded or reported captured, according to a report of the War Department.

Dec. 2—Germans forced the British to retire from ground they had captured at Masnieres, three and one-half miles south of Cambrai. The Germans made fifteen attacks on the British line. They were finally repulsed with losses to the Germans estimated to be greater than almost any other twelve hours' fighting in the war.

—American volunteer army engineers engaged in railway construction work near Gouzeaucourt were caught in an attack by German troops and in the engagement, so France later informed the Government at Washington, a considerable number of the Americans were killed and wounded.

—The Krupp Gun Works opened a branch factory at Lucerne, Switzerland, with $6,000,000 capital.

—Baron Lowen, the Swedish Minister to Argentina, quit Buenos Ayres without formal farewells.

—Jacob H. Schiff, at a dinner given in New York City, raised $1,060,000 in two hours for the National Jewish War Relief Fund. He contributed $200,000, and Nathan Straus, $30,000.

—A new Cabinet in China was appointed.

Dec. 3—The Inter-Allied War Conference in Paris closed with an address by Col. E. M. House, Chairman of the American Mission,

felicitating France on her sacrifices and work.
—Berlin stated that local armistices had been agreed to by the German and Russian divisions holding the lines from Pripet to Lipa.
—Secretary of the Treasury McAdoo submitted at the opening of Congress the largest year's budget in the history of the United States—more than $13,500,000,000—to carry on the war and governmental departments. More than $11,000,000,000 is direct war budget.
—Government war savings stamps were placed on sale for the first time.

Dec. 4—President Wilson in his second war message to a joint session of Congress urged a declaration of war against Austria-Hungary.
—London reported the sinking of the British passenger steamer Apapa with a loss of eighty lives.
—The French Foreign Office announces the creation of a Supreme Allied Naval Committee as a result of the Inter-Allied Conference. Military unity, it was also announced, was in the process of realization.
—Berlin reported that a Russian deputation was received by Prince Leopold of Bavaria, Commander in Chief of the East. Negotiations for an armistice were immediately begun.
—The following message from President Wilson to the King of Roumania was transmitted through the Department of State: "The people of the United States have watched with feelings of warmest sympathy and admiration the courageous struggle of Your Majesty and the people of Roumania to preserve from the domination of German militarism their national integrity and freedom. The Government of the United States is determined to continue to assist Roumania in this struggle. At the same time I wish to assure Your Majesty that the United States will support Roumania after the war to the best of its ability, and that in any final negotiations for peace it will use its constant efforts to see to it that the integrity of Roumania as a free and independent nation is adequately safeguarded."

Dec. 5—A Vienna cable quoted Emperor Charles as saying in an address to an Austro-German delegation that the Dual Monarchy was ready at any time to conclude a peace that would guarantee the integrity of the monarchy.
—With fresh divisions the Germans forced Gen. Diaz to yield slightly on the Asiago Plateau in Italy.
—The House Committee on Foreign Affairs voted unanimously that a state of war existed between the United States and Austria-Hungary, dating from noon Dec. 5, 1917.
—The German auxiliary cruiser Bothnia was reported blown up in collision with a German mine off the Island of Amagar.
—The Brazilian High War Commission arrived in New York.

Dec. 6—A U boat sank the American destroyer Jacob Jones while she was on patrol duty. It was the first regular warship of the United States Navy destroyed by the Germans. Sixty-nine officers and men were reported missing.
—The British War Office reported the strategic withdrawal of troops marking the Noyelles-sur-l'Escaut and Bourlon Wood line, west of Cambrai.
—German aeroplanes raided London and environs, killing seven persons and injuring twenty-one. Six enemy aeroplanes were captured.
—In the new offensive in Northern Italy Berlin reported the capture of 11,000 prisoners and sixty guns.
—The House of Commons agreed to the disfranchisement of conscientious objectors, to continue for the duration of the war and five years thereafter.

Dec. 7—The joint resolution of Congress declaring war on Austria-Hungary was passed with but one dissenting vote, and signed by the President at 5.03 P. M. The House vote was 365 yeas, 1 nay; the Senate, 74 to 0.
—Gen. Allenby, in Palestine, reported that British troops occupied the town of Hebron.
—A general order giving preferential shipment to food, fuel and Government supplies was issued by Robert S. Lovett, Director of Priority Transportation in the United States.

Dec. 8—Jerusalem surrendered to Gen. Allenby and the British forces. British, French and Mohammedan representatives safeguarded the holy places. Welsh and home country troops, advancing from the direction of Bethlehem, drove back the enemy and, passing Jerusalem on the east, established themselves on the Jerusalem-Jericho road. At the same time London infantry and dismounted yeomanry attacked the strong enemy positions west and northwest of Jerusalem and placed themselves astride the Jerusalem-Shechem road. The Holy City, being thus isolated, surrendered to Gen. Allenby.
—Jerusalem's capture by the British represents the seventh fall of the Holy City before besiegers since its stormy history began more than 3,000 years ago. The last Christian ruler over it was the German Emperor Frederick II., from 1229 to 1244. It has been in the hands of Assyrians, Babylonians, Greeks, Romans, Arabs and Turks. It contains the Christian Mecca, the Holy Sepulchre, that stirred those tremendous religious and military phenomena of the Middle Ages—the Crusades. Jerusalem was a factor in the life of every great conqueror from Nebuchadnezzar and Alexander the Great to Napoleon. Modern Jerusalem is a strongly fortified city, protected by up-to-date armament.
—Gen. Allenby began his active campaign in Palestine with Jerusalem as his objective, with the investment and capture of the City of Beersheba, just inside the southern border, on Oct. 31, 1917. The campaign was pushed with great speed and energy. Gaza fell on Nov. 7. Ascalon was captured on Nov. 9. On Nov. 14 Allenby reported the capture of the junction point of the Beersheba-Damascus railway. Jaffa was taken and then Jerusalem was invested.
—Ecuador severed diplomatic relations with Germany.
—Despatches from Madrid stated that the revolutionist movement in Portugal had been successful, that the Cabinet had resigned and that Dr. Affonso Costa, former Premier, favored a Provisional Government.

Dec. 9—A proclamation to the Russian nation was issued by the Russian Government announcing that "Kaledine and Korniloff, assisted by the Imperialists and Constitutional Democrats, have raised a revolt and declared war in the Don region against the people and the revolution."
—The Battle of Asiago was virtually suspended, with the enemy checked in breaking through to the Brenta Valley and the plain a few miles below.
—Col. Ernest E. Jannicky resigned as commander of the 47th New York Infantry.

Dec. 10—A counter revolt in Southeastern Russia, under the leadership of Gens. Kaledine, Dutoff and Korniloff, was aimed at seizing the authority in that region and in cutting off food supplies from Siberia. Gen. Alexieff and Michael Rodzianko, President of the Duma, were at Novo-Cherkask, capital of the territory of the Don Cossacks and the centre of the revolt.
—Observation trenches lost by the Italians east of Capo Sile, on the Lower Piave line, were retaken by the Italian forces.
—A despatch from Jassy, Roumania, stated that an armistice for three months between the German and Roumanian forces, taking in also the Russians on the Roumanian front, had been agreed upon.

Dec. 11—The Italians launched an air raid over the German lines. On a narrow sector on the Asiago over 150 airplanes participated.
—Germans began a heavy shelling along the British and French fronts in Flanders. Reports to London and Paris indicated that the Kaiser was placing every available gun—those captured in Italy and many released from the Russian front—for a great artillery battle in the west before the American forces became really active.
—London reported the destruction by an explosion

CHRONOLOGY OF THE WAR—*Continued.*

on Nov. 22 of a chemical factory of Griesheim, near Frankfort. It covered forty-four acres. Scores of workmen and chemists were killed, it was said.

—A Russian Government wireless message to London said: "The second sitting of the Constituent Assembly was opened by a person authorized by the Council of the People's Commissaries. There were 400 members present." The message was signed by Lenine, head of the Bolshevik Government; Uritzky, Commissary for Elections to the Assembly, and by Guseff, Secretary to the Military Revolutionary Committee.

—Speaking at Bedford, Winston Spencer Churchill, Minister of Munitions, said that the situation was more serious than it had been reasonable three months ago to expect. The country and the Allied cause, Col. Churchill said, were endangered. The future of the British Empire and of democratic civilization was hanging in the balance. "When I say the country is passing through a time of danger, I mean there are people who wish to bring about a premature peace. They are listening to the sophistries and dangerous counsel of certain politicians. People who say 're-state your war aims' really mean to make peace with the victorious Huns."

—Advices from Vigo, Spain, indicated that quiet reigned throughout Portugal. The number killed and injured which overthrew the Ministry was placed at 530. Former Premier Costa was reported arrested in Oporto.

—The Austrian battleship Wien was reported torpedoed and sunk in the Mediterranean Sea.

Dec. 12—In a mass attack the Germans struck the British line between Bullecourt and Queant, ten miles west of Cambrai, but Gen. Byng repulsed the enemy after they had gained a foothold in the first line along a front of 500 yards.

—The Bolshevik garrison at Mohileff fought with newly arrived troops. Shock battalions and Cossacks advancing on Mohileff fought with the Bolsheviki and defeated them.

—The United States freight steamer Minnesota, under control of the Government Shipping Board, struck a submerged rock in East River, near Hell Gate, and was beached at Lawrence Point.

—Gov. Cox of Ohio seized coal trains and distributed their contents to consuming points.

—The World's exposure of east side coal speculators caused Fuel Administrator Schley to shut off supplies from malefactors. Angry crowds besieged coal yards and dealers throughout congested districts of Greater New York.

AMERICA'S WAR TRADE BALANCE $7,773,000,000.

According to the Department of Commerce, the trade balance in favor of the United States since the European war began to November 1, 1917, was $7,773,004,669. Exports for October were valued at $542,000,000. Merchandise exported for the ten months ended October 31, 1917, were valued at $5,149,000,000, against $4,443,000,000 in 1916 and $2,867,000,000 in 1915, and imports for the ten months show an increase of $494,000,000 over the previous year.

	Exports.	Imports.	Exc. Exports
1917.			
October	$542,000,000	$221,000,000	$321,000,000

November	327,670,353	155,496,674	172,173,678

According to the National City Bank, the average United States exports to Denmark, Norway and Sweden in the years immediately preceding the war aggregated less than $40,000,000; in the fiscal year 1915, $197,000,000; in 1916, $169,000,000, and in 1917, $184,000,000. To Denmark exports were $15,670,000 in 1914, $79,824,000 in 1915, $55,872,000 in 1916 and $56,729,000 in 1917; to Norway, $9,064,000 in 1914, $39,075,000 in 1915, $53,645,000 in 1916 and $82,017,000 in 1917. To Sweden in 1914, $14,644,000; in 1915, $78,274,000; in 1916, $51,980,000, and in 1917, $45,116,000. This increase occurred chiefly in foodstuffs, copper, cotton and manufactures. The share which the United States supplied of the imports of these countries was in the year before the war: Denmark, 10 per cent.; Norway, 13 per cent., and Sweden, 11 per cent. In 1915 we supplied approximately 20 per cent. of the imports of Norway and about 18 per cent. of those of Sweden. For Denmark no figures are available, nor are there figures for the year 1916.

To Denmark exports of corn, but $95 in 1914, were over $9,000,000 in 1917; wheat in 1914, $845,000; in 1916 more than $2,000,000. Copper and cotton exports to Denmark also show large gains. Iron and steel manufactures show an increase of about 50 per cent. To Norway wheat, which was but $71,000 in 1914, was over $3,000,000 in 1915, and $2,250,000 in 1916. Rye, nothing in 1914; in 1915, $6,500,000, and in 1916, $8,500,000. Flour, $1,500,000 in 1914, $5,500,000 in 1915, and about the same in 1916. To Sweden wheat and flour in 1914 were about $500,000, in 1915 nearly $7,000,000, and in 1916 also nearly $7,000,000; rye, nothing in 1914, nearly $2,000,000 in 1915, and $1,250,000 in 1916. Bacon and lard in 1914 less than $500,000, over $7,000,000 in 1915, and about $2,250,000 in 1916.

NEW YORK FEDERAL MILK COMMISSION.

Chairman—John Mitchell, New York State Food Commission; Dr. L. P. Brown, New York City Board of Health; Dr. W. H. Jordan, Director New York Agricultural Experiment Station; John T. Galvin, New York City Board of Water Commissioners; Jacob Schiff, Miss Mabel Kittredge, Eugene Schoen, Charles M. Dow, Jamestown; Bradley Fuller, Utica; C. S. Shedrick, Buffalo, and Arthur Williams, *ex-officio*, Federal Food Administrator for New York City. This commission was empowered to determine, after hearing, the reasonable prices of milk to be paid by purchasers to producers, and by consumers to distributers, such prices to be based upon the cost of production and distribution, with a reasonable profit added.

GENERAL RECORD OF EVENTS IN 1917.

(This list is distinct from the war chronology, which includes all steps and events here and abroad directly connected with the war and its activities.)

1916.

Dec. 13—Fifty thousand workers on men's and children's clothing in New York City went on strike for shorter hours and wage increase.
—In the House, Democratic leaders, after conference, decided to pass a $30,000,000 public buildings measure.
Dec. 14—The people of Denmark voted to sell the Danish West Indies to the United States for $25,000,000.
—Edmund Schulthess was elected President of the Swiss Confederation.
—The United States Senate passed the Immigration Bill by a vote of 64 to 7. The bill carried a literacy test and an amendment designed to meet Japanese criticism.
Dec. 18—The Mexican members of the Joint Commission informed the Americans that Gen. Carranza had refused to ratify the protocol—objecting to a supplemental statement of American intentions regarding border patrol—and wished to submit a counter statement.
Dec. 20—Both houses of the Danish Parliament assented by large majorities to a treaty for the sale of the Danish West Indies to the United States.
Dec. 21—The New York Stock Exchange did the largest volume of business in fifteen years—3,086,000 shares—due to the frantic sale of "war stocks," following the statement of Secretary Lansing that the United States was being drawn into the war.
Dec. 22—The President nominated five members of the new Shipping Board—John A. Donald of New York, John B. White of Kansas City, William Denman of San Francisco, Bernard N. Baker of Baltimore, and Theodore Brent of New Orleans.
—Both branches of Congress adjourned for the holidays.
Dec. 23—Villa troops occupied Torreon, in northern Mexico, after defeating the Carranza garrison.
—The demands of railroad switchmen, in a test case arbitrated under the Newlands Act, were mostly granted, the men to receive an eight-hour day, with pro rata overtime.
Dec. 27—The Farm Loan Board announced that the twelve district banks would be located at Springfield, Mass.; Baltimore, Md.; Columbia, S. C.; New Orleans, La.; Houston, Tex.; St. Louis, Mo.; Louisville, Ky.; St. Paul, Minn.; Omaha, Neb.; Wichita, Kan.; Spokane, Wash., and Berkeley, Cal.

1917.

Jan. 2—Both branches of Congress reassembled.
—The Senate Committee on Interstate Commerce held its first hearing on the Administration's programme for preventing railroad strikes.
—Torreon recaptured by Carranza troops.
Jan. 3—President Wilson nominated Lieut. Col. Chester Harding for Governor of the Panama Canal, succeeding Major Gen. Goethals.
Jan. 4—Villa's troops were defeated at Jimenez by Government troops under Gen. Francisco Murguia, with a loss of 1,500 killed.
Jan. 5—The President nominated the members of the new Workmen's Compensation Commission—Dr. Riley McMillan Little of Pennsylvania, Mrs. Frances C. Axtell of Washington, and John J. Keegan of Indiana.
Jan. 6—Prof. Frank W. Taussig of Harvard accepted appointment as one of the members of the new Tariff Commission.
—Gen. Emiliano Chamorro was inaugurated as President of Nicaragua.
Jan. 7—Representative Adamson of Georgia introduced in Congress the Railroad Eight-Hour-Day Bill.
Jan. 8—The United States Supreme Court upheld the constitutionality of the Webb-Kenyon law prohibiting the shipment of liquor from "wet" into "dry" States.
Jan. 9—The Senate passed the Sheppard bill prohibiting the manufacture, importation or sale of liquor in the District of Columbia.
Jan. 10—The Supreme Court ended the hearings in the case testing the constitutionality of the so-called Railroad Eight-Hour Law.
Jan. 11—The Senate passed a bill prohibiting the sending of liquor advertisements by mail into "dry" territory.
Jan. 13—The United States cruiser Milwaukee became a total loss after running aground on the coast of California.
Jan. 15—The American-Mexican Joint Commission was dissolved.
—The United States Supreme Court upheld the constitutionality of the so-called White Slave Law.
Jan. 16—The House passed the Post Office Appropriation Bill.
Jan. 17—The Danish West Indies passed to the sovereignty of the United States.
Jan. 18—Dr. Cary T. Grayson, the White House physician, was promoted to the post of Medical Director in the Navy with the rank of Rear Admiral.
—The United States Department of Agriculture announced that the value of farm products in 1916 was $13,449,000,000, the greatest in the history of the country.
Jan. 19—The House passed the $38,000,000 Public Buildings Bill.
Jan. 22—The United States Supreme Court upheld the constitutionality of the "blue sky" laws in Ohio, Michigan and South Dakota.
Jan. 23—The Governor of North Dakota signed a bill extending suffrage to women.
Jan. 24—The Senate Committee on Interstate Commerce rejected part of the railroad legislation programme which provided for prohibition of strikes and lockouts pending investigation.
Jan. 26—The Senate passed the Legislative, Executive and Judicial Appropriation Bill, $40,000,000. The House passed a $38,000,000 Rivers and Harbors Bill.
—It was officially reported that 300 persons had been killed in an earthquake on the Island of Bali (Dutch), Malay Archipelago.
Jan. 27—The President of Costa Rica, Alfred Gonzales, was deposed by the military forces. Minister of War Frederico Tinoco became the administrative head.
Jan. 28—The War Department announced that the Pershing expedition had been ordered to withdraw from Mexico.
Jan. 29—President Wilson vetoed the Immigration Bill.
Jan. 30—The report of the United States Steel Corporation showed earnings of $333,625,000 for the fiscal year.
Jan. 31—The delegates to the Mexican Constitutional Assembly at Queretaro signed the constitution on which they had been working since Dec. 2.
Feb. 2—Prohibition bills were signed by the Governors of Oregon and Tennessee.
Feb. 5—The Pershing expedition crossed the Mexican border into the United States.
Feb. 5—The Senate passed the Immigration Bill over the President's veto, the bill containing the literacy test to which the President objected.
Feb. 9—The Governor of Indiana signed the Prohibition Bill, to take effect April 2, 1918.
—Raymond B. Stevens named as a member of the United States Shipping Board, succeeding Bernard N. Baker, resigned.
Feb. 16—The President nominated Thomas G. Patten for Postmaster at New York.
Feb. 17—Both branches of Congress approved the conference report on the bill creating a Federal board to promote vocational education.
—War Department ordered the demobilization of the National Guard at the Mexican border.
Feb. 19—The House passed a bill carrying out the provisions of the treaty for the purchase of the Danish West Indies. In the Senate the Porto

Rican Government and Danish West Indies measures were passed.

—The President nominated ex-Gov. John Franklin Fort of New Jersey and William B. Colver of Minnesota as members of the Federal Trade Commission.

Feb. 21—The House adopted the Senate measure forbidding shipment of intoxicating liquors into States which prohibit the manufacture and sale; thus nineteen States become "bone dry."

Feb. 24—The House of Representatives appropriated $400,000 for an inquiry by the Federal Trade Commission into the food situation.

Feb. 26—A plan to permit the Federal Trade Commission to fix the price of news-print paper was agreed upon by manufacturers and publishers.

—The Senate passed the bill appropriating $45,000,000 for the control of floods of the Mississippi and Sacramento Rivers.

Feb. 28—The House passed the Senate bill making the District of Columbia "dry" from November 1, 1917.

March 5—President Wilson took public oath of office for his second term and delivered his inaugural address.

March 6—The United States Supreme Court annulled the 6 per cent. rebate clause in the Underwood tariff applicable to goods imported in American ships, holding that the clause conflicted with existing treaties.

March 7—The Irish Nationalists in the British House of Commons presented a resolution calling for the immediate application of the Home Rule Law. The Government replied that Home Rule would not be forced upon Ulster.

March 8—The Senate abandoned its long-standing rule permitting unlimited debate.

—American marines landed at Santiago, Cuba, at the request of the Civil Government.

March 9—The President called the Sixty-fifth Congress to meet in extra session on April 16.

March 11—Mexico held elections for President and members of the Chamber of Deputies and the Senate. Carranza was elected President without opposition.

—The New York Senate, following action by the House, agreed to submit a woman suffrage amendment to the voters at the 1917 election.

March 12—A strike was called for March 17 on seven Eastern railroads by representatives of engineers, firemen, trainmen and conductors, the men declining to wait beyond that date for concessions by the managers or for a favorable decision by the Supreme Court in the matter of the constitutionality of the Eight-Hour Law.

March 15—The Senate began a discussion of the proposed treaty with Colombia, offering apology, indemnity and special rights in the Panama Canal.

March 16—Lieut. Gov. William D. Stephens became Governor of California upon the resignation of Hiram W. Johnson to take his seat in the United States Senate.

March 19—The railroad managers, in view of the international crisis, agreed to most of the demands of the brotherhoods and granted the eight-hour basis for pay.

—The United States Supreme Court upheld the constitutionality of the Railroad Eight-Hour Law.

March 21—President Wilson summoned Congress to meet in extra session April 2, two weeks in advance of the date first set.

March 23—A hurricane wrecked many buildings in New Albany, Ind., killing thirty-three persons.

March 25—American marines were entirely withdrawn from Cuba.

March 29—Owing to a general strike martial law was declared in Spain.

March 31—The United States took formal possession of the Danish West Indies, renaming them the Virgin Islands.

April 1—The Cuban rebel leader, Major Rigoberto Fernandez, was placed in custody by American naval forces en route to Hayti.

April 2—The Sixty-fifth Congress met in extraordinary session and was addressed by President Wilson.

April 3—The Reichstag adopted a resolution appointing a committee to consider the revision of the constitution of the German Empire.

April 4—The Russian Provisional Government repealed all laws abridging religious freedom.

—The price of wheat on the Chicago Board of Trade passed $2 for the first time in a normal market.

—The New York Legislature completed the passage of a bill creating a State constabulary.

April 7—The Agricultural Department's first forecast of the winter wheat crop showed an estimated production of 430,000,000 bushels, compared with 481,000,000 harvested in 1916 and 674,000,000 in 1915.

April 9—President Menocal carried the special elections in Oriente Province, and was reelected President of Cuba by 86 electoral votes to 44 for Dr. Zayas.

—The price of cotton on the New York Exchange reached 21¼ cents a pound, the highest price since the Civil War.

April 11—Butter and Egg Exchanges in New York and Chicago, as a patriotic duty, abolished speculation by suspending all dealings for future delivery.

April 17—The Governor of New Hampshire signed a bill establishing prohibition, effeteive May 1, 1918.

April 19—Premier Romanones of Spain resigned and the President of the Senate, Marquis Manuel Garcia Prieto, formed a Ministry.

—The price of wheat for May delivery on the Chicago Exchange reached $2.40 a bushel, a rise of 40 cents in ten days.

April 20—The Secretary of Agriculture, Houston, suggested to the Senate that wide powers be given to his department to direct food production.

April 21—Elections in Japan resulted in an increased majority for the adherents of Premier Terauchi.

April 25—Dr. Affonso Costa formed a Ministry in Portugal, succeeding Antonio J. Almeida.

—Anthracite coal miners in the East won wage increases averaging 20 per cent.

April 27—More than 120 men were killed by a gas explosion in a mine near Trinidad, Col.

April 28—Approximately 200 members of the U. S. House of Representatives expressed to Premier Lloyd George, by cable, the interest of America in an immediate settlement of the Irish problem.

May 1—The Senate was addressed by ex-Premier Viviani of France, who was accompanied by Marshal Joffre and other members of the French Mission.

—Carranza took the oath of office as President of Mexico, the first Constitutional President in four years.

May 5—The U. S. House of Representatives was addressed by the Rt. Hon. Arthur J. Balfour, British Secretary of State for Foreign Affairs.

May 7—The Interstate Commerce Commission began hearings in the matter of the railroads' plea for a 15 per cent. increase in freight rates.

May 8—The United States Senate was addressed by the British Secretary of State for Foreign Affairs, the Rt. Hon. Arthur J. Balfour.

May 11—The Chicago Board of Trade ordered the discontinuance of trading in May wheat, the price of which had reached $3.25 a bushel.

May 16—The United States Government warned Cuban insurrectionists that interference with sugar production would be considered a hostile act against the United States.

May 21—Fire destroyed over $3,000,000 worth of property in the residential section of Atlanta, Ga.

May 22—In the House a letter from the President was read, declaring it imperative that authority to exercise censorship over the press should be granted to the President.

May 23—Tornadoes swept across Kansas, Illinois, Indiana, Kentucky, Tennessee, Arkansas and Alabama, causing the death of nearly 600 persons.

May 29—American exports for the year ending April 30 are officially announced as $6,060,000,000, a 50 per cent. increase over last year and more than twice the total of any other year.

June 1—Eleven provinces in China declared their independence.
—Hurricanes in Kansas and Oklahoma caused much property damage and loss of life.
June 5—It was reported from Amoy, China, that the seceding provinces demanded the dismissal of the National Assembly, a revision of the constitution, the reinstatement of Premier Tuan Chi-jui, and a declaration of war against Germany.
June 7—The United States expressed to China the hope that political disputes would be set aside and government re-established so that the Chinese Republic might proceed along the road to national development.
—San Salvador and several smaller towns of San Salvador were severely damaged by earth shocks.
June 8—Explosion and fire in a copper mine at Butte, Mont., caused the death of more than 140 workmen.
June 9—The Premier of Spain, Marquis Manuel Garcia Prieto, tendered his resignation.
June 12—Eduardo Dato formed a Ministry in Spain, with the purpose of observing neutrality and devoting attention to economic problems.
June 13—The Chinese Parliament was dissolved by the President.
June 14—In the Senate debate on the Railroad Control Bill, Mr. Reed and Mr. Lodge criticized the tendency to centralize legislative powers in the Executive.
June 15—The British Government decided to release all prisoners taken in the Irish Rebellion of April, 1916.

—United States Senator Paul O. Husting of Wisconsin was accidentally shot and killed by his brother Gustave while they were on a duck hunting trip at Rush Lake, Wis.

Oct. 22—The American record for speed in sustained flight was beaten by Lieut. Attilio Baldioli, carrying Capt. L. B. Lent, U. S. A., as passenger. He piloted a Pamilio scout biplane with a 300-horsepower engine from Newport News, Va., to New York—330 miles—in two hours and fifty-five minutes. Lieut. Silvio Resnati in a Caproni biplane of second size carried nine persons over the same 330-mile route in four hours and ten minutes.

Oct. 23—Two army deserters from Camp Mills were sentenced to ten years apiece at hard labor in the Federal Penitentiary at Atlanta.

Oct. 24—The Government Food Administrator secured from Louisiana 100,000 tons of sugar to help break the shortage in the East.

Oct. 25—New York City Federal Food Administrator Arthur Williams urged on housewives two meatless and wheatless days a week.

—In an address to 100 members of the New York State Woman Suffrage Party in the White House President Wilson indorsed equal suffrage by States. He said: "I am very glad to add my voice to those which are urging the people of the great State of New York to set a great example by voting for Woman Suffrage."

Oct. 26—Troops from Alabama and troops from the 15th Infantry, New York (negroes), clashed at Camp Mills, L. I. No casualties were reported, but the camp was kept under arms all night.

—The Indiana Woman Suffrage Law was held unconstitutional by the Indiana Supreme Court.

Oct. 27—The Spanish Cabinet resigned.

—Twenty thousand women marched in a Suffrage parade in New York City.

Oct. 28—A collision between an excursion train and a local freight at Camp Upton, L. I., resulted in the death of one soldier and the injury of fifteen civilians and soldiers.

Oct. 31—A special Japanese Finance Commission headed by Baron Tanetomo Megata arrived at a Pacific port en route to Washington, D. C.

—The Court of Appeals of New York State upheld the constitutionality of the legislative act abolishing the office of Coroner in the City of New York.

—The District of Columbia went "bone dry" in accordance with the provisions of the Sheppard Law.

Nov. 2—Lieut. Hanson McCann of the United States Naval Forces at Newport News, Va., flew with a seaman, Charles Allen, from Newport News to Duquoin, Ill., a total distance of 1,023 miles, in a little less than ten hours. One stop was made.

—Roland B. Molineux died of paresis in the State Hospital for the Insane at Kings Park, L. I., nearly twenty years after his arrest charged with the murder by poison of Mrs. Kate Adams in 1898. He was acquitted on second trial.

Nov. 3—Money in circulation in the United States increased to $4,924,928,348, a per capita of circulation of $47.03, the highest ever recorded. The general stock of money in the country was $5,768,711,565, an increase of $1,000,000,000 within the year.

Nov. 4—John V. W. Reynders jr., a Naval Reserve airman, was killed by a fall in a hydroaiplane of 500 feet at the naval air station, Bay Shore, L. I.

—A demand for wage increases for the 200,000 men belonging to the Brotherhood of Railroad Trainmen and the Order of Railway Conductors was decided by the chief executives of both organizations.

—Nineteen persons were burned to death in the Salvation Army Rescue Mission, 42 Mill Street, Paterson, N. J.

Nov. 5—Baron Hayashi, the Japanese Minister to China, informed the Chinese Foreign Office that Viscount Ishii, head of the Japanese Mission in the United States, and Secretary Lansing signed an agreement Nov. 2 under which the United States recognizes Japan's special interests in China and under which also Japan and the United States reaffirm the "open door" policy in China.

—President Wilson fixed prices on minor iron and steel manufactures to continue in effect until Jan. 1, 1918.

Nov. 6—In brief, the outstanding election features were:

—John F. Hylan defeated John Purroy Mitchel in New York City, carrying the entire Tammany ticket with him.

—Woman Suffrage won in New York State and lost in Ohio.

—Gov. Samuel W. McCall was chosen Governor of Massachusetts for a third term.

—The Republicans gained three seats in Congress, electing candidates in Connecticut, Massachusetts and Pennsylvania.

—The largest requisition for postage stamps ever made on the Post Office Department was received from New York City. It called for $8,195,705.20 worth, 310,202,320 stamps. Of the new 3-cent stamps 150,000,000 were ordered. If the stamps were placed end to end they would make a strip 5,200 miles long. The stamps were wrapped in 1,800 packages, which, if placed in a single stack, would be four times as high as the Washington Monument.

—Six women lost their lives and many men had narrow escapes when the three upper floors of a four-story brick factory building, Nos. 17 and 19 Atlantic Avenue, Brooklyn, collapsed.

Nov. 9—Borough Inspector of Police James E. Dillon was named Chief Inspector of New York City in place of Max Schmittberger, deceased.

Nov. 10—Forty-one Suffragist pickets were arrested in front of the East and West gates of the White House, charged with obstructing traffic. Among the women were Mrs. Harvey W. Wiley, wife of the pure food advocate, and Mrs. William Kent, wife of former Representative Kent of California.

—Seventeen members of the Industrial Workers of the World were tarred and feathered by a posse of "Knights of Liberty" near Tulsa, Okla.

Nov. 11—Fire destroyed the Washburn Wire Company's plant in New York. Loss, $1,500,000.
—The Chinese Minister at Tokio, Japan, presented to the Japanese Foreign Minister a note protesting against the understanding arrived at between Japan and the United States in regard to China.
Nov. 12—Five thousand, seven hundred men struck at three shipbuilding plants at Port Newark, N. J.
—The Rev. Allen W. McCurdy of the Morningside Presbyterian Church, New York, announced his withdrawal from the ministry.
—The Metropolitan Opera season in New York opened.
—The New York Horse Show opened, the entire receipts to be devoted to Red Cross work.
Nov. 13—Carrying nine passengers, Capt. Emilio Resnati, Italian aviator, made the trip from Mineola, N. Y., to Langley Field, Newport News, Va., in three hours and fifty-nine minutes, beating his former record by twenty-five minutes.
—Dean Howard Chandler Robbins announced that further building operations on the Cathedral of St. John the Divine, New York City, would be suspended until the end of the war.
Nov. 14—Thirty-one Suffragettes arrested Nov. 13 in front of the White House were sentenced in individual cases from six days to six months in jail.
—Mexican Federal troops evacuated Ojinaga and came to the American side, where they surrendered their arms. Gen. Juan Espinosa y Cordova, commander, surrendered to Capt. Theodore Barnes jr. Villa troops occupied the evacuated town. Earlier in the day Villa was repulsed twice by the Ojinaga garrison after having seventy men killed.
Nov. 15—Walter Clarke Teagle became President of the Standard Oil Company, succeeding A. C. Bedford, who became Chairman of the Board of Directors.
Nov. 16—A piece of gas pipe loaded with black powder was ignited in the Chicago Auditorium while the opera was in progress. There was a semi-panic. The house was rapidly emptied and no one was injured.
—Frank A. Vanderlip, called by the Interstate Commerce Commission as witness in the 15 per cent. advance rate case, testified that radical action was necessary to remedy the railroad financial situation. "One of two things must be done—either the Government must acquire ownership or some action be taken to restore confidence in securities of the railroads," said Mr. Vanderlip. "Granting the increase the roads request, he insisted, would act only as a poultice and not effect a real cure."
Nov. 17—The Marine Workers at the Port of New York were granted increases in pay by the Government Board of Arbitration.
—Anthracite operators and miners agreed on wage increases of approximately 20 per cent., conditioned on an increase in prices of coal to cover the raise.
—By a vote of 215 to 21, the American Federation of Labor in convention at Buffalo, determined to abandon its non-partisan attitude and decided to enter politics, speaking through its delegates in National Convention.
Nov. 18—Fire destroyed the nitrate plant of the Knowles-Brodby Company in Brooklyn.
Nov. 19—Mrs. Blanca De Saulles was placed on trial at Mineola, N. Y., charged with the murder of her divorced husband, "Jack" De Saulles, whom she shot to death Aug. 3, 1917.
—Gov. McCall of Massachusetts refused to honor a requisition from Gov. Cornwell of West Virginia for John Johnson, a negro charged with attacking a white girl. Gov. McCall stated he feared Johnson might not secure a fair trial.
—Seventeen thousand, five hundred tons of sugar intended for the Russian Government was seized in New York to relieve the shortage in the Eastern States.
Nov. 22—At a meeting of the National Association Opposed to Woman Suffrage held in Washington a new platform was adopted.
Nov. 23—Newly opened coal mines were put under direct Government control by the Fuel Administration, which issued regulations governing their operations and fixed prices at which their output would be sold.
—Viscount Reading, Lord Chief Justice of England, was created an Earl and Lord Northcliffe a Viscount.
—The American Federation of Labor declared that any injunction dealing with the relationship of employer and employee based on the dictum that labor is property "be held as usurpation and disregarded, let the consequences be what they may."
—The Special Japanese Financial Commission was welcomed at New York. The Commissioners included Ossamu Matsumoto, Secretary of the Japanese Department of Finance; Takenosuke Sagaguchi, Technical Expert in Finance; Baron Bunkichi Ito, Secretary of Agriculture and Commerce; Choso Koike, former Consul General to New York; Kenjiro Matsumoto of the Yasukawa and Matsumoto Corporation; Dr. Soiji Hishida, Secretary Interpreter to the Government of Corea, who took his degree at Columbia; Umekichi Yoneyama, Managing Director of the Mitsui Bank, and Yoshitaro Yamashita, General Manager of the Sumimoto Corporation.
Nov. 24—Thirteen persons were killed when a bomb exploded in the Central Police Station in Milwaukee. The bomb had been taken to the police station for safe keeping.
—Samuel Gompers was re-elected President of the American Federation of Labor.
Nov. 25—Sir Robert Borden, Prime Minister of Canada, was howled down at a no-conscription campaign mass meeting at Kitchener, Ont. (formerly Berlin).
Nov. 26—Federal Judge Mayer at New York ordered dissolved the News-Print Manufacturers' Association, charged with violation of the Sherman Act in restraint of trade. Five of the officials were fined.
Nov. 28—The Railroad War Board ordered the suspension of all "fast" freight lines in the Eastern District of the United States.
—Mess pork was quoted at $50 a barrel at Chicago, the highest price on record.
—Henry G. Freeman, a Philadelphia lawyer, in his will provided $12,000 annually for "pin money" for the wife of the President of the United States, the fund to be carried in perpetuity.
—Marion Cleveland, daughter of former President Cleveland, was married to William Stanley Dell of New York City.
Nov. 29—Fire destroyed the Parkway Bathing Pavilion, Coney Island, one of the largest in the country, and sixteen adjoining structures; estimated loss, $300,000.
Nov. 30—Queen Wilhelmina of Holland indorsed the Constitutional Revision Bill, which provides for universal suffrage and proportional representation.
Dec. 1—Mrs. Blanca Errazuriz De Saulles, on trial at Mineola, L. I., charged with the murder of her divorced husband, John Longer De Saulles, at Westbury, L. I., Aug. 3, 1917, was acquitted.
—A general increase of 35 cents a ton was added to the price of anthracite coal at the mines by President Wilson, to meet a wage increase for the miners.
Dec. 2—Five thousand union sympathizers ran through the streets of St. Paul, Minn., smashing the windows of street cars and attacking non-union carmen who attempted to run the cars.
Dec. 3—The second session of the Sixty-fifth Congress began in Washington.
—Fire in the Morse Iron Works and Dry Dock Company, Red Hook, Brooklyn, did $1,000,000 damage.
—An Army balloon, with a trailing steel cable, broke loose and sailed amuck over three States, Kansas, Oklahoma and Nebraska, destroying telegraph and telephone lines, toppling poles and unroofing barns. It travelled over 400 miles.
—The expulsion from the United States Senate of Robert M. La Follette of Wisconsin was urged

GENERAL RECORD OF EVENTS IN 1917—*Continued.*

by the American Defense Society in a brief submitted to the Senate committee investigating the speech of La Follette at St. Paul in September, 1917.

—Representative Fitzgerald, Seventh New York District (Brooklyn), announced he would resign from Congress Dec. 31, 1917, after nineteen years' service.

Dec. 4—The new Quebec Bridge, one of the longest cantilever spanned structures in the world, was opened to traffic.

—Eight hundred policemen, representative of the membership of the Patrolmen's Benevolent Protective Association, in every police station in Philadelphia, voted "resignation as a body" unless Mayor Smith and the Council eliminated politics from the Department of Public Safety.

Dec. 5—Eight persons were killed and twenty-five injured by an explosion of T. N. T. at the Aetna chemical plant near Pittsburgh, Pa.

—The Ford Motor Company was ordered to declare a dividend of $19,275,385 by Judge George S. Hosmer in the Dodge-Ford suit.

Dec. 6—Over 1,000 persons were killed in and about Halifax, N. S., by the explosion of 3,000 tons of high explosives on board the steamship Mont Blanc in Halifax Harbor, when it was rammed by the Belgian Relief steamer Imo. Thousands were injured. At the north end of the city two square miles of territory was laid waste by the blast. Fires started simultaneously all over the city, raging until they burned out. The shock of the explosion was felt 150 miles distant. Three ships were sunk in the harbor.

Dec. 7—Halifax was swept by a blizzard. So fierce was the storm that rescue workers were forced to suspend their operations. Many buried under the ruins of shattered buildings perished of cold and hunger.

—A joint resolution to appropriate $5,000,000 for the relief of Halifax was introduced in Congress by Representative Tague of Massachusetts.

Dec. 8—The ocean-going tug Eugene F. Moran of New York City foundered in the heavy sea off Atlantic City, N. J. The Captain, Fred S. Riley of Brooklyn, and ten members of the crew lost their lives.

—The Superintendent of Morgues at Halifax estimated that the dead from the disaster would reach 4,000.

—President Wilson attended the annual dinner of the Gridiron Club, Washington, D. C.

—Count Christian Gunther von Bernstorff, only son of the former German Ambassador to the United States, and Mrs. Marguerite Vivian Burton Thomason of Burlington, N. J., were married.

Dec. 9—Police reserves were called to hold back throngs at a theatre, Washington, D. C., where a mass meeting in honor of the White House pickets was in progress. Pledges totalling $6,326 were made. The meeting was presided over by Mrs. O. H. P. Belmont.

Dec. 10—John J. Dillon ceased to be State Commissioner of Foods and Markets or a member of the State Council of Farms and Markets. Dr. Eugene H. Porter of Upper Lisle, Broome County, former State Health Commissioner, was appointed to succeed him.

—Decisions defining the rights of both organized labor and the employer were rendered by the Supreme Court of the United States. While the right of workmen to organize for lawful purposes was reaffirmed, the Court held that employers legally may operate their plants as "open shops" and prevent conspiracies to bring their non-union employees into labor organizations. The opinions were rendered in the case of the Hitchman Coal and Coke Company against John Mitchell and others, upholding a restraining order to prevent union labor from bringing a strike in a non-union coal mine in West Virginia. Justice Pitney delivered the opinion for the Court, in which the Chief Justice and four other Justices concurred, and Justice Brandeis, Justice Holmes and Justice Clark dissented.

—With a decision upholding the Idaho Prohibition Law, the United States Supreme Court gave an opinion in which it was held that a citizen has no constitutional right to possess liquors for his personal use if a State wishes to forbid it. Justice McReynolds, who gave the Court's opinion, held that a State "has power absolutely to prohibit manufacture, gift, purchase, sale or transportation of intoxicating liquors within its borders without violating the Constitution. We further think it clearly follows from our numerous decisions upholding Prohibition legislation that the right to hold intoxicating liquors for personal use is not one of those fundamental privileges of a citizen of the United States which no State may abridge."

Dec. 11—The United States Senate ordered a sweeping inquiry into the cause of the shortage of coal and sugar throughout the country. At the request of Mr. Hoover, agents of the Federal Trade Commission trailed dealers in foods whose operations kept the supply short and the prices high.

—Thirteen negroes, soldiers of the 24th United States Infantry, were hanged at Fort Sam Houston (San Antonio) for complicity in the Houston riots August, 1917, in which twenty-two persons were killed by the soldiers, who ran amuck. Forty-one other negroes were sentenced to life imprisonment and four for short terms. All were convicted under process of United States court martial.

—President Wilson issued a proclamation reducing the alcoholic content of beer brewed after January 1, 1918, to 2¾ per cent. by weight. He also prohibited the use in the manufacture of malt liquors of more than 70 per cent. of the average amount of foods, fruits, food materials and feeds used in such manufacture during the one year period ending on that date.

—The Chinese Government protested to Japan in a note against the Japanese establishment of civil administration in Shantung territory outside of the Tsingtau area.

Dec. 12—Dr. Charles C. North, Superintendent of the Hospital for Insane Convicts at Dannemora, N. Y., was stabbed and instantly killed by Chris Reichart, an insane convict. The murderer, a German, was a "trusty" in the carpenter shop, where the Superintendent frequently visited him on friendly terms.

JEWISH PUBLICATION SOCIETY OF AMERICA.

This is an organization for "the publication and dissemination of literary, scientific, and religious works, giving instruction in the principles of the Jewish religion," the third of its kind in the United States. Its headquarters are in Philadelphia. It was founded June 3, 1888, at a convention held in Philadelphia. At the end of the first fiscal year the membership was 1,071, and by 1903 it had reached 4,700; in 1917, it had about 15,000 members. Every member of the society receives a copy of each publication. Since the society has been in existence, over two hundred thousand volumes have been distributed and sold. The society is supported by the income derived from a permanent fund and from membership dues.

As a rule, four, sometimes five, publications are issued each year. The first, "Outlines of Jewish History," by Lady Magnus, appeared in 1890. The society issues two series, a "Special Series" (Seven Numbers) appearing occasionally, and including short works of a miscellaneous character, and "The American Jewish Year Book," published since 1899-1900 (5,660). Besides the volumes of these two series, the society has brought out about 100 volumes, among them translations from German, French and Hebrew; of these books it has distributed about 1,000,000 copies. The offices of the society are located at 1201 North Broad Street, Philadelphia. Simon Miller, President, Judge Mayer Sulzberger, Chairman of the Publication Committee. I. G. Dobsevage, Secretary.

DEATH ROLL OF 1917.

The age is in parenthesis, and the occupation is usually given.

Abbelen, Rev. Mgr. P. M. (74), Aug. 24.
Achelis, Herr Friedrich (77), May 20.
Albro, Dr. Samuel H. (80), educator, April 14.
Allen, John, "Private John" (71), former Congressman, Oct. 30.
Allison, Thomas (76), ex-Judge, May 15.
Anderson, Brig. Gen. Thomas McA. (81), U. S. Army retired, May 8.
Andrews, Dr. Elisha B. (73), educator, Oct. 30.
Arden, George B. H. (89), eleventh Earl of Haddington, June 11.
Arnold, Rear Adm. Conway H. (69), U. S. Navy retired, July 16.
Atwood, Rev. Dr. Isaac Morgan (80), clergyman and educator, Oct. 26.
Aubert, Prof. Eugene (85), French scholar, Dec. 7.
Audont, Col. A., head of Swiss Army, Nov. 20.
Austen, Major Gen. David E. (76), July 16.
Avery, Dr. Edward W. (76), Feb. 13.
Ayers, Rear Adm. Samuel L. P. (82), U. S. Navy retired, April 29.
Baird, William R. (59), lawyer and editor, March 15.
Baker, Chas. D. (70), journalist, Jan. 7.
Baker, Major William H. (74), war veteran, Jan. 23.
Barbour, Col. Wm. H. (59), manufacturer, March 1.
Baring, Evelyn (75), first Earl of Cromer, Jan. 29.
Barlow, Jane, novelist, April 17.
Barnett, Dr. James R. (75), former president of the Wisconsin Medical Association, Jan. 29.
Bates, Rear Adm. Alexander B. (75), U. S. Navy retired, Feb. 19.
Baudouin, Manuel (70), French jurist, Jan. 23.
Beach, Charles Yale (70), journalist, Oct. 16.
Beadleston, Alfred N. (69), brewer, Aug. 9.
Beall, Joseph H. (46), jurist, May 14.
Beaman, Rear Adm. George W. (79), U. S. Navy retired, May 3.
Beardsley, Charles S. (72), lawyer, July 9.
Beckett, Charles Henry (58), former Surrogate New York County, Nov. 29.
Beckwith, James Carroll (65), portrait painter, Oct. 24.
Beebe, Mrs. Maria Louise, President of Y. W. C. A., May 10.
Beebe, Prof. William (65), educator, March 11.
Beekman, Lieut. Col. William S. (49), National Guard New York, April 10.
Belding, Milo M. (84), manufacturer, May 23.
Belford, Joseph M. (65), ex-Congressman, lawyer, May 3.
Bell, Digby (67), actor, June 20.
Benoist, Tom (37), aviator, June 14.
Benton, George V. (50), March 31.
Bergman, Henry (58), actor, Jan. 9.
Berri, William (68), publisher, April 19.
Biddle, Julian, aviator Lafayette Squadron, Aug. 20.
Bird, Joseph (79), banker, March 8.
Birdwood, Sir George (84), scientist, June 27.
Blickensderfer, George, typewriter inventor (67), Aug. 15.
Boardman, Rev. Dr. Samuel (87), educator, Aug. 30.
Boatwright, Capt. John A., U. S. Army retired, Jan. 16.
Bodman, Edward C. (77), N. Y. grain merchant, Jan. 21.
Boileau, Philip (53), painter, Jan. 13.
Bolles, Richard J. (73), March 25.
Bonavita, Capt. Jack, animal trainer, March 19.
Boniface, George H. (56), actor, March 27.
Borden, Sir Frederick W. (69), formerly Minister of Defense in Canada, Jan. 5.
Bostwick, Lieut. Col. Henry A. (52), July 25.
Botelho, Col. Abel, diplomat, April 24.
Bowell, Sir Mackenzie (94), former Premier of Canada, Dec. 10.
Bowman, Thomas, former United States Congressman (Iowa), Dec. 1.
Boyle, John J. (66), sculptor, Feb. 9.
Bradley, Luther D. (63), cartoonist of the Chicago Daily News, Jan. 9.
Brady, James Buchanan (64), "Diamond Jim," April 13.
Brainerd, William H. (62), journalist April 27.
Brensinger, Major Geo. F. Jersey City Commissioner, Sept. 12.
Bronson, Edgar B. (60), author, Feb. 4.
Brooke, Sir Charles (88), "Rajah of Sarawak," Borneo ruler, May 17.
Brown, John Howard (76), author, April 22.
Brown, Neal (61), political leader, Sept. 19.
Brown, Stephen H. (53), financier, July 20.
Browne, David H. (53), metallurgist, March 30.
Bruce, Victor Alex. (68), ninth Earl of Elgin and Kincardine, Jan. 18.
Brunnow, Rudolph E. (59), educator, April 14.
Bryan, Capt. Francis I., U. S. A. (94), West Point's oldest alumnus, Oct. 25.
Bryce, Gen. Lloyd S. (66), author and diplomat, April 2.
Buchanan, George N. (58), custodian Brooklyn Hall of Records, Nov. 30.
Buchner, Dr. Edward, winner of Nobel prize for chemistry, Aug. 23.
Burke, Major John M. (74), former Indian scout, April 12.
Burkhardt, A. E. (73), international furrier, Nov. 5.
Burnand, Sir Francis C. (81), editor, April 21.
Burnham, Henry E. (73), ex-U. S. Senator, Feb. 8.
Burton, Gen. Geo. H., U. S. A. (75), Indian fighter, Oct. 20.
Bustanoby, Louis (44), restaurateur, Aug. 4.
Butters, A. C. (52), editor, Aug. 25.
Byles, Sir William P., member British Parliament (78), Oct. 18.
Caetani, Onorato, Duke of Sermoneto (75), Sept. 2.
Callahan, Charles E. (74), author, Jan. 22.
Callanan, James H. (52), publisher, April 29.
Campbell, Alexander C. (37), dairyman, June 14.
Campbell, Brig. Gen. Edward A. (73), Civil War veteran, Feb. 15.
Campbell, Rev. Dr. Frederick, astronomer, Feb. 22.
Campbell, William A. (65), District Superintendent of Schools, Brooklyn, Nov. 23.
Capehart, Capt. Edward E. (58), U. S. Navy retired, Feb. 20.
Carlstrom, Victor (27), aviator, May 9.
Carmody, John R. (73), Paymaster U. S. Navy retired, March 16.
Carolus-Duran, Emile Auguste (79), portrait painter, Feb. 18.
Carr, Most Rev. Thomas (78), May 6.
Carreno, Mme. Teresa (63), pianist, June 12.
Carter, Prof. Jesse B. (45), July 21.
Cary, Edward (76), journalist, May 23.
Castellane, Marquis de (75), father of Count Boni, Dec. 9.
Chace, Jonathan (88), ex-U. S. Senator, June 30.
Chaille-Long, Col. Charles (76), explorer, March 24.
Chamberlain, Robt. N. (57), jurist, Sept. 20.
Chandler, William E. (82), former U. S. Senator from New Hampshire, Nov. 30.
Charlton, Paul (61), jurist, June 4.
Charlton, Judge Walter G. (65), Feb. 13.
Ching, Prince (80), Chinese statesman, Premier of China and former Minister of Foreign Affairs, Jan. 31.
Chip, Sam, comedian, April 11.
Choate, Joseph H. (85), lawyer and former Ambassador, May 14.
Christie, Mrs. John Reid, wife of New York insurance man, Dec. 1.
Church, John Adams (73), engineer, Feb. 12.
Church, Lieut. Col. William Conant (80), editor, May 23.
Clark, Walter (69), artist, March 12.
Clark, Dr. William Bullock (57), educator and geologist, July 27.
Clarke, Dr. Powhatan (81), educator, April 25.
Clausen, George C. (68), brewer, May 24.

Sulloway, Cyrus A. (77), Congressman from N. H., March 11.
Sultan of Egypt (Hussein Kemal), Oct. 9.
Swan, Alden S. (78), financier, Feb. 23.
Sweeney, Bo (53), public official, July 16.
Sweeney, Dennis F. (57), former Police Inspector, Sept. 11.
Swete, Rev. Dr. Henry B. (82), educator, May 9.
Sykes, Dr. Frederick H., educator, Oct. 14.
Tait, Sir Melbourne McT. (74), jurist, Feb. 10.
Talbert, Benj. G. (85), former Chairman New York Stock Exchange, Dec. 7.
Tate, Prof. William F., educator, Feb. 7.
Taylor, Isaac S., Chief Architect St. Louis World's Fair, Oct. 28.
Tenny, A. W. (78), Civil War veteran, March 1.
Terry, Henry C. ("Deacon") (68), veteran New York newspaper reporter, Nov. 30.
Thayer, Rufus H. (67), ex-Judge U. S. Court, July 12.
Thomson, Rev. Elliott H. (83), Archdeacon of Shanghai, April 26.
Thornton, Amasa P. (62), lawyer, Jan. 22.
Thurston, Col. Nathaniel B. (60), Jan. 15.
Thweatt, Alexander S. (56), G. P. A. Southern R. R., Dec. 4.
Tietjen, Christian F. (71), banker, Oct. 24.
Titus, Stephen A. (62), former member of N. Y. World staff, Aug. 22.
Tracy, Rev. Charles C. (78), educator, April 20.
Tree, Sir Herbert Beerbohm (63), actor, July 2.
Tremain, Hobart L. (72), U. S. Navy retired, June 29.
Turcas, Jules (63), landscape artist, March 16.
Tweed, Charles H. (73), lawyer and banker, Oct. 10.
Upshur, Rear Adm. John H. (94), U. S. Navy retired, May 30.
Val, Merry del, Rafael, diplomat, Aug. 30.
Van Buren, Rt. Rev. James H. (67), July 9.
Vance, Alanson A. (91), journalist, Jan. 22.
Van Zile, Judge Philip T. (73), jurist, Oct. 26.
Viljoen, Gen. B. (48), Boer veteran, Jan. 14.
Vitale, Giuseppe, master violinist, Sept. 17.
Vollmer, John Philip (70), capitalist, May 7.
von Baeyer, Adolph (81), German chemist, Aug. 24.
von Behring, Prof. Emil, April 2.
von Bissing, Gen. (73), German Governor General of Belgium, April 18.
von Ihne, Ernest E. (69), architect, April 23.
von Hengelmuller, Baron Ladislaus von Hengervar (72), statesman, April 25.
von Kaltenfels, Vice Adm. Kailer, Austrian Navy, April 29.
von Puttkamer, Baron Jesko (76), Jan. 26.
von Radolin, former German Ambassador to Paris, July 20.
von Ranke, Major Gen. (70), June 23.
von Zeppelin, Count Ferdinand (78), March 8.
Walker, William Hall (72), kodak pioneer, Nov. 29.
Walker, Dr. David (81), explorer, May 11.
Walker, Rt. Rev. Wm. D. (77), May 2.
Wallace, William J. (79), jurist, March 11.
Walsh, Judge R. J. (63), former Secretary of State of Connecticut, Dec. 7.
Wanamaker, Lewis C. (73), retired merchant, Feb. 5.
Wanamaker, Geo. W., former appraiser Port of New York, Dec. 9.
Warburton, Frederick J. (75), linotype expert, Nov. 2.
Ward, Charles B. (52), song writer, March 21.
Ware, William R. (68), architectural writer, March 28.
Warrender, Vice Adm. Sir George J. S. (66), Jan. 8.

DEATH ROLL OF 1917—*Continued.*

Warren, Prof. Herbert L. (60), educator, June 27.
Watmough, Rear Adm. James H. (95), U. S. Navy retired, Jan. 18.
Weart, William G. (45), baseball writer and authority, Dec. 7.
Weed, George W. (77), manufacturer, April 7.
Weil, Jonas (80), philanthropist, April 11.
Weil, Major Richard, U. S. A., cancer specialist, Nov. 19.
Wells, Dr. Charles (79), Orientalist, Oct. 4.
Wells, Julian L., civil engineer, Oct. 27.
Wells, Dr. Brooks H. (57), gynecologist, July 6.
Wendell, Evert Jansen (57), former Governor of Aero Club, Aug. 28.
Wenzell, Albert B. (53), artist, March 5.
Wesley, Louis (54), actor, Nov. 18.
Wesner, Ella (76), actress, Nov. 11.
Weston, Major Gen. John F. (71), war veteran U. S. A., Aug. 3.
Wheatley, Henry B. (79), author, April 30.
White, Charles (52), boxing referee, Dec. 1.
White, Prof. Charles J. (78), educator, Feb. 12.
White, John W. (78), educator, May 9.
White, Dr. Whitman V. (83), Civil War veteran, Feb. 21.
Wicker, Prof. George H., economist, Nov. 25.
Wielemans, Gen. Maximilian, Jan. 6.
Wilbur, Albert L. (75), theatrical manager, March 23.
Williams, Rev. Dr. Moseley H. (78), the "Bishop of Congregationalism," Nov. 9.
Williams, Alexander S. (77), police inspector, March 25.
Williams, Charles G. (48), Secretary of Union News Co., Jan. 22.
Willitts, Rear Adm. George S. (64), U. S. Navy retired, May 3.
Wills, Nat M. (44), actor, Dec. 9.

ALIEN ENEMIES EXCLUDED FROM WASHINGTON AND CANAL ZONE.

ALL alien enemies were excluded from the District of Columbia and from the Panama Canal Zone by a Presidential proclamation, November 16, 1917, which added:

"An alien enemy shall not approach or be found within one hundred yards of any canal; nor within one hundred yards of any wharf, pier, dry dock used directly by or by means of lighters or by any vessel or vessels of over five hundred tons gross engaged in foreign or domestic trade other than fishing; nor within one hundred yards of any warehouse, shed, elevator, railroad terminal or other terminal, storage or transfer facility adjacent to or operated in connection with any such wharf, pier, or dock; and wherever the distance between any two of such wharves, piers, or docks, measured along the shore line connecting them, is less than 880 yards, an alien enemy shall not approach or be found within one hundred yards.

"Whenever the Attorney-General of the United Sates deems it to be necessary, for the public safety and the protection of transportation, to exclude alien enemies from the vicinity of any warehouse, elevator, or railroad depot, yard, or terminal which is not located within any prohibited area designated by this proclamation or the proclamation of April 6, 1917, then an alien enemy shall not approach or be found within such distance of any such warehouse, elevator, depot, yard, or terminal as may be specified by the Attorney-General by regulation duly made and declared by him; and the Attorney-General is hereby authorized to fix, by regulations to be made and declared from time to time, the area surrounding any such warehouse, elevator, depot, yard, or terminal from which he deems it necessary to exclude alien enemies.

"An alien enemy shall not, except on public ferries, be found on any ocean, bay, river, or other waters within three miles of the shore line of the United States or its territorial possessions; said shore line for the purpose of this proclamation being hereby defined as the line of seacoast and the shores of all waters of the United States and its territorial possessions connected with the high seas and navigable by ocean-going vessels; nor on any of the Great Lakes, their connecting waters or harbors, within the boundaries of the United States.

"No alien enemy shall ascend into the air in any airplane, balloon, airship, or flying machine."

WILSON'S SECOND WAR MESSAGE TO CONGRESS.

(Delivered by the President at a joint session, December 4, 1917.)

Following is the text of President Wilson's message to the joint session of Congress on December 4, 1917, urging war on Austria-Hungary: "Gentlemen of the Congress: Eight months have elapsed since I last had the honor of addressing you. They have been months crowded with events of immense and grave significance for us. I shall not undertake to detail or even to summarize those events. The practical particulars of the part we have played in them will be laid before you in the reports of the executive departments. I shall discuss only our present outlook upon these vast affairs, our present duties and the immediate means of accomplishing the objects we shall hold always in view.

"I shall not go back to debate the causes of the war. The intolerable wrongs done and planned against us by the sinister masters of Germany have long since become too grossly obvious and odious to every true American to need to be rehearsed. But I shall ask you to consider again and with a very grave scrutiny our objectives and the measures by which we mean to attain them. For the purpose of discussion here in this place is action, and our action must move straight toward definite ends. Our object is, of course, to win the war, and we shall not slacken or suffer ourselves to be diverted until it is won. But it is worth while asking and answering the question, when shall we consider the war won? From one point of view it is not necessary to broach this fundamental matter. I do not doubt that the American people know what the war is about and what sort of an outcome they will regard as a realization of their purpose in it.

NATION UNITED FOR WAR.

"As a nation we are united in spirit and intention. I pay little heed to those who tell me otherwise. I hear the voices of dissent—who does not? I hear the criticism and the clamor of the noisily thoughtless and troublesome. I also see men here and there fling themselves in impotent disloyalty against the calm, indomitable power of the nation. I hear men debate peace who understand neither its nature nor the way in which we may attain it, with uplifted eyes and unbroken spirits. But I know that none of these speaks for the nation. They do not touch the heart of anything. They may safely be left to strut their uneasy hour and be forgotten. But from another point of view I believe that it is necessary to say plainly what we here at the seat of action consider the war to be for and what part we mean to play in the settlement of its searching issues. We are the spokesmen of the American people and they have a right to know whether their purpose is ours. They desire peace by the overcoming of evil, by the defeat once for all of the sinister forces that interrupt peace and render it impossible and they wish to know how closely our thought runs with theirs and what action we propose. They are impatient with those who desire peace by any sort of compromise—deeply and indignantly impatient—but they will be equally impatient with us if we do not make it plain to them what our objectives are and what we are planning for in seeking to make conquest of peace by arms.

PICTURE OF GERMAN POWER.

"I believe that I speak for them when I say two things: First, that this intolerable Thing of which the masters of Germany have shown us the ugly face, this menace of combined intrigue and force, which we now see so clearly as the German power. A Thing without conscience or honor or capacity for covenanted peace, must be crushed, and if it be not utterly brought to an end, at least shut out from the friendly intercourse of the nations, and, second, that when this Thing and its powers are indeed defeated and the time comes that we can discuss peace—when the German people have spokesmen, whose word we can believe and when those spokesmen are ready in the name of their people to accept the common judgment of the nations as to what shall henceforth be the bases of law and of covenant for the life of the world—we shall be willing and glad to pay the full price for peace and pay it ungrudgingly. We know what that price will be. It will be full, impartial justice—justice done at every point and to every nation that the final settlement must affect, our enemies as well as our friends.

"You catch with me the voices of humanity that are in the air. They grow daily more audible, more articulate, more persuasive, and they come from the hearts of men everywhere. They insist that the war shall not end in vindicative action of any kind, that no nation or people shall be robbed or punished because the irresponsible rulers of a single country have themselves done deep and abominable wrong. It is this thought that has been expressed in the formula, 'No annexations, no contributions, no punitive indemnities.' Just because this crude formula expresses the instinctive judgment as to right of plain men everywhere it has been made diligent use of by the masters of German intrigue to lead the people of Russia astray—and the people of every other country their agents could reach, in order that a premature peace might be brought about before autocracy has been taught its final and convincing lesson and the people of the world put in control of their own destinies. But the fact that a wrong use has been made of a just idea is no reason why a right use should not be made of it. It ought to be brought under the patronage of its real friends.

TO MAKE RIGHT THE ARBITER.

"Let it be said again that autocracy must first be shown the utter futility of its claims to power or leadership in the modern world. It is impossible to apply any standard of justice so long as such forces are unchecked and undefeated as the present masters of Germany command. Not until that has been done can right be set up as arbiter and peacemaker among the nations. But when that has been done—as, God willing, it assuredly will be—we shall at last be free to do any unprecedented thing, and this is the time to avow our purpose to do it. We shall be free to base peace on generosity and justice, to the exclusion of all selfish claims to advantage even on the part of the victors. Let there be no misunderstanding. Our present and immediate task is to win the war and nothing shall turn us aside from it until it is accomplished. Every power and resource we possess, whether of men, of money or of materials, is being devoted and will continue to be devoted to that purpose until it is achieved. Those who desire to bring peace about before that purpose is achieved I counsel to carry their advice elsewhere. We will not entertain it.

"We shall regard the war as won only when the German people say to us through properly accredited representatives that they are ready to agree to a settlement based upon justice and the reparation of the wrongs their rulers have done. They have done a wrong to Belgium, which must be repaired. They have established a power over other lands and peoples than their own—over the great Empire of Austria-Hungary, over hitherto free Balkan states, over Turkey, and within Asia—which must be relinquished. Germany's success by skill, by industry, by knowledge, by enterprise, we did not grudge or oppose, but admired rather. She has built up for herself a real empire of trade and influence, secured by the peace of the world. We were content to abide by the rivalries of manufacture, science and commerce that were involved for us in her success and stand or fall as we had or did not have the brains and the initiative to surpass her. But at the moment when she had conspicuously won her triumphs of peace, she threw them away, to establish in their stead what the world will no longer permit to be established, military and political domination by arms, by which to oust where she could not excel the rivals she most feared and hated. The peace we make must remedy that wrong. It must deliver the once fair lands and happy peoples of Belgium and Northern France from the Prussian conquest and the Prussian menace, but it must also deliver the peoples of Austria-Hungary, the peoples of the Balkans and the peoples of Turkey, alike in Europe and in Asia, from the impudent and alien dominion of the Prussian military and commercial autocracy.

NOT TO IMPAIR AUSTRIA.

"We owe it, however, to ourselves to say that we do not wish in any way to impair or to rearrange the Austro-Hungarian Empire. It is no affair of ours what they do with their own life, either industrially or politically. We do not purpose or desire to dictate to them in any way. We only desire to see that their

affairs are left in their own hands in all matters, great or small. We shall hope to secure for the peoples of the Balkan peninsula and for the people of the Turkish Empire the right and opportunity to make their own lives safe, their own fortunes secure against oppression or injustice and from the dictation of foreign courts or parties. And our attitude and purpose with regard to Germany herself are of a like kind. We intend no wrong against the German Empire, no interference with her internal affairs. We should deem either the one or the other absolutely unjustifiable, absolutely contrary to the principles we have professed to live by and to hold most sacred throughout our life as a nation. The people of Germany are being told by the men whom they now permit to deceive them and to act as their masters that they are fighting for the very life and existence of their empire, a war of desperate self-defense against deliberate aggression. Nothing could be more grossly or wantonly false, and we must seek by the utmost openness and candor as to our real aims to convince them of its falseness.

"We are, in fact, fighting for their emancipation from fear, along with our own—from the fear as well as from the fact of unjust attack by neighbors or rivals or schemers after world empire. No one is threatening the existence of the independence or the peaceful enterprise of the German Empire. The worst that can happen to the detriment of the German people is this, that if they should still after the war is over continue to be obliged to live under ambitious and intriguing masters interested to disturb the peace of the world, men or classes of men whom the other peoples of the world could not trust, it might be impossible to admit them to the partnership of nations which must henceforth guarantee the world's peace.

PARTNERSHIP OF PEOPLES.

"The partnership must be a partnership of peoples, not a mere partnership of Governments. It might be impossible, also, in such untoward circumstances, to admit Germany to the free economic intercourse which must inevitably spring out of the other partnerships of a real peace. But there would be no aggression in that; and such a situation, inevitable because of distrust, would in the very nature of things sooner or later cure itself, by processes which would assuredly set in. The wrongs, the very deep wrongs, committed in this war will have to be righted. That, of course. But they cannot and must not be righted by the commission of similar wrongs against Germany and her allies. The world will not permit the commission of similar wrongs as a means of reparation and settlement. Statesmen must by this time have learned that the opinion of the world is everywhere wide awake and fully comprehends the issues involved. No representative of any self-governed nation will dare disregard it by attempting any such covenants of selfishness and compromise as were entered into at the Congress of Vienna. The thought of the plain people here and everywhere throughout the world, the people who enjoy no privilege and have very simple and unsophisticated standards of right and wrong, is the air all governments must henceforth breathe if they would live. It is in the full disclosing light of that thought that all policies must be conceived and executed in this midday hour of the world's life. German rulers have been able to upset the peace of the world only because the German people were not suffered under their tutelage to share the comradeship of the other peoples of the world either in thought or in purpose. They were allowed to have no opinion of their own which might be set up as a rule of conduct for those who exercised authority over them.

"But the Congress that concludes this war will feel the full strength of the tides that run now in the hearts and consciences of free men everywhere. Its conclusions will run with those tides. All these things have been true from the very beginning of this stupendous war; and I cannot help thinking that if they had been made plain at the very outset the sympathy and enthusiasm of the Russian people might have been once for all enlisted on the side of the Allies, suspicion and distrust swept away and a real and lasting union of purpose effected. Had they believed these things at the very moment of their revolution and had they been confirmed in that belief since, the sad reverses which have recently marked the progress of their affairs toward an ordered and stable government of free men might have been avoided.

PROPAGANDA IN RUSSIA.

"The Russian people have been poisoned by the very same falsehoods that have kept the German people in the dark, and the poison had been administered by the very same hands. The only possible antidote is the truth. It cannot be uttered too plainly or too often. From every point of view, therefore, it has seemed to be my duty to speak these declarations of purpose, to add these specific interpretations to what I took the liberty of saying to the Senate in January. Our entrance into the war has not altered our attitude toward the settlement that must come when it is over. When I said in January that the nations of the world were entitled not only to free pathways upon the sea, but also to assured and unmolested access to those pathways I was thinking, and I am thinking now, not of the smaller and weaker nations alone, which need our countenance and support, but also of the great and powerful nations and of our present enemies as well as our present associates in the war. I was thinking and am thinking now, of Austria herself, among the rest, as well as of Serbia and Poland. Justice and equality of rights can be had only at a great price. We are seeking permanent, not temporary, foundations for the peace of the world, and must seek them candidly and fearlessly. As always, the right will prove to be the expedient. What shall we do, then, to push this great war of freedom and justice to its righteous conclusion? We must clear away wth a thorough hand all impediments to success and we must make every adjustment of law that will facilitate the full and free use of our whole capacity and force as a fighting unit.

CALLS FOR DECLARATION.

"One very embarrassing obstacle that stands in our way is that we are at war with Germany but not with her allies. I, therefore, very earnestly recommend that the Congress immediately declare the United States in a state of war with Austria-Hungary. Does it seem strange to you that this should be the conclusion of the argument I have just addressed to you? It is not. It is, in fact, the inevitable logic of what I have said. Austria-Hungary is for the time being not her own mistress, but simply the vassal of the German Government. We must face the facts as they are and act upon them without sentiment in this stern business. The Government of Austria-Hungary is not acting upon its own initiative or in response to the wishes and feelings of its own peoples but as the instrument of another nation. We must meet its force with our own and regard the Central Powers as but one. The war can be successfully conducted in no other way. The same logic would lead also to a declaration of war against Turkey and Bulgaria. They also are the tools of Germany. But they are mere tools and do not yet stand in the direct path of our necessary action. We shall go wherever the necessities of this war carry us, but it seems to me that we should go only where immediate and practical considerations lead us and not heed any others. The financial and military measures which must be adopted will suggest themselves as the war and its undertakings develop, but I will take the liberty of proposing to you certain other acts of legislation which seem to me to be needed for the support of the war and for the release of our whole force and energy. It will be necessary to extend in certain particulars the legislation of the last session with regard to alien enemies, and also necessary, I believe, to create a very definite and particular control over the entrance and departure of all persons into and from the United States. Legislation should be enacted defining as a criminal offense every wilful violation of the Presidential proclamations relating to alien enemies promulgated under section 4,067 of the Revised Statutes and providing appropriate punishments. And women as well as men should be included under the terms of the acts placing restraints upon alien enemies.

WOULD IMPRISON ALIENS.

"It is likely that as time goes on many alien enemies will be willing to be fed and housed at the expense of the Government in the detention camps, and it would be the purpose of the legislation I have suggested

to confine offenders among them in penitentiaries and other similar institutions where they could be made to work as other criminals do. Recent experience has convinced me that the Congress must go further in authorizing the Government to set limits to prices. The law of supply and demand, I am sorry to say, has been replaced by the law of unrestrained selfishness. While we have eliminated profiteering in several branches of industry it still runs impudently rampant in others. The farmers, for example, complain with a great deal of justice that, while the regulation of food prices restricts their incomes, no restraints are placed upon the prices of most of the things they must themselves purchase; and similar iniquities obtain on all sides. It is imperatively necessary that the consideration of the full use of the water power of the country and also the consideration of the systematic and yet economical development of such of the natural resources of the country as are still under the control of the Federal Government should be immediately resumed and affirmatively and constructively dealt with at the earliest possible moment. The pressing need of such legislation is daily becoming more obvious.

"The legislation proposed at the last session with regard to regulated combinations among our exporters, in order to provide for our foreign trade a more effective organization and method of co-operation, ought by all means to be completed at this session. And I beg that the members of the House of Representatives will permit me to express the opinion that it will be impossible to deal in any but a very wasteful and extravagant fashion with the enormous appropriations of the public moneys which must continue to be made, if the war is to be properly sustained, unless the House will consent to return to its former practice of initiating and preparing all appropriation bills through a single committee, in order that responsibility may be centred, expenditures standardized and made uniform, and waste and duplication as much as possible avoided. Additional legislation may also become necessary before the present Congress again adjourns in order to effect the most efficient co-ordination and operation of the railway and other transportation systems of the country. But to that I shall, if circumstances should demand, call the attention of Congress upon another occasion.

URGES WAR SESSION.

"If I have overlooked anything that ought to be done for the more effective conduct of the war your own counsels will supply the omission. What I am perfectly clear about is that in the present session of the Congress our whole attention and energy should be concentrated on the vigorous and rapid and successful prosecution of the great task of winning the war. We can do this with all the greater zeal and enthusiasm because we know that for us this is a war of high principle, debased by no selfish ambition of conquest or spoliation; because we know, and all the world knows, that we have been forced into it to save the very institutions we live under from corruption and destruction. The purposes of the Central Powers strike straight at the very heart of everything we believe in; their methods of warfare outrage every principle of humanity and of knightly honor; their intrigue has corrupted the very thought and spirit of many of our people; their sinister and secret diplomacy has sought to take our very territory away from us and disrupt the union of the States. Our safety would be at an end, our honor forever sullied and brought into contempt were we to permit their triumph. They are striking at the very existence of democracy and liberty. It is because it is for us a war of high, disinterested purpose in which all the free peoples of the world are banded together for the vindication of right, a war for the preservation of our nation and of all that it has held dear of principle and of purpose that we feel ourselves doubly constrained to propose for its outcome only that which is righteous and of irreproachable intention for our foes as well as for our friends.

"The cause being just and holy, the settlement must be of like motive and quality. For this we can fight, but for nothing less noble or less worthy of our traditions. For this cause we entered the war and for this cause will we battle until the last gun is fired. I have spoken plainly because this seems to me the time when it is most necessary to speak plainly, in order that all the world may know that even in the heat and ardor of the struggle and when our whole thought is of carrying the war through to its end we have not forgotten any ideal or principle for which the name of America has been held in honor among the nations and for which it has been our glory to contend in the great generations that went before us. A supreme moment of history has come. The eyes of the people have been opened and they see. The hand of God is laid upon the nations. He will show them favor, I devoutly believe, only if they rise to the clear heights of His own justice and mercy."

DECLARATION BY CONGRESS OF WAR ON AUSTRIA-HUNGARY.

(Passed as a joint resolution by Congress on December 7, 1917, signed by the President at 5.03 P. M., and in effect from December 5, 1917.)

JOINT RESOLUTION.

Declaring that a state of war exists between the Imperial and Royal Austro-Hungarian Government and the Government and the people of the United States, and making provision to prosecute the same.

Whereas, the Imperial and Royal Austro-Hungarian Government has committed repeated acts of war against the Government and the people of the United States of America; therefore be it,

Resolved, by the Senate and House of Representatives of the United States of America, in Congress assembled, that a state of war is hereby declared to exist between the United States of America and the Imperial and Royal Austro-Hungarian Government, and the President be, and he is hereby, authorized and directed to employ the entire naval and military forces of the United States and resources of the Government to carry on war against the Imperial and Royal Austro-Hungarian Government; and to bring the conflict to a successful termination all the resources of the country are hereby pledged by the Congress of the United States.

Champ Clark, Speaker of the House of Representatives.

Thomas R. Marshall, Vice-President of the United States and President of the Senate.

Approved 7, December, 1917. Woodrow Wilson.

AMERICAN PORTS UNDER MILITARY CONTROL.

THIS procedure began with the port of New York, which was put under military control (in compliance with the proclamation of the President of November 16, 1917), at midnight Sunday, November 25. All docks and waterfronts involved in transatlantic shipping were then guarded by the Regular Army, in dress uniform to distinguish them from enlisted men on other duty, fully armed and with orders to prohibit the passage of any person, alien or citizen, who could not establish a business reason for access to waterfront areas. Citizens and aliens were warned of the peril of trespassing on the prohibited areas. The War Department requested the Department of Justice to emphasize the necessity of a strict observance by the public of the military control. As rapidly as the machinery of Government could be applied to the administration of the service, the same military control was established at other American ports. The Department of Justice authorized specific instructions relative to the control of alien enemies in waterfront areas, conforming to the President's proclamation, and also authorized specific instructions to persons owning or operating waterfront shipping facilities.

THE ENTENTE CONFERENCE AT PARIS.

THE conference, which opened at Paris early in December, 1917, consisted of the following delegates:

United States—Col. E. M. House, Chairman; William Graves Sharp, Ambassador; Admiral William S. Benson, Chief of Naval Operations; Gen. Tasker H. Bliss, Chief of Staff; Oscar T. Crosby, Assistant Secretary of the Treasury; Vance McCormick, Chairman of the War Trade Board; Thomas Nelson Perkins of the Priority Board.

France—Georges Clemenceau, Premier and Minister of War; Stephen Pichon, Minister of Foreign Affairs; Louis Klotz, Minister of Finance; Georges Leygues, Minister of Marine; Etienne Clementel, Minister of Commerce; Louis Loucheur, Minister of Munitions; Victor Boret, Minister of Provisions; M. Lebrun, Minister of Blockade and Invaded Region; André Tardieu, High Commissioner to the United States; Jules Cambon, General Secretary to the Foriegn Office; M. de Margerie, Director of the Ministry of Foreign Affairs.

Great Britain—David Lloyd George, Premier; Arthur James Balfour, Secretary for Foreign Affairs; Sir Francis Bertie, Ambassador to France; Sir Eric Campbell Geddes, First Lord of the Admiralty; Gen. Sir William Robertson, Chief of the Imperial Staff at Army Headquarters; Admiral Sir John Jellicoe, Chief of the Naval Staff; Sir Maurice Hankey, Secretary to the Committee on Imperial Defense. Including clerks and other attachés there are 143 persons in this delegation.

Italy—Prof. Vittorio E. Orlando, Premier and Minister of Interior; Baron Sonnino, Foreign Minister; Francesco S, Nitti. Minister of the Treasury; Count Bonin-Longare. Ambassador; Signor Bianchi, Minister of Transports; Gen. Alfredo Dallolio, Minister of Munitions.

Japan—Viscount Chinda, Ambassador to Great Britain.

Belgium—Baron Charles de Broqueville, Foreign Minister; Baron de Gaiffier d'Hestroy, Minister to France; Gen. Recquoy, Chief of the General Staff.

Serbia—Nikola P. Pachitch, Premier and Minister of Foreign Affairs; Dr. H. R. Vesnitch.

Roumania—V. Antonesco, Minister; Gen. Iliescu, Chief of the General Staff.

Greece—Eleutherios Constantine Venizelos, Premier and Minister of War; Athos Romanos, Minister to France; Alexander Diomede, former Minister of Finance; Agyropoulos, Governor of Macedonia; Col. Frantzis Rottassis, Naval Attaché.

Portugal—Dr. Affonso Costa, Premier and Minister of Finance; Augusto Soares, Minister of Foreign Affairs.

Montenegro—Eugene Popovitch, Premier and Minister of Foreign Affairs.

Brazil—Antonio Olynthe de Magalhaes, Minister at Paris.

Cuba—Gen. Carlos Garcia y Velez, Minister at London.

Russia—Mathieu Sevastopoulos, Councillor of the Embassy at Paris; Maklakoff, Ambassador to France (by special invitation and unofficially, as he has not yet presented his letters).

Siam—Mr. Charoon, Minister at Paris.

China—Hu Wei Teh, the Minister in Paris, and Gen. Tami Tsai Lieh, Assistant Secretary of the Chinese General Staff.

FEDERAL FUEL ADMINISTRATORS.

STATE.	Name.	City.	STATE.	Name.	City.
Alabama	S. P. Kennedy	Anniston.	Nebraska	John L. Kennedy	Omaha.
Arizona	Will. L. Clark	Phoenix.	Nevada	E. H. Walker	Carson City.
Arkansas	H. C. Couch	Little Rock.	New England	James J. Storrow	Boston.
California	A. E. Schwabacher	San Francisco.	N. Hampshire	Charles M. Floyd	Manchester.
Colorado	William J. Galligan	Denver.	New Jersey	R. C. Jenkinson	Newark.
Connecticut	Thomas W. Russell	Hartford.	New Mexico	Wm. C. McDonald	Carrizozo.
Delaware	Chas. H. Ten Weeges	Wilmington.	New York	Albert H. Wiggin	New York.
Dist. of Col	John L. Weaver	Washington.	N. Carolina	A. W. McAlister	Greensboro.
Florida	Arthur T. Williams	Jacksonville.	North Dakota	I. P. Baker	Bismarck.
Georgia	Dr. L. G. Hardman	Commerce.	Ohio	Homer H. Johnson	Columbus.
Idaho	Frank R. Gooding	Gooding.	Oklahoma	P. A. Norris	Ada.
Illinois	John E. Williams	Chicago.	Oregon	Fred J. Holmes	Portland.
Indiana	Evans Woollen	Indianapolis.	Pennsylvania	William Potter	Philadelphia.
Iowa	Charles Webster	Des Moines.	Rhode Island	George H. Holmes	Providence.
Kansas	Emerson Carey	Hutchinson.	S. Carolina	B. B. Gossett	Anderson.
Kentucky	Wiley B. Bryan	Louisville.	South Dakota	W. G. Bickelhaupt	Aberdeen.
Louisiana	John G. O'Kelley	New Orleans.	Tennessee	W. E. Myer	Nashville.
Maine	J. C. Hamlen	Portland.	Texas	Wiley Blair	Dallas.
Maryland	Ferdinand A. Meyer	Baltimore.	Utah	W. W. Armstrong	Salt Lake City.
Massachusetts	James J. Storrow	Boston.	Vermont	H. J. M. Jones	Montpelier.
Michigan	William K. Prudden	Lansing.	Virginia	Harry F. Byrd	Richmond.
Minnesota	John F. McGee	Minneapolis.	Washington	David Whitcomb	Seattle.
Mississippi	C. L. Townes	Minter City.	West Virginia	J. Walter Barnes	Fairmont.
Missouri	Wallace Crossley	Jefferson City.	Wisconsin	W. N. Fitzgerald	Milwaukee.
Montana	W. J. Swindlehurst	Helena.	Wyoming	Augustine Kendall	Rock Springs.

NEW YORK FUEL ADMINISTRATION.

Albert H. Wiggin, New York State Federal Fuel Administrator, established headquarters at 61 Broadway on his appointment and chose the following deputies:

Manhattan—Reeve Schley, 65 Broadway.
Bronx—Cyrus C. Miller, Board of Trade Bldg., East 137th Street near Third Avenue.
Brooklyn—Fred E. Gunnison, 44 Court Street.
Queens—Geo. J. Ryan, Bridge Plaza, L. I. C.
Richmond—Otis Williams, 37 Wall Street, N. Y. City.
Westchester—Walter Law, Jr., Briarcliff Manor, N.Y.

WAR BOARD OF THE PORT OF NEW YORK.

Chairman—William G. McAdoo, Secretary of Treasury; the Secretary of War, the Secretary of the Navy, the Secretary of Commerce, the Secretary of Labor, the Chairman United States Shipping Board, the New York-New Jersey Port and Harbor Development Commission, the Mayor of the City of New York, a member of the Railway War Council. Irving T. Bush, Chief Executive Officer; Julius Henry Cohen, Secretary and Counsel; William R. Willcox, Vice-Chairman. The individual members of the New York-New Jersey Port and Harbor Development Commission are as follows: William R. Willcox, Chairman; Gen. George W. Goethals, B. F. Cresson, Arthur Curtiss James, DeWitt VanBuskirk, J. Spencer Smith, Frank R. Ford. Headquarters, 45 Broadway.

HOW TO GET WORLD PEACE—THE PRESIDENT'S WAY.

(From Mr. Wilson's address on Labor, Pacifists, Russia and Germany, November 12, 1917, at the American Federation of Labor Convention, Buffalo, N. Y.)

I am introduced to you as the President of the United States, and yet I would be pleased if you would put the thought of the office into the background and regard me as one of your fellow-citizens who had come here to speak, not the words of authority, but the words of counsel, the words which men should speak to one another who wish to be frank in a moment more critical perhaps than the history of the world has ever yet known, a moment when it is every man's duty to forget himself, to forget his own interests, to fill himself with the nobility of a great national and world conception, and act upon a new platform elevated above the ordinary affairs of life, elevated to where men have views of the long destiny of mankind. I think that in order to realize just what this moment of counsel is it is very desirable that we should remind ourselves just how this war came about and just what it is for. You can explain most wars very simply, but the explanation of this is not so simple. Its roots run deep into all the obscure soils of history, and in my view this is the last decisive issue between the old principles of power and the new principles of freedom.

The war was started by Germany. Her authorities deny that they started it. But I am willing to let the statement I have just made await the verdict of history. And the thing that needs to be explained is why Germany started the war. Remember what the position of Germany in the world was—as enviable a position as any nation has ever occupied. The whole world stood at admiration of her wonderful intellectual and material achievements, and all the intellectual men of the world went to school to her. As a university man, I have been surrounded by men trained in Germany, men who had resorted to Germany because nowhere else could they get such thorough and searching training, particularly in the principles of science and the principles that underlie modern material achievements. Her men of science had made her industries perhaps the most competent industries in the world, and the label "Made in Germany" was a guarantee of good workmanship and of sound material. She had access to all the markets of the world, and every other man who traded in those markets feared Germany because of her effective and almost irresistible competition.

She had a place in the sun. Why was she not satisfied? What more did she want? There was nothing in the world of peace that she did not already have and have in abundance. We boast of the extraordinary pace of American advancement. We show with pride the statistics of the increase of our industries and of the population of our cities. Well, these statistics did not match the recent statistics of Germany. Her old cities took on youth, grew faster than any American cities ever grew; her old industries opened their eyes and saw a new world and went out for its conquest; and yet the authorities of Germany were not satisfied. You have one part of the answer to the question why she was not satisfied in her methods of competition. There is no important industry in Germany upon which the Government has not laid its hands to direct it and, when necessity arises, control it.

You have only to ask any man whom you meet who is familiar with the conditions that prevailed before the war in the matter of international competition to find out the methods of competition which the German manufacturers and exporters used under the patronage and support of the Government of Germany. You will find that they were the same sorts of competition that we have tried to prevent by law within our own borders. If they could not sell their goods cheaper than we could sell ours, at a profit to themselves, they could get a subsidy from the Government, which made it possible to sell them cheaper anyhow; and the conditions of competition were thus controlled in large measure by the German Government itself.

GERMANY'S POLITICAL DREAMS.

But that did not satisfy the German Government. All the while there was lying behind its thought, in its dreams of the future, a political control which would enable it in the long run to dominate the labor and the industry of the world. They were not content with success by superior achievement; they wanted success by authority. I suppose very few of you have thought much about the Berlin-to-Bagdad Railway. The Berlin-to-Bagdad Railway was constructed in order to run the threat of force down the flank of the industrial undertakings of half a dozen other countries, so that when German competition came in it would not be resisted too far—because there was always the possibility of getting German armies into the heart of that country quicker than any other armies could be got there.

Look at the map of Europe now. Germany, in thrusting upon us again and again the discussion of peace, talks about what? Talks about Belgium, talks about Northern France, talks about Alsace-Lorraine. Well, those are deeply interesting subjects to us and to them, but they are not talking about the heart of the matter. Take the map and look at it. Germany has absolute control of Austria-Hungary, practical control of the Balkan states, control of Turkey, control of Asia Minor. I saw a map in which the whole thing was printed in appropriate black the other day, and the black stretched all the way from Hamburg to Bagdad—the bulk of the German power inserted into the heart of the world. If it can keep that, she has kept all that her dreams contemplated when the war began. If she can keep that, her power can disturb the world as long as she keeps it, always provided—for I feel bound to put this proviso in—always provided the present influences that control the German Government continue to control it.

I believe that the spirit of freedom can get into the hearts of Germans and find as fine a welcome there as it can find in any other hearts. But the spirit of freedom does not suit the plans of the Pan-Germans. Power cannot be used with concentrated force against free peoples if it is used by a free people. You know how many intimations come to us from one of the Central Powers that it is more anxious for peace than the chief Central Power; and you know that it means that the people in that Central Power know that if the war ends as it stands they will, in effect, themselves be vassals of Germany, notwithstanding that their populations are compounded with all the people of that part of the world, and notwithstanding the fact that they do not wish, in their pride and proper spirit of nationality, to be so absorbed and dominated.

Germany is determined that the political power of the world shall belong to her. There have been such ambitions before. They have been in part realized. But never before have those ambitions been based upon so exact and precise and scientific a plan of domination. May I not say that it is amazing to me that any group of people should be so ill-informed as to suppose, as some groups in Russia apparently suppose, that any reforms planned in the interest of the people can live in the presence of a Germany powerful enough to undermine or overthrow them by intrigue or force? Any body of free men that compounds with the present German Government is compounding for its own destruction. But that is not the whole of the story. Any man in America, or anywhere else, who supposes that the free industry and enterprise of the world can continue if the Pan-German plan is achieved and German power fastened upon the world is as fatuous as the dreamers of Russia.

What I am opposed to is not the feeling of the pacifists, but their stupidity. My heart is with them, but my mind has a contempt for them. I want peace, but I know how to get it, and they do not. You will notice that I sent a friend of mine, Colonel House, to Europe who is as great a lover of peace as any man in the world; but I did not send him on a peace mission. I sent him to take part in a conference as to how the war was to be won, and he knows, as I know, that that is the way to get peace if you want it for more than a few minutes.

RAISING AMERICAN POWER.

All of this is a preface to the conference that I referred to with regard to what we are going to do. If we are true friends of freedom—our own or anybody else's—we will see that the power of this country, the productivity of this country, is raised to its absolute maximum and that absolutely nobody is allowed to stand in the way of it. When I say that nobody is allowed to stand in the way, I don't mean that they

shall be prevented by the power of the Government, but by the power of the American spirit. Our duty, if we are to do this great thing and show America to be what we believe her to be, the greatest hope and energy of the world—then we must stand together night and day until the job is finished.

While we are fighting for freedom, we must see, among other things, that labor is free; and that means a number of interesting things. It means not only that we must do what we have declared our purpose to do—see that the conditions of labor are not rendered more onerous by the war—but also that we shall see to it that the instrumentalities by which the conditions of labor are improved are not blocked or checked. That we must do. Nobody has a right to stop the processes of labor until all the methods of conciliation and settlement have been exhausted; and I might as well say right here that I am not talking to you alone. You sometimes stop the courses of labor, but there are others who do the same. And I believe that I am speaking of my own experience not only, but of the experience of others, when I say that you are reasonable in a larger number of cases than the capitalists.

We are all of the same clay and spirit, and we can get together if we desire to get together. Therefore, my counsel to you is this: Let us show ourselves Americans by showing that we do not want to go off in separate camps or groups by ourselves, but that we want to co-operate with all other classes and all other groups in a common enterprise, which is to release the spirit of the world from bondage. I would be willing to set that up as the final test of an American. That is the meaning of democracy. I have been very much distressed, my fellow citizens, by some of the things that have happened recently. The mob spirit is displaying itself here and there in this country. I have no sympathy with what some men are saying, but I have no sympathy with the men that take their punishment into their own hands, and I want to say to every man who does join such a mob that I do not recognize him as worthy of the free institutions of the United States.

SOME ORGANIZATIONS THAT ARE LAWLESS.

There are some organizations in this country whose object is anarchy and the destruction of law, but I would not meet their efforts by making myself a partner in destroying the law. I despise and hate their purposes as much as any man, but I respect the ancient processes of justice, and I would be too proud not to see them done justice, however wrong they are. And so I want to utter my earnest protest against any manifestation of the spirit of lawlessness anywhere or in any cause. Why, gentlemen, look what it means: We claim to be the greatest democratic people in the world, and democracy means, first of all, that we can govern ourselves. If our men have not self-control, then they are not capable of that great thing which we call democratic government. A man who takes the law into his hands is not the right man to co-operate in any form of or development of law and institutions. And some of the processes by which the struggle between capital and labor is carried on are processes that come very near to taking the law into your own hands. I do not mean for a moment to compare them with what I have just been speaking of, but I want you to see that they are mere graduations of the manifestations of the unwillingness to co-operate.

And the fundamental lesson of the whole situation is that we must not only take common counsel, but that we must yield to and obey common counsel. Not all of the instrumentalities for this are at hand. I am hopeful that in the very near future new instrumentalities may be organized by which we can see to it that various things that are now going on shall not go on. There are various processes of the dilution of labor, and the unnecessary substitution of labor, and bidding in distant markets, and unfairly upsetting the whole competition of labor, which ought not to go on—I mean now on the part of employers—and we must interject into this some instrumentality of co-operation by which the fair thing will be done all around. I am hopeful that some such instrumentalities may be devised, but, whether they are or not, we must use those that we have, and, upon every occasion where it is necessary to have such an instrumentality, originated upon that occasion, if necessary.

EFFECT OF THE WAR ON TARIFF POLICIES.

(A Department of Commerce Announcement in November, 1917.)

In considering the probable economic effects of the war, the question as to its influence on the future tariff policies of the belligerents as well as the important neutral countries is given a great deal of prominence. It is regarded as inevitable that a struggle in which economic factors count so much should bring about radical changes in the treaty relations between the two groups of belligerents, as well as between them and the neutral countries. While the conclusions reached as to the tariff policy best adapted to meet the economic changes resulting from the war may in some cases be influenced by preconceived ideas on the tariff and by political traditions, it is safe to assume that the tariff policy of some of the most important countries of the world will be changed as a result of the war, for economic or political reasons. The tendencies toward new economic alignments are reflected in the Paris Economic Conference on the part of the Allies and in the movement for a customs union on the part of the Central Powers. Attention should also be directed to the aspirations of the British Dominions for closer tariff relations with the mother country, involving some radical changes in the tariff policy of Great Britain.

The resolutions adopted by the representatives of the Allied Governments who met at Paris in June, 1916, in compliance with the mandate of the Paris Conference of March 28, 1916, call for economic measures calculated to meet conditions arising during the war, as well as during the period of reconstruction, and also to establish a permanent policy of economic co-operation among the allied countries. This policy is to be carried out mainly through the following agencies: An agreement among the allied countries to withhold from enemy powers most-favored-nation treatment during the period of reconstruction and to provide compensatory outlets for such trade as may be injured by the refusal of most-favored-nation treatment to enemy powers; special arrangements intended to conserve for the allied countries during the period of reconstruction such natural resources as may be within their control; special treatment of enemy goods with a view to prevent dumping and other forms of unfair competition; steps to be taken by the Allies to render themselves independent of enemy countries in regard to raw materials and manufactured products essential to their industrial development. The resolutions adopted were mostly general in character and, according to a statement by the British Prime Minister in the House of Commons on June 22, 1916, were not to be binding on that legislative body.

One of the concrete results of the Economic Conference of the Allies was the appointment in July, 1916, of the Committee on Commercial and Industrial Policy, headed by Lord Balfour of Burleigh, to consider the recommendations of the Conference, with special reference to the following questions: (*a*) What industries are essential to the future safety of the Empire, and what steps should be taken to maintain or establish them. (*b*) What steps should be taken to recover home and foreign trade lost during the war and to secure new markets. (*c*) To what extent and by what means the resources of the Empire should and can be developed. (*d*) To what extent and by what means the sources of supply within the Empire can be prevented from falling under foreign control. It is rather significant that the first report of the committee, made in February, 1917, took the form of the following resolutions:

"1. In the light of experience gained during the war, we consider that special steps must be taken to stimulate the production of foodstuffs, raw materials, and manufactured articles within the Empire wherever the expansion of production is possible and economically desirable for the safety and welfare of the Empire as a whole. 2. We therefore recommend that His Majesty's Government should now declare their adherence to the principle that preference should be accorded to the products and manufactures of the British Overseas Dominions in respect of any customs duties now or hereafter to be imposed on imports into the United

EFFECT OF THE WAR ON TARIFF POLICIES—*Continued.*

Kingdom. 3. Further, It will in our opinion be necessary to take into early consideration, as one of the methods of achieving the above objects, the desirability of establishing a wider range of custom duties which would be remitted or reduced on the products and manufactures of the Empire, and which would form the basis of commercial treaties with allied and neutral powers."

TARIFF REFORM IN GREAT BRITAIN.

The resolution of the Committee on Commercial and Industrial Policy in favor of a "wider range of customs duties" for Great Britain is not the only indorsement of tariff reform in that country. In a report of a subcommittee of the Advisory Committee to the Board of Trade on Commercial Intelligence, appointed for the purpose of considering means for the protection of certain British industries established since the war, the following recommendation is made in regard to tariff protection:

"We are of the opinion that where the national supply of certain manufactured articles, which are of vital importance to the national safety, or are essential to other industries, has fallen into the hands of manufacturers and traders outside this country, British manufacturers ready to undertake the manufacture of such articles in this country should be afforded sufficient tariff protection to enable them to maintain such production after the war. With reference to the strongly expressed opinion of many of the witnesses that the enactment of protective duties on the industries other than those referred to in the preceding paragraph, which have formed the subject of our inquiry, is essential to their maintenance, we wish to report that in view of the following considerations—

"(*a*) That there exists a strong desire to respond to the feeling in our Dominions in favor of an Imperial preference in trade, and that there is also a strong desire to arrange preferential trading with those who are our allies in the present war, and (*b*) That the present high direct taxation tends to raise the rate of interest on money, and cheap and abundant capital for the employment of their labor is of the greatest importance to the working classes—it will be necessary to impose some widely spread import duties, and we are therefore prepared to recommend that a larger proportion of the revenue should be raised by reasonable import duties. We are of opinion that such import duties would go a long way toward satisfying the requests for special protective treatment for the industries which we have had under consideration."

A number of British organizations have expressed themselves emphatically in favor of tariff reform, particularly with a view to the protection of new industries and the extension of preferential relations with the British Dominions. The Association of Chambers of Commerce of the United Kingdom, at their meetings in 1916 and 1917, adopted resolutions in favor of reciprocal trading relations between all parts of the British Empire, the protection of newly established industries, favorable treatment of neutral countries, and restriction, by tariff or otherwise, of the trade relations with enemy countries. The report of the Special Committee on Trade During and After the War, adopted at a special meeting of the Council of the London Chamber of Commerce on May 25, 1916, contains definite suggestions for a triple tariff calculated to provide different tariff treatment for (1) British Empire countries, (2) present allies, (3) friendly neutrals, (4) other neutral countries, and (5) enemy countries. The Imperial War Conference, which met in London early in 1917, adopted a resolution to the effect that the time had arrived for making the Empire independent of other countries in respect to food supplies, raw materials, and essential industries, and expressed itself in favor of specially favorable treatment among the constituent parts of the Empire.

While it is too early to make any predictions as to the outcome of the agitation for tariff reform in Great Britain, it is not improbable that the war will result in an extension of the preferential relations between Great Britain and the British Dominions. In this connection it is worth pointing out that Australia has validated the tariff (in effect provisionally since December, 1914) providing for greatly increased preference in favor of Great Britain, while New Zealand has recently increased the rates of duty on the articles included in the textile schedule for the purpose of granting preference on those articles to the British Dominions.

Some of the other Allied countries are making preparations for tariff revision. Italy has denounced all commercial treaties providing for tariff reductions, and a recent report of the Italian Tariff Commission recommends the maximum and minimum system instead of the present general and conventional tariff system. In France, too, the parliamentary tariff committees have recommended the abrogation of existing commercial agreements, so as to give France full freedom of action in tariff matters. There seems to be a general assumption among economic and political writers in France that a change in the tariff system of the country will be necessitated by the political and economic changes resulting from the war.

AUSTRO-GERMAN CUSTOMS UNION.

Among the Central Powers the movement for closer economic relations is centred largely in the agitation for a customs union between Germany and Austria-Hungary, although most writers on the subject intimate the possibility of including the Balkan States and Turkey and, ultimately, some of the neutral countries of northern Europe. From a perusal of a portion of the voluminous literature on the subject, it would seem that both the German and the Austrian advocates of the union are fully cognizant of the difficulties to be overcome, but believe that the concessions and sacrifices to be made will be more than compensated for by the increased strength which will enable the Central European nations to meet the economic pressure of the Allied nations after the war. The political opposition, due to the large Slavic element in Austria-Hungary, seems to be regarded as the most formidable obstacle, but it is believed that it could be removed by diplomatic handling. The economic difficulties arising from the inferior development of Austria-Hungary along industrial lines is to be overcome by a temporary tariff between the two parts of the union, intended to enable the weaker country to withstand German competition during the transition period. It is pointed out that the cartel system could be utilized to limit the competition on the part of the stronger German industries and that the Austrian manufacturers of specialties requiring taste and special training have no reason to fear German competition. Opposition is expected from the large landowners of Hungary, owing to the fact that improvement in agricultural methods in that country, which is one of the benefits expected from the union, is to be brought about by agrarian reforms and the creation of small holdings. There are also some technical difficulties connected with the division of the revenue collected and the fiscal adjustments necessitated by the loss of revenue on account of tariff concessions.

The benefits to be derived from the union, it is claimed, are both economic and political. The economic advantages will consist in the broadening of the home market, which will make for greater specialization and increase in scale of production; the influx of German capital, which will have a stimulating effect on the economic life of Austria-Hungary; and the stronger position of the two countries in negotiating commercial treaties and resisting economic discrimination on the part of the Allied nations. The political advantages are regarded as so obvious that they are taken for granted, although it is generally emphasized that political autonomy is not to be affected by the union. While the question of including other countries in the alliance is left open, it is generally suggested that provisions be made for the purpose of facilitating the adherence of additional countries in the future.

AMERICAN PHILATELIC SOCIETY.

President—J. W. Scott, 30 East Forty-second Street, New York City, N. Y. *Vice-Presidents*—F. S. Parmelee, 210 First National Bank Building, Omaha, Neb.; H. A. Whipple, New York Life Building, Omaha, Neb.; Dr. W. P. Wherry, 603 Brandies Theatre Building, Omaha, Neb. *Secretary*—Dr. H. A. Davis, P.-O. Box 613, Denver, Colo. *Treasurer*—J. E. Scott, 238 Lincoln Avenue, Detroit, Mich. *International Secretary*—L. Harald Kjellstedt, 1026 Woodlawn Avenue, Scranton, Pa. *Directors-at-Large*—H. B. Phillips, Berkeley, Cal.; H. N. Mudge, Chicago, Ill.

NATIONAL HOME FOR DISABLED VOLUNTEER SOLDIERS.

MANAGERS.

Managers: *President*—General George H. Wood, Dayton, Ohio. *First Vice-President*—Captain John C. Nelson, Logansport, Ind. *Second Vice-President*—Major James W. Wadsworth, Geneseo, N. Y. *Secretary*—Hon. James S. Catherwood, Hoopeston, Ill. Colonel Henry H. Markham, Pasadena, Cal.; Hon. John W. West, Lewiston, Me.; Hon. George Black, Olathe, Kan.

OFFICERS OF THE BOARD OF MANAGERS.

Officers of the Board of Managers: *General Treasurer*—Colonel C. W. Wadsworth. *Assistant General Treasurer and Assistant Inspector-General*—Lieut.-Col. M. H. Spanier. *Inspector-General and Chief Surgeon*—Colonel James E. Miller. *Assistant Inspector-General*—Lieut.-Col. O. K. Marshall.

There are branches of the National Home at Dayton, Ohio; Milwaukee, Wis.; Togus, Me.; Hampton, Va.; Leavenworth, Kan.; Santa Monica, Cal.; Marion, Ind.; Danville, Ill.; Johnson City, Tenn., and Hot Springs, S. Dak. The aggregate number of members cared for is about 30,000.

REQUIREMENTS FOR ADMISSION.

1. An honorable discharge from the United States service during a war in which it was engaged.
2. Disability which prevents the applicant from earning his living by labor.
3. Applicants for admission will be required to stipulate and agree to abide by all the rules and regulations made by the Board of Managers, or by its order; to perform all duties required of them, and to obey all the lawful orders of the officers of the Home. Attention is called to the fact that by the law establishing the Home the members are made subject to the Rules and Articles of War, and will be governed thereby in the same manner as if they were in the Army of the United States.
4. A soldier or sailor must forward with his application for admission his Discharge Paper, and when he is a pensioner, his Pension Certificate, which papers will be retained at the branch to which the applicant is admitted, to be kept there for him, and returned to him when he is discharged. This rule is adopted to prevent the loss of such papers and certificates, and to hinder fraudulent practices; and no application will be considered unless these papers are sent with it. If the original discharge does not exist, a copy of discharge, certified by the War or Navy Department, or by the Adjutant-General of the State, must accompany the application.

UNITED STATES SOLDIERS' HOME FOR THE REGULAR ARMY.

The United States Soldiers' Home in the District of Columbia receives and maintains discharged soldiers of the *regular* army. All soldiers who have served twenty years as enlisted men in the army (including volunteer service, if any), or who have served in any war, and all soldiers of less than twenty years' service who have incurred such disability, by wounds, disease, or injuries *in the line of duty while in the regular army*, as unfits them for further service, are entitled to the benefits of the Home.

Pensions of inmates are drawn by the Treasurer of the Home and held in trust for the pensioner, to whom it is paid in such sums as the Governor of the Home deems proper while he is an inmate of the Home, the balance being paid in full when he takes his discharge and leaves the Home.

Inmates are subject to the Rules and Articles of War, the same as soldiers in the army. They are comfortably lodged, fed, and clothed, and receive medical attendance and medicine, all without cost to them. There are 1,453 men now receiving the benefits of the Home.

Applications for admission to the Home may be addressed to the "Board of Commissioners, U. S. Soldiers Home, War Department, Washington, D. C.," and must give date of enlistment and date of discharge, with letter of company and number of regiment for each and every term of service, and rate of pension, if any, and must be accompanied by a medical certificate showing nature and degree of disability if any exists.

CONFEDERATE SOLDIERS' HOMES.

Atlanta, Ga.; Austin, Tex.; Beauvoir, Miss.; Columbia, S. C.; Hermitage, Tenn.; Higginsville, Mo.; Jacksonville, Fla.; Little Rock, Ark.; Mountain Creek, Ala.; New Orleans, La.; Pewee Valley, Ky.; Pikesville, Md.; Raleigh, N. C.; Richmond, Va.; Washington, D. C.

SOCIETY OF THE ARMY AND NAVY OF THE CONFEDERATE STATES.

President—Lieut. McHenry Howard. *Vice-President*—Lieut. Joseph Packard. *Secretary*—Capt. William L. Ritter, Reisterstown, Md. *Treasurer*—Capt. F. M. Colston. There are twelve Vice-Presidents and an Executive Committee of seven members. The Society of the Army and Navy of the Confederate States in the State of Maryland was organized in 1871 "to collect and preserve the material for a truthful history of the late war between the Confederate States and the United States of America; to honor the memory of our comrades who have fallen; to cherish the ties of friendship among those who survive, and to fulfil the duties of sacred charity toward those who may stand in need of them." The membership is 760.

CATHOLIC BENEVOLENT LEGION.

President—Richard B. Tippett, Baltimore, Md. *Treasurer*—Gottfred J. Reebhausen, 186 Remsen Street, Brooklyn, N. Y. *Secretary*—John E. Dunn, 186 Remsen Street, Brooklyn, N. Y. *Medical Examiner-in-Chief*—Franklin J. Keller, M. D., Totowa and Sherman Avenues, Paterson, N. J.

Organized September 5, 1889. Paid in death claims, $25,000,000. Disability, $403,750.

FEDERAL TRADE COMMISSION.

(Headquarters, 921 Fifteenth Street, Washington, D. C.)

Chairman—William J. Harris. Joseph E. Davies, William B. Colver, John Franklin Fort, Victor Murdock. *Secretary*—Leonidas L. Bracken.

The Federal Trade Commission is composed of five Commissioners appointed by the President. Not more than three of the Commissioners can be members of the same political party. The first Commissioners appointed continue in office for terms of three, four, five, six, and seven years respectively, the term of each to be designated by the President, but their successors will be appointed for terms of seven years, except that any person chosen to fill a vacancy shall be appointed only for the unexpired term of the Commissioner whom he shall succeed, and no Commissioner shall engage in any other business, vocation, or employment. A vacancy in the commission does not impair the right of the remaining Commissioners to exercise all the powers of the commission. The Commissioners receive a salary of $10,000 a year, and the Secretary $5,000.

The principal office of the commission is in Washington, but it may meet and exercise all its powers at any other place. The commission may, by one or more of its members, or by such examiners as it may designate, prosecute any inquiry necessary to its duties in any part of the United States.

SEC. 5 provides: That unfair methods of competition in commerce are declared unlawful. The commission is empowered and directed to prevent persons, partnerships, or corporations, except banks, and common carriers subject to the acts to regulate commerce, from using unfair methods of competition in commerce.

Whenever the commission shall have reason to believe that any such person, partnership, or corporation has been or is using any unfair method of competition in commerce, and if it shall appear to the commission that a proceeding by it in respect thereof would be to the interest of the public, it shall issue and serve upon such person, partnership, or corporation a complaint stating its charges in that respect, and containing a notice of a hearing upon a day and at a place therein fixed at least thirty days after the service of said complaint. The person, partnership, or corporation so complained of shall have the right to appear at the place and time so fixed and show cause why an order should not be entered by the commission requiring such person, partnership, or corporation to cease and desist from the violation of the law so charged in said complaint. Any person, partnership, or corporation may make application, and upon good cause shown may be allowed by the commission to intervene and appear in said proceeding by counsel or in person. The testimony in any such proceeding shall be reduced to writing and filed in the office of the commission. If upon such hearing the commission shall be of the opinion that the method of competition in question is prohibited by this act, it shall make a report in writing in which it shall state its findings as to the facts, and shall issue and cause to be served on such person, partnership, or corporation an order requiring such person, partnership, or corporation to cease and desist from using such method of competition. Until a transcript of the record in such hearing shall have been filed in a Circuit Court of Appeals of the United States, as hereinafter provided, the commission may at any time, upon such notice and in such manner as it shall deem proper, modify or set aside, in whole or in part, any report or any order made or issued by it under this section.

If such person, partnership, or corporation fails or neglects to obey such order of the commission while the same is in effect, the commission may apply to the Circuit Court of Appeals of the United States, within any circuit where the method of competition in question was used, or where such person, partnership, or corporation resides or carries on business, for the enforcement of its order, and shall certify and file with its application a transcript of the entire record in the proceeding, including all the testimony taken and the report and order of the commission. Upon such filing of the application and transcript the court shall cause notice thereof to be served upon such person, partnership, or corporation and thereupon shall have jurisdiction of the proceeding and of the question determined therein, and shall have power to make and enter upon the pleadings, testimony, and proceedings set forth in such transcript a decree affirming, modifying, or setting aside the order of the commission. The findings of the commission as to the facts, if supported by testimony, shall be conclusive.

SEC. 6 provides: Broad powers to compile information concerning, and to investigate the business and practices of, corporations engaged in interstate commerce, and to require, by its order, sworn reports from them on their own business and their relation to other corporations; to classify corporations; to investigate and report on violations of the anti-trust acts; to investigate trade conditions in and with foreign countries, and report to Congress thereon, with advisable recommendations.

SEC. 11. Nothing in this act, approved September 26, 1914, shall be construed to prevent or interfere with the enforcement of the provisions of the anti-trust acts or the acts to regulate commerce, nor shall anything contained in the act be construed to alter, modify, or repeal the said anti-trust acts or the acts to regulate commerce or any part or parts thereof.

The commission is authorized to enforce compliance with sections 2, 3, 7, and 8 of the act approved October 15, 1914 (the Clayton act, as printed in vol. 1915 of THE WORLD ALMANAC), by persons and corporations respectively subject thereto, except common carriers and banks.

NEWSPRINT PAPER INVESTIGATION.

(A Statement of the ALMANAC by the Federal Trade Commission.)

During the past year the commission made an investigation of the newsprint paper industry pursuant to a resolution of the Senate introduced by Senator Owen of Oklahoma. (S. Res. 177, 64th Cong. 1st Sess. adopted Apr. 24, 1916.) A preliminary report was submitted to the Senate on March 3, 1917, and a final report on June 13, 1917. The investigation disclosed that prices of newsprint paper had been advanced more rapidly than was justified, either by the cost of manufacture or by conditions of supply and demand. Considerable evidence was obtained tending to show that the enhancement of prices was due in part at least, it was alleged, to the activities of the Newsprint Manufacturers Association which included in its membership almost all of the producers on the North American Continent. This evidence was submitted to the Department of Justice and resulted in indictments being handed down against certain newsprint manufacturers by the Federal Grand Jury for the southern district of New York.

In connection with this investigation the commission endeavored to bring about a reduction of prices through the voluntary co-operation of the parties interested, but was unsuccessful. It also distributed a large tonnage of paper to publishers needing assistance. In its final report the commission recommended the enactment of legislation providing for government supervision of the production and distribution of print paper during the continuance of the war as a war measure.

BOOK PAPER INVESTIGATION.

The commission's investigation of the book paper industry was made pursuant to a resolution of the Senate introduced by Senator Fletcher of Florida. (S. Res. 269, 64th Cong. 1st Sess. adopted Sept. 7th, 1916.) A preliminary report was submitted to the Senate June 3, 1917, and a final report on October 21, 1917. The investigation disclosed an advance in the prices of book paper beyond what the cost of production or conditions of supply and demand justified, it was alleged, and that this advance in price was aided by the activities of the Bureau of Statistics, which included in its membership twenty-three important book paper manufacturers. The commission instituted proceedings against the members of this bureau alleging that certain practices were unfair methods of competition in violation of Section 5 of the Federal Trade Commission act. As a result of this proceeding the Bureau of Statistics disbanded.

FEDERAL TRADE COMMISSION—*Continued.*

COAL INVESTIGATION.

Also in 1917, an investigation of the coal industry was conducted by the commission (1) as to anthracite coal in answer to Senator Hitchcock's resolution, adopted June 22, 1916 (S. Res. 217, 64th Cong., 1st Sess.), and pursuant to Senator Calder's resolution, adopted April 30, 1917 (S. Res. 51, 65th Cong., 1st Sess.), (2) relative to the bituminous coal-mining industry, in response to Representative Rainey's resolution, agreed to by the House of Representatives Aug. 18th, 1916 (H. Res. 352, 64th Cong. 1st Sess.). On May 4 the commission transmitted an interim report on anthracite prices to the Senate in response to the Hitchcock resolution, which inquired regarding price increases of leading producers of anthracite and whether or not wage increases in May, 1916, justified the subsequent price increases. The commission reported that the increase in prices, as measured by a comparison of the average sales receipts, was not justified by the increase in costs and that the increase in labor cost alone did not justify the price increases.

In part answer to Senator Calder's resolution the commission presented information to the Senate on (1) The present conditions in the anthracite industry and the outlook for anthracite; (2) The panic conditions and prices in the anthracite trade during the fall and winter of 1916–1917; (3) The cost of production by the larger companies and certain of the smaller companies in 1916; (4) The impossibility of solving the anthracite problem without action by Congress that will at the same time cure the present evil conditions in the bituminous industry and in transportation; (5) Anthracite royalties. In a more detailed report on anthracite and bituminous coal, transmitted to the Senate on June 19, 1917 (Senate Doc. No. 70) the following recommendations were embodied:

(1) That the production and distribution of coal and coke be conducted through a pool in the hands of a Government agency; that the producers of various grades of fuel be paid their full cost of production plus a uniform profit per ton (with due allowance for quality of product and efficiency of service).

(2) That the transportation agencies of the United States, both rail and water, be similarly pooled and operated on Government account, under the direction of the President, and that all such means of transportation be operated as a unit, the owning corporations being paid a just and fair compensation which would cover normal net profit, upkeep and betterments. One Commissioner dissented from the second recommendation.

BITUMINOUS COAL INDUSTRY.

In the course of the commission's investigation, under the Rainey resolution, into the production and distribution of bituminous coal, an alarming situation suddenly developed involving extraordinary high prices and difficulty in obtaining supplies. The commission immediately directed special attention to the causes of this disturbance, and on May 19, 1917, transmitted a preliminary report on the results of its inquiry to the House (House Document No. 152, 65th Cong., 1st Sess.). It was pointed out that the underlying causes of the abnormal bituminous coal situation were as follows, viz.: Increased demand for coal, shifting markets, inadequate transportation facilities, labor conditions, increased costs of production and distribution, lack of sufficient storage facilities, and speculative activities of some mine operators and brokers.

ANTHRACITE COAL PRODUCTION IN PAST FOUR YEARS.

(Compiled by the Anthracite Bureau of Information, Wilkes-Barre, Pa.)

LICENSE RULES OF FEDERAL TRADE COMMISSION.

Applicants for licenses must submit, in the English language (in exceptional cases and for good cause shown, applications and other communications may be submitted in German, but only when accompanied by a verified English translation) to the Federal Trade Commission every application for letters patent, for the registration of trade-mark, print, label, or copyright which they desire to file in the country of an enemy or ally of enemy, every amendment, power of attorney, letter, or communication with respect thereto, and every drawing, electro, or other cut or reproduction, specimen, facsimile, copy, or model, together with any check, draft, or other form of remittance for any tax, annuity, or fee, and agents' or attorneys' fees or compensation proposed to be sent, directly or indirectly, to any country of an enemy or ally of an enemy.

In case of chemical compounds or compositions of matter there shall also be submitted samples of the article or preparation, or samples of the ingredients, if any; and in the case of coloring matters prepared from tar, a sample of the dyeing of wool, silk, or cotton, and any statement, description, and directions in respect thereto, if and as required by the foreign law, and any and all other samples, specimens, descriptions, statements, and directions proposed to be forwarded. There shall also be submitted at the same time, the envelope or other cover, stamped with sufficient postage and addressed, in which the matters herein mentioned are proposed to be forwarded. The intention is to have submitted to the Federal Trade Commission every inclosure and cover concerning every application for patent, trade-mark, print, label, or copyright, and their prosecution, desired to be forwarded, directly or indirectly, to an enemy country or to the country of an ally of an enemy.

Everything (except remittance) is required to be furnished to the Federal Trade Commission in duplicate. One copy will be retained in the files of the commission. Each application for a license shall be accompanied by the affidavit of the applicant, his solicitor, or patent agent that nothing contained in any of the material submitted will give any information detrimental to the public safety or defense or which may assist the enemy or endanger the successful prosecution of the war, and that the amount of money, if any, proposed to be transmitted is the correct tax, annuity, or fee and the customary agents' fee, and such affidavit shall also state what portion of the remittance is to be applied to taxes, fees, or annuities and what portion to agents' fees. It is unlawful and punishable by fine and imprisonment for anyone without first obtaining a license to forward applications for letters patent or for the registration of trade-mark, print, label, or copyright in an enemy or ally of enemy nation indirectly through correspondence or agents in any foreign country.

PITT'S SUBSIDIES IN THE NAPOLEONIC WARS.

(From the New York *Evening Post.*)

There have been many notable historical parallels in this war, which brought suddenly into the practical consideration of the Twentieth Century actions, policies, and expedients which we had read about in the history of wars in bygone epochs, but had thought of as incidents forever dismissed from history. But not every one is aware how curiously history has repeated itself in a very different direction—in the $4,500,000,000 or so advanced to her continental allies by England since the war began, and in the $3,000,000,000 appropriated for the purpose by our Government last month. These are a very interesting reminder. Probably Germany has talked about them with the same mixture of consternation and bewilderment as the people of Paris showed, a little over a century ago, when they discussed "Pitt's subsidies." At the end of the eighteenth century, in the Napoleonic wars, the armies of the allies arrayed against Bonaparte had suffered defeat after defeat. They were discouraged; internal dissensions broke out. It was desperately necessary for England to keep the allies in line. The British navy was efficient; victory had followed victory on the sea. But the British armies were small, mismanaged, disorganized; they had not yet won a victory; they were of negligible help to England's allies. In order to keep the coalition going, England would have to give more aid. England was rich. Her financial position was stronger than that of her enemy or of any of her allies. William Pitt was Prime Minister, and he decided to grant to the allies financial aid.

The aid was in two forms; outright gifts, and the guarantee of loans; most of it went to impecunious German kings and princes. The records of the Exchequer show that during Pitt's Governments, from 1793 to 1805, actual gifts were granted to Hanover, Hesse Cassel, Sardinia, Prussian, Hesse Darmstadt, Baden, Brunswick, Portugal, Prince of Orange, Russia, Germany, the German Princes, Bavaria, and Sweden. The initial money grants were in the form of gifts. The first of "Pitt's subsidies" was one of almost two and a half million dollars to Hanover, in 1793. Then followed a series of subsidies from time to time to the various states or potentates opposed to Napoleon, to the German and Austrian kingdoms, to Russia, to Portugal, to Sweden. A sum equivalent to six million dollars was given to Prussia in 1794; four million went to Russia in 1799; more than five million went to Germany in 1800; and by 1805, more than $45,000,000 had been given away. The circumstances surrounding some of these gifts are very interesting. As the war continued, the military superiority of France increased. In April, 1795, Prussia came to terms; in June, Sweden; in July, Spain. The Court of Vienna continued its readiness to receive subsidies from England, but in other respects showed little activity. Windham, the British War Minister at the time, built his greatest hopes on an expedition of French aristocrats and malcontents to Quiberon Bay, but this force, sumptuously provided with money and munitions of war, and supported by a powerful fleet, was almost annihilated as soon as it landed.

In 1796 a general election increased Pitt's majority. While it was proceeding, he sent on his own responsibility a subsidy of $6,000,000 to Austria. The act was fiercely criticised by the Opposition, and only condoned by the House of Commons on the express stipulation that it should not be considered a precedent. In April, 1797, Austria, England's last ally, laid down her arms and concluded a preliminary treaty of peace. England's two adventures in guaranteeing loans, somewhat similar to the present method of financial aid by our Government, were unhappy. Under an act passed in May, 1795, to give effect to a convention between Great Britain and the potentate at Vienna, who was then styled Emperor of Germany, was provision for a loan for $23,000,000, to be raised by the Emperor. In consideration of the maintenance by Austria of 200,000 troops in the war against France, it was stipulated that Great Britain should guarantee the interest on this loan. After the first two years, however, Austria was unable to provide the money, and, on various more or less plausible pretexts, repudiated the contract. The burden fell on the British Exchequer. At a similar convention, concluded in May 1797, a loan of $8,000,000 was arranged and guaranteed on the same conditions. But the charge again fell entirely on the British Exchequer, as Austria was unable to pay anything.

Pitt died in 1806, but his policy of subsidies continued. As late in the Napoleonic wars as March, 1814, while futile arrangements for an armistice were undertaken by the allies, the representatives of Great Britain, Russia, Austria, and Prussia bound themselves at Chaumont, not to treat singly with France for peace, but to continue the war until France was brought back to her old frontiers, and the complete independence of Germany, Holland, Switzerland, and Spain secured. Each of the four powers was to maintain 150,000 men in the field; and Britain agreed to aid her allies with equal yearly subsidies, amounting in all to $25,000,000 for the year 1814. The English representative at this conference was Viscount Castlereagh, but for whose determination (and promises of financial help) it was believed that the alliance against Napoleon might have broken up. He adopted a firm tone. He pressed upon the Austrians the vigorous continuance of the war. He resisted the Russian demands for more money. It had been at Castlereagh's instance that, in 1813, the British Government raised its subsidies to foreign powers for 1813 to $50,000,000, though the year's expenditures reached $585,000,000. While the increase in the British debt from February, 1793, to March, 1801, was $1,626,000,000, less than $45,000,000 was given in this period as subsidies.

NEW WAR PASSPORT REGULATIONS.

(Supplementary to the regular passport rules, on Page 129.)

THE new Selective Service Regulations concerning passports, put in effect November 20, 1917, says in part: "The State Department issues passports to persons subject to draft only when the application is accompanied by a permit of the Provost Marshal General to leave the country. No passport is required by the State Department to go to Canada, but persons subject to draft who desire to cross the line are often subjected to delay while their cases are being investigated. When any registered person desires a passport or to go to Canada, he may apply to his local board for a permit. The local board shall consider the application, and if the person is not likely to be called within the period of the proposed absence, or if the board is otherwise assured that favorable action will not result in evasion of or interference with the execution of the law, the local board shall take from the applicant a statement of his address while absent, and an engagement to keep himself informed of any call that may be made upon him and to return immediately upon call. Thereupon the local board may issue the permit.

"The forms for this application and permit will be found in Sections 299 and 300, but no printed forms will be furnished. If the applicant is so far distant from his own local board that it would work hardship for him to apply thereto for a permit, he may apply to the nearest local board to investigate his case and at the registrant's expense to telegraph or write to the registrant's local board for authority to issue the permit with a recommendation as to the advisability of issuing it. Upon receipt of such authority the local board to which the registrant applies may issue the permit."

In a joint statement regarding the new war passport regulations, the Secretaries of State and Labor, said: "A rigid control is now exercised over all persons coming to the United States. This has been found necessary in order to prevent, as far as possible, enemy agents and persons inimical to the United States from securing admission to this country. To make this control effective, a joint order has been issued by the Secretaries of State and of Labor requiring passports and certain information from aliens who propose to come to the United States from foreign countries. The Department of State also requires every American citizen to bear a valid passport. Passports of Americans must be verified by an American consular officer in the country from which the bearer starts for the United States, as well as in the country from which he sails for this country.

"Passports are not required from persons, whether American or alien, who leave Canada, Newfoundland, or Bermuda for the United States. Americans coming to the United States from Mexico are required to have their passports verified by the American Consul stationed in the district from which they leave for this country. Aliens must have their passports viséed by the American consular officer stationed in that part of the country from which they start for the United States. Special temporary arrangements are being made for persons on the Mexican border. If an alien starts for the United States from a country which is not that to which he owes allegiance, his passport must be viséed by a diplomatic or consular officer of his own country before being presented to visé to an American consular officer.

"In order that the United States Government may have a full history of the alien who desires to come to the United States, he is required to make a formal declaration before an American Consul in the country from which he begins his journey which states his full name, the name of the country of which he is a citizen or subject, the number and date of his passport, together with the name of the office which issued it. If wife or children accompany the alien, their full names, places, and dates of births must be included in the declaration. However, sons over sixteen and daughters over twenty-one are required to bear separate passports and make separate declarations. The alien must give the place and date of his birth, must state the citizenship and race of his father and mother, and furnish the place, address, and date of his last residence. He is also required to state the names of other countries in which he has resided or which he has visited in the past five years.

MUST FURNISH REFERENCES.

"If he has previously resided in the United States, the dates, addresses, and objects of his residences in this country must also be included in the declaration. The name of the steamship, the port from which it sails, and the date of its sailing must also be stated. In addition, he is required to furnish references with addresses of persons both in the country from which he starts on his journey and in the United States. Full information as to the object of his proposed visit to the United States, together with proofs of that object, the place and address where he intends to live, and the period of his proposed sojourn are required in the declaration. Consular officers are also required to inform prospective immigrants of the provisions of the new Immigration Act, which prohibits the entrance into the United States of certain classes of persons, so that those who would be liable to exclusion on arrival may be informed of that possibility in advance and be saved from the unnecessary journey and the inconveniences and hardships that would follow their exclusion. Consular officers are not, however, authorized to refuse to visé passports of prospective immigrants unless there are other reasons to justify such a refusal other than their liability to exclusion under the immigration act.

"No fee shall be collected by diplomatic or consular officers of the United States for or in connection with the execution of such declaration or the viséing of passports. No American embassy, legation, or consulate shall visé a passport of an alien enemy of the United States to enable him to enter this country unless special authorization of this Government has been previously obtained.

"In order to prevent or avoid so far as possible the hardships and dangers involved in deportation under present conditions, a diplomatic or consular officer to whom a passport is presented for visé shall ascertain to the fullest extent practicable whether the holder is a member of any one of the classes excluded from the United States by the provisions of Section 8 of the Immigration Act of February 5, 1917, and if in the judgment of such official the alien is a member of any such excluded class he shall so advise the alien, informing him of the serious risk he is taking in attempting to enter the United States, and, if the alien nevertheless insists on proceeding, shall visé the passport if it is valid, but shall place upon the alien's declaration the notation: 'Advised that he will probably be rejected and deported.'

"Aliens 'likely to become a public charge,' from whatsoever cause such likelihood may arise, are excluded by Section 3 of the Immigration Act. (S. Rep. No. 352, 64th Cong., 1st sess.) Unless, during the present state of war, aliens applying for admission present evidence by which their identity and nationality are positively proved, such aliens, if they enter the United States, are liable to be taken into custody as enemies and thereby become public charges. Therefore, immigration officials will exclude from the United States any alien who may apply for admission and not be in possession of a passport or other official document establishing his identity and nationality, viséed in the manner specified in this order, and will cause such alien to be returned to the country whence he came, at the expense of the transportation company involved: Provided, however, That such exclusion shall not be made in the cases of alien seamen arriving in ports of the United States, unless such seamen apply for permanent admission to this country, or unless it is necessary to require such papers in order to ascertain whether alien seamen are enemies of the United States; nor in the cases of aliens entering temporarily from contiguous foreign territory to follow agricultural pursuits, in accordance with the terms of Department of Labor circular of May 23, 1917, and the supplements thereto.

"Alien seamen not provided with passports or other official documents showing their identity and nationality may be detained until they receive passports from the consular representatives of the countries whose nationality they claim.

FEDERAL PROSECUTIONS IN NEW YORK CITY UNDER THE SELECTIVE DRAFT AND ESPIONAGE ACTS.

(Data furnished by United States Attorney Francis Gordon Caffey's office.)

THIS is a summary of the principal cases only. The Federal prosecutors in the cases were John C. Knox and Harold A. Content.

(1) Owen Cattell, Eleanor W. Parker, and Charles F. Phillips, charged with conspiring to aid, abet counsel and induce persons of conscriptable age wilfully not to register. (Sections 37 and 332, United States Criminal Code, and Section 5 of the Act of May 18, 1917.) Trial, June 18, 19, 20 and 21, 1917. Eleanor W. Parker acquitted by direction of Court June 20, 1917; Cattell and Phillips found guilty June 21, 1917; July 12th Cattell and Phillips each sentenced to pay a fine of $500 and to serve one day in the City Prison. Phillips sentenced on July 12th to serve an additional five days in the City Prison upon an indictment to which he pleaded guilty on June 6, 1917, charging him with wilfully having failed to register (Section 5 of the Act of May 18, 1917).

(2) Louis Kramer, Joseph Walker, Louis Sternberg and Morris Becker, charged with conspiring to aid, abet, counsel and induce persons of conscriptable age wilfully to fail to register. (Sections 37 and 332 United States Criminal Code and Section 5 of the Act of May 18, 1917.) Trial, June 11 and 12, 1917. Louis Sternberg acquitted by direction of the Court June 12, 1917; Joseph Walker found not guilty June 12, 1917; Louis Kramer and Morris Becker found guilty June 12, 1917. Louis Kramer sentenced June 13, 1917, to serve two years in the United States Penitentiary at Atlanta, Ga., and to pay a fine of $10,000; Morris Becker sentenced June 13, 1917, to serve one year and eight months in the United States Penitentiary at Atlanta, Ga. Louis Kramer was again tried on June 13, 1917, for having wilfully failed to register. (Section 5, Act of May 18, 1917.) He was sentenced to serve one year in the Mercer County Jail at Trenton, N. J.; the sentence on that indictment to be served after his sentence in the United States Penitentiary at Atlanta, Ga.

(3) Emma Goldman and Alexander Berkman, charged with conspiring to aid, abet, counsel and induce persons of conscriptable age wilfully to fail to register. (Sections 37 and 332, United Stated Criminal Code and Section 5 of Act of May 18, 1917.) Trial, June 27, 28, 29, July 2, 3, 5, 6, 9, 1917. July 9th both defendants found guilty; Alexander Berkman sentenced to serve two years in the United States Penitentiary at Atlanta, Ga., and to pay a fine of $10,000, and Emma Goldman sentenced to serve two years in the Missouri State Penitentiary at Jefferson City, Mo., and to pay a fine of $10,000.

(4) Louis C. Fraina and Edward Ralph Cheney, charged with conspiring to induce persons subject to draft to fail to perform duties required of them in the execution of the Selective Draft Law. (Sections 37 and 332, United States Criminal Code and Section 6, Act of May 18, 1917.) Trial, October 15, 16, 17 and 18, 1917. Both defendants found guilty October 18, 1917. On October 22nd, each of the defendants sentenced to serve thirty days in the Mercer County Jail at Trenton, N. J.

(5) Louis J. Cherey, Samuel J. R. Bernfeld and Kalman Gruher, charged with conspiring to unlawfully exempt persons subject to the draft under the Selective Draft Act. (Section 37, United States Criminal Code and Section 6, Act of May 18, 1917.) Cherey and Bernfeld pleaded guilty on August 20, 1917. Gruher was tried August 20 and 21, 1917. Cherey and Bernfeld were sentenced on August 20, 1917, and Gruher was sentenced August 21, 1917, to serve two years each in the United States Penitentiary at Atlanta, Ga.

(6) Paul Rubin, offering bribe to Chairman of Local Board. (Section 131, United States Criminal Code.) Pleaded guilty September 27, 1917. Sentenced September 28th to serve one year in New York State Reformatory at Elmira, N. Y.

(7) Lyman A. Irish, Howard L. Coombs, and Margaret L. Cooke, charged with conspiring to make false statements to Local Board and to aid evasion of the Selective Draft Law. (Section 37, United States Criminal Code, and Section 6, Act of May 18, 1917.) Defendants pleaded guilty October 1, 1917. October 4, 1917, Irish sentenced to thirty days in City Prison; Mrs. Cooke thirty days in City Prison, and Coombs ten days in City Prison.

WHAT CONSTITUTES SEDITIOUS PUBLICATION.

THE Postmaster-General, by order of the President, announces that under the war acts and the Constitution it is unlawful for any person, firm, corporation, or association, to mail, or to transport, or carry, or otherwise publish or distribute during the present war any printed or other matter—

(1) Advocating or urging treason, insurrection, or forcible resistence to any law of the United States.

(2) Any matter conveying false reports or false statements intended to interfere with the operation or success of the military or naval forces of the United States, or to promote the success of its enemies.

(3) Any matter intended to cause insubordination, disloyalty, mutiny, or refusal of duty in the military or naval forces of the United States.

(4) Any matter intended to obstruct the recruiting or enlistment service of the United States, to the injury of the service of the United States.

(5) Any matter, the circulation or publication of which involves the violation of any of the numerous other criminal provisions of the espionage act, but which are not of special interest to publishers.

TRANSLATIONS OF ARTICLES.

(6) Any matter printed in a foreign language containing any news item, editorial, or other printed matter respecting the Government of the United States, or of any nation engaged in the present war, its policies, international relations, the state or conduct of war, or any matter relating thereto, unless the publisher or distributor thereof, on or before offering the same for mailing, or in any manner distributing it to the public, has filed with the postmaster at the place of publication, in the form of an affidavit, a true and complete translation of the entire article, containing such matter proposed to be published, and has caused to be printed on each copy thereof, in plain type in the English language, at the head of such item, editorial, or other matter, the words, "True translation filed with postmaster at ———, on ——— (the name of the post-office where the translation was filed, and the date of filing thereof), as required by Section 19 of the act of October 6, 1917."

(7) Any matter referred to in the preceding paragraph for which publishers have been granted a permit to circulate, free of restrictions named therein, but which does not bear at the head thereof in plain type in the English language the words:

Published and distributed under permit No. — (here giving the number of the permit), authorized by the act of October 6, 1917, on file at the post-office of ——— (here giving the name of the office of publication).

AMERICAN RED STAR ANIMAL RELIEF.

Organized June, 1916, and conducted under the auspices of the American Humane Association. The American Red Star Animal Relief was organized on the invitation of the United States War Department to do work for the animals in the army similar to that performed by the American Red Cross for human beings. Headquarters, 287 State Street, Albany, N. Y. *Director General*—William O. Stillman, M. D. *Corresponding Secretary*—L. Eveleth Powers.

THE SECOND CALL TO THE COLORS.

THE second summons to service under the Selective Conscription Act of May 18, 1917, was issued by President Wilson in November, and applied to those not drafted by the first call, in June, which took over 600,000 of the ten million men who registered June 5.

In his call to the second quota of registrants the President said: "The task of selecting and mobilizing the first contingent of the National Army is nearing completion. The expedition and accuracy of its accomplishment were a most gratifying demonstration of the efficiency of our democratic institutions. The swiftness with which the machinery for its execution had to be assembled, however, left room for adjustment and improvement. New regulations putting these improvements into effect are, therefore, being published to-day. There is no change in the essential obligation of men subject to selection. The first draft must stand unaffected by the provisions of the new regulations. They can be given no retroactive effect. The time has come for a more perfect organization of our man power. The selective principle must be carried to its logical conclusion. We must make a complete inventory of the qualifications of all registrants, in order to determine, as to each man not already selected for duty with the colors, the place in the military, industrial, or agricultural ranks of the nation in which his experience and training can best be made to serve the common good. This project involves an inquiry by the selective boards into the domestic, industrial, and educational qualifications of nearly ten million men.

"Members of these boards have rendered a conspicuous service. The work was done without regard to personal convenience and under a pressure of immediate necessity which imposed great sacrifices. Yet the services of men trained by the experience of the first draft must of necessity be retained and the selection boards must provide the directing mechanism for the new classification. The thing they have done is of scarcely one-tenth the magnitude of the thing that remains to be done. It is of great importance both to our military and to our economic interests that the classification be carried swiftly and accurately to a conclusion. An estimate of the time necessary for the work leads to the conclusion that it can be accomplished in sixty days; but only if this great marshaling of our resources of men is regarded by all as a national war undertaking of such significance as to challenge the attention and compel the assistance of every American. I call upon all citizens, therefore, to assist local and district boards by proffering such service and such material conveniences as they can offer and by appearing before the boards, either upon summons or upon their own initiative, to give such information as will be useful in classifying registrants.

"I urge men of the legal profession to offer themselves as associate members of the legal advisory boards to be provided in each community for the purpose of advising registrants of their rights and obligations and of assisting them in the preparation of their answers to the questions which all men subject to draft are required to submit. I ask the doctors of the country to identify themselves with the medical advisory boards which are to be constituted in the various districts throughout the United States for the purpose of making a systematic physical examination of the registrants. It is important also that police officials of every grade and class should be informed of their duty under the selective service law and regulations, to search for persons who do not respond promptly and to serve the summons of local and district boards. Newspapers can be of very great assistance in giving wide publicity to the requirements of the law and regulations and to the numbers and names of those who are called to present themselves to their local boards from day to day."

DRAFT CLASSES AND ORDER IN WHICH SELECTIVES GO.

The Provost Marshal General has authorized the following classification of selectives into five groups, indicating the order in which they will be called to service:

CLASS I.

1. Single men without dependent relatives.
2. Married man (or widower) with children, who habitually fails to support his family.
3. Married man dependent on wife for support.
4. Married man (or widower) with children, not usefully engaged; family supported by income.
5. Men not included in any other description in this or other classes.
6. Unskilled laborer.

CLASS II.

1. Married man or father of motherless children, usefully engaged, but family has sufficient income to afford support during his absence.
2. Married man, no children; wife can support herself decently and without hardship.
3. Skilled farm laborer engaged in necessary industrial enterprise.
4. Skilled industrial laborer engaged in necessary agricultural enterprise.

CLASS III.

1. Man with foster children dependent on daily labor for support.
2. Man with aged, infirm, or invalid parents or grandparents dependent on daily labor for support.
3. Man with brothers or sisters incompetent to support themselves, dependent on daily labor.
4. County or municipal officer.
5. Firemen or policemen.
6. Necessary artificers or workmen in arsenals, armories, and navy yards.
7. Necessary custom house clerk.
8. Persons necessary in transmission of mails.
9. Necessary employés in service of United States.
10. Highly specialized administrative experts.
11. Technical or mechanical experts in industrial enterprise.
12. Highly specialized agricultural expert in agricultural bureau of State or Nation.
13. Assistant or associate manager of necessary industal enterprise.
14. Assistant or associate manager of necessary agricultural enterprise.

CLASS IV.

1. Married man with wife (and) or children (or widower with children) dependent on daily labor.
2. Mariners in sea service of merchants or citizens in United States.
3. Heads of necessary industrial enterprises.
4. Heads of necessary agricultural enterprises.

CLASS V.

1. Officers of States or the United States.
2. Regularly or duly ordained ministers.
3. Students of divinity, or who were such on May 18, 1917.
4. Persons in military or naval service.
5. Aliens.
6. Alien enemies.
7. Persons morally unfit.
8. Persons physically, permanently, or mentally unfit.
9. Licensed pilots.
10. Member of well-recognized religious organization on May 18, 1917, whose creed forbids its members to participate in war, and whose convictions are against war.

WAR SERVICE COMMISSIONS OF THE CHURCHES.

(Made Public by the Government.)

AMERICAN Christian Convention, War-Work Committee—Rev. F. G. Coffin, D. D., 126 Chestnut Street, Albany, N. Y.; Rev. J. F. Burnett, D. D., C. P. A. Building, Dayton, Ohio; Hermon Eldredge, Erie, Pa.

Baptists, North, War Commission of the Northern Baptist Convention, office, 903 Real Estate Trust Building, Washington, D. C.—George W. Coleman, Chairman, 220 Devonshire Street, Boston; Rev Howard B. Grose, D. D., Vice-Chairman, care United States Food Administration Commission, Washington, D. C.; Rev. Samuel Z. Batten, D. D., Secretary, 903 Real Estate Trust Building, Washington, D. C.; Ernest S. Butler, Treasurer, Ford Building, Boston. Executive Staff—Rev. Samuel Z. Batten, D. D., Rev. Herbert F. Stilwell, D. D., Ernest S. Butler, Charles A. McAlpine, Rev. Howard B. Grose, D. D.

Baptists, South, Home Mission Board of the Southern Baptist Convention.—Rev. B. D. Gray, D. D., Corresponding Secretary, 1004 Healey Building, Atlanta, Ga.; Rev. George Green, Director of Camp Activities, 1004 Healey Building, Atlanta, Ga.

Congregational, National Service Commission of the Congregational Churches; office, 289 Fourth Avenue, New York—Kenyon L. Butterfield LL. D., Chairman, Amherst, Mass.; Rev. Henry A. Atkinson, D. D., Secretary, 289 Fourth Avenue, New York; Charles H. Baker, Treasurer, 1476 Broadway, New York. Executive Committee—Kenyon L. Butterfield, LL. D., President, Amherst, Mass.; Rev. Ernest H. Abbott, 381 Fourth Avenue, New York; Dean Charles R. Brown, D. D., New Haven, Conn.; Rev. Nehemiah Boynton, D. D., 379 Washington Avenue, Brooklyn; Herbert Knox Smith, Farmington, Conn.; Rev. Livingston L. Taylor, Canandaigua, N. Y.; Rev. Edward D. Eaton, Washington, D. C.

Disciples of Christ, War Emergency Committee—Keith Vawter, Secretary, Cedar Rapids, Iowa; Prof. Alva W. Taylor, Bible College of Missouri, Columbia, Mo.; Rev. E. M. Bowman, "Easedale," Glen Head, Long Island, N. Y.; Frederick D. Kershner, President, Eighth and Cutler Streets, Cincinnati; Rev. F. W. Burnham, Carew Building, Cincinnati; Mrs. Anna R. Atwater, Indianapolis, representing the Woman's Board.

Evangelical Association Commission for War Work—Bishop S. C. Breyfogel, D. D., 636 Center Avenue, Reading, Pa., Chairman; Rev. F. C. Berger, Secretary, 1903 Woodland Avenue S. E., Cleveland.

Evangelical Lutheran Church, Missouri Synod, Lutheran Board for Army and Navy—Rev. C. Eissfeldt, Chairman, River Grove, Ill.; Rev. F. C. Streufert, Secretary, 4317 South Mozart Street, Chicago; Fred H. Wolff, Treasurer, 155 West Ohio Street, Chicago; Rev. Frederick Wenchel, 226 Morgan Street, Washington; Rev. D. H. Stevens, 896 Battery Avenue, Baltimore; George F. Schmidt, 204 Baltic Street, Brooklyn, representing Atlantic Division.

Evangelical Lutheran Church, nearly all Synods, National Lutheran Commission for Soldiers' and Sailors' Welfare; office, Room 801, 437 Fifth Avenue, New York—Rev. Frederick H. Knubel, D. D., President, 48 Hamilton Terrace, New York; Prof. C. M. Jacobs, Vice-President, Mount Airy, Pa.; Rev. L. Larsen, Secretary, 460 Seventy-fourth Street, Brooklyn; E. F. Ellert, Treasurer, 318 West Thirty-ninth Street, New York; Rev. William Freas, Field Secretary, 162 Mercer Street, Jersey City; Rev. Howard R. Gold, Field Secretary, 925 Chestnut Street, Philadelphia.

Jewish Board for Welfare Work in the United States Army and Navy—Col. Harry Cutler, Chairman, 7 Eddy Street, Providence, R. I.; Dr. Cyrus Adler, Vice-Chairman, Dropsie College, Philadelphia; Samuel A. Goldsmith, Secretary, 31 Union Square West, New York; S. S. Rosenstein, Treasurer, 61 Broadway, New York.

German Evangelical Synod of North America, Evangelical War Welfare Commission—Rev. William N. Dresel, Chairman, 31 North Third Street, Evansville, Ind.; Rev. Reinhold Niebuhr, General Secretary, 787 Lothrop Street, Detroit (Mr. Niebuhr to receive all communications); Dr. E. A. R. Torsch, 814 Starks Building, Louisville; Rev. Theodore Mayer, 1716 Chouteau Avenue, St. Louis; Ernst W. Meyer, 1716 Chouteau Avenue, St. Louis; Rev. John Baltzer, 2506 Benton Street, St. Louis; Fred Ress, 1000 Q Street, Lincoln, Neb.

Methodist Episcopal Church, War Emergency Committee—Bishop Joseph W. Berry, Chairman; Rev. David D. Forsyth, D. D., Secretary, 1701 Arch Street, Philadelphia.

Methodist Episcopal Church, South—Bishop Walter R. Lanbuth, Chairman; Rev. John M. Moore, D. D., Secretary, 810 Broadway, Nashville, Tenn.

Methodist Protestant Church, War Work Commission—Rev. Lyman E. Davis, D. D., 219 Sixth Street, Pittsburgh; Rev. C. E. Wilbur, D. D., 200 Pittsburgh Life Building, Pittsburgh; Rev. Charles H. Beck, D. D., Secretary, 507 Pittsburgh Life Building, Pittsburgh (to receive all communications).

Presbyterian Church, United States, South, Committee on War Work—Rev. James I. Vance, D. D., Chairman, Fifth Avenue and Church Street, Nashville, Tenn.; Rev. A. S. Johnson, D. D., Vice-Chairman, Birmingham, Ala.; Rev. Homer McMillan, D. D., Secretary, Atlanta, Ga.

Presbyterian Church, United States of America, National Service Commission—Rev. John F. Carson, D. D., Chairman, 258 Jefferson Avenue, Brooklyn; John T. Manson, Vice-Chairman, New Haven, Conn.; Rev. Ford C. Ottman, D. D., Representative, 156 Fifth Avenue, New York; Rev. William Henry Roberts, D. D., Corresponding Secretary, Witherspoon Building, Philadelphia; Rev. Seldon L. Haynes, Recording Secretary, 160 Maple Street, Kingston, Pa.; Roy M. Hart, Treasurer, 260 Broadway, Brooklyn. Administrative Committee—Rev. John F. Carson, D. D., Chairman, 258 Jefferson Avenue, Brooklyn; Rev. Ford C. Ottman, D. D., Executive Secretary, 156 Fifth Avenue, New York; William A. Harbison, Farmers' Bank Building, Pittsburgh, Pa.; John T. Manson, Vice-Chairman, New Haven, Conn.; Rev. William H. Foulkes, D. D., Witherspoon Building, Philadelphia, Pa.; Dr. Robert E. Speer, 156 Fifth Avenue, New York.

United Presbyterian Church, National Service Commission—Rev. Thomas C. Pollock, D. D., 5034 Hazel Avenue, Philadelphia, Pa., Chairman; Rev. C. S. Cleland, D. D., Second Church, Philadelphia; George Innes, 1005 Land Title Building, Philadelphia.

Protestant Episcopal Church in the United States of America, War Commission of the Episcopal Church, office, 14 Wall Street, New York—Right Rev. William Lawrence, D. D., Chairman, 122 Commonwealth Avenue, Boston; Right Rev. James De Wolf Perry, Jr., D. D., Chairman Executive Committee and active executive, 14 Wall Street, New York; Rev. George C. Stewart, Secretary, Evanston, Ill.; Arthur E. Newbold, Treasurer, Messrs. Drexel & Co., Philadelphia; overseas address, Right Rev. John M. McCormick, D. D., care of Morgan, Harjes & Co., 31 Boulevard Haussmann, Paris.

Reformed Church in America, War Service Commission of the League for Patriotic Service—Rev. Oscar M. Voorhees, D. D., Chairman, 350 East One Hundred and Forty-sixth Street, New York; Special Sub-Committee—Rev. W. I. Chamberlain, Ph. D., Chairman, 25 East Twenty-second Street, New York.

Roman Catholic Church, National Catholic War Council—Rev. John J. Burke, C. S. P., President, 120 West Sixtieth Street, New York; Walter G. Hooke, Executive Secretary, 154 East Thirty-eighth Street, New York; Robert Biggs, Secretary, 826 Law Building, Baltimore; John G. Agar, Treasurer, 31 Nassau Street, New York.

Sunday Schools, National Sunday School War Council—Rev. Edgar Blake, D. D., President, 58 East Washington Street, Chicago; John L. Alexander, Secretary, 1416 Mallers Building, 5 South Wabash Avenue, Chicago.

United Evangelical Church, War Service Commission—Bishop W. F. Heil, Allentown, Pa.; Rev. H. Franklin Shlegel, Lancaster, Pa.; Rev. Dr. A. E. Gobble, Myerstown, Pa.; Rev. A. A. Winter, Louisberg, Pa.; Rev. A. Q. A. Curry, Johnstown, Pa.

WORK OF THE UNITED STATES SHIPPING BOARD.

(An Official Statement.)

The Emergency Fleet Corporation has awarded since July, 1917, contracts for 118 wooden vessels of 3,500 tons dead weight capacity each to twenty-seven different ship yards. There had previously been awarded contracts for 235 wooden vessels of similar type to the above, and for fifty-eight vessels of composite construction, thereby making a total of 411 wooden and composite vessels of an aggregate dead weight tonnage of 1,460,900. The designs for machinery have been completed for the manufacture of engines, boilers and other articles of equipment for these vessels, for which the facilities available of machine shops and boiler works throughout the country have been availed of. Specifications have been prepared and negotiations outlined and initiated for the assembly and installation of machinery in wooden vessels, the most of which have been or are being constructed as "hulls only." Great difficulty has been experienced on the Atlantic Coast in obtaining suitable lumber for these ships, and it is anticipated that there will be greater delay in their completion than was expected when this movement was begun, notwithstanding every possible effort on the part of the corporation and its contractors.

Since August 1 there have been awarded contracts for 155 steel cargo vessels of 1,076,800 tons dead weight tonnage, distributed among six ship yards. The most important of these contracts are for vessels of the so-called fabricated type and special ship yards are being prepared for them. Contracts for the boilers and machinery and steel construction of these vessels have been placed and the contractors are actively at work in the preparation of the sites for the assembling of these ships. The best efforts of the Emergency Fleet Corporation are devoted to expediting these great ship building projects.

Previous to August 1 seventy steel cargo vessels of 587,000 tons total dead weight capacity had been contracted for. These vessels were distributed among ten ship yards, so that, in September, the total number of steel vessels under construction for the United States was 225, with a total aggregate dead weight tonnage of 1,663,800.

REQUISITIONED VESSELS.

By proclamation of August 3, 1917, the Fleet Corporation, under authority delegated by the President, under the provisions of the Emergency Act, approved June 15, 1917, requisitioned all vessels under construction in the ship yards of the United States, of 2,500 tons dead weight capacity and above. By this act the United States acquired a total number of 403 vessels, determined by the progress reports obtained from the various ship yards to be actually under construction; in many cases where keels had not actually been laid, engines, boilers, equipment and materials, all of which were also requisitioned, are in various stages of progress; and in comparatively few cases contracts existing for vessels not actually begun which may or may not be proceeded with as the merits of each case, compared with what is desirable construction, are considered. The total dead weight tonnage under construction, thus acquired, and on which orders have been issued to proceed with the maximum expedition, exceeds 2,000,000 tons dead weight.

SUMMARY AS OF OCTOBER 1, 1917.

Under construction for the Emergency Fleet Corporation:

Number of Vessels.	Type of Vessels.	Total Dead Weight Tonnage.
353	Wood	1,253,900
58	Composite	207,000
225	Steel	1,663,800
Requisitioned Vessels:		
403		2,800,000
Grand total 1,039		5,924,700

In addition to the above, Congress is authorizing the construction of additional vessels whose total dead weight capacity will be nearly 5,000,000 tons. Plans for the major portion of these additional vessels are in course of preparation, and many of them will be of special types adapted to particular necessities of war, and while substantially cargo carriers will have much greater speed than the cargo vessels now under construction. The Corporation has ascertained from the builders of requisitioned vessels their demands for structural steel, machinery and various items of equipment, and is endeavoring to regulate the supply of these items to provide for the individual needs of the ship builders in accordance with their program of capacity, so far as the country's resources are available. And it is apparent that with the similar needs of the Naval Service and the War Department, with which the Emergency Fleet Corporation is working in harmonious co-operation, every mechanical resource of the United States, with considerably increasing development, will be necessary for the realization of this programme and what must follow in continuation of it.

INDUSTRIAL SERVICE DEPARTMENT.

The Fleet Corporation has instituted an Industrial Service Department which, by co-operation with the Department of Labor, is assisting ship builders and others in the employment of suitable labor and to indicate an extensive system of vocational training, with the purpose of adapting allied trades and unskilled labor for service in ship yards, and through co-operation with the Y. M. C. A. organization throughout the United States to give attention to the housing and personal affairs of the men recruited for ship building work. The vast development of ship building essential to this emergency necessitates an agency of this kind, because up to this time the thinning out of unskilled men in the older ship yards over a large territory is, in many instances, resulting in greatly decreased production. It has been estimated that 150,000 new men are necessary for full production.

NAMES OF NEW DESTROYERS ANNOUNCED.

SECRETARY of the Navy Daniels announced in October the names of 24 of the destroyers under construction. All bear the names of officers of the Navy who have won distinction in service.

They are: Little, McKee, Stevens, Philip, Bell, Stribling, Kimberly, Robinson, Murray, Wickes, Israel, Ringgold, Woolsey, Sigourney, Gregory, Evans, Colhoun, Stringham, Gridley, Dyer, Harding, McKean, Fairfax, and Taylor.

The men for whom they are named were:

Rear-Admiral Robley D. Evans, known popularly as "Fighting Bob" Evans, who was in command of the Iowa at the Battle of Santiago, July 3, 1898.

Rear-Admiral John Woodward Philip, who commanded the Texas in the Battle of Santiago Bay.

Capt. Charles Vernon Gridley was Commander of Dewey's flagship, the Olympia, at the Battle of Manila Bay.

Rear-Admiral Henry Clay Taylor commanded the Indiana during the Spanish-American War.

Rear-Admiral Cadwallader Ringgold commanded Ringgold Expedition in the Pacific; received the thanks of Congress for daring when he was Commander of the Sabine in rescuing a battalion of marines at sea, and for his rescue of the line-of-battle ship Vermont.

Capt. N. Mayo Dyer was Captain of the Baltimore at the Battle of Manila Bay.

Rear-Admiral Edmund R. Colhoun, a native of Missouri, commanded the monitor Weehawken in the Civil War and was at one time Commander-in-Chief of the South Pacific station.

Rear-Admiral Francis Hoyt Gregory served with distinction in the War of 1812 and the Mexican War.

Rear-Admiral Henry H. Bell commanded the East Indian Squadron in the capture of the barrier forts near Canton, China, in 1856, and served through the Civil War.

Capt. Charles Holdup Stevens served in the War of 1812.

NAMES OF NEW DESTROYERS ANNOUNCED—*Continued.*

Lieut. Hugh W. McKee was killed while leading an attack on the Corean forts at Kango-hoa Island in 1871.

Rear-Admiral Lewis Ashfield Kimberly took part in many operations on the Mississippi during the Civil War.

Capt. George Little, as Commander of the Winthrop in 1771, captured several British vessels. Later, commanding the frigate Boston, he captured the French ship Le Bercean after a remarkable engagement.

Midshipman Joseph Israel volunteered his services against Tripolitan ships in the harbor of Tripoli and was promoted to Acting-Lieutenant by Commodore Preble. He was aboard the Intrepid when she was blown up in 1804.

Midshipman James Butler Sigourney commanded the Asp, a schooner, in defense of Chesapeake Bay in the War of 1812. After beating off three British ships, the Asp was attacked and boarded, and Midshipman Sigourney was killed while still holding his post.

Rear-Admiral Silas Gorton Stringham took part in the war with the Barbary powers and the suppression of piracy in the West Indies; in the Mexican War commanded the U. S. S. Ohio; and as Commander of the Atlantic Squadron in the Civil War attacked Forts Hatteras and Clark.

Rear-Admiral Cornelius Kinchilee Stribling was Superintendent of the United States Naval Academy from 1851 to 1853 and commanded the East Gulf blockading squadron in the Civil War.

Capt. Isaiah Robinson served in the War of the Revolution.

Capt. Lambert Wickes was in the Revolutionary War, Captain of the Reprisal, which ship captured a number of British vessels.

Capt. Melancthon Taylor Woolsey commanded the Oneida and the naval station at Sacketts Harbor in the War of 1812.

Commodore William Wister McKean commanded the Niagara, which in 1860 transported the first Japanese Embassy home from the United States. He was until 1862 in command of the East Gulf blockading squadron.

Capt. Seth Harding, as Commander of the brigantine Defense, captured seven British vessels in three separate battles in 1776.

Rear-Admiral Donald McNeill Fairfax served in the Pacific Squadron during the Mexican War. In 1861 he was on the San Jacinto and boarded the British vessel Trent when it was captured with the Confederate commissioners.

The Murray is named for two gallant officers. Capt. Alexander Murray during the Revolutionary War, with five ships, had many engagements with the British. Rear-Admiral Alexander Murray was prominently engaged in the North Atlantic blockading squadron during the Civil War.

THE BOY SCOUTS OF AMERICA.

An active campaign in the interest of the production and conservation of food has been conducted, resulting in the increased production of food products by Scouts and Scout officials. Thousands of boys have worked on farms and in agricultural camps during the season, and reports at this time show that thousands of acres have been planted by Scouts. The Boy Scouts participated in the first Liberty Loan, visiting 139,645 homes and securing $23,238,250 subscriptions. They also got subscriptions for the second loan. The Scouts are participating in Red Cross activities, acting as messengers and taking part in the various campaigns and activities of the Red Cross. The local Boy Scout organizations within a radius of 50 miles of the Atlantic Gulf and the Pacific Coast are ready for immediate services in case the Coast Guard is drawn upon for other duties. In every city and town where Scouts are organized they are in immediate touch with these committees for active service.

The Boy Scouts of America was incorporated February 8, 1910, and given a Federal charter protecting the name, uniform, badges, insignia, etc., June 15, 1916. It has as its Honorary President the Hon. Woodrow Wilson, President of the United States, and Hon. William H. Taft, Col. Theodore Roosevelt, and Daniel Carter Beard as its Honorary Vice-Presidents. Associated with these in approval and promotion of the movement are eminent citizens from all walks of public life, who are members of the National Council and of the local councils in the cities and towns of the whole country, and a host of others who earnestly co-operate in the work. The Scouts are organized in patrols and troops. Eight boys constitute a patrol, one of whom is chosen as the Patrol Leader. Four patrols make up a troop. The Scout Master is the adult leader of the troop. Already there are about 320 local councils in as many cities throughout the United States, and under the direction of each there are from five to one hundred and fifty Scout Masters in charge of troops. In the past year arrangements were completed whereby the isolated boy—the boy who lives in a village or on a farm and cannot organize a troop—may become a Pioneer Scout, officially affiliated with the national movement and eligible to all the pleasures and benefits of scouting. Over 9,000 Scout Masters are already registered with the national organization, representing about 250,000 boys that are being reached by the movement. Work to some extent has been started in practically every city in this country having a population of 4,000 or over, besides in the Hawaiian Islands, the Philippine Islands, Porto Rico and Guam. Any boy, of any class or creed, over 12 years of age, is eligible to become a Scout. The initial requirements are that he know the Scout salute, sign and laws, and that he take the Scout oath. By meeting certain requirements, he is in line to become a Tenderfoot, Second-Class and First-Class Scout. The national organization is largely maintained by public subscriptions. Sustaining and Contributing Memberships are issued to men and women throughout the country who are financially assisting in the development and promotion of this organization among boys.

National Headquarters of the Boy Scouts of America, No. 200 Fifth Avenue, New York City.

OFFICERS OF THE NATIONAL COUNCIL.

Honorary President—Hon. Woodrow Wilson.
Honorary Vice-President—Hon. William H. Taft.
Honorary Vice-President—Col. Theodore Roosevelt.
Honorary Vice-President—Daniel Carter Beard.
President—Colin H. Livingstone, Washington, D. C.
Vice-President—Mortimer L. Schiff, New York, N. Y.
Vice-President—B. L. Dulaney, Bristol, Tenn.
Vice-President—Milton A. McRae, Detroit, Mich.
Vice-President—Arthur Letts, Los Angeles, Cal.
Vice-President—A. Stamford White, Chicago, Ill.
National Scout Commissioner—Daniel Carter Beard, Flushing, N. Y.
Treasurer—George D. Pratt, Brooklyn, N. Y.
Chief Scout Executive—James E. West, 200 Fifth Avenue, New York City.
Members of the Executive Board—Daniel Carter Beard, Ernest P. Bicknell, Benjamin L. Dulaney, Robert Garrett, Charles D. Hart, Franklin Chase Hoyt, John Sherman Hoyt, Charles C. Jackson, Jeremiah W. Jenks, Colin H. Livingstone, Milton A. McRae, William D. Murray, Charles P. Neill, John H. Nicholson, George D. Porter, George D. Pratt, Frank Presbrey, G. Barrett Rich, Jr., Mortimer L. Schiff, F. L. Seely, A. Stamford White.

THE AMERICAN SOCIOLOGICAL SOCIETY.

President—George E. Howard, University of Nebraska. *Former Presidents*—Albion W. Small, University of Chicago; George E. Vincent, Rockefeller Foundation, New York, N. Y. *First Vice-President*—Charles H. Cooley, University of Michigan. *Second Vice-President*—Frank W. Blackmar, University of Kansas. *Secretary-Treasurer*—Scott E. W. Bedford, University of Chicago.

Applications for membership and all inquiries concerning the general business of the society should be addressed to the American Sociological Society, Fifty-eighth Street and Ellis Avenue, Chicago, Ill.

NAMES OF GERMAN SHIPS TAKEN OVER IN AMERICAN PORTS.

THE names of the interned German vessels of commerce taken over by the United States Government under a joint resolution of Congress early in the war were as follows:

Vaterland, Amerika, Kaiser Wilhelm II., President Grant, Pennsylvania, Bulgaria, Prinzess Irene, Hamburg, Neckar, Bohemia, Rhaetia, Wittekind, Armenia, Adamsturm, Willehad, Serapis, Allemannia, Nassovia, Maia, Neptun, O. J. D. Ahlers, Prinz Waldemar, Loongmoon, Governeur Jaeschke, Darvel, Princess Alice, Wiegand, Bochum, Carl Diederichsen, Coblenz, Esslingen, Lyeemoon, Pongtong, Sachsen, Suevia, Steinbeck, Elsass, Indra, Arnoldus Vinnen, Ottawa, Grunewald, Sachsenwald, Staatssekretar Solf, Aroa (lighter), George Washington, Kronprinzessin Cecile, President Lincoln, Cincinnati, Grosser Kurfurst, Barbarossa, Friedrich der Grosse, Rhein, Konig Wilhelm II., Koln, Prinz Oskar, Ockenfels, Arcadia, Pisa, Prinz Joachim, Harburg, Portonia, Clara Mennig, Pommern, Setos, Holsatia, Staatssekretar Kraetke, Borneo, Marudu, Tsintau, Andalusia, Camilla Rickmers, Clara Jebsen, Elmshorn, Johanne, Mark, Rajah, Sambia, Tubingen, Dalbek, Magdeburg, Matador, Kurt, Andromeda, Prinz Sigismund, Savola, Arni (lighter), Argus (lighter).

Secretary of the Navy Daniels later announced that the names of the seized German ships that had been assigned to the Navy had been changed as follows:

Geier to Schurz, Breslau to Bridgeport, Kiel to Camden, Leibenfels to Houston, Saxonia to Savannah, Vogensen to Quincy, Nicaria to Pensacola, Odenwald to Newport News, Hohenfelde to Long Beach, Frieda Leonhardt to Astoria, Andromeda to Bath, Rudolf Blumberg to Beaufort, Praesident to Kittery, Locksun to Gulfport.

The Geier, the German gunboat which was interned at Honolulu and taken over by this Government after the declaration of war, was renamed for Carl Schurz, the famous German-American soldier and statesman. A native of Prussia, Schurz was one of the heroes of the ill-fated revolution of 1848, and, after that historic uprising against the Prussian autocracy, found a haven in America. He was one of Lincoln's strongest supporters and served in the United States Army through the Civil War, holding the rank of major general. Later he was United States Senator from Missouri and was Secretary of the Interior in President Hayes's Cabinet. The foe of oppression and the lifelong advocate of popular government, he represented the highest type of citizenship.

The names chosen for the other vessels were generally of coast towns and cities which have some connection with the Navy. Bridgeport builds submarines and produces large amounts of guns and munitions; Camden, N. J., is one of the shipbuilding centres of the country; Houston is the Texas port from which come oil and cotton; Savannah is the leading port of Georgia; Quincy, Mass., has a large shipyard at which all classes of naval vessels are built; Pensacola, Fla., is the location of the Navy Aeronautic Training Station; Newport News, Va., is the site of one of the largest plants in the country at which numerous battleships have been built; submarines are built at Long Beach, Cal.; Astoria is the important port near the mouth of the Columbia River; Bath, Me., has been for generations a centre of shipbuilding, and has a shipyard where destroyers are built; Beaufort represents two old seaports, one in North Carolina, the other in South Carolina; Kittery is the location of the Portsmouth Navy Yard; and Gulfport is one of the chief ports from which the Navy gets its supply of fuel oil.

SUNK IN CHARLESTON HARBOR.

The Liebenfels was the steamer of the Hansa Line sunk in Charleston Harbor at the time the United States broke off relations with Germany. As she was an obstruction to navigation, the Army engineers were directed to remove the wreck. They raised the vessel and it was taken to the navy yard at Charleston for repairs. She was technically the property of the War Department, but was transferred to the Navy. The repairs were completed and the Liebenfels, which was not badly damaged, was ready for service in June. She was 376 feet long with 4,525 gross and 2,830 net tonnage and was used as a collier and cargo ship.

DIMENSIONS OF VESSELS.

The dimensions of the other vessels were as follows: Hohenfelde, formerly at Savannah, now at Charleston, 2,974 gross, 1,887 net tonnage, 318 feet long, owned by Fuhrman, Nissle & Gunther; Frieda Leonhardt, at Jacksonville, 2,789 gross, 1,731 net tonnage, 320 feet long, owned by Leonhardt & Blumberg; Rudolf Blumberg, at Pensacola, 1,767 gross, 1,077 net tonnage, 276 feet long, owned by Leonhardt & Blumberg; Vogesen, at Pensacola, 3,716 gross, 2,357 net tonnage, 349 feet long, owned by H. Vogemann; Andromeda, at New Orleans, 2,554 gross, 1,546 net tonnage, 329 feet long; Breslau, at New Orleans, 7.524 gross, 4,808 net tonnage, 429 feet long, owned by North German Lloyd; Saxonia, at Winslow, Wash., 4.424 gross, 2,782 net tonnage, 400 feet long; owned by Hamburg-American Steamship Co.; Odenwald, seized at San Juan, P. R., 3,537 gross, 2,098 net tonnage, 356 feet long, owned by Hamburg-American Line; Locksun, formerly tender to the German gunboat Geier, interned at Honolulu, 1,657 gross, 1,020 net tonnage, 254 feet long, owned by Hamburg-American Line; Praesident, former tender to the Odenwald, taken over at San Juan, P. R., about 900 tons; Kiel, taken over at Southport, N. C., now at Charleston, 4,494 gross, 2,872 net tonnage, 388 feet long, owned by Fleusburger Shipping Co.; Nicaria, taken over at Southport, N. C., now at Charleston, 3,974 gross, 2,298 net tonnage, 339 feet long; owned by Hamburg-American Line.

STEEL PRICES FIXED BY WILSON.

THE President approved late in September an agreement between the War Industries Board and the steel men, fixing the following prices, which became effective immediately, and are subject to revision January 1, 1918, viz.:

Commodity.	Basis.	Price Agreed Upon.	Recent Price.	Reduction.	
				Amount.	Per Cent.
Iron ore	Lower Lake ports	a$5.05	a$5.05	.....	.....
Coke	Connellsville	b6.00	b16.00	$10.00	62.5
Pig iron	.....	a33.00	a58.00	25.00	43.1
Steel bars	Pittsburgh	c2.90	c5.50	2.60	47.3
	Chicago				
Shapes	Pittsburgh	c3.00	c6.00	3.00	50.0
	Chicago				
Plates	Pittsburgh	c3.25	c11.00	7.75	70.5
	Chicago				

a Gross tons. *b* Net tons. *c* Hundredweight

It was stipulated, first, that there should be no reduction in the present rate of wages; second, that the prices above named should be made to the public and to the Allies, as well as to the Government; and third, that the steel men pledge themselves to exert every effort necessary to keep up the production to the maximum of the past, so long as the war lasts.

Measures were at once taken by the War Industries Board for placing orders and supervising the output of the steel mills in such manner as to facilitate and expedite the requirements of the Government and its Allies for war purposes, and to supply the needs of the public according to their public importance and in the best interest of all, as far as practicable.

THE AMERICAN MERCHANT MARINE.

(W. M. Brittain, in Agwi Steamship News.)

For over one hundred years transportation between United States ports on the Atlantic and the Pacific coasts, the Gulf of Mexico and the Great Lakes, has been by statute confined exclusively to ships constructed in our domestic shipyards and owned by Americans, the penalty for violation of this statute being forfeiture of merchandise so carried. This exclusion of foreign shipping from our coastwise commerce was subsequently extended to cover transportation between United States ports and the ports of Hawaii and Porto Rico, but it does not apply to carriage between United States ports and the ports of the Philippine Islands. By statute enacted in October, 1917, for the duration of the war only, foreign vessels are permitted to transport cargoes between American ports when a license to do so for each specific cargo has been granted by the United States Shipping Board.

Until the passage of the Act of August 24, 1912, no ship, regardless of where she traded, either coastwise or foreign, was permitted to be operated under the American flag unless she was built in the United States and owned by Americans. Since the enactment of this statute, vessels built abroad, but now owned by citizens of the United States, may be admitted to registry under the American flag to operate in international commerce but not in our coastwise trade. All the licensed officers in the deck and engineering departments of ships under the American flag, whether in the coastwise or international trades, must be citizens of the United States; there is no legal restriction in respect to the citizenship of the crews. Exceptions to this requirement have been made, applicable for a limited period in the case of the officers of foreign-built ships recently admitted to American registry for operation in international trade, and, for the period of the war, to the licensed officers of our allies and of neutral nations.

TONNAGE BEFORE THE WAR.

Previous to the outbreak of the war, the figures compiled by the United States Government gave the total gross register tonnage of all craft over one hundred gross tons under our flag to be in round numbers, 8,600,000, of which about 4,000,000 were trading between ports on the Atlantic Coast, Gulf of Mexico and Pacific Coast; about 3,000,000 on the Great Lakes; the remainder being engaged in trade between this and other countries. This was at that time about one and a half times as great as the combined foreign-going and coastwise tonnage of Germany, more than three times the total tonnage of Norway, and twice the total tonnage of France and Italy combined. Great Britain, with about 22,000,000 gross tons, alone surpassed the United States in shipping. While it is true that Germany's tonnage was almost exclusively engaged in international transportation—her coastwise tonnage being practically negligible—and that the coastwise tonnage of Great Britain is small as compared to the tonnage of that country engaged in foreign commerce, yet the assumption is fallacious that, because such a large proportion of the gross tonnage of the United States operates on American coastwise routes, our merchant marine is therefore vastly inferior. The coastwise routes and shipping of this country are no way comparable to the coastwise routes and shipping of other countries.

Most of the trades in which our coastwise vessels operate bear a close analogy in length of route and size of ships to many of the international routes, and bear no resemblance even to the coastwise shipping of Great Britain, which has the greatest coastwise tonnage in the world outside of our own. The steamers engaged in the coastwise trade of Great Britain are almost all under 1,000 gross tons, the large majority being much less than this. Few of the routes reach 300 miles in length. A tabulation of some of the distances between American ports to and from which our steamers operate direct, and the size of the ships employed on these routes, will illustrate this:

	Miles.	Gross Tonnage of Ship.		Miles.	Gross Tonnage of Ship.
New York to Honolulu	6,700	12,000	New York to Savannah	708	6,200
New York to San Francisco	5,217	12,000	New York to Charleston	736	4,500
San Francisco to Honolulu	2,091	12,000	New York to Norfolk	320	3,800
San Francisco to Alaskan Ports	2,000	3,500	Baltimore to Jacksonville	772	3,600

Many of our coastwise routes exceed the distance of the routes traversed by British ships plying between ports in Great Britain and the ports of Norway, Sweden, Germany, Holland, Belgium, France, Spain, and even the Mediterranean ports, as well as the Baltic ports of Russia, the steamers covering these routes being classed, of course, by Great Britain as in the foreign trade. The number of vessels over 2,500 tons at present registered or enrolled under the American flag capable of overseas operations is estimated to be about 500, comprising about 225 steamers built for deep-sea operations (many of which have been admitted to American registry within the past three years or are of recent construction) and 275 coastwise ships, and ninety-three of these latter are combined freight and passenger steamers. When the war broke out, the internment of all German vessels and the withdrawal of many British ships for Government service, so curtailed the supply of tonnage to serve the transportation needs of the United States that calamity would have ensued had we not been able to fall back on our coastwise shipping. Though the number of such vessels suitable for overseas operation was limited, and the relief afforded by them totally inadequate to our needs, yet they did render a national service in this emergency which can be appreciated only by those conversant with the circumstances.

AMERICAN FLAG ON SHIPPING.

The requirement that vessels transporting our commerce between American ports must be under the American flag, built in American shipyards, and owned by American citizens, has for its purpose primarily the development and preservation of means of national defense. Previous to the commencement of the war the higher wages prevailing in this country, as compared with European nations, so increased the cost of American ship construction and the expense of operation of American ships in competition with the vessels of other countries, that we had only about 1,000,000 gross register tons of shipping operating in the international trades, most of which was engaged on mail routes. Our domestic shipyards, with their 30,000 skilled employees, were therefore almost entirely dependent on our coastwise shipping, and, of course, our navy, for new construction and repairs. As a means of national defense we must have shipyards and skilled shipbuilders, and we cannot have them if all our ships are built abroad.

Our great coastwise fleets have been the nursery for the deck and engineer officers hurriedly required to man the 105 interned German and Austrian steamers, aggregating nearly 700,000 gross tons, seized by the United States Government when our nation entered the war, and it is to our coastwise fleets that the country must look for the nucleus of the officers who are to navigate the tremendous number of merchant ships recently launched, or now under construction for use in the transportation of our exports, imports and armed forces and supplies therefor, or as auxiliaries to the navy. To-day, exclusive of coastwise vessels, which are ready for use in the trans-Atlantic service when necessary, the United States has over 2,400,000 gross register tons of shipping operating in foreign service.

BRITAIN'S WAR EXPENDITURES.

(Summarized from a statement in the House of Commons, in November, 1917, by the Chancellor of the Exchequer.)

For the six months ended September 29 last the increase in expenditure over the budget estimate has been £220,000,000. Much of this increase is due to productive expenditure or advances that will be repaid. Loans to Allies, increase over the estimate, £61,500,000; advances to the Dominions on account of the cost of their troops in Europe, which will be repaid by them, £24,000,000; War Office purchases for the Allies, £3,500,000; State purchases of wheat, sugar, ships, wool, hides, timber, etc., £74,500,000; Treasury advances to British agents, £15,600,000; total, £178,500,000.

Making these deductions the net increase in the six months in expenditure out of the Vote of Credit is £43,500,000 above the budget estimate. Of the excess £39,000,000 is due to increased army expenditure, the rest to the increased cost of the navy and munitions. In the current six months the expenditure will be largely increased owing to the cost of the policy of the subsidized loaf and the increase in the pay of the men in the navy and army. Together these will cost the Treasury about £40,000,000 per annum. In round figures the amount of the national debt on September 29 was £5,000,000,000. From this, however, the following deductions have to be made: Advances to our Allies since the war began, £1,100,000,000; advances to our Dominions, £126,000,000; Indian Government gift, £100,000,000; total, £1,326,000,000.

Deducting this total the national debt is brought down to £3,674,000,000, and its total when the war began was £645,000,000. As far as he could judge, the Chancellor said, the daily position would not be so favorable at the end of the year as in the first half, and for two causes: the Government had fixed the price of the loaf at 9d. and had increased the pay of the soldier and sailor. These two items would add an expenditure of between £40,000,000 and £50,000,000. The total increase of the War Office would be £39,000,000, leaving only £4,500,000 for the navy and munitions. He had received details of the increase from the War Office, and the causes were: rise in the price of commodities, the larger number of forces abroad, the larger number of Indian troops, and the forward move in Flanders. The position of the country, as it stood now, was that the national debt on September 29 stood at between 4,900 and 5,000 millions.

COMPARISON WITH GERMANY.

The Chancellor added that he had never suggested it was a burden which should be treated lightly, but it was interesting to compare the German position. The figures had been difficult to get, but the German Government had passed votes of credit for 4,700 millions, which did not include advances to their allies, or separation allowances. The whole of this represented additional debt, as the German Government had raised no part of it by additional taxation. It meant that their debt was 1,700 millions more than ours. The monthly expenditure of Germany in June of last year was £100,000,000 and, he said, in May this year, it had risen to £150,000,000, while Britain's expenditure during the same period had only increased by 34 per cent. The Germans had put on no taxation at all until 1916, when they began by putting on increased taxation to the extent of £25,000,000. This year they added an additional £60,000,000 of taxation. Beyond that they had intimated that they were making a capital levy of another £100,000,000. But the interest on their war debt alone was £240,000,000 at least, so that their increased taxation fell short of the interest by £55,000,000.

BRITISH MERCANTILE MARINE.

(From a report by the Liverpool Steamship Owners' Association in November, 1917.)

Under peace conditions it is estimated that the liner tonnage of the United Kingdom was represented by about 1,200 vessels of about 7,000,000 tons gross. Of this liner tonnage there were employed: In trade with the United Kingdom, about 900 vessels; gross tonnage, 5,500,000. In trade between ports both outside the United Kingdom, about 300 vessels; gross tonnage, 1,500,000. Total, 1,200 vessels; gross tonnage, 7,000,000.

Of the above liner tonnage, there was on August 5, 1914, entered in the Liverpool and London War Risks Association 908 vessels, representing 5,921,575 tons gross. The vessels entered in that association therefore represented about 75 per cent. in numbers and 84 per cent. in tonnage of the total liner tonnage.

Since August 5, 1914, of the liner tonnage entered in the association, there has been withdrawn as a result of sales, marine losses and war losses 305 vessels of 1,890,550 tons gross. The above withdrawals, calculated on both numbers and tonnage, represent 33 per cent.

In the same period there have been added: New vessels, 95; gross tonnage, 766,146. Purchased vessels, 36; gross tonnage, 180,386. Total, 131 vessels; gross tonnage, 946,532. Few of the vessels purchased by the lines can be regarded as replacements of lost liner tonnage—they are merely vessels taken from other trades, and most of them are not of the type of liner tonnage. The total replacements represent 13 per cent. Therefore the net loss in liner tonnage since August 5, 1914, has been 20 per cent.

Under peace conditions, the liner tonnage, to keep pace with the normal growth in oversea trade, should have increased during the three years since August 5, 1914, by not less than 10 per cent.

From the above considerations it will be seen that if peace is re-established next year, the liner tonnage of the United Kingdom must be insufficient to meet the demands that will be made upon it to enable the overseas communications of the United Kingdom to be re-established—probably the shortage will not be less than 30 per cent.

In 1913 the approximate first cost of building liner tonnage was as under: Fast mail and passenger liners, £30 to £35 gross per ton; passenger and cargo liners, £20 to £30 gross per ton; cargo liners, £12 to £15 gross per ton. The average first cost of the liner tonnage entered in the Liverpool and London War Risks Insurance Association in August, 1914, had been £18 gross per ton. The average value of this liner tonnage in August, 1914, calculated on the basis of first cost, less depreciation at the rate of 4 per cent. per annum, was £11 to £12 gross per ton. The average value of this liner tonnage as now agreed with the Ministry of Shipping for the purposes of insurance under the liner requisition scheme is about £30 gross per ton. It is not possible under existing conditions to estimate the present cost of the replacement of the lost liner tonnage. It cannot be assumed at less than two and a half times the first cost under peace conditions, and it is probably considerably higher. At two and a half times, the average first cost would be £45 gross per ton.

NOTE.—An estimated average building cost of £45 per ton gross represents an average building cost of about £29 per ton deadweight cargo carrying capacity. Contracts are now being offered for the building of tramp tonnage at £25 per ton deadweight cargo carrying capacity. On the above estimates the replacement cost, at present prices, of one-third of the liner tonnage, 7,000,000 tons gross—2,300,000 tons gross at £45 per ton gross would amount to £103,500,000. As against such estimated cost of replacement the lines have recovered under their insurance policies, or from the State as ascertained values under the terms of requisition, about two-thirds of such cost, £69,000,000. Leaving a balance to be provided of £34,500,000. In addition to the cost of replacement, there must be a very heavy outlay incurred in reconditioning the liner fleets as they exist when peace is restored. Overhauls, repairs and renewals have been postponed. The wear and tear of continuous service under war conditions has been abnormal. The cost of reconditioning will be at practically war prices. It is difficult to assess this outlay, but (having regard to war prices) it will not be less than 15 per cent. on the original cost of the vessels still left in the liner fleets, say on £84,600,000—£12,690,000. In the result, provided the whole of the money collected in respect of war losses is reinvested in shipping, the lines will have to find out of earnings, out of further capital or on credit, in order to bring back their fleets to the state of efficiency in which they were when war was declared, about £47,190,000.

EUROPEAN UNITY—THEN AND NOW.

(From an interview with Sir Max Waechter, in the London Daily Telegraph, in August, 1913.)

THE European Unity League, which owes its origin to the efforts of Sir Max Waechter, has set itself the task of bringing about what in practice will amount to the federation of the Continent of Europe. A representative of the Daily Telegraph has had an interview with Sir Max Waechter on the inception and development of his plan, which, if it one day comes to be realized, will confer a greater blessing on the peoples of the White Continent than anything that has ever been conceived since the foundation of Christianity. Before reciting the interesting statements made by Sir Max, it will be helpful to an understanding of the evil he has set himself to combat to point out that at the present moment the nations of Europe are spending fully £500,000,000 on the maintenance of armies and navies. If to that be added the loss of industrial wealth which could be produced by the millions of men under arms, the present state of affairs must cost the people of Europe nearly another £500,000,000. In the armies of the Continent and of Great Britain somewhere between 4,000,000 and 5,000,000 of men, among the fittest physically of each race, are permanently withdrawn from economic production.

ORIGIN OF THE PROPOSALS.

These points, and many more equally cogent, have been set out in the statement recently published in the daily papers by Sir Max Waechter. That statement, it is interesting to recall, was prepared nearly six years ago by Sir Max for submission to his late Majesty King Edward, the Peacemaker of Europe. Our representative asked Sir Max Waechter how he first came to turn his attention to the subject of the waste involved by the maintenance of Europe as an armed camp.

"It is a good many years," he replied, "since I first saw what would be the ultimate result of the mad race in armaments. The matter absorbed my attention, because I clearly foresaw that if it went on it must result in national bankruptcy and the degradation of the European races from their place in the forefront of civilization. But it is only about six years ago that I began to do what I could to create a public opinion against a continuation of this mad policy. The first person I ever spoke to on the subject was our present King, then Prince of Wales. I pointed out the end toward which all the European nations were drifting. He listened very attentively to what I had to say, and at the end he said, 'I wish you would put that down in writing for the King.' I immediately did so, and that was the earliest memorandum I prepared on the subject.

"I had long ago realized that my plan could not succeed if the German Emperor was not in sympathy with it, and did not know how to approach him, but chance threw an opportunity in my way. I had gone to Kiel in my yacht, and while there the Admiral in command of the Imperial dockyard gave a garden party, at which the Emperor was expected, and to which the owners of all the foreign yachts lying in the harbor were invited. During the afternoon I spoke to him and told him of my desire to have an audience from the Emperor. The Admiral very kindly introduced me to His Majesty's personal aide de-camp, who secured for me what I wanted."

"What was the attitude of the German Emperor to your proposed Federation of Europe?"

"From the very beginning he was most gracious and friendly toward me. He listened to what I had to say, and then said he would like to talk further about it. When His Majesty left the garden party he came on my yacht and remained three hours on board. In the evening I dined with him on board the Hohenzollern, and ever since His Majesty has honored me with his friendship."

"Was the Emperor favorable to your plan?"

"He received it with a certain amount of approval, but pointed out the tremendous obstacles it would be necessary to overcome. At the same time, although I had a fair knowledge of his personal views, sufficient to justify me in regarding him as one of the principal peacekeepers of Europe, I was surprised to learn the very large and generous views he entertained with regard to other nations. But he is a devoted German patriot, and would not entertain anything that he did not consider in the interests of Germany."

GERMANY AND THE WAR PARTY.

"Do you feel at liberty to say what you believe to be the opinions of the German Emperor on the subject of armaments?"

"Yes, I think I can say that the Emperor's personal view is that his country at the present time requires a large army and a good, powerful navy. Germany is in a very peculiar position, and is practically in the position of having to defend three frontiers. The country for centuries was the battleground of Europe, and it is only recently that the nation has felt itself strong enough to defend itself against two first class powers. A certain extra armament on the part of Germany, therefore, seems to be fully justified. But so far as the Emperor personally is concerned, I am convinced he is a man of peace. He thoroughly realizes that a young nation like Germany requires peace above all things for its industrial and social development. But he is surrounded by a very strong and influential war party, whose efforts are not directed toward peace. The Emperor, however, is strong enough to resist them, and I know that he has saved Europe from war on several occasions.

"I was in Berlin when the Morocco crisis was at its height. I was aghast to see how the whole population had been stirred to frenzy by the war party."

"Who constitute the war party?"

"Mainly the Junker class, from which most of the army officers are drawn, and some wealthy and influential people interested in the manufacture of armaments. I am quite sure that if the German Government had declared war against England at that time it would have had the whole nation enthusiastically behind it. It was only the personal influence of the Emperor and his steadfast conviction that peace was necessary in Germany that saved the situation. The war party in Germany is larger and more influential than in any other European country; that is a factor which we must always bear in mind. They are always exceedingly active and skilful in working on the patriotic feeling of the people and guiding it in the direction of war. That is the great danger in Germany."

"Are the German people in favor of war?"

"No; the great mass of the people are thoroughly pacific, and do not want war, but the danger is that the influence of the war party might, by playing upon their prejudices and emotions, lead them in that direction under certain circumstances. The Emperor, however, fortunately, is firmly convinced that peace is better than war, and he is strong enough to hold the war party in check. Having come to the conclusion that the Emperor would not personally oppose my scheme, I visited in turn every sovereign in Europe with the exception of the Emperor of Austria and the Queen of Holland."

"How did these come to be left out?"

"Well, at the time Count Aehrenthal was Chancellor, and his view was that the Emperor had reached an age which made him inaccessible to new ideas. 'I shall get you an audience, if you wish,' he said to me, 'but the danger is that you may weary him.' In the face of that I did not insist on an audience. It is worth mentioning that Count Aehrenthal assured me the whole of Austria would be favorable to the federation scheme. Indeed, he said that a somewhat similar scheme had been tentatively discussed in Government circles in Austria."

CZAR'S FAVORABLE VIEW.

"I suppose the Czar, as the originator of The Hague Conference, was favorably inclined toward your scheme?"

"Yes, quite. I had a very confidential conversation with the Czar, in which he spoke with great frank-

ness. Indeed, I found all the sovereigns of Europe more disposed to view my plans with favor than some of the Ministers and politicians. My experience is that the Kings have a much keener conception of the dangers which threaten Europe than anybody else to whom I have spoken on the subject. I had my interview with him at the Tsarskoe Selo, near Petrograd. I found in him a man full of sympathy for humanity, and quite ready to do anything in his power to bring about better conditions of existence among the peoples of the world. I am convinced that he would have prevented the unfortunate Japanese War, if he had been fully informed of the situation by his advisers. Personally, the Czar approved of the federation idea, and expressed himself as very anxious to see it brought about, if possible. I believe His Majesty was greatly disappointed with the results that followed his own first efforts with regard to The Hague Tribunal. He seems to have expected too much from his first step, so much that it could not be speedily realized. I pointed out to him that he ought to be quite satisfied with the result of his effort, and that the establishment of an International Court at The Hague was such an advance in civilization that it could not be overestimated.

"I saw all the Balkan monarchs before the recent war, including the Sultan and the rulers of Greece, Bulgaria, Serbia, Roumania, and Montenegro. Every one of them declared himself in favor of peace, and expressed a desire to see a federation for defence brought about. I thought the opportunity favorable for saying that the Balkan states were in an excellent position to set an example, and could form a federation which would be strong enough to disregard the intrigues and schemes of the diplomats of other powers. They all agreed with me, and actually promised to try and bring it about. I was very disappointed when they went to war instead."

"Was it before the war in Tripoli that you saw the King of Italy?"

"Yes, but I have seen him twice. He said to me, 'You will have my full support for your scheme, if my people will let me give it.' The Kings of Denmark, Belgium, Sweden, and Norway, and the King of Spain all expressed themselves in favor of some scheme of federation. So also did President Fallières and several of the French Ministers. Of course, one can never leave out of sight the fact that the position of Alsace-Lorraine constitutes a grave obstacle in the way of European unity. I have discussed that question quite recently with the Prince of Monaco, who takes a great interest in it. He was good enough to say that he considered a plan I had of dealing with it seemed to promise success."

ANGLO-FRANCO-ITALIAN PACT FOR SUPREME WAR COUNCIL.

THE text of the agreement between the British, French and Italian Governments, read November 14, 1917, in the House of Commons by Premier Lloyd George, is as follows:

"First—With a view to better co-ordination of the military action on the western front, a Supreme War Council is created, composed of the Prime Minister and a member of the Government of each of the great Powers whose armies are fighting on that front, the extension of the scope of the Council to other fronts to be reserved for discussion with the other great Powers.

"Second—The Supreme War Council has for its mission to watch over the general conduct of the war. It prepares recommendations for the consideration of the Governments and keeps itself informed of their execution and reports thereon to the respective Governments.

"Third—The General Staff and military commands of the armies of each Power charged with the conduct of the military operations remain responsible to their respective Governments.

"Fourth—General war plans drawn by competent military authorities are submitted to the Supreme War Council, which, under high authority of Government, insures its concordance and submits, if need be, any necessary changes.

"Fifth—Each Power delegates to the Supreme War Council one permanent military representative, whose exclusive function is to act as technical adviser to the Council.

"Sixth—Military representatives receive from the Government and the competent military authorities of their country all proposals, information and documents relating to the conduct of the war.

"Seventh—The military representatives watch day by day the situation of the forces and the means of all kinds of which the Allies and enemy armies dispose.

"Eighth—The Supreme War Council meets normally at Versailles, where the permanent military representatives and staffs are established; they may meet at other places, according to circumstances. Meetings of the Supreme War Council take place at least once a month."

FRENCH AND BRITISH SCIENTIFIC MISSION TO UNITED STATES.

THE French Ministry of War sent to the United States in 1917 a scientific mission composed of eminent French and British scientists and army and navy officers prominently engaged in the task of scientific development connected with the war. This mission was headed by Prof. Charles Fabry, physicist at the University of Marseilles, eminent for his contributions to optics; Prof. H. Abraham, of the University of Paris prominent in wireless telegraphy and submarine work; M. le Duc de Guiche, aeronaut and eminent in researches in aerodynamics; Lieut. M. Paternot, wireless expert; Capt. Dupouey, of the French Army; Prof. Grignard, chemist of the University of Nancy; Sir Ernest Rutherford, professor of physics at the University of Manchester, and Commander Cyprian Bridge, of the Royal Navy, Secretary of the Allied Inventions Board. These gentlemen (excepting Prof. Grignard, who came later) reached an American port on the Espagne on May 28, and were met by official representatives of the War, Navy and Commerce Departments of the Government, and by New York members of the Executive Committee of the National Research Council. They arrived in Washington on the evening of May 30, and were received by the Secretary of War, the Secretary of the Navy, and the Secretary of Commerce, and by Gen. Crozier, Chief of Ordnance; Gen. Squier, Chief Signal Officer; Admiral Griffin, Chief Engineer of the Navy; and other Government officers.

The War and Navy Departments organized special conferences between the members of the French scientific mission and their own officers, and, through the offices of the National Research Council, with scientific representatives of the corresponding research activities of the United States. The members of the mission brought with them specimens of scientific instruments developed in France for uses in the war, and these instruments were exhibited to and discussed with Army and Navy officers and scientists engaged in researches bearing on military problems.

The appointment of this mission was largely due to the fact that a corresponding group of American scientists was sent to Europe early in April, 1917, by the National Research Council for the purpose of studying conditions at the front. The Chairman of this committee was Prof. Joseph S. Ames, professor of physics at the Johns Hopkins University, and the other members were Dr. George K. Burgess, metallurgist at the Bureau of Standards; Prof. George S. Hulett, chemist of Princeton University and the Bureau of Mines; Prof. Harry F. Reid, geologist at Johns Hopkins University; Dr. R. P. Strong, professor of tropical medicine at Harvard University and physician-in-charge of the Serbian anti-typhus campaign; Dr Lindsey Williams, assistant Health Commissioner of New York State, and Dr. H. D. Dakin, director of the Herter Laboratory, New York, and member of staff of British Government Medical Research Committee. This committee was received by the French Government and shown every possible courtesy and all available information was placed at its disposal.

GRAND ARMY OF THE REPUBLIC.

Headquarters—1224 State Life Building, Indianapolis, Ind.

Commander-in-Chief—Orlando A. Somers, Kokomo, Ind. *Senior Vice-Commander-in-Chief*—John L. Clem, Atlanta, Ga. *Junior Vice-Commander-in-Chief*—John M. Vernon, Chicago, Ill. *Surgeon-General*—John M. Adams, Cincinnati, Ohio. *Chaplain-in-Chief*—C. H. Frady, Helena, Mont.

OFFICIAL STAFF.

Adjutant-General—Robert W. McBride, Indianapolis, Ind. *Quartermaster-General*—Cola D. R. Stowits, Buffalo, N. Y. *Judge Advocate-General*—Smith Stimmel, Fargo, N. D. *Inspector-General*—Thomas H. Brown, Sioux Falls, S. D. *National Patriotic Instructor*—William C. Calland, Springfield, Mo. *Assistant Adjutant-General*—C. A. Williams, Portland, Ore. *Assistant Quartermaster-General and Custodian of Records*—J. Henry Holcomb, Philadelphia, Pa. *Chief of Staff*—George A. Hosley, Boston, Mass. *Senior Aide-de-Camp*—Gavin M. Stormont, Pomona, Cal.

Total			135,931

The number of Grand Army posts December 31, 1916, was 5,166. Losses by death during the year ended December 31, 1916, were 11,430. The first post was organized at Decatur, Ill., April 6, 1866. The first National Encampment was held at Indianapolis, November, 20, 1866.

WOMAN'S RELIEF CORPS.

(Auxiliary to the Grand Army of the Republic.)

THE national officers chosen at the thirty-fifth national convention, held in Boston, Mass., August 22 and 23, 1917, are: *President*—Mrs. Lois M. Knauff, Chagrin Falls, Ohio. *Senior Vice-President*—Mrs. Carrie L. Hoyt, Berkeley, Cal. *Junior Vice-President*—Mrs. Elizabeth J. Savage, Bangor, Me. *Secretary*—Mrs. Eliza Brown Daggett, Attleboro, Mass. *Treasurer*—Mrs. Estella E. Plopper, Iowa Falls, Ia. *Chaplain*—Mrs. Rebecca Shea, Brookings, S. D. *Counselor*—Mrs. Ida S. McBride, Indianapolis, Ind. *Inspector*—Mrs. Florence L. P. Haydn, Meriden, Ct. *Instituting and Installing Officer*—Mrs. Mabel C. Wade, Cleveland, Ohio. *Patriotic Instructor*—Mrs. Aida Smith Parker, Pittsburgh, Pa. *Press Correspondent*—Miss Mary E. Elliot, Boston, Mass. *Senior Aide*—Mrs. Harriett Hendee, Portland, Ore.

The Woman's Relief Corps was organized in 1883 and has thirty-six departments, comprising 2,642 corps, with a total membership of 160,871. It has expended for assistance $4,819,994.31. The national headquarters is at Chagrin Falls, Ohio.

NATIONAL ENCAMPMENTS AND COMMANDERS-IN-CHIEF, 1902-1917.

1902—Washington, D. C. *Thos. J. Stewart, Pa.
1903—San Francisco *John C. Black, Ill.
1904—Boston *W. W. Blackmar, Mass.
1905—Boston †John R. King, D. C.
1905—Denver James Tanner, New York.
1906—Minneapolis *R. B. Brown, Ohio.
1907—Saratoga Charles G. Burton, Mo.
1908—Toledo *Henry M. Nevius, N. J.
1909—Salt Lake City Sam'l R. Van Sant, Minn.
1910—Atlantic City John E. Gilman, Mass.
1911—Rochester Harry M. Trimble, Ill.
1912—Los Angeles Alfred B. Beers, Ct.
1913—Chattanooga Wash'n Gardner, Mich.
1914—Detroit David J. Palmer, Ia.
1915—Washington, D. C. Elias R. Monfort, Ohio.
1916—Kansas City, Mo. Wm. J. Patterson, Pa.
1917—Boston Orlando A. Somers, Ind.

* Deceased. † After the death of the Commander-in-Chief the Senior Vice-Commander succeeded him.

CHILD LABOR IN THE WARRING COUNTRIES.

(A summary, by the Children's Bureau of the United States Department of Labor, Julia C. Lathrop, Chief. The data were gathered by Anna Rochester.)

The first effect in every country of the European war was a period of widespread unemployment, accompanied by tremendous pressure in the few industries which were immediately necessary for war supplies. The activities of labor exchanges were extended to facilitate the distribution of labor, and in many places labor restrictions were relaxed, since this was thought necessary to intensify production. Experience proved, however, that the relaxing of standards failed of its purpose. In England and France, and more recently in Italy, after the redistribution of labor had been effected and an actual shortage of workers had replaced the earlier unemployment, definite steps were taken by the Governments to restore the provisions of the labor law, because they were found to be essential not only to the conservation of the available workers but to the quantity and the quality of their output.

On the other hand some countries resisted from the beginning of the war any such breaking down of the labor law and maintained, or even advanced, their labor restrictions. No special exemptions are reported from Hungary; and, with the exception of a slight lengthening of legal overtime in the Australian State of Victoria, school-attendance and child-labor laws have not been relaxed in any part of Canada, Australia, or New Zealand. They have been strengthened during the war in South Australia and in four Canadian Provinces. In England and France also official proposals have been made to reorganize and extend secondary education in ways which would directly affect the employment of children and raise the standard of their protection.

Switzerland toward the end of 1915 defined more exactly the exemptions which might be granted under the special war decree of 1914 and made it plain that night work by girls under eighteen and boys under sixteen would not be permitted and that the fourteen-year age limit for employment must be observed. In other countries, where standards have been relaxed and no official action has been taken toward their restoration protests and agitation by labor organizations, physicians, or social workers are reported. In Germany and in Austria-Hungary hours of labor have been shortened in certain specified industries for the sake of conserving materials. Thus, Germany in 1915 forbade night work in bakeries; limited the work in spinning, weaving, and hosiery mills to ten hours a day and five days a week; prohibited the use of power machinery for cutting textiles; and permitted the use of power machinery for sewing, buttonholing, etc., only thirty hours a week. Hungary has forbidden night work in bakeries. Austria has withdrawn the power to grant exemptions for overtime and night work in establishments using cotton, except on urgent orders for the army.

In general the relaxing of labor standards during the war has fallen into three classes. First and most general is the lengthening of hours of work, including night work and Sunday work and more or less unlimited overtime. Some such exemptions have been reported from England, France, Italy, Germany, Austria (but not Hungary), Switzerland, Holland, and Russia. The Australian Province, Victoria, in 1914 lengthened slightly the amount of overtime permitted to women and girls, but Victoria's present limit for special overtime is shorter than that fixed in times of peace in the European countries.

Second is a lowering of the age requirement for children entering industry. In this Italy has made the most general provision, permitting boys of twelve whose fathers are soldiers to go to work without regard to the educational standard formerly required of all boys under fifteen years of age. France in 1915 admitted children of eleven years and six months, instead of twelve years, to the July examination for primary certificate which would exempt from school attendance. In England local authorities in certain districts have been excusing children from the requirements of the school-attendance law for agriculture and other "suitable" employments. In Germany special exemptions from the age limit for child labor are provided for in the emergency law of August 4, 1914, but how generally they have been granted does not appear.

In the third place women and young persons have been employed in dangerous, injurious, or heavy work formerly prohibited by law. The war legislation in Germany and Russia, for example, specifically provided for the granting of permission to women and young persons to work underground in coal mines. The Under Secretary of Arms and Munitions in France authorized the employment of girls under eighteen in Government powder plants, from which they had formerly been excluded. In addition, women have been employed in some occupations in which men only were formerly engaged and for which little or no protection was provided by law. Again, in some cases new dangers have developed for which former laws made no specific provision. Quite as important as the temporary granting of exemptions is the postponement of laws which had been passed before the war but had not yet become effective. Conspicuous examples are the Federal factory act in Switzerland, which had been passed in June, 1914, and awaited the word of the Federal Council to supersede the former law; the conventions of Berne regarding night work of young persons and hours of labor for women and the use of white phosphorus which had not taken effect in Italy when the war began; and the decree limiting the hours of labor in iron and steel industries in Germany.

EXTENT OF THE PROBLEM.

In considering the labor standards of belligerent nations during the war, it should be remembered that these standards in European countries were in time of peace lower than those accepted by public opinion and by legislation in this country. It is significant, moreover, that the British colonies which have maintained or advanced their labor standards in war time have, alone among the belligerent nations, enforced in time of peace restrictions of hours for women and children which are fairly comparable with the standards of the Federal child-labor law and the laws affecting women in the more advanced States of this country. The point which does stand out unmistakably from the foreign experience is the general realization that the labor standards achieved in time of peace are none too high to promote the efficiency of work, the intensity of output, and the general level of health which are absolutely essential to the nation's welfare in war time. The disorganization of industry and the exceptional labor conditions which have been permitted would have seriously affected the welfare of women and children even if there had been no increase in the number at work, since even before the war they were employed extensively in the European countries. But in addition new workers have everywhere been drawn into industry during the war.

In England and Wales in 1911 more than 4,800,000 women and girls were employed. This was about one-third (32.5 per cent.) of the total female population ten years of age and over. The number of children under fourteen years of age reported at work was 146,417. Of these, 10,424 were employed in agriculture. There were 34,152 half-timers, children under fourteen, who attended school part of the day and worked part of the day. The whole number of boys and girls in Great Britain ten years of age and less than fifteen was 3,499,638.

In France in 1911 more than seven and a half million women and girls were employed, 38.7 per cent. of the total female population of all ages. Nearly three and a quarter million of them were in agriculture and over two and a half million in occupations classified as industry. Of the 3,292,502 children ten to fourteen years of age 657,425 were at work, and about half of these working children were in agriculture. For the same year it is reported that 336,040 boys and girls, 286,578 under eighteen years of age, were employed in occupations subject to inspection by the Ministry of Labor; the total number of young people twelve to eighteen years of age was just short of four million.

The number of women and girls over sixteen years of age at work in Germany in 1907 was about seven and one-half million, 37.9 per cent. of the total number in the Empire. A little more than four millions of those employed were engaged in agriculture. Of the 2,441,976 boys and girls fourteen, but under sixteen

years of age, 60.1 per cent., or 1,468,982, were employed, including 666,673 agricultural workers. Of the 20,168,636 children under fourteen, 183,428 boys and 113,358 girls were employed; and 68.7 per cent. of these working boys and 81.2 per cent. of these working girls were in agriculture. In addition, 1,060,812 women sixteen years of age and over and 188,571 girls below that age were employed as household servants.

Even in Italy, where it is generally supposed that women are averse to industrial employment, the figures for 1911 show that out of a total of 13,680,201 girls and women above ten years of age, 1,402,362 were then employed in industry and nearly three millions were working in agriculture. Of the 1,861,727 boys ten to fifteen years of age, more than half were at work either in industry or in agriculture.

In the United States there was a marked increase between 1900 and 1910 in the percentage of women employed, and the latter census reports that 23.4 per cent. of the thirty-four and a half million women and girls over ten years of age were at work. Of the five and one-half million boys ten to fifteen years of age in 1910 in this country 1,353,139 were at work.

While these figures can not be used for a comparison of different countries because of variations in the basis of the statistics, they do unmistakably indicate a longer period of education for young people and a less general employment of women in industry in the United States than in Europe. Few figures are available to show how many more women and children have been drawn into gainful employment during the war by the extraordinary demand for labor which is reported for certain occupations in every country. From France, Germany, and Italy come reports of a great increase in home work, with its customary evils of long hours and low wages, in connection with army contracts for clothing and other supplies; and home work almost invariably includes the employment of children.

In all European countries the demand for children and women in agricultural work has been very great. Furloughs from school for a limited period are permitted by the school-attendance laws in France and Holland. In Russia the movement for compulsory school attendance which was under way before the war has been seriously hampered and the attendance of children who have been enrolled is reported to be more irregular than usual because of work they have to do at home and in the fields. In England certain exemptions are permitted by law and others have been granted at the discretion of the authorities. The actual number of children engaged in agricultural work can not be estimated for any country. An interesting side light on what agricultural employment of children may mean comes from Russia, where some 600 refugee children from thirteen to sixteen years of age were organized in colonies by an agency of the City Council of Moscow for the double purpose of helping the peasants in their summer work in the fields and of saving the children from the harmful influences of the capital. On the basis of a medical examination the children were divided into two groups—those able to give help on farms to a great extent and those who needed rest and recuperation. The latter, making up eight out of the nineteen colonies, also worked; but it was arranged that they could only help in the household and do "light" field work.

IN ENGLAND.

From the British Board of Education we learn that while ordinarily in Great Britain some 450,000 children pass out of the elementary schools annually at or about the age of fourteen the number was increased by approximately 10 per cent. during the year 1915. These additional 45,000 children were practically all legally entitled to leave school. Further, since September, 1914, a very large number of children who were still of compulsory school-attendance ages have been excused by the local education authorities for full-time agricultural employment or (in a few cases) for suitable light employment in cities. "Broadly speaking, it is probable that together these figures do not fully represent the total loss." On the other hand, Mr. Herbert Fisher, President of the Board of Education, stated in the House of Commons in April, 1917, that with the greater prosperity of the working classes since the war the enrollment in secondary schools has increased.

From various British sources come reports of high wages for boys in unskilled occupations and special complaint of the large increase of young boys in street trades. It is stated that the scarcity of boy labor has caused girls to enter occupations in which they have not formerly been employed, but the occupations are not specified. The Board of Trade Labor Gazette speaks also of the shifting of juvenile labor from one district to another in a way apparently unknown before the war. The number of women gainfully employed in Great Britain had increased by almost one-third between July, 1914, and January, 1917, according to reports from employers. And of the 1,072,000 women who were added to the number of wage earners during that period, all but 1,000 were said to be directly replacing men. About 147,000 of these new wage earners were in Government establishments and 270,000 in privately owned metal works. Just what proportion of these two groups are at work in munition plants is not stated. The clothing trades, which were distinctly women's occupations before the war, and the paper and printing trades report a small decrease in the number of women employed. It should be noted, however, that these figures do not include the displacement of women, estimated at about 300,000, from domestic service or from very small workshops in the dressmaking trade. Between July, 1914, and October, 1916, women railway employees had increased from 11,000 to 33,000, and women brewery workers from 8,000 to 18,000.

IN GERMANY.

Reports of increased employment of women in Germany are based on the returns of the sickness insurance funds, for in Germany practically all industrially employed women must be insured. On September 1, 1915, the number of women insured against sickness in the sick insurance funds reporting to the Imperial Bureau of Statistics exceeded by 600,000 the number insured on February 1, 1915. The increase was 120,000 for the city of Greater Berlin alone. In quoting these figures Ernst Francke refers also to an investigation of the metal industry in the Dusseldorf district before the war which found 913 women employed there; in December, 1914, the number was 6,928. He states further that in the spring of 1915 the mining establishments of Prussia engaged an additional group of 3,000 women and 8,000 children fourteen to sixteen years old. The women in the Prussian mines were employed in 1915 only above ground, but some of the children "because of the removal of part of the protective restrictions can also be employed underground. It is to be hoped that a growing care for health and safety in industry accompanies the increasing number of women and young persons employed." A news item from London states that on July 1, 1916, no fewer than 3,827,640 women were at work in the metal trades in Germany. That women's work in metal trades in Germany is not confined to the munition factories appears from such a statement as the following:

In wire factories, women are employed at wire spooling, at the wire weaving machine, and at wire drawing. In so-called "pottery" foundries women work at the machine mold for cast iron cooking pots. A smelter in Upper Silesia employs about fifty women in blast furnaces, twenty-five in coke ovens, and sixty in steel and rolling mills. These women are obliged to do Sunday and overtime work. Another smelter employs about twenty-five women at blast furnaces and about twenty at Martin furnaces and in the steel works. In still another a particularly strong woman is employed as stoker of a furnace. These are all occupations for which formerly only strong men were used.

Various other references are found to women's employment in Germany in occupations which were formerly men's and for which it is said that new restrictions should be provided in order to protect the health of the women. Unfortunately few German publications have been received since the spring of 1916 and no other figures on the employment of women and children are available. An exodus of German children from the usual blind-alley occupations is indicated by the difficulty of getting boys for odd jobs, messengers, errands, and other unskilled "nomad" work. "All young boys with any ambition now become apprentices in skilled trades because they are much needed and are paid very differently from peace-time rates; or else they become lathe workers in munition factories, or enter the postal service. Formerly the parents had to make sacrifices and pay for the instruction of the boy, but now he makes while an apprentice as much as the unskilled youthful worker used to make."

Even more incomplete are the figures available for France, Italy, and Russia. We learn from the Bulletin du Ministere du Travail, for example, that in April, nearly 50,000 industrial establishments, not including State-owned munition works or railways, tramways, mines, and quarries, had replaced by other workers more than one-fifth of the wage earners who had been mobilized. These establishments had employed before the war one and three-quarter million workers of both sexes and all ages and of these approximately 420,000 men (24 per cent.) had been called to the colors. In April, 1916, the places of some 87,800 had been filled, but how these new workers were distributed among men above military age, and women, boys, and girls does not appear. A marked increase of women workers on French railways is reported. For example, it is stated by the Journal des Debats that the percentage of women railway employees in France in November, 1916, was growing daily and had already risen to proportions varying from one in ten to one in six on different lines. From France come reports also of women's work in furnace industries. As early as August, 1915, the bulletin of the Minister of Labor states that "Certain of the new occupations in which women are employed seem injurious to their health and under normal circumstances the question would arise whether the employment of women in these occupations should not be regulated." In July, 1916, the French Government ordered that all soldiers detailed to munition work must so far as possible be replaced by women, and even earlier it had been ordered that women should be employed instead of men in office work and house service at army headquarters. In September, 1916, the Minister of Munitions stated that 300,000 women had gone into the munition works.

IN ITALY.

Similar orders were issued in Italy in circulars of August 23 and September 28, 1916, which stated that by October 31, 50 per cent. of the men of military age in the munition works must be replaced by women and boys and that by December 31 the percentage must be brought up to 80. The second circular states that of the 355,349 wage earners employed at that time in 822 munition works only 45,628, or 13 per cent., were women. By December 31, 1916, according to the report of the National Committee for Munitions published early in the current year, the number of women employed in war industries had risen to 90,000, as against 430,000 men, or to 18 per cent. of the total number of employees as compared with 4 per cent. in November, 1915. In some plants the percentage of women has risen to 90, and even 95. While emphasizing the remarkable rapidity of this increase, the report points out the necessity of a much more general displacement of men by women, discusses the growth of technical training schools for women munition workers, and expresses the expectation of a continually increasing response of Italian women to the needs of the war industries. How far this expectation has been realized, material available in this country does not yet show. As in France, the employment of women in auxiliary army services in Italy has been encouraged. Clerical work, kitchen work, laundry work, general cleaning and other work in military hospitals, and clerical work in territorial offices are especially referred to.

The only Italian figures received concerning the employment of boys during the war refer to munition works in Lombardy. They are based on reports from 660 factories employing about 100,000 workers in June, 1914, and 145,000 workers in June, 1916. The number and percentage of boys employed was small and showed little change; 1,297 boys under twenty-one, or 1.28 per cent., were employed in 1914, and 2,076 boys under twenty-one, or 1.42 per cent., in 1916. On the other hand the number of women and girls in these plants had more than tripled and the percentage of women and girls among all workers had risen from 4.77 per cent. in 1914 to 9.97 per cent. in June, 1916. This indication of the slight employment of boys in comparison with that of women and girls is borne out by the report of the National Committee for Munitions.

"It may be noted that the number of boys in comparison with women is very small in large and medium sized establishments; and greater on the other hand in unimportant ones. The reasons for this distribution of juvenile workers in contrast with that of female employees are evidently to be sought in the fact that quantitatively and qualitatively the output of boys is less than that of women, so that while the boys may be usefully employed in establishments which carry on small secondary operations they are on the other hand less adapted to take part in the large, complex, and very fatiguing processes of plants of the first importance. The economic factor doubtless also helps to determine the distribution; it is quite natural that the factories of limited range and productivity should prefer to utilize boys either on account of the low wages or because their employment exacts fewer hygienic safeguards and precautions."

The Corriere della Sera (Milan, February 2, 1917) tells us that for the advantage of pupils working in munitions factories the committee of Tuscan teachers has submitted various practical proposals to the Minister Ruffini. Among these is one to divide the school year into two periods, one of which should be reserved—from June to October—for those who have given service in the factories. An article which appeared in the Moscow Russkiia Viedomosti on July 3 (16), 1915, gives a picture of the effect of war upon women's work in Russia.

IN RUSSIA.

"Since the war the use of women's work in industries has largely increased, particularly the number of women working in metallurgical establishments which before the war did not employ women and even avoided them. At first women were employed only in the most unskilled occupations of a general character. But gradually their labor was tried in more skilled occupations at the bench and machines. The women passed the test. Moreover, the experiment showed that substitution of women for men had some economic advantages for the factories. As a result, women were employed not only from necessity, but because of profits. Women were taken on by various mechanical shops, including blacksmiths. There were factories where no women were found a year ago and now they constitute 20 to 25 per cent. of all the employees; and this percentage is growing rapidly. The more highly paid man's labor is being replaced by the cheaper woman's labor. The changes are striking. The women employing servants began to complain of scarcity of help and of the increased demands made by domestics. In the regions observed by the author the factories until now had been closed to women. The men were working and the wives taking care of the children; many workers' families had their children in high schools.

"The same thing happened in villages where the amount of land owned by peasants was insufficient and required outside earnings; men were working the whole year around, women often gave birth to children while at work, and children of tender age were also employed. At present there is a necessity greater than ever before to use women's work. Their labor is now required by the State. The consequences are complex. If the women at present plow the fields where they never did so before, it does not mean that we have come nearer to the protection of women and motherhood, to the equality of the sexes. If the women at present work in slaughter houses, blacksmith shops, carpenter shops, and other factories, it does not mean that we have solved the important questions of social legislation. On the contrary, it can be stated that in view of the increased demand for women's work the questions of social legislation become more urgent."

Other occupations in which Russian women have been largely employed during the war include various kinds of railroad work and work in inns and restaurants. The Minister of Ways of Communication, Trepov, early in 1916, issued an order permitting an increase in the number of women employees on railroads for the period of the war up to 25 per cent. of all employees. Their employment as conductors is especially referred to, and in the cities of Kiev and Odessa it is reported that classes were opened for training women as conductors. General references are found in Russian publications to the substitution of children for older workers but no data are available as to the industrial occupations in which they are most largely employed. Street trading by young children has increased and some as young as five years of age are said to be engaged in this work. A member of the City Duma of Moscow, appealing to that body to help these children, stated: "The retail sale of newspapers is mostly in the hands of growing children.

With the leaving of the adult workers for the front, their places were taken by growing boys and girls working on the streets from early morning till late at night."

In spite of her neutrality Netherlands has, of course, been deeply affected by the war. As industrial life has gradually adjusted itself to these war conditions and to the mobilization of the army, there has been on the one hand continued unemployment and on the other a slight increase in child and woman labor. This increase has been especially marked in certain industries. The proportion of women and girls among all wage earners in industrial establishments employing more than twenty-five persons rose from 20 per cent. in May, 1914, to 22 per cent. in May, 1916. The number of young children twelve and thirteen years of age who were at work had decreased in 1913 and again in 1914. The number rose again in 1915, but did not reach the total reported for 1912 or 1913 A census of all indusries shows from 1914 to 1916 an increase of 3 per cent. in the employment of boys under seventeen years of age, of 16 per cent. in the employment of girls under seventeen, and an increase of 12 per cent. in the employment of women seventeen years of age and over. The increase in the employment of men seventeen years of age and over in the same period was only 2 per cent. In the clothing trades and the metal industry, including shipbuilding, these percentages of increase are much higher.

BRITISH COLONIES.

There has been no weakening of labor laws affecting women and children in New Zealand or in any Canadian Province, and Manitoba has during the war reduced the overtime permitted to women and girls. The only alteration in factory laws for women and children in any Australian State has been an increase in overtime permitted by law in Victoria, but the present limit in Victoria is shorter than that fixed by European laws before the war. The pressure of demand for labor in these British colonies may be guessed from the large numbers of men who have gone to the front. Canada has sent from civil to military life one-nineteenth of her total population, or 440,000 men from among 8,322,000 persons of both sexes and all ages; in New Zealand, one-fourteenth of the population has enlisted, or 80,593 men from a total population of 1,160,000.

In Manitoba, Canada by act of the Legislature, 1916, overtime allowed in special cases for women and young girls in factories is reduced so that working hours may never exceed twelve hours a day or sixty hours a week, instead of twelve and one-half hours a day and seventy-two and one-half hours a week, and overtime may now be permitted on only thirty-six days in the year. The working hours may not ordinarily exceed nine per day and fifty-four per week.

In Victoria, by public general statutes of 1913 and 1914, overtime allowed in special cases to women and girls and to boys fourteen and fifteen years of age is increased so that working hours may amount to fifty-seven hours a week during eight weeks in the year, instead of fifty-one hours a week, including overtime on ten days in the year. The working hours may not ordinarily exceed eight per day and forty-eight per week.

Compulsory school-attendance laws have been maintained during the war without a lowering of the required standards in Canada, Australia, and New Zealand. This is especially significant in New Zealand, Alberta, and the Australian States—South Australia, Western Australia, and Tasmania—where attendance is compulsory under specified ages throughout the entire school term, except for children who have completed the elementary school course. The standard of school attendance laws has been raised since August 1, 1914, in Nova Scotia, Ontario, Saskatchewan and South Australia, and Manitoba passed its first compulsory school-attendance law in March, 1916. In Nova Scotia attendance is required for the entire term in all cities and towns, instead of only 120 days a year. In Ontario the local education authority may require attendance of adolescents under seventeen years of age who are exempt from attendance under the Truancy Act at day classes or night classes. Exceptions may be made if the adolescent has been granted special exemption by the board or committee of the school he would otherwise attend, or if he is sick or has a senior public school diploma. In Saskatchewan every child over seven and under fourteen is required to attend school for the whole time during which the school is open each year. Formerly children in rural districts were required to attend 100 teaching days a year and children in towns 150 days a year.

In Manitoba school attendance is required for the full term for all children seven to fourteen years of age, with exemptions for sickness, or distance from school, or completion of elementary school course. Also, the child may be excused by a justice of the peace or by the principal of the school for not more than six weeks a term if he is satisfied that the child is needed for husbandry or work at home because of poverty. In South Australia the school-attendance law is made to apply to all children from six to fourteen years of age instead of only to those from seven to thirteen years of age, and attendance is now required for the entire school term.

One of the European belligerents, Hungary, has apparently made no special war exemptions.

NEW PLANS FOR INDUSTRIAL EDUCATION.

In England and France proposals have been made not only to establish new systems of continuation schools and additional opportunities for industrial education, but also to require part-time school attendance of boys and girls who are now exempt from school-attendance laws. In England it is recommended that the school-leaving age be raised to fourteen years without exemptions and that all young people under eighteen, who are not attending the regular schools, should be enrolled in part-time classes. France does not propose to raise the school-leaving age, but a bill is pending which would require part-time attendance of girls under eighteen and boys under twenty. In presenting this bill M. Viviani referred to the fact that it would not only enforce part-time attendance of adolescents, but would incidentally secure better enforcement of elementary school-attendance provisions. The English plan is based on reports made by a special departmental committee on juvenile education in relation to employment after the war. The reports emphasize the new conception of the child's relation to education and to industry and the importance of real preparation for future work.

WAR EXEMPTIONS.

The power to grant special war-time exemptions to labor laws affecting women and children was secured by legislation or by decree during the first month of the war in Germany and Austria and in the two neutral countries, Italy and Switzerland. In France inspectors were authorized by the Minister of Labor to grant the exemptions for the national defense which were provided for in the labor code. The Russian exemption measure was not enacted until March, 1915. In England under the Factory and Workshop Act the Secretary of State possessed the power to exempt from the Factory Act establishments owned by the Crown or working for the Crown. In June, 1915, his power was extended to include other establishments. The nature of the exemptions and the extent to which they were used have varied in the different countries. In practically all, some movement for restoring standards is reported; in England, France, and Italy official action has been taken; in Austria the decree permitting overtime exemptions was cancelled for the cotton industry because there was danger of unemployment through scarcity of raw materials. From these countries and others come reports of dissatisfaction of the workers and testimony of physicians concerning the effects of excessive hours. The greater efficiency of a reasonable working day is mentioned frequently.

The Austrian exemptions do not appear to affect the age limits for employment. It should be noted that permits for night work by women and girls may be more freely granted than those for night work by boys fourteen to sixteen, because the welfare of the boys is considered important to the future defense of the state. Protests against excessive hours during the war have been made by a convention of workers. The only official action withdrawing special war exemptions has been concerned with the cotton industry and it is expressly stated that the reason for restricting hours in cotton establishments is the postponement of the unemployment that would result from a scarcity of raw materials. The

only change in labor standards reported from Hungary is a new prohibition of night work in bakeries between 6 P. M. and 6 A. M. by a ministerial order of June 24, 1916.

In France the only apparent lowering of age limits has been the admission in 1915 of children eleven years and six months old instead of twelve years old to the examination held annually in July for a primary education certificate which exempts from school attendance. It should be remembered, however, that children holding this certificate are not admitted to factory employment unless they pass the test of physical fitness. The exemptions granted in accordance with the circulars of August, 1914, seem to have been concerned chiefly with night work and overtime. In June, 1916, the night work prohibition was restored for girls under eighteen, and in January, 1917, for expectant mothers and for mothers who are nursing young babies. Other night workers are now subject to constant supervision and women who show irregular attendance because of sickness are transferred to the day shift. The three-shift system in continuous industries is recommended but not required. The compulsory school-attendance law permitted before the war exemptions amounting to three months in the year in addition to vacations. No change in these provisions during the war is reported. The age at which a primary certificate might be obtained, permanently exempting the child from school attendance, was reduced from twelve years to eleven years and six months for the examinations in July, 1915. Whether a similar reduction was permitted in 1916 does not appear.

IN GERMANY.

In Germany the special act of August 4, 1914 (No. 4,439), authorizing the Imperial Chancellor to grant exemptions from the provisions of the labor law, opened the way for an almost complete suspension of the restrictions by which women and children in industry had been protected. Available reports indicate that exemptions were granted very sparingly during the first months of the war and more frequently as the struggle progressed. The possibility of avoiding the need of exemptions by more efficient organization is referred to, but the only definite statements received from Germany about the harmful effects of the exemptions which have been granted come from social workers and workingmen. Very little information has been received since the spring of 1916. Whether the age limit for factory work has been lowered, and just what overtime has been permitted to women and children in industry, the available material does not state. Various requests for exemptions during the first months of the war were met by statements refusing exemptions so long as numbers of men were without work, except in cases of extreme need. The number of exemptions under the law of August 4, 1914, increased in the second year of the war. The only protests against war exemptions to the labor laws which have been reported come from social workers, working people, and Social Democrats. They include medical testimony to the injurious effects of overtime and night work by women and young persons.

The Secretary of State in Great Britain had, without special war legislation, power to exempt from the restrictions of the factory act establishments belonging to the Crown or working for the Crown. By an order in council in June, 1915, this power was extended to include other establishments. Under such exemptions night work, overtime, and Sunday work by women and young persons were permitted in munition works and elsewhere. In 1915 a committee was appointed to report on the health of the munition workers, and this committee recommended that the standards of the factory act should be restored and that at least night work should not be permitted to boys under sixteen or girls under eighteen years of age, Sunday work should be abolished, and the three-shift system should be introduced in all plants where operation was continuous. The reports of this committee and the report prepared for the home office by Dr. A. F. Stanley Kent, as the result of scientific experiments with industrial fatigue, emphasized the importance of moderate hours for efficiency of work and intensity of production.

Another committee having administrative powers and representing the Home Office, the Munitions Department, and the Admiralty has drafted general rulings and studied the applications for special exemptions from the factory act, weighing the demands for production, the needs of the workers, and the relation of hours to efficiency. As a result, night work and overtime by girls under sixteen have been abolished and the one day of rest in seven for women and young persons under eighteen has been restored. A general order was also issued by the Secretary of State, on September 9, 1916, fixing the limits of hours which would be permitted after the first of October without a special exemption and stating that "applications for such special orders will not in future be entertained save in exceptional circumstanecs and in respect of work of a specially urgent character.[1] This order practically reduced the amount of overtime to that permitted by the factory act before the war for certain exceptional occupations. The local education authorities in certain districts have excused children from school attendance for agriculture and other work considered suitable to their strength. Many of the local authorities have refused to exempt children, however, and the extra-legal exemptions which have been granted are greatly deplored by the general board of education, although that board sanctioned them. These exemptions, although granted in special cases only, have affected the hours of work of women and young persons under eighteen years of age. Exemptions to the school-attendance law have been permitted in certain districts for occupations other than agriculture.

In September, 1915, the Minister of Munitions, with the concurrence of the Home Secretary, appointed the Health of Munitions Workers Committee "To consider and advise on questions of industrial fatigue, hours of labor, and other matters affecting the physical health and physical efficiency of workers in munition factories and workshops." The reports of this committee recommended a return to regular labor standards and emphasize the ill effects of night work and overtime from the viewpoint of both health and efficiency. Reports on industrial fatigue, based on war conditions, were also prepared for the Home Office by Dr. A. F. Stanley Kent, of the University of Bristol. These are especially concerned with the relation of fatigue and output and emphasize the importance of a workingday of reasonable length. As an administrative measure, toward the end of 1915 an inter-departmental committee on hours of labor was set up to insure that the Ministry was fully informed as to the points at issue, and also to focus the attention of its officials on the importance of regulating the number of hours which could be worked to maintain adequate efficiency. The memoranda of the Health of Munition Workers Committee served as a basis for the committee's work. The committee includes a representative of the Home Office, who is responsible for the conditions of employment of women, girls, and boys in munition factories, and officers representing the Admiralty and the various supply departments and welfare section of the Ministry. As a result of the committee's work certain definite orders have been issued for controlled factories, eliminating night work by girls under sixteen years of age, providing one day of rest in seven for all females, and practically eliminating Sunday production in certain kinds of plants. On the ninth of September, 1916, the Home Office issued a general order applicable to "all munition factories and workshops or parts thereof belonging to or controlled by the Crown—including all controlled establishments under the munitions of war acts 1915 and 1916 (not being textile factories) which are not specifically regulated by any other order * * * and such other classes of factories and workshops engaged on munitions work as the Secretary of State may from time to time direct * * *. Hours not allowed by the factory act or the order in question are not to be worked after the first of October, 1916, unless expressly sanctioned by special order from the Home Office. Applications for such special orders will not in future be entertained save in exceptional circumstances and in respect of work of a specially urgent character." Four schemes of employment are outlined, and employers may adopt any one or any combination. No boys under fourteen or girls under sixteen are to be employed overtime. If females are employed on night shifts, they must be supervised by a welfare worker or responsible forewoman.

Scheme A (Three Shifts).—This applies to women and female young persons of sixteen years of age and over, and male young persons of fourteen years of age and over. Three shifts, none of which may be longer than ten hours, may be worked in each period of twenty-four hours.

Scheme B (Two Shifts)—This applies to women and female young persons of sixteen years of age and over and male young persons of fourteen years of age and over, provided that the employment in the night shift of girls under eighteen or boys under sixteen years of age shall be subject in each case to the approval of the superintending inspector of factories. Two shifts of twelve hours each may be worked. No requirement is laid down in the order that workers on the night shift shall change periodically to the day shift. The matter is left to the individual employers to determine in consultation with their work people. Care should be taken in selecting women and young persons for night work. They should not be put on night work indiscriminately.

Scheme C (Rearrangement of Statutory Hours)—This applies to women and female young persons of sixteen years of age and over, and male young persons of fourteen years of age and over. In the case of such women and young persons, the hours of work and intervals for meals allowed by the [factory and workshop] act may be rearranged subject to a condition that the total hours worked per week (exclusive of intervals for meals) shall not exceed sixty.

Scheme D (Overtime for Boys)—This applies to male young persons of sixteen years of age and over, provided that the superintending inspector of factories shall have power in cases where the work is of a specially urgent character to extend the application of the scheme to male young persons between fourteen and sixteen years of age. Such young persons may be employed overtime on week days other than Saturday subject to the following conditions: The total hours worked per week (exclusive of intervals for meals) shall not exceed sixty-five. The daily period of employment (including overtime and intervals for meals) —Shall not commence earlier than 6 A. M. or end later than 10 P. M. Shall not exceed fourteen hours. Provided that where overtime is worked on not more than three days in the week the period of employment may in the case of boys of sixteen years of age and over be fifteen hours. Intervals for meals amounting to not less than one and one-half hours shall be allowed during the period of employment, with an additional half hour if the period of employment is more than thirteen and one-half hours, or an additional three-fourths of an hour if the period of employment is fifteen hours. On Saturday the period of employment shall end not later than 2 P. M.

Naval Ship Repairing Work—In cases of special emergency, women, female young persons of sixteen years of age and over, and male young persons of fourteen years of age and over, employed on repair work for ships, may be employed for special hours on any day of the week on the express instructions of the senior naval officer in charge and subject to such conditions as he may lay down as regards intervals for meals and rest; provided that in any case no male young person over sixteen years of age shall be employed for more than sixty-seven and one-half hours in the week (exclusive of intervals for meals and rest). No other young person or woman shall be employed for more than sixty-five hours in the week (exclusive of intervals for meals and rest).

Miscellaneous Provisions—No woman or young person shall be employed continuously at any time for more than five hours without an interval of at least half an hour, except that where not less than one hour is allowed for dinner, an afternoon spell of six hours may be worked, with an interval of a quarter of an hour only for tea, if the factory inspector is satisfied that adequate provision is made for the worker to obtain tea in the works and for tea to be actually ready for them as soon as they stop work.

In Greece, in October, 1915, a law was passed authorizing a suspension of the labor laws under definitely specified conditions in case of mobilization. Several months earlier (December 24, 1914–January 6, 1915) the provisions concerning night work in bakeries had been suspended for fancy bakeries under specified conditions and for zweiback bakeries by special permission. This does not appear, however, to have been a war measure.

SUSPENSION OF NIGHT WORK.

In Italy, on August 30, 1914, a royal decree allowed suspensions of the night work prohibition for women and children under specified conditions, and in June, 1915, after Italy had entered the war, a decree of the Lieutenant-General suspended for the duration of the war educational requirements for soldiers' sons who were twelve years old and wished to go to work. The weekly rest law, without any war time amendment, permitted exemptions in case of force majeure or for work in the public interest; these exemptions were frequent and seem to have been applied for without due cause. It has been intended that exceptional hours should be permitted only in carefully considered cases, and one of the duties of the Medical Inspection of Industry and Labor, instituted in January, 1915, has been to give judgment on exemptions. On the other hand the budget and staff for factory inspection have been greatly reduced each year, although the police have to some extent supplemented the work of the few trained inspectors remaining. Physicians and working men and the official advisory body, the Comitato Permanente del Lavoro, have entered protests against the war exemptions, and the Government has referred frequently to the importance of safeguarding the health of women. In October, 1916, the Central Committee on Industrial Mobilization authorized the Regional Committees on Industrial Mobilization to prescribe standards of hours which would restore the safeguards of the labor law, but apparently this effected no immediate change, for several weeks later protests were again made by Deputies and Socialists. Definite measures have now been taken to secure obedience to the labor law in all auxiliary establishments. In February, the Under Secretariate of Arms and Munitions ordered the restoration of the weekly rest day in establishments working for the national defense, except in special cases for which individual permits might be secured. And in March the Under Secretary Dallolio, in reply to a question from a Socialist Deputy gave emphatic assurance that the conditions of labor in munitions plants were matters of deepest concern to the Government. A decree of March 15, 1917, extended the powers of the Regional Committees to establishments not auxiliary, if their work concerned the production of arms and munitions. The committees could prescribe limitations of hours of work; inspection service for hygiene and sanitation was to be organized. In accordance with this decree regulations were issued in April by the Under Secretariate of Arms and Munitions. These regulations limited the working hours of women and young persons to sixty a week. They also forbade the employment on night shifts of children under eighteen, and, except in absolutely exceptional cases, required the granting of one day's rest in seven. These regulations do more than re-establish pre-war labor standards in some respects the standards are even higher than those demanded before Italy entered the struggle. Women under eighteen and children must not be permitted to work on night shifts, and on these shifts the hours of labor must not exceed ten for women.

In Netherlands much of the country was placed under martial law at the outbreak of the war and this empowered the military authority to order the suspension among other laws of the general labor act (Arbeidswet), the safety act (Veiligheidswet), and the laws regulating dangerous and unhealthy trades (Hinderwet) as authorized by the martial law act of May 23, 1899 (Staatsblad, 1899, No. 128). The military commanders granted temporary exemptions to limits of hours in some plants running on war orders and permitted night work in three textile mills. All these exemptions on war orders had expired or were cancelled by November 1, 1915, except one which ran until December 1, 1915. *

Not until March 9–22, 1915, did Russia provide for any emergency exemptions from the labor laws protecting women and children. On this date the Czar, in accordance with a resolution of the Ministerial Council, issued a decree, "temporarily to amend and supplement the legal provisions in question [concerning night and underground work by women and by young persons under fifteen years in coal mines] until the conclusion of warlike operations," as follows: Persons of the female sex and such young persons of the male sex as have not reached the age of fifteen years shall be admitted to work at night and underground in the coal mines of European Russia, subject to the observance of the following rules: (1) Young male persons shall not be employed in underground work in the daytime for a period exceeding eight hours, or at night exceeding six hours, in twenty-four, subject to the condition that in the course of the working day

CHILD LABOR IN THE WARRING COUNTRIES—*Continued.*

following after night work young persons shall not be readmitted to work for a period of twelve hours from the cessation of such night work. (2) Persons of the female sex having been employed at night shall not be employed again earlier than midday on the day following the night work. (3) Persons of the female sex and young male persons shall only be admitted to night and underground work on condition that they are first shown, by an examination undertaken for the purpose by the mines medical officer, or, where there is no such person, by the rural or municipal medical officer, to be suited, from the point of view of their strength and health, for the said work. And—(4) It shall rest with the local mining authorities, in agreement with the governors concerned, to issue special lists of processes in which persons of the female sex and young persons may be employed.

On October 19—November 1, 1915, an Imperial decree provided for the granting of special exemptions to the laws regulating the hours of women and young persons in factories working for the national defense. It does not permit the employment of children below the legal age limit. No information is available about the administration of these exemptions or the frequency with which they were granted. The only note of protest against child-labor conditions is found in a conference on the care of children where legislative measures were discussed and it was considered desirable to raise the age limit for factory work from twelve to fourteen years, to reduce the maximum hours for children to six per day, and to prohibit night work and factory work detrimental to the health of children.

IN SWITZERLAND.

In Switzerland, under the authority of the general emergency decree of August 3, 1914, the Federal Council on August 11, 1914, stated that derogations from the labor laws affecting women and children might be permitted in special cases where this is the sole means of enabling work to continue. In November and December, 1915, the Federal authorities specified in detail the exemptions which might be allowed by the Cantonal Governments or by the district or local authorities. (a) The extension of the eleven-hour working day on not more than eighty days annually by not more than two hours a day for persons of both sexes over sixteen years of age. (b) The extension of hours of work annually on not more than twelve days preceding Sundays and holidays (nine hours only permitted by factory law). (c) Work on not more than thirty nights annually for men eighteen years of age and over, but in no case for women. (d) Work on not more than twelve Sundays annually for men eighteen years of age and over, but in no case for women. In these cases the Cantonal Governments may require payment of 25 per cent. additional wages for this overtime work. The exemptions, which may be granted by the Cantonal Governments to individual factories, are: (a) To employ women over eighteen and male persons over sixteen at night. (b) To organize work in shifts and work without interruption by day (this system with moderate hours is preferred to allowing overtime to an excessive degree). (c) To reduce the midday break to less than one hour. (d) To extend overtime, Sunday, and night work beyond the limits specified in the exemptions allowed to factories collectively. In these cases the payment of 25 per cent. additional wages is required for all overt me work and 50 per cent. additional for all night or Sunday work. The Federal factory inspector is to be notified of all exemptions allowed and the department may revoke or lim t exemptions. Current exemptions contrary to these provisions must be brought into conformity with them by December 15, 1915, or withdrawn altogether.

The only protest against the granting of exemptions referred to in the official circulars is a petition from the Swiss Federation of Trade Unions, mentioned in the circular of December 6, 1915, which urged that "even during the war, deviations from the provisions of the exist ng factory act should not be allowed in any case." The Government asks the Cantonal Governments to report in Feburary, 1916, on the enforcement of the resolution of November, 1915, and to state whether its retention is still needed. Organizations of employers and workers will also be requested to express their opinions on this point.

COST OF HEALTH SUPERVISION IN INDUSTRY.

(By the Conference Board of Physicians on Industrial Practice.)

THE compilation is based on data for 1916 as reported by ninety-nine industrial plants located in fifteen States. The total average number of employés was nearly 500,000; the average number per plant was 5,000, the maximum over 37,000, the minimum 141.

SUMMARY.

INDUSTRY.	Number Represented.	Employés Supervised.	Total Cases of All Kinds.	Medical Cost.	Medical Supervision Per Employé.
Metal trades	47	294,646	1,988,991	$541,771	$1.84
Rolling mills	7	49,317	358,574	137,047	2.78
Smelting and refining	1	1,270	2,832	6,932	5.46
Light and power	7	24,921	49,046	92,601	3.72
Transportation	5	35,795	81,591	69,633	1.95
Chemicals	6	10,572	78,744	34,797	3.29
Food	5	13,650	69,565	39,875	2.92
Rubber	5	27,462	234,060	76,089	2.77
Textiles	4	8,939	67,380	24,177	2.70
Paint	2	4,023	10,255	29,635	7.37
Leather	2	3,026	9,440	6,102	2.02
Publishing	2	3,358	6,742	3,473	1.03
Coal mining	1	2,454	2,842	4,637	1.89
Gold mining	1	2,500	62,126	35,500	14.24
Coal and iron mining	1	11,000	131,989	130,000	11.82
Miscellaneous	3	2,611	11,019	6,126	2.35
Total	99	495,544	3,165,114	$1,238,485	*$2.50

* The average annual cost per employé was $2.21.

TORRENS LAND TITLE REGISTERING SYSTEM.

The system of registering the ownership of real property, known as the Torrens Law, is now in force in nineteen States, which, with the year of adoption, are as follows: California, 1897; Illinois, 1897; Massachusetts, 1898; Oregon, 1901; Minnesota, 1901; Colorado, 1903; Washington, 1907; New York, 1908; North Carolina, 1913; Ohio, 1914; Mississippi, 1915; Nebraska, 1915; South Carolina, 1916; Virginia, 1916; Georgia, 1917; Utah, 1917; North Dakota, 1917; South Dakota, 1917; Tennessee, 1917.

WIDOWED MOTHERS' PENSIONS.

(For tabulated provisions of the various acts prior to 1917, see the ALMANAC of that year.)

Maine—The recent Mothers' Pensions Law enacted in Maine provides, first, that every city and town shall, subject to certain provisions specified, render suitable and useful aid to any mother residing therein with a dependent child or children under the age of 14 years, who needs and desires such aid to enable her to maintain herself and children in her home and who is fit and capable, mentally, morally and physically to bring up her children. It is not necessary that mothers have a settlement in the State provided they have resided in Maine for not less than five consecutive years next prior to their application. Aid may be in money or supplies and shall not exceed the value of ten dollars a month to a mother with but one child under the age of 14 years; further allowance not exceeding four dollars a month is provided for each additional child. A State board is created which shall consist of the members of the State Board of Charities and Correction. There is also to be a Municipal Board consisting of the Overseers, or Board of Overseers of the Poor unless towns may provide for a special Board. Both boards are to serve without compensation. The mother makes application first to the Municipal Board, and this board is to investigate the justness of the application and claim and file with the State Board a copy of said application and a written report embodying the results of their investigation and recommendations, and the State Board makes final decision.

If, for any reason, the Municipal Board fails to act upon the application of the mother within a period of thirty days, the State Board may make its own investigation. In case the dependent mother has a husband living apart from her the Municipal Board is to advise the mother to proceed against him under the provisions of the statute made and provided in case of desertion, and until such proceedings have been begun and prosecuted in good faith to the satisfaction of the Municipal and State Boards, no aid shall be given under the provisions of this act. Towns and cities furnishing aid to dependent mothers are to be reimbursed by the State to the amount of one-half of the expense actually incurred after approval by the State Board. If the mother has a settlement in some other town the amount of the expenditure incurred by the town in which the mother was living when she made the application for aid may be recovered in an action against the town where the mother has a legal settlement. The sum of $35,000, $10,000 for 1917 and $25,000 for 1918 is appropriated for this purpose.

Texas—This law approved by the Governor, March 29, 1917, runs as follows:

1. Any widow who is the mother of a child or children under the age of sixteen years and who is unable to support them and to maintain her home, may present a petition for assistance to the Board of County Commissioners of the county wherein she resides.

2. Such petition shall be verified and shall set forth the following: (*a*) Her name, the date of the death of her husband, the names of her children, and the dates and places of their birth and the time and place of her marriage. (*b*) Her residence and the length of time that she has been a resident of the State, the length of time she has lived at said residence and the address or addresses of her place or places of abode for the previous five years, and the date; as near as possible, when she moved in and when she left said place or places of residence. (*c*) A statement of all the property belonging to her and to each of her children, which statement shall include any future or contingent interest which she or any of them may have. (*d*) A statement of the efforts made by her to support her children. (*e*) The name, relationships and addresses of all her and her husband's relatives, that may be known. (*f*) The names, sex, and age of each of her children, giving date and place of birth of same.

3. A copy of the petition provided for in section two hereof and a notice of the time and place when it will be presented to the Board of County Commissioners must be served on or mailed to the County Judge as chairman of the board at least five days before the time the board shall be requested in said petition to meet to consider the same.

4. Upon the return of the petition and notice the Board of County Commissioners shall examine under oath all who desire to be heard; provided, however, that the board may, in its discretion, issue subpoenas for the attendance of witnesses and adjourn the hearing from day to day; and provided, however, that the board may refer said matter to a commissioner to be appointed by the board to hear such witnesses. Said commissioner shall make a report to the Board setting forth the facts as proven before him.

5. If, upon the completion of the examination provided for under section four hereof, the board concludes that, unless relief is granted, the mother will be unable to properly support and educate her children, and that they may become a public charge, it may take an order directing that there shall be paid to the mother, monthly, out of the county funds, the following amounts, for the maintenance and support of the children under sixteen years old; not more than twelve dollars for one such child; eighteen dollars for two children; and four dollars per month additional for each additional child; and it is provided further that said allowance or relief shall be discontinued after said child or any of said children, as mentioned in section one of this act, has reached the age of sixteen years.

6. It shall be the duty of the Board of County Commissioners to see that any widow receiving an allowance as provided under this act is properly caring for her children, that they are sufficiently clothed and fed, and when it is found she is not properly caring for her child or children, or that she is an improper guardian for such child or children, or when the board shall find that she no longer needs such support as is afforded by said allowance, the board shall thereupon revoke or cancel any order made pursuant to this act, at any time with or without notice, and in lieu thereof make any order that in the judgment of the board may protect the welfare of the child or children.

7. Provided that the Commissioners Court shall have the right to refuse any and all applications for allowance under this act, and their action in so doing shall be final and not subject to review by any court.

8. Provided that no person shall be entitled to receive allowances under the terms of this act until after they have been a bona-fide resident of the State of Texas for five years and the county in which they make their application for at least two years.

9. The fact that many widowed mothers of this State are without sufficient means of support for themselves and their children creates an emergency and an imperative public necessity requiring that the Constitutional rule, which provides that bills shall be read on three several days shall be suspended, and said rule is suspended, and this act shall take effect and be in force from and after its passage, and it is so enacted.

NATIONAL WOMEN'S TRADE UNION LEAGUE OF AMERICA.

The object of the league is to promote among woman wage-earners organization into the trade unions of the American Federation of Labor.

President—Mrs. Raymond Robins. *Vice-President*—Miss Melinda Scott. *Secretary-Treasurer*—Miss Emma Steghagen. Headquarters, 166 West Washington Street, Chicago, Ill.

ESTIMATED RECEIPTS AND DISBURSEMENTS OF UNITED STATES GOVERNMENT FOR FISCAL YEAR 1917-1918.

(Submitted to Congress by Secretary of Treasury McAdoo, December 3, 1917.)

THE annual report of the Secretary of the Treasury contains the following estimates of the receipts and disbursements of the Government for the current year:

RECEIPTS.

Ordinary receipts—from customs..	$220,000,000
From internal revenue—	
Miscellaneous.....	$973,000,000
Excess-profits tax.....	1,226,000,000
Income tax—corporations....	535,000,000
Individuals.....	666,000,000
	$3,400,000,000
From sales of public lands.....	1,800,000
From miscellaneous sources (including $40,000,000 increased postage).....	265,000,000
Total estimated ordinary receipts.....	$3,886,800,000
Panama Canal:	
Estimated receipts from tolls, etc.	$7,000,000
Public debt—First Liberty loan of 1917 (less amount thereof received in 1917).....	$533,665,000
Second Liberty loan of 1917.....	3,808,766,150
One-year Treasury notes.....	9,849,000
Deposits to retire Federal Reserve bank notes and National bank notes.....	4,000,000
War-savings certificates (estimated).....	663,200,000
Deposits for postal-savings bonds	1,218,800
Additional bonds authorized by law to be issued during the year.....	3,666,233,850
Total estimated public debt receipts.....	$8,686,932,800
Grand total estimated receipts.....	$12,580,732,800

DISBURSEMENTS.

For civil establishment:	
Legislative establishment.....	$15,164,000
Executive proper, including Tariff Commission.....	11,450,000
State Department.....	7,568,000
Treasury Department proper....	77,112,000
Public buildings, construction and sites.....	12,025,000
War-risk insurance.....	145,300,000
War Department proper.....	10,417,000
Department of Justice.....	11,777,000
Post-Office Department proper..	1,852,000
Navy Department proper.....	1,834,000
Interior Department proper.....	36,483,000
Department of Agriculture.....	51,354,000
Department of Commerce.....	16,275,000
Department of Labor.....	5,617,000
Shipping Board.....	901,129,150
Food and Fuel Administration..	152,500,000
Council of National Defense....	500,000

DISBURSEMENTS—*Continued.*

For civil establishment:	
Interstate Commerce Commission.....	$5,616,000
Other independent offices.....	4,138,950
National security and defense...	*73,141,800
Expenses of loans†.....	22,316,000
Increase of compensation.....	15,000,000
District of Columbia.....	15,000,000
Total civil establishment.....	$1,593,569,900
For War Department—Military establishment (including $8,668,000,000 for war purposes).	$8,790,798,000
Rivers and harbors.....	35,080,000
Miscellaneous War, Civil.....	7,972,000
	$8,833,850,000
For Navy Department (including $1,300,000,000 for war purposes):	
Naval establishment, exclusive of building programs..	$966,150,000
Navy building program, new..	295,000,000
Navy building program, prior years.....	205,000,000
	$1,466,150,000
For Indian service.....	20,930,000
For pensions.....	160,000,000
For interest on the public debt‡...	241,795,323
Total estimated ordinary disbursements.....	$12,316,295,223
Special disbursements:	
Purchase of obligations of foreign governments.....	§$6,115,000,000
Panama Canal:	
Disbursements for the canal....	23,593,000
Public debt:	
Certificates of indebtedness....	$285,632,732
One-year Treasury notes.....	9,849,000
Retirements of bank notes.....	25,000,000
Miscellaneous redemptions of the debt.....	50,000
Amount of redemption of bonds necessary to offset estimated issue of postal savings bonds January 1, 1918.....	500,000
Total estimated public-debt disbursements.....	321,031,732
Grand total estimated disbursements.....	$18,775,919,955
Estimated excess of ordinary disbursements over ordinary receipts, fiscal year 1918.....	$8,429,495,223
Estimated excess of total disbursements over total receipts, fiscal year 1918.....	6,195,187,155

* Unallotted balance on November 3, 1917. † Exclusive of cost of any loans that may be hereafter authorized. ‡ Exclusive of interest on any loans that may hereafter be authorized. § Total authorized purchases of obligations of foreign Governments, $7,000,000,000, of which $885,000,000 were purchased in the fiscal year 1917.

Secretary McAdoo, in his annual report to Congress, December 3, 1917, reviewed the first and second Liberty loans, and stated that to the first there was subscribed a total of $3,035,226,850, an oversubscription of $1,035,226,850, by more than 4,000,000 persons, and to the second a total of $4,617,532,300—an oversubscription of $1,617,532,300—by approximately 9,400,000 persons. Referring to the issues of Treasury certificates of indebtedness the Secretary states that to November 1, there had been issued a total of $3,388,698,000, of which a large part have matured and been cancelled.

Concerning the Federal Reserve System the report says: America's entrance into the war was accompanied by no shock or financial panic, nor was there the slightest flurry in financial circles when the decision was announced. Happily for America, the Federal Reserve System was established in 1914. It has been subjected to supreme tests, both preceding and following the declaration of hostilities, and has measured up to every expectation and to every requirement. The Federal Reserve System during the past year has grown enormously, while widening materially the general scope of its activities and usefulness. The total assets of the twelve Federal Reserve banks on November 17, 1916 amounted to $943,419,000. On November 16, 1917, after the expiration of three years, the assets of these banks amounted to $3,012,406,000. The gold held by the Federal Reserve banks and the Federal Reserve agents, which a year ago amounted to $674,103,000, on November 16, 1917, had reached the enormous sum of $1,584,328,000.

LOANS TO FOREIGN GOVERNMENTS.

Loans to foreign Governments up to November 1, have been made as follows:

COUNTRY.	Loans and Credits Agreed Upon.	Loans Made.	Bal's Under Established Credits.	COUNTRY.	Loans and Credits Agreed Upon.	Loans Made.	Bal's Under Established Credits.
	Dollars.	*Dollars.*	*Dollars.*		*Dollars.*	*Dollars.*	*Dollars.*
Gt. Britain..	1,425,000,000	1,425,000,000	.....	Belgium....	58,400,000	54,500,000	3,900,000
France.....	820,000,000	820,000,000	.....	Serbia.....	3,000,000	3,000,000	.....
Italy.....	500,000,000	255,000,000	245,000,000				
Russia*....	325,000,000	159,700,000	165,300,000	Total....	3,131,400,000	2,717,200,000	414,200,000

* Of the credits and loans in favor of the Russian Government, $5,000,000 represents a loan to the Roumanian Government, the advance being made in this manner through the Russian Government in the absence of a Roumanian representative in the United States who could negotiate a direct loan to his Government.

THE STOCK OF GOLD.

"The gold monetary stock (coin and bullion used as money) in the United States on November 1, 1917, is estimated at $3,041,500,000. The increase in the past 10 months has been $174,500,000; in the past three years $1,236,500,000; while in the past five years it has been $1,161,333,000. In five years the portion of the world's gold monetary stock held by the United States has increased from approximately one-fifth to more than one-third."

According to the Treasury estimates, engineer operators, including the equipment of the corps and railroad and other construction for the expeditionary force in France, will cost $892,000,000 in 1919, based on providing for engineer operations of 1,500,000 men. Regular equipment is estimated at $135,000,000. For this work Congress appropriated in the first session of 1917 the sum of $1,174,000, but a deficiency of $12,100,000 was incurred in outfitting the ten special railway regiments alone. Congress already had provided $94,500,000 for engineer operations this year, but deficiency items totalling $186,000,000 have been submitted for construction work to be accomplished by the force in France. Equipment for seventy divisions, or approximately 1,000,000 men, was purchased within 350 hours after the declaration of war. It included 8,700,000 articles, among them four miles of pontoon bridges. Every unit sent to France took its full engineer equipment with it.

The largest single item in the War Department estimate is $3,332,445,122.57 for fortifications, guns and other works of defense and their ammunition. Next comes the estimate of $2,224,335,001.24 for supplies, services and transportation to be furnished by the Quartermaster Corps. Third is the estimate of $1,138,-249,314.77 for the signal service, of which $1,032,294,260 is for the aviation section of the army. Next is the sum of $1,003,933,676.04 for pay and the traveling expenses of the army. Exhibits attached to the pay estimates show that during the fiscal year 1919 the army expects to have 99,818 officers and 1,606,353 men, to be distributed as follows:

OFFICERS.

Line officers.....	62,000	Quartermaster Corps.....	8,300
General Staff.....	347	Medical Department.....	14,000
Adjutant General's Department....	281	Judge Advocate General's department.....	300
Inspector General's Dpartment....	246	Signal Corps.....	11,941
Engineer Corps.....	400	Insular Affairs Department.....	3
Ordnance Department.....	2,000		

ENLISTED MEN.

Of the line.....	1,208,300	In Signal Corps.....	153,945
In Ordnance Department.....	20,000	In Medical Department.....	124,108
In Quartermaster Corps.....	100,000		

OTHER ESTIMATES.

Construction of gun and mortar batteries.....	$3,241,000	Alteration and maintenance of mobile artillery.....	$310,500,000
New mountain, field and siege cannon, (including $83,399,697 for motor trucks and tractors).....	225,000,000	Proving grounds' maintenance and operation.....	1,000,000
Ammunition for mountain, field, and siege cannon, (including $842,304,-856 for powder, $849,855,542 for metals, $568,654,744 for acids and chemicals, and $147,718,213 for machines and their parts).....	2,672,000,000	Operation of new ammonia plant...	1,100,000
Seacoast cannon.....	12,200,415	Operation of new nitric acid plant..	200,000
Ammunition for seacoast cannon...	6,060,000	Operation of new sodium cyanide plant.....	300,000
		Terminal storage and shipping facilities.....	29,000,000
		Storage facilities at armories and arsenals.....	37,000,000

The estimate of $1,003,933,676 for the pay of the army includes $142,943,400 for officers of the line, $3,500,000 for extra pay for these officers, $478,695,627 for enlisted men of the line, $8,520,000 for additional pay for the length of service of these men, $7,873,800 for 20,000 enlisted men for the Ordnance Department, $39,369,000 for 100,000 enlisted men for the Quartermaster Corps, $69,606,607 for 153,945 enlisted men of the Signal Corps, $49,146,078 for 124,108 enlisted men of the Medical Department, $19,197,900 for 8,300 officers of the Quartermaster Corps, $32,382,000 for 14,000 officers of the Medical Department, $13,808,920 for army nurses, $27,619,533 for 11,941 officers of the Signal Corps, and $10,030,800 for increase of pay of these officers for aviation service. The estimates call for $17,207,341 for the 10 per cent. increase of pay which Congress has authorized for all army officers on foreign service, and $56,414,355 for the 20 per cent. increase Congress has allowed for enlisted men on foreign service, a total of $73,621,696. The item for the subsistence of the army calls for the appropriation of $298,405,655, of which $268,850,537 is to be spent for the purchase of subsistence for issue to troops, including reserve supplies. The ordnance items start with $25,500,000 for current expenses of the Ordnance Department, of which $696,733 is for auto trucks, and $108,-330 for horses. For the manufacture and purchase of ammunition for small arms and hand use $390,000,000 is asked. For small arms target practice $75,200,000 is asked, to train men to shoot during the second year of the war. In this target practice, it is estimated, the army will shoot away $33,900,449 worth of metal, $11,707,158 worth of guns, shells, and cartridges will be used, and $12,203,350 worth of powder will be utilized.

For making arms at national armories $50,000,000 additional is asked, of which $15,525,665 will be spent on pistols, revolvers, and rifle parts. Besides this $93,400,000 is wanted for overhauling ordnance, stores and supplies, and making new ordnance stores to fill requisitions from troops. Congress is asked for $237,144,000 for automatic machine guns, of which $43,504,040 is to be spent on armored motorcycles. The sum appropriated by Congress for the purchase and making of machine guns for the current fiscal year of 1918 was $291,177,000. Another item is $75,550,000 for armored motor cars, including tanks.

The cost of improvement and maintenance of harbors and waterways is estimated at $29,515,697 for

RECEIPTS AND DISBURSEMENTS UNITED STATES GOVERNMENT—*Continued.*

1919. A reduction of $5,000,000 from 1917. The estimate for the Mississippi River is $12,112,000, for the Ohio $5,006,000, and for the harbor of New York, $3,010,000, which includes provision for improvements on the Hudson and East Rivers, estimates for the latter waterway amounting to $2,500,000. Harbor estimates include:

Boston, $40,000; Baltimore, $300,000; Galveston, $300,000; Oakland, Cal., $100,000; Los Angeles, $100,000; Lake Erie, $50,000; Lake Superior, $21,000; Lake Michigan, eastern shore, $70,500, western shore $121,350; Lake Huron, $113,000, including $106,000 for completing harbor of refuge at Harbor Beach; Tonawanda Harbor, N. Y., and Black Rock Channel, $310,000.

AVIATION ESTIMATES.

The total sum asked for aviation by Major-Gen. Squier, the Chief Signal Officer of the army, is $1,032,294,260, while $105,946,054.77 is for other objects in which the signal service is interested.

The principal items are $553,289,120 for extra engines and spare parts for aircraft, $235,866,000 for airplanes and hydroplanes, and $77,475,000 for machine guns for airplanes. The items in detail are:

Aeronautical salaries of instructors in flying, instructors in ballooning, aeronautical mechanical engineers, inspectors of airplanes and airplane engines, factory inspectors, consulting engineers, accountants, clerks, bookkeepers, draughtsmen, plant engineers, photographers, military storekeepers, and wages of packers, chauffeurs, aviation mechanicians, model and instrument makers	$9,012,600
Wages	544,200
Lighter-than-air equipment	8,171,000
Spare parts and accessories	47,173,200
Airplanes and hydroplanes	235,866,000
Extra engines and spare parts	553,289,120
Maintenance, upkeep, and operation of air squadrons	20,950,000
Aero stations in United States	20,400,000
Aero stations in Panama	$9,420,000
Aero stations in Hawaii	4,420,000
Maintenance of buildings in Europe	9,127,000
Purchase of land	16,700,000
Warehouse and supply depots	5,595,000
Aviation clothing equipment	1,358,440
Expenses of officers, enlisted men and civilians on special duty	67,200
Vocational training	120,000
Mileage to officers and travelling expenses of civilian employés	3,050,000
Schools of military aeronautics	8,050,000
Machine guns for airplanes	77,475,000
Development of new types of airplanes and engines	2,000,000
Contingent expenses	3,405,500
Construction	100,000
Total Aviation	$1,032,294,260

The $105,946,054.77 the signal service asks for purposes other than aviation, includes $46,163,733.39 for mobile army equipment, $1,369,089.60 for radio equipment, $21,708,877.50 for motor vehicles, and $35,191,914.28 to restock and maintain signal supply depot in France. The item of $9,012,600 for aeronautical salaries calls for 376 instructors of flying—four at $5,400, four at $5,200, thirty-two at $4,800, twenty-four at $4,200, ninety-two at $3,600, twenty-four at $1,509, and 196 at $1,200. Part of this sum will be spent on the employment of thousands of inspectors of airplanes under construction. The estimates call for ten inspectors of airplanes and airplane engines at $3,000 each, forty at $2,400, 100 at $2,000, 1,500 at $1,800, 800 at $1,600, 950 at $1,400, and 600 at $1,200 each, a total of 4,000 inspectors. There are also estimates for seventy-five factory inspectors at $2,000 each, sixty at $1,800, and 140 at $1,400. General Squier's estimates of $1,138,240,314.77 for the Signal Corps do not include the items for the pay of officers and men estimated for by the Quartermaster-General.

Pay of 11,941 officers	$27,619,533.00
Aviation increase	10,030,800.00
Additional pay for length of service	100,000.00
Pay of 153,945 enlisted men	$60,606,607.05
Aviation increase	4,916,800.00
Additional pay for length of service	150,000.00

THRIFT STAMPS.

THE nation-wide sale of war savings certificates, or thrift stamps, as they are popularly called, resulted in the distribution of several million among the people. Thousands too poor to buy Liberty Bonds invested in the stamps. The sales campaign was inaugurated December 3 by Secretary of the Treasury McAdoo, with the assistance of the war-saving's committee, consisting of Frank A. Vanderlip, New York, Chairman; Mrs. George Bass of Chicago; Frederic Delano, of Chicago; Henry Ford of Detroit; Eugene Meyer Jr., of New York, and Charles L. Baine of Boston. Any person may invest amounts as small as 25 cents at a time at post-offices, banks, or trust companies, at most railroad stations, stores, and factories, and at many other public places where accredited persons act as authorized selling agents.

At the average 1918 selling price such investments in certificates will yield 4 per cent. interest, compounded quarterly. The certificates will be dated January 2, 1918, and will mature January 1, 1923, or five years after date. No person may purchase at one time more than $100 worth or hold at one time more than $1,000 worth of these certificates. These obligations of the United States will be evidenced by stamps of two denominations—a war-savings stamp costing from $4.12 to $4.23, according to the month in which purchased, and having a maturity value of $5 and a thrift stamp costing 25 cents. During December, 1917, and January, 1918, war-savings stamps sold and will sell for $4.12 each. At the beginning of each of the succeeding months of 1918, starting February 1, the cost of a stamp will increase 1 cent per month. All war-savings stamps issued during 1918 will mature on January 1, 1923, when they will be redeemed at $5 each. The difference between the purchase price paid at any time during 1918 and $5 represents the interest the Government will pay the holder. With the first war-savings stamp bought the purchaser obtains without expense a war-savings certificate containing spaces for twenty such stamps. If the twenty spaces are filled during January, 1918, the cost to the purchaser will have been $4.12 for each stamp or $82.40 for the filled certificate and on January 1, 1923, the Government will redeem the certificate at $100, giving the holder a net profit of $17.60 for the use of his money.

Thrift stamps costing 25 cents each are from time to time as purchased to be affixed to thrift cards, which will be supplied without cost. Thrift stamps will not bear interest, but a thrift card when filled at a cost of $4 may be exchanged for a war-savings stamp bearing interest at 4 per cent., compounded quarterly, merely by turning the card in to the post-office, bank, or other sales agency and paying the difference between $4 and the current price of a war-savings stamp. The privilege of surrendering a certificate to the Government and receiving the cost thereof plus interest at the rate of about 3 per cent. has been provided for the convenience of those who may have bought certificates and later on find themselves in need of their money. The Government asks that this privilege be exercised only in cases of necessity.

Upon ten days' written notice, after January 1, 1918, postmasters pay off certificates at their cost to purchasers, plus an increase of 1 cent a month on each war-savings stamp on the certificates surrendered, as shown by a table of value appearing on the certificate. Money derived from war-savings investments is used to meet the expenses of the war. The greater part of these funds will be expended within the borders of the United States.

COUNCIL OF YOUNG MEN'S HEBREW AND KINDRED ASSOCIATIONS.

The council has a constituent membership of three hundred associations and institutions throughout the English speaking world. There are 294 Young Men's Hebrew Associations, Young Women's Hebrew Associations, Hebrew Institutes, Educational Alliances and Jewish Settlements in the United States, five Young Men's Hebrew Associations in Canada and one Young Men's Hebrew Association in Australia.

The *President* of the Council is Judge Julian W. Mack, of Chicago. *First Vice-President*—Judge Samuel Greenbaum, of New York. *Second Vice-President*—Jacob Newman, of New Orleans. *Secretary*—Felix M. Warburg, of New York. *Treasurer*—Judge Irving Lehman, of New York. *General Secretary*—Samuel A. Goldsmith.

Trustees—Dr. Cyrus Adler, Philadelphia, President; Adolph Lewisohn, New York, Treasurer; Julian W. Mack, Chicago; Jacob H. Schiff, New York; Herbert N. Straus, New York, Secretary. *Managers*—I. W. Bernheim, Louisville; Alfred M. Cohen, Cincinnati; David A. Ellis, Boston; Harry Fischel, New York; Samuel Greenbaum, New York; First Vice-President. Isaac Hassler, Philadelphia; Irving Lehman, New York, Treasurer; Jacob M. Loeb, Chicago; Julian W. Mack, Chicago, President; Louis Marshall, New York; Jacob Newman, New Orleans, Second Vice-President; M. C. Sloss, San Francisco; Mrs. I. Unterberg, New York; A. Leo Weil, Pittsburgh; Felix M. Warburg, New York, Secretary.

The offices of the council are at 31 Union Square West, New York.

Militia of New York State.

NEW YORK GUARD.

THE disbandment of the National Guard of the State having been effected by its draft into the service of the United States and by the discharge of its members from further service in the National Guard by the Federal authorities, a new military force known as the New York Guard has been organized under orders of the Governor and in compliance with Section 3, Article XI. of the State Constitution, which prescribes that there shall be maintained at all times a force of not less than ten thousand enlisted men, fully uniformed, armed, equipped, disciplined and ready for active service.

The New York Guard is commanded, under the orders of the Governor, by Brig.-Gen. Charles H. Sherrill, with headquarters at No. 23 Washington Avenue, Albany, and consists of 3 battalions of field artillery, 4 squadrons of cavalry, 1 signal battalion, 1 engineer regiment, 3 coast artillery organizations, 13 regiments and 2 battalions of infantry, 4 field hospitals, 4 ambulance companies and 1 service company, Q. M. C.

Commander-in-Chief, Governor Charles S. Whitman, Albany, N. Y.

Staff of the Governor—Brig.-Gen. Charles H. Sherrill, the Adjutant-General of the State; Major Francis L. V. Hoppin, Military Secretary to the Governor; Aides, detailed, Lieut.-Com. Louis M. Josephthal, Naval Militia; Lieut.-Col. Howard E. Crall, 7th Infantry, N. Y. G.; Major James A. Blair, Jr, Reserve List; Capt. Joseph J. Kingsbury, Reserve List; Capt. Alvan W. Perry, Reserve List.

Militia Council—Brig.-Gen. Charles H. Sherrill, the Adjutant-General; Commodore Robert P. Forshew, Commanding Officer, Naval Militia.

Headquarters New York Guard—Office at No. 23 Washington Avenue, Albany; Brig.-Gen. Charles H. Sherrill, commanding; Lieut.-Col. Arthur F. Schermerhorn, Chief of Staff; Major James N. Connolly, Chaplain; Major Michael Friedsam, Quartermaster-General; Major Howard C. Smith, Inspector-General; Major Schuyler Colfax, Inspector Rifle Practice; Lieut.-Col. George W. Burleigh, Aide; Major Louis M. Greer, Aide; Major Charles J. Lamb, Aide; Major Seymour P. White, Aide; Major William C. Barry, Aide; Capt. Chester B. McLaughlin, Jr., Aide; Second Lieut. Norvin H. Green, Aide; Second Lieut. Malcolm D. Sloane, Aide.

Organizations attached to Headquarters New York Guard—1st Provisional Regiment, N. Y. G., on active duty guarding the New York City Aqueduct, under command of Col. John B. Rose, 1st Infantry, N. Y. G.; strength 1,500 officers and men; 2d Provisional Regiment, N. Y. G., on active duty guarding railways, waterways, bridges and public buildings, under command of Brig.-Gen. F. DeForest Kemp, 3d Brigade, N. Y. G.; strength 650 officers and men. Service Company, Q. M. C., at the State Arsenal, New York City; strength 53 officers and men. The provisional regiments mentioned above are formed of officers and men who volunteered for this service from regular organizations of the New York Guard.

All organizations of the New York Guard, except those mentioned in the preceding paragraph, are organized into three brigades, as follows:

FIRST BRIGADE.

1st Brigade—Headquarters, 105 East 34th Street, New York City: Brig.-Gen. George R. Dyer, commanding; Lieut.-Col. Charles J. Ahern, Q. M. C., Acting Adjutant; Major Samuel A. Brown, Medical Officer; Capt. Louis T. Montant, Aide; Capt. William W. Barbour, Aide; Capt. James P. Askin, Aide; First Lieut. Walter S. Gurnee, Jr., Q. M. C.; strength 6,500 officers and men.

Organizations Attached.

1st Battalion, Signal Corps, 104 East 34th Street, New York City, Major James C. Fox, commanding.

22d Engineers, 216 Fort Washington Avenue, New York City, Col. Harry H. Treadwell, commanding. Battalion of 4 companies at Mount Vernon, attached.

Squadron A, Cavalry, 1339 Madison Avenue, New York City, Major Latham G. Reed, commanding.

Squadron C, Cavalry, 1579 Bedford Avenue, Brooklyn, Major Cornelius S. DeBevoise, commanding.

1 troop at Huntington.

1st Field Artillery, 1988 Broadway, New York City, Major Prentice Strong, commanding.

2d Field Artillery, 171 Clermont Avenue, Brooklyn, Major Henry H. Royce, commanding.

8th Coast Artillery Corps, 29 West Kingsbridge Road, New York City, Major Sylvanus G. Teets, commanding.

Company G, attached—Yonkers.

Company H, attached—Mount Vernon.

Company L, attached—White Plains.

9th Coast Artillery Corps, 125 West 14th Street, New York City, Col. John R. Delafield, commanding.

13th Coast Artillery Corps, 357 Sumner Avenue, Brooklyn, Major Clarence W. Smith, commanding.

1 company at Far Rockaway.

1st Field Hospital, 56 West 66th Street, New York City, Major John F. Dunseith, commanding.

3d Field Hospital, 355 Marcy Avenue, Brooklyn.

4th Field Hospital, 216 Fort Washington Avenue, New York City.

3d Ambulance Company, 56 West 66th Street, New York City.

7th Infantry, 643 Park Avenue, New York City, Col. DeWitt C. Falls, commanding.

12th Infantry, 120 West 62d Street, New York City, Col. Thomas Denny, commanding.

1 company at Cedarhurst.

14th Infantry, 1402 Eighth Avenue, Brooklyn, Col. Frederick W. Baldwin, commanding.

Machine Gun Company—Hempstead.

1 company—Flushing.

1 company—East Hampton.

1 company—Sag Harbor.

1 company—Quogue.

1 company—Islip.

15th Battalion, Infantry, 7th Avenue, and 132d Street, New York City, Major Vertner W. Tandy, commanding.

23d Infantry, 1322 Bedford Avenue, Brooklyn, Col. James Robb, commanding.

1 company—Lynbrook.

1 company—Inwood.

Total strength New York Guard, 14,000 officers and men.

NAVAL MILITIA.

The Naval Militia of the State comprises Headquarters, 1st, 2d, 3d, 4th Battalions, and 1st and 2d Separate Divisions. Headquarters Naval Militia is located at Rooms 823-5-7 Municipal Building, New York, N. Y., and has the following staff:

Commodore Robert P. Forshew, commanding; Capt. Alfred B. Fry, Chief of Staff; Lieut.-Com. Herbert W. York, Gunnery Officer; Lieut.-Com. Warren L. Sawyer, Aide; Surgeon John C. MacEvitt; Paymaster William H. Ferguson.

1st Battalion consists of Headquarters, 10 divisions, an aeronautic section and a marine company, and is commanded by Capt. Chas. L. Poor. The entire battalion is located aboard the U. S. S. Granite State, foot West 97th Street, New York, N. Y.

2d Battalion consists of Headquarters, 9 divisions, and aeronautic section and a marine company, and is commanded by Capt. Edward T. Fitzgerald. The entire battalion is located at 52d Street, Brooklyn, N. Y.

3d Battalion consists of Headquarters, 12 divisions and 2 marine companies, and is commanded by Capt. Edward N. Walbridge, Headquarters, 2d, 6th and 7th divisions are located at Rochester, N. Y. 3d. 5th and 11th Divisions at Buffalo, N. Y., 1st Division at Dunkirk, 4th Division at Watertown, 8th Division at Niagara Falls, 9th Division at Oswego, 10th Division at Fulton, 12th Division at Syracuse, 1st Marine Company at Tonawanda and 2d Marine Company at Rochester.

4th Battalion consists of headquarters, 11 divisions and 1 aeronautic section and is commanded by Capt. Eckford C. deKay. Headquarters 4th Battalion is located at Room 825 Municipal Building, New York, N. Y. The divisions are located as follows: 1st Division, Peekskill, 2d, 5th, 7th and 11th Divisions at Staten Island, N. Y., 3d Division at Poughkeepsie, 4th Division at Albany, 6th Division at Flushing, 8th Division at Ossining, 9th Division at Yonkers, 10th Division at Yonkers, and the Aeronautic Section at Beacon, N. Y.

1st Separate Division is located at Port Chester, N. Y., and is commanded by Lieut. (j. g.) Joseph F. Dunn.

2d Separate Division is located at Mount Vernon, N. Y., and is commanded by Lieut. (j. g.) Edwin S. Parsons.

The strength of the Naval Militia is 215 officers and 5,217 men. Total, 5,432.

THE NATIONAL GUARD IN THE NEW AMERICAN ARMY.

(Reorganization of the various State Militia Units as far as they have progressed.)

(Revised to December 10 by the Committee on Public Information.)

The transfer of the old units to the new ones is not complete in many cases. In almost every instance where two old infantry regiments are consolidated into one new infantry regiment, a considerable number of commissioned and non-commissioned officers—usually about one-half of the latter, and some in the "special grades," including blacksmiths, etc.—do not go into the new regiment, but will be utilized elsewhere. In those instances in which the old units are insufficient to bring to full strength the new unit into which they go, Guardsmen remaining from other readjustments, or men from the National Army, will be added. No National Guard officers rendered surplus in the reorganization will be demoted or discharged as a result of the changes, but all will be utilized in the formation of corps troops, army troops, etc.

The following explanation is given of terms appearing in the tables:

Reserve officers: With each National Guard Division are about 200 reserve officers commissioned from the first series of officers' training camps. They are placed with the National Guard Divisions to give and receive instruction and for practice in exercising command. These officers are not permanently attached but are being temporarily utilized to fill vacancies in those units in which the term appears, or in addition to the regular complement of National Guard officers. Reserve Corps officers are eligible for appointment or promotion in National Guard divisions only after all available and suitable National Guard material in the unit has been utilized.

Nucleus: This means that there are only a few men, or a subordinate unit, toward the formation of the new unit in connection with which the term is used. Such units will be brought to full strength by the additions indicated, or, if not indicated, by addition of Guardsmen remaining from other re-arrangements, or by putting in men from the National Army.

To be organized by transfers—transfer or draft: These terms indicate that no nucleus for the new unit is found in existing available units, and that the unit is to be formed by transfer of Guardsmen in another kind of service (as cavalrymen to machine-gun companies, etc.), or by putting in men from the National Army.

Separate battalion, company or squadron: These are units which, ordinarily, would be one of several similar units composing a larger organization (as battalions in a regiment) but which, in the old State National Guard organizations were "separate," that is, without the other similar units necessary to compose the larger unit.

Depot brigade: These are utilized at present as a reservoir for surplus units, officers and men not used in the formation of the divisions. These and other surplus and unassigned units will probably go into the organization of army and corps troops attached to army and corps headquarters, when armies and corps shall have been organized. No details as to the organization of these army and corps troops have been made public.

26TH DIVISION.

(Troops from New England.)

Unit of New Organization.	Organizations from Which Formed.
26th Div. Hdqrs. Troop.	Troop B, Mass. Squad. Cavalry.
101st Mch. Gun Battalion.....	Conn. Squad, Cav. and 196 enlisted men from 1st Vt. Inf.

SOCIALIST PARTY NATIONAL COMMITTEE.

(By Adolph Germer, Executive Secretary, No. 803 West Madison Street, Chicago.)

The Socialist Party National Committee went out of existence on September 24, 1917. The affairs of the Socialist Party are administered by the National Executive Committee, which consists of four members, namely, Morris Hillquit, 30 Church Street, New York City; Victor L. Berger, Brisbane Hall, Milwaukee, Wis.; John M. Work, 1217 Rosedale Avenue, Chicago, Ill., and Anna A. Maley, 613 Washingtou Avenue S. E., Minneapolis, Minn. The Constitution of the Socialist Party provides for five members on the Executive Committee, but Mr. Spargo resigned. The term of office of this committee continues to the first of July, 1918.

Under the newly adopted National Constitution of the Socialist Party, the National Executive Committee will consist of fifteen members. The country is divided into five districts and three members are to be elected from each district. The call for nominations for this committee will be sent out on January 1, 1918, and they will begin their term of office on July 1, 1918. This organization, known nationally as the Socialist Party, is officially known as the Public Ownership Party in Minnesota, to conform to the election laws in that State.

PUBLIC MARKETS IN NEW YORK CITY.

THE public markets are West Washington, Gansevoort, Washington, Jefferson and Delancey in Manhattan, and Wallabout in Brooklyn.

Washington Market, at Fulton and West Streets, covers an area of 175 x 203 feet, and was established in 1812. Meat, fish and game, butter, eggs, cheese fruits, and vegetables are sold there. The city charges for space in this market.

Jefferson Market at Greenwich Avenue and Sixth Avenue, occupies 36,000 square feet. This is a retail market. Space is rented by the city to dealers.

West Washington Market—Established in 1889 at Gansevoort and West Streets, covers 369 x 400 feet. There are ten buildings—two-story structures in blocks of twenty stands, with marketing space on the first floor and offices on the second. It is a wholesale market in which meat, garden produce and live poultry are sold. The stalls are leased.

Gansevoort Market—An open square bounded by West, Little West Twelfth, Washington and Gansevoort Streets, has no buildings of any kind. It is by legislation restricted to the use of farmers and gardeners for the sale of products they themselves have grown. Each farmer is charged 25 cents daily. It is mostly a wholesale market for dealers.

Delancey Street Market is under the approach to Williamsburg Bridge at Pitt and Willett Streets, where fish, vegetables and fruits and miscellaneous dry goods are sold. It occupies a space 400 x 100 feet.

Wallabout Market has an area of thirty-six acres. It extends from Clinton Avenue to East Avenue, to Wallabout Basin. The city owns the land and the ground is leased. Many farmers use this market to sell their produce to dealers, and pay 25 cents a day for each wagon space in the market. Mostly all the purchases are wholesale.

FRANCE'S INDUSTRIAL CONDITION.

(By Consul-General A. M. Thackara, Paris.)

In October, official estimates gave the following crop reports for 1917: Wheat, 3,950,000 metric tons; spelt, 90,000; rye, 700,000; barley, 700,000; oats, 3,500,000 tons. For 1916 the crop figures were: Wheat 5,841,070 metric tons; spelt, 111,427 tons; rye, 911,632 tons; barley, 857,940 tons; oats, 4,127,960 tons.

The total value of the exports invoiced at the American Consulate-General at Paris for the United States during the first nine months of 1917 was $35,335,669, against $41,990,745 for the corresponding period in 1916. The principal decreases were in precious stones, diamonds, pearls, silk manufactures, clover seed, green calfskins, champagne, feathers, and cotton manufactures. The principal increases were in cigarette-paper, gloves, perfumery, and films.

A decree published in the Journal Officiel of September 11, 1917, stated that the maximum issue of notes of the Bank of France and its branch offices, provisionally fixed at 21,000,000,000 francs by the decree of February 15, 1917, has been raised to 24,000,000,000 francs. It is also stated that the maximum issue of notes of the Bank of Algeria and its branch offices, provisionally fixed at 550,000,000 francs by the decree of July 27, 1917, has been increased to 600,000,000 francs.

In many French cities small metallic currency has become scarce, particularly 1 and 2 sou copper pieces; and it is not unlikely that nickel coins of the value of 1, 2, and 5 sous will soon be put into circulation by the mint. In many French towns the local chambers of commerce have been authorized to issue paper money in denominations of 2 francs, 1 franc, 50 centimes, and even of 25 and 10 centimes. The shortage of the divisional metallic currency is said to be largely attributable to hoarding, for the quantities issued by the mint since the outbreak of the war have been unusually large. On June 30, 1917, there were outstanding 319,165,938 silver denominational coins, representing a total value of 313,184,301 francs; 99,469,811 copper coins, representing 6,695,047 francs; and 1,579,940 nickel coins, representing 394,389 francs.

The value of French foreign trade during 1916, not including gold and silver coin, bullion, and the baser coinage, according to the official provisional statistics was 20,275,102,000 francs, as compared with 14,973,163,000 francs in 1915, an increase of 5,301,939,000 francs. The value of the imports was 15,159,412,000 francs, against 11,035,794,000 francs in 1915, an increase of 4,123,618,000 francs, or 37 per cent., and the value of the exports was 5,115,690,000 francs, as compared with 3,937,369,000 francs, an increase of 1,178,321,000 francs, or over 29 per cent. The imports of gold and silver coin and bullion and of the baser coins in 1916 were valued at 146,341 000 francs, against 126,886,000 francs in 1915, an increase of 19,455,000 francs, and the value of the exports during the past two years was 34,643,000 francs and 150,823,000 francs, respectively. The imports of gold coin and bullion increased from 38,268,000 francs in 1915 to 57,288,000 francs in 1916; the exports during 1916 were 630,000 francs, as compared with 115,242,000 francs in 1915. The imports and exports of silver coin and bullion in 1916 were 39,029,000 francs and 33,638,000 francs, respectively, as compared with 88,607,000 francs and 35,556,000 francs, respectively, in 1915.

The following table shows the values of the imports and exports, not including gold, silver, etc., for 1915 and 1916, arranged by classes:

Classes.	Imports.		Exports.	
	1915.	1916.	1915.	1916.
	Francs.	*Francs.*	*Francs.*	*Francs.*
Food products	3,314,797,000	4,076,052,000	648,953,000	483,262,000
Industrial materials	4,653,404,000	6,452,320,000	767,521,000	801,090,000
Manufactures	3,067,593,000	4,631,040,000	2,341,317,000	3,587,024,000
Postal packages	.....	.....	179,578,000	244,314,000
Total	11,035,794,000	15,159,412,000	3,937,369,000	5,115,690,000

The above totals were computed on the basis of the average 1915 prices and are therefore less than the actual figures.

BALANCE OF TRADE AGAINST FRANCE.

As shown by the table, the balance of trade against France during 1916 was 10,043,722,000 francs. Wheat, with other cereals and flour, leads in food imports with a value of 1,694,361,000 francs. In 1908, the year of good crops, the imports of cereals were only 201,286,000 francs. Next comes meat, with imports of 564,589,000 francs; in 1913 the value was only 38,679,000 francs. The imports of wine in 1916 were 332,815,000 francs and brandy for drinking purposes 30,806,000 francs, a total of 363,621,000 francs. Of the wine imports Algeria sent 183,015,000 francs, as compared with 321,495,000 out of a total importation of 343,523,000 in 1915. Coffee imports were 289,178,000 francs; sugar, 413,178,000 francs (only 34,302,000 francs in 1913), and cocoa, 99,281,000 francs.

The principal import items were: Iron and steel, 1,216,501,000 francs; other metals, 630,074,000 francs; coal, 1,142,839,000 francs; cotton, 425,444,000 francs; wool, 315,842,000 francs; silk, 218,696,000 francs; oleaginous seeds and fruits, 342,033,000 francs; crude and refined petroleum, 284,091,000 francs, and horses, 275,885,000 francs. Of the imports in 1916 machinery was 687,035,000 francs; wool tissues, 613,326,000 francs (50,603,000 francs in 1913); cotton tissues, 282,332,000 francs (56,474,000 in 1913); tools and metal work, 392,707,000 francs, and chemical products, 332,728,000 francs. The value of the trade of France by principal countries during 1915 and 1916, excluding gold, silver, etc., was:

Countries.	Imports from.		Exports to.	
	1915.	1916.	1915.	1916.
	Francs.	*Francs.*	*Francs.*	*Francs.*
United States	3,027,618,000	4,766,933,000	446,190,000	492,692,000
Algeria	546,895,000	427,148,000	367,708,000	388,449,000
Argentina	472,983,000	733,722,000	107,841,000	121,484,000
Belgium	22,791,000	5,755,000	36,151,000	42,420,000
Brazil	209,800,000	277,742,000	55,468,000	63,056,000
Great Britain	3,037,647,000	4,048,379,000	1,098,898,000	906,023,000
Italy	433,184,000	504,859,000	388,294,000	685,886,000
Russia	77,386,000	172,991,000	113,334,000	859,832,000
Spain	581,362,000	652,005,000	139,475,000	152,194,000
Switzerland	244,176,000	407,685,000	297,694,000	299,736,000
All other countries	2,381,952,000	3,162,193,000	886,316,000	1,103,918,000
Total	11,035,794,000	15,159,412,000	3,937,369,000	5,115,690,000

FOOD AND ITS RELATION TO HEALTH.

Edward Clark, M. D. Acting Director Division of Child Hygiene, New York State Department of Health.)

[A Summary.]

The processes of oxidization of material and the transformation of energy in the body are less simple than in the engine and less clearly understood. Late research, however, has given us ways of measuring the energy latent in coal, wood, and in food materials as well. This is most generally done in the chemical laboratory by an apparatus called the bomb calorimeter. The amount of heat given off in the oxidization of a given quantity of any material is called its "heat of combustion," and is taken as a measure of its latent or potential energy. The unit commonly used is the calorie, *i. e.*, the amount of heat which would raise the temperature of 1 kilogram of water 1° C., or, what is nearly the same thing, 1 pound of water 4° F. Every article of food that we put into our bodies, either to build up and repair tissue, or to furnish heat and energy, belongs to one of the three following groups.: 1. Proteins, such as lean meat, fish, eggs, cheese, milk, peas and beans. 2. Carbohydrates, such as sugars, starches and vegetables. 3. Fats. In addition to the above, we also need water. Some of the proteins, like milk and lean meats, and many of the carbohydrates, especially fruits and vegetables, supply us with large quantities of water, but we need more water than we can get in this way.

A number of mineral salts are necessary for our bodies and these we get largely from eating fruits and vegetables. Sulphur, however, is supplied to us in our protein foods; and from milk we get a large amount of calcium salts so important in connection with phosphorus in building up strong bones and teeth. This is the reason why milk is such an essential element in the diet of growing children. "It is said that one hundred calories of milk yield as much calcium salt as 2,400 calories of white bread or meat." We get iron in almost all of the vegetables, notably in spinach, and in some fruits such as strawberries, grapes and raisins. Many mineral salts other than those above mentioned are needed in the body in small amounts, notably potassium, magnesium, iodine, and others, and we generally get the necessary supply of these in all fairly well-balanced diets.

As a general rule most of the carbohydrates and proteins contain approximately four calories of food value in each gram (seventeen grains) of weight. Pure fats, lard, butter, and oils (vegetable and animal) contain nine calories per gram of weight. There are twenty-eight grams in an avoirdupois ounce.

HOW TO MEASURE FOOD VALUES.

According to Fisher and Fisk, we find one hundred calories in a small lamb chop (weighing about an ounce); in a large egg (about two ounces); in a small side-dish of baked beans (about three ounces); in 1½ cubic inches of cheese (about an ounce); in an ordinary side-dish of sweet corn (about 3½ ounces); in one large sized potato (if baked, about three ounces; if boiled about four ounces); in an ordinary thick slice of bread (about 1½ ounces); in one shredded wheat biscuit (about an ounce); in a very small piece of sponge cake (about an ounce); in a third of an ordinary piece of pie (about 1½ ounces); in three teaspoonfuls or 1½ lumps of sugar (about one ounce); in a dozen peanuts (about ⅔ of an ounce); in eight pecans (about ½ an ounce); in four prunes (about one ounce); in two apples (about seven ounces); in a large banana (about four ounces); in half a cantaloupe (about nine ounces); in seven olives (about 1½ ounces); in a very large orange (about ten ounces); in an ordinary pat of butter (about ½ an ounce); in a quarter of a glass of cream (about two ounces); in a small glass of milk (about five ounces).

Fats, and carbohydrates such as sugars and starches, consisting, as they do, of carbon and hydrogen, are the principal combustible foods; hence these are the foods which give us heat and energy. The protein or nitrogenous foods like meat, milk, eggs, fish, cheese, dried beans and dried peas are the foods that are used principally to furnish the building and repair material for the body. To use a familiar illustration, we can compare the protein foods we eat to the oil which is used in the automobile. The purpose of the oil in the automobile is to keep the machine in good running order. We can compare the carbohydrate foods which we eat to the gasoline in the automobile; the combustion of the gasoline in the automobile drives the machine, just as the combustion of the carbohydrate foods in the human body gives it energy to enable it to do the work that it is called upon to perform. The different kinds of food, to a certain extent, can do each other's work; thus some protein foods can, under certain conditions, be burned in the body and do the work of the carbohydrates. While some of the proteins, as stated above, can take the place in the body and do the work of the carbohydrates, the latter, however, cannot take the place of what are called albuminoid proteins in the process of building up new tissues and repairing worn and wasted ones.

As a result of a large amount of experimentation, the conclusion seems to be pretty firmly established that a well-balanced diet furnishing a total of from 2,500 to 4,500 calories of food value of different kinds is sufficient for all the daily food needs of the average man or women, taken, of course, with reference to age, size, occupation and physical peculiarities.

ONE-THIRD OF FOOD SHOULD BE FATS.

Most authorities now seem to agree that for a normal, healthy person a well-balanced diet should consist of 10 per cent. protein food, 60 per cent. carbohydrate food, and 30 per cent. fat food, always estimated, of course, on the caloric basis, and not according to weight or bulk. In addition to the above, a large amount of water is needed over and above that which we get in the foods.

According to Mary Swartz Rose, a test of the rations of agricultural laborers showed the following average consumption, expressed in energy: Farmers in Connecticut, 3,410 calories; in Vermont, 3,635 calories; in New York, 3,785 calories; in Mexico, 3,435 calories; in Italy, 3,565 calories; in Finland, 3,474 calories. Any person who takes a small amount of muscular exercise, who follows a sedentary occupation, and who eats freely of red meat two or three times a day, is extending a cordial invitation to toxins and uric acid to come and take up their abode within his physical domain, where, in time, they may prove to be very troublesome tenants. Meat, however, contains certain elements that are of great value in building up and repairing muscle and body tissue, and as such is a valuable article of diet, but it is a well-known fact that most American people eat altogether too much meat. By eating less protein food, especially meat and eggs, we will enjoy better health and be able to economize in the cost of our food ration.

A common mistake is that by eating large quantities of meat, eggs and cheese we can better perform work that requires the expenditure of a large amount of muscular energy. The fact that it is foods like bread, oat meal, corn meal and vegetables, and sugars that supply us with energy must be impressed on the minds of people. Another important thing for people to know is that protein foods, consisting, as they do, largely of nitrogen, are, if not promptly digested and assimilated, liable to quickly decompose in the intestinal canal and produce intestinal toxemia or auto-intoxication with all their train of evils.

NEW ANTHRACITE WAGE SCALE OF DECEMBER, 1917.

Following is the agreement of November 17, 1917, entered into by anthracite operators and miners: "Whereas, on May 5, 1916, an agreement was entered into by the parties hereto, covering wages and working conditions in the anthracite field of Pennsylvania, for the four-year period beginning April 1, 1916, and ending March 31, 1920; and Whereas, by reason of conditions that arose as a result of the war, the parties hereto, under date April 25, 1917, entered into a supplemental agreement modifying the wage compensation provided in said agreement of May 5, 1916; and Whereas, by reason of further changes in conditions that have arisen since the date of said supplemental agreement of April 25, 1917, the parties hereto have deemed it advisable and necessary to make further increase in the wage compensation provided in said supplemental agreement as hereinafter more specifically set forth: Now, therefore, this agreement witnesseth, That in lieu of the voluntary advances made under the agreement of April 25, 1917, the following advances are proposed to be applied to the rates established under the agreement of May 5, 1916:

"(*a*) Contract hand and machine miners shall be paid an advance of 25 per cent. on their gross earnings. (*b*) Consideration miners shall be paid an advance of 25 per cent. on their earnings. (*c*) Contract miners' laborers shall be paid an advance or 30 per cent. on their earnings. (*d*) Consideration miners' laborers shall be paid an advance of 25 per cent. on their earnings. (*e*) Day machine miners' laborers who received not less than $2.72 per day shall be paid an advance of 25 per cent. on their earnings. (*f*) Outside engineers working a 12-hour cross-shift and firemen shall be paid an advance of $1 per day for each day worked. All other outside company men who received $1.54 or more per day shall be paid an advance of 90 cents per day for each day worked. (*g*) Inside engineers and pumpmen working a 12-hour cross-shift shall be paid an advance of $1.10 per day for each day worked. All other inside company men who received $1.54 or more per day shall be paid an advance of $1 per day for each day worked. (*h*) All employés paid by the day who received less than $1.54 per day shall be paid an advance of 60 cents per day for each day worked. (*i*) Monthly men coming under the agreement of May 5, 1916, shall receive an advance per day for each day worked equivalent to that provided for their respective occupations under paragraphs F and G. (*j*) The advances of $1.10 per day, $1 per day, 90 cents per day, and 60 cents per day provided above are to be applied to a day, whether eight hours or more, as established under the agreement of May 5, 1916; any proportionate part of a day to be paid a proportionate part of the advances herein provided. (*k*) The employés of stripping contractors, paid by the day, working on the basis of a 9-hour or 10-hour shift, shall be paid the same increase per hour for each hour worked that is provided for outside company men working on an 8-hour basis.

"It is understood and agreed that, except as herein provided, all of the covenants and conditions of the agreement of May 5, 1916, shall remain in full force and effect. And it is further understood and agreed that this contract will become effective only on condition that the selling price of coal shall be advanced by the United States Government sufficient to cover the increased cost of production and will not take effect until the first day of the pay period following the order granting such increased price. Subject to the foregoing provision, the contract will remain in effect during the period of the war, or until March 31, 19120, in case the was is not terminated before that date. In witness whereof the parties hereto have caused this agreement to be properly executed this 17th day of November, 1917."

On behalf of anthracite operators: W. J. Richards, S. D. Warriner, Daniel B. Wentz, W. L. Connell. On behalf of anthracite mine workers' organization: *President, District No. 1*—John T. Dempsey; *President, District No. 7*—Thomas Kennedy; *President, District No. 9*—James Matthews; *President of United Mine Workers of America, Representing Anthracite Mine Workers' Organization*—Frank J. Hayes.

In connection with the new wage agreement, the Government allowed the anthracite operators an increase of 35 cents a ton in the selling price at the mines.

ANTHRACITE SHIPMENTS IN OCTOBER, 1917, ESTABLISH NEW RECORDS.

The shipments of anthracite for October, 1917, amounted to 7,110,950 tons, establishing a new record. The October shipments showed an increase of 738,194 tons, or 11 per cent. over the preceding month, and were 1,240,746 tons, or 21 per cent. in excess of the shipments during the corresponding month last year. The total shipments for the first ten months of 1917 have amounted to 64,889,047 tons, an increase over the same period in 1916 of 9,088,427 tons.

The normal yearly anthracite coal consumption in New York City is approximately as follows: Domestic, private houses and small stores using mostly egg, stove and nut, 2,800,000 tons; flats and apartment houses, heating, etc., using mostly broken, egg, or pea and buckwheat, 3,200,000 tons; hotels, theatres, clubs, factories, institutions, etc., 1,800,000 tons; gas and electric requirements, estimated from annual reports, 1,550,000 tons; elevated, subway and surface railroads, 500,000 tons; steamboats, tugs and shipping, also steam railroad fuel, for heating, etc., within city limits, 500,000 tons; department stores, office buildings, etc., 1,300,000 tons; municipal requirements (city departments), 600,000 tons; total anthracite, 12,200,000 tons.

The bituminous consumption: Steam trade, factories, refineries, etc., including gas and electric plants, about 1,600,000 tons; steamship bunkering (official returns), 4,900,000 tons; heating stores, office buildings, etc., 400,000 tons; blacksmith trade, including wheelwrights and carriage manufacturers, 100,000 tons; elevated, subway and surface railroads, 1,500,000 tons; municipal requirements (pumping stations, etc.), 100,000 tons; total bituminous, 8,600,000 tons; total anthracite and bituminous, 20,800,000 tons.

The above figures are all in gross tons of 2,240 pounds. In addition there is used an estimated coke tonnage (gas house) amounting to 300,000 loads of fifty bushels each.

NATIONAL ADVISORY COMMITTEE FOR AERONAUTICS.

Dr. William F. Durand, Chairman, Stanford University, Cal.; Dr. S. W. Stratton, Secretary, Bureau of Standards; Dr. Joseph S. Ames, Johns Hopkins University, Baltimore, Md.; Lieut.-Col. V. E. Clark, U. S. A., Aviation Section, War Department; Dr. John F. Hayford, Northwestern University, Evanston, Ill.; Prof. Charles F. Marvin, U. S. Weather Bureau; Hon. Byron R. Newton, Treasury Department; Dr. Michael I. Pupin, Columbia University, New York, N. Y.; Major-Gen. George O. Squier, U. S. A., Chief Signal Officer, War Department; Rear-Admiral D. W. Taylor, U. S. N., Chief Constructor, Navy Department; Lieut.-Com. J. H. Towers, U. S. N., Navy Department; Dr. Charles D. Walcott, Smithsonian Institution.

Executive Committee—Dr. Charles D. Walcott, Chairman; Dr. S. W. Stratton, Secretary; Dr. Joseph S. Ames, Prof. Charles F. Marvin, Dr. Michael I. Pupin, Brig.-Gen. George O. Squier, U. S. A., Rear-Admiral D. W. Taylor, U. S. N.

Naval aviation schools are established as follows: Boston, Mass., ground schoo ; Bay Shore, L. I., flying school; Hampton Roads, Va., flying school; Miami, Fla., flying school; Pensacola, Fla., flying school; San Diego, Cal., flying school.

FOREIGN COMMERCE, PRINCIPAL PORTS OF THE WORLD.

(Compiled by Bureau of Foreign and Domestic Commerce, Department of Commerce.)

Ports.	Year.	Imports.	Exports.	Total Commerce.
Europe:				
London	1915	$1,642,764,000	$479,948,000	$2,122,712,000
Liverpool	1915	1,119,429,000	654,418,000	1,773,847,000
Hull	1915	243,990,000	90,745,000	334,735,000
Manchester	1915	192,986,000	81,168,000	274,154,000

POISONS USED IN MAKING EXPLOSIVES.

(Summary of a Special Inquiry in 1916 by Alice Hamilton, M.D., of the United States Bureau of Labor Statistics.)

There is no way of knowing how much illness and death resulted from the mad rush during the first months of the war, before the munition factories were in a position to carry on the work properly to get out the product. Another thing that led to sickness in this work was its unfamiliarity. It involved new problems in engineering that had to be solved by men with little or no experience with these substances and reactions. So many of the more serious cases were engineers and chemists who took risks to which they would not subject others, and suffered in consequence. Undoubtedly also the newness of the substances employed and of their by-products was responsible for many accidents. It is plain that in some plants the occurrence of a serious case of poisoning was the first thing that aroused the management to the fact that a certain process was really dangerous. Naturally in a factory making explosives the danger of explosion is so great that it first attracts attention, and the danger of poisoning, less spectacular but perhaps just as great, is not recognized till something startling happens.

Still another evidence of the newness and unfamiliarity of this industry is seen in the large number of cases of poisoning that occurred through some accident, something not inherent in the process. Repairing stills or retorts which have been filled with poisonous fluids is a fruitful source of serious poisoning. Others are leaking pipes which let fumes escape, or violent decomposition with the production of poisonous vapors, or a too rapid reaction producing a "boil-over." Such accidents tend to become rarer all the time, but they were frequent in the early months when the industry was still in the experimental stage. If chemists and engineers were faced with a new problem, this was even more true of the physicians living in the neighborhood of explosives works. Such occurrences as cyanosis and syncope from nitrobenzol fumes, of toxic hepatitis from trinitrotoluol, as of edema of the lungs from nitrous fumes, were totally new experiences to the ordinary physician, and there was very little in the medical literature to help him. If his practice was near the factory he was at least able to connect the illness with the occupation, and by careful observation he could build up for himself a picture of that form of industrial poisoning; but if, as is often the case, the workmen were drawn from many scattered towns, the physicians in those towns had no reason to suspect that the symptoms complained of by their patients were occupational in origin. This makes it extremely difficult to trace cases of poisoning in this industry, and it also explains why men who were suffering from symptoms that should have been regarded as grave were allowed to go back to work in a poisoned atmosphere till they were so ill they gave up of their own accord. Several of the histories we secured of deaths from occupational poisoning show that if the condition had been recognized in the early stages the victim might have been saved.

Description of the Industry.—The making of black powder, ordinary gunpowder, does not carry with it any danger of occupational poisoning, and it is not included in this study. The explosives that do involve in their manufacture several poisonous substances are the following: Nitrocellulose, or nitrocotton, including pyroxylin and military guncotton; smokeless powder, including nitroglycerin powders; picric acid and ammonium picrate; nitroglycerin and dynamite; Trinitrotoluol, or TNT or triton; fulminate of mercury; tetranitraniline, or TNA; Tetranitromethylanilin, or tetryl; nitron aphthalenes; ammonium nitrate. Dangerous substances are also used in the production of these explosives: Nitric acid, sulphuric acid; benzol and toluol; nitrobenzol; anilin oil; chlorbenzol and dinitrochlorbenzol; phenol or carbolic acid; sulphuric ether; mercuric nitrate; amyl acetate. Other compounds with toxic properties more or less pronounced are used in making explosives, but were not manufactured in any of the plants visited: Ammonia; caustic soda or sodium hydrate; Chile saltpeter or sodium nitrate; acetone.

Finally, there are certain poisons that are evolved in the course of chemical reactions, as by-products, or in intermediate stages in the making of explosive compounds. Some of these are the most important poisons encountered in the explosives industry: Oxides of nitrogen or nitrous fumes. in all processes of nitration; sulphur dioxide, in making carbolic acid; chlorine gas, in making nitric acid; ethyl nitrite, in making mercury fulminate. These compounds vary greatly in their toxicity, some of them producing only disagreeable skin eruptions, others being rapidly fatal after a short exposure.

This is the list of industrial poisonings that occurred in 28 plants in the space of about a year. Thirteen plants could not be included for lack of information:

CASES OF INDUSTRIAL POISONING IN 28 PLANTS IN ONE YEAR.

Poisons.	Number of Cases.			Fatal Cases.		
	Men.	Women.	Total.	Men.	Women.	Total.
Nitrogen oxides and nitric acid	1,389	.....	1,389	28	.....	28
Trinitrotoluol	659	43	702	11	2	13
Picric acid	7	.....	7	.....	.....	.....
Nitrobenzol and nitrotoluol	12	.....	12	1	.....	1
Benzine and toluol	14	.....	14	7	.....	7
Sulphuric ether	52	.....	52	1	.....	1
Anilin	205	.....	205	.....	.....	.....
Phenol	2	.....	2	1	.....	1
Sulphuric acid	4	.....	4	1	.....	1
Mixed acids	2	.....	2	1	.....	1
Chlorine gas	3	.....	3	.....	.....	.....
Ammonia gas	1	.....	1	.....	.....	.....
Mercury	1	.....	1	.....	.....	.....
Fulminate of mercury	79	32	111	.....	.....	.....
Nitronaphthalene	2	.....	2	.....	.....	.....
Total	2,432	75	2,507	51	2	53

Though all of these were serious enough to come under the observation of a physician, they vary in severity from a case of rapidly fatal congestion of the lungs caused by nitrous fumes to a case of eczema from filling caps with fulminate. There were nine other fatal cases, all men, six from triton and three from nitrous fumes, which were reported to us either by men who were not physicians or at second hand by physicians who had only heard of the occurrences and had not themselves seen the men. It has seemed best not to include these in our enumeration, although some of them had every mark of authenticity. Those listed under the head of fulminate were all mild and of slight importance. Those under anilin were more serious, but far less so than most of the cases on the list. Subtracting these 316, there are left about 2,200 cases of occupational poisoning, either serious at the time or likely to become so. The 702 who had triton poisoning were not all very ill, but experience has shown that in this form of poisoning an apparently slight case may suddenly change to a severe or fatal form. The same thing is true in nitrous fume poisoning. All the benzol cases, those from picric acid, from phenol, from mineral acids, and from nitrobenzol, were serious if not fatal in character.

PHYSIOLOGICAL ACTION OF POISONS.

Nitration—The process of nitration is essential for all the products which are covered by this investigation In making of explosives it is necessary to provide oxygen in some easily available form to cause

combustion of the substances which make up the explosive, and this is usually done by treating them with nitric acid in such a way that the group NO_2 enters into combination, the oxygen of which is readily given up. Because all these explosives are nitrated compounds the most common form of poisoning in the industry is that from nitrogen oxide fumes—usually called nitrous fumes—which are given off more or less in all nitration processes. The higher the nitration the greater the danger from fumes, unless great precautions are taken. The 1,300 to 1,400 men on our list who suffered from these fumes were employed in making nitrocellulose, or nitrocotton, picric acid or trinitrophenol, the nitrotoluols, nitrobenzols, nitronaphthalenes, nitroglycerin, and the nitric acid needed for these processes.

Nitrogen Oxide Poisoning—"Fume Sickness"—In the making of explosives a mixed acid is used for nitration, one ingredient of which is sulphuric acid and the other nitric acid 100 per cent. strong. When it is remembered that the "strong" or "fuming" nitric acid of the chemical laboratory is only about 70 per cent. pure it can readily be seen how great is the danger from fumes in connection with this work. When the mixed acid is exposed to the air, or when it is being mixed with the substances to be nitrated, a rapid decomposition sets up at once, with the evolution of the lower oxides of nitrogen, which rapidly take up oxygen from the air and change to the higher oxides. The lower oxides are pale or colorless; the higher are of a deep orange color. It is almost always easy to discover the site of a nitric acid or a nitrating plant by the yellow color which tints the sky over it and which often is deep and dense enough to be seen for several miles. Sometimes decomposition takes place suddenly and violently enough to reduce the nitric acid to a finely atomized spray, and this is caught and mingled with the oxide fumes. These gases, known usually as nitrous fumes, are very irritating to one who is unaccustomed to them, but the workmen soon establish a good deal of tolerance, and the visitor to the factory may be choked and tearful and speechless in an atmosphere which seems to be causing no discomfort to the men who work there. If something goes wrong and there is an unusual production of fumes the air becomes unbearable even to the workmen, and unless they run to the fresh air they may become badly poisoned. Unfortunately the immediate effect of breathing these fumes is often not painful enough to give the men sufficient warning of danger. Many men have stayed in the poisoned atmosphere long enough to cause damage to the throat or lungs, and yet at the time they did not realize that anything more serious was happening than a "choking" from the gas. Autopsies on fatal cases usually reveal quite extensive changes, especially in the lungs. The damage done may result in a bronchitis, with fever, necessitating care in a hospital or at home for several days. Or it may result in pneumonia. There is also a less well recognized form of nitrogen oxide fumes poisoning which is so rapidly fatal that only slight anatomical changes are found after death. The poison in these cases seems to act directly on the respiratory centre. This is probably the explanation for those cases of sudden death after very short exposure to fumes when an autopsy reveals no damage to the lungs sufficient to account for death.

Nitric Acid—Nitric acid is made by the action of sulphuric acid on sodium nitrate (Chile saltpeter). The oxide fumes that come off are collected in water. It is the escape of such fumes that constitutes the great danger in a nitric-acid building, aside from the danger of burns from contact with the acid.

Sulphuric Acid Fumes (Sulphur Dioxide)—The fumes from sulphuric acid that are to be dreaded are sulphur dioxide, given off in large quantities at a certain stage in the production of sulphuric acid and also at one stage in the production of phenol. The ordinary fumes from roasting sulphur flowers or iron pyrites consist of the trioxide, and are irritating but not dangerous, as is the dioxide. The effects of sulphur dioxide fumes are very like those of nitrogen oxide fumes, but far fewer men are exposed to them and rarely is any one exposed to very large quantities.

Benzol and Toluol, or Methyl Benzol—A great deal of benzol is used in the manufacture of phenol (C_6H_5HO), a smaller amount in the manufacture of nitrobenzol as a step in the production of anilin for explosives, and a great deal of toluol is used in making the nitrotoluols, of which trinitrotoluol is the most important. The symptoms that follow inhalation of benzol or toluol fumes or absorption through the skin differ according to the degree of exposure and the susceptibility of the individual, for men vary decidedly in this regard. There are always, however, in mild as in severe cases, the symptoms of intoxication by a substance with a specific action on the central nervous system: Dizziness; confusion; transient excitement, followed quickly by stupor; twitchings, then exhaustion; loss of consciousness, with respirations at first rapid, then slow; pulse rapid; temperature low. In mild cases there is a condition like early alcoholic intoxication, with excitement and irritability, headache and dizziness. Later there is a feeling of general illness, loss of appetite and nausea. The characteristic post-mortem findings after benzol or toluol poisoning are: Congestion of the abdominal organs and multiple capillary hemorrhages into serous and mucous membranes and into the subcutaneous tissues, probably because of the action of the poison in dissolving the endothelial walls of the small vessels, or its action in dissolving the body fats, allowing the lodging of fat emboli in the small vessels and thus causing their rupture. Sometimes hemorrhages from the nose, lungs, uterus and gums occur during life if the poisoning is slower, and the body may be covered with purpuric spots. The blood in these slow cases shows a marked diminution of white blood corpuscles, which may amount to an almost complete disappearance of these corpuscles if the poisoning is very severe.

Phenol, or Carbolic Acid—Carbolic acid is a well-known poison, used often with suicidal intent, but the industrial form of poisoning differs from that which follows the drinking of the acid, because industrial poisoning takes place through the skin or through the lungs. In the early days of antiseptic surgery there were many cases of poisoning resembling industrial poisoning, for it was customary to use a carbolic acid solution to irrigate wounds, as a dressing for wounds, as a disinfectant for the surgeon's hands, and even in the form of a spray to disinfect the air while the operation was going on. Many instances are recorded of severe poisoning and even death caused by the washing out of a large wound with carbolic solution or the leaving on too long of a dressing saturated with it. There were also cases of chronic poisoning among surgeons who were obliged to work in an atmosphere filled with minute particles of the carbolic solution. Phenol, or its salt, sodium phenolate, is a corrosive poison, which coagulates the albumen of the skin, but not as strongly as do the mineral acids. Even after this corrosive effect, absorption takes place through the skin as long as the phenol remains in contact with it, so it is of the greatest importance to wash off the splashed surface as quickly as possible. The local effect of carbolic acid may be quite serious, causing gangrene. When absorbed into the blood through the skin—and this may take place even through unbroken skin—it causes quickening of the pulse and respirations, then slowing; depression and weakness, dizziness, roaring in the ears, confusion, then collapse with cold perspiration, irregular pulse, respiratory failure and death.

Nitro and Amido Derivatives of the Benzene Series—Several compounds belonging to these two groups play a more or less important part in the explosives industry, as, for instance, the following: Nitrophenols, nitrobenzols, nitrotoluols, nitronaphthalenes, nitrochlorbenzols, amidobenzol or anilin, diamidobenzol or diphenylamin, tetranitranilin, tetranitromethylanilin. The characteristic form of poisoning to which these compounds give rise depends on changes in the blood and a direct action on the central nervous system as follows: On the first day the blood is chocolate colored, the serum a deep yellow, but there is no methaemoglobin; the color is caused by bile pigments. When, however, the red cells are dissolved in water, methaemoglobin appears. The urine is dark, urobilin is present, but neither bile pigments nor haemoglobin. On the second day there is no longer methaemoglobin and the chocolate color is gone, but changes begin in the red corpuscles, which increase for some six days, variations in size, microcytes and megalocytes, loss of color from loss of haemoglobin. In severer cases, the serum may be chocolate colored also and show methaemoglobin. This destruction of blood elements is accompanied by elimination of the blood coloring matter, which is carried on by the liver and kidneys. When the poisoning is prolonged, degenerative changes appear in these organs, fatty degeneration of the parenchymatous cells, sometimes death of the cells and a consequent shrinking of the organ. These nitro and amido aromatic compounds are not, however, purely blood poisons. There is in addition a direct effect on the central nervous system, and in the case of some of these

compounds it is this latter which causes the most marked symptoms and is responsible for death. The symptoms of poisoning which have been described in connection with exposure to anilin, dinitrobenzol, the nitrochlorbenzols, and trinitrotoluol especially, more rarely in connection with picric acid and the nitronaphthalenes, depend largely on the formation of methaemoglobin. The replacement of haemoglobin with its easily released oxygen by methaemoglobin, with its oxygen firmly bound, interferes with the normal exchange of gases and results in a state of internal suffocation, starvation for oxygen in the presence of plenty of air. The outward signs of this lack of oxygen are seen in the bluish tint of lips and tongue and sometimes of the face, a color which may appear before the man has noticed any disturbance in health.

The first disturbance the workman notices is a flushing of the face and sense of fulness in the head, which develops into a throbbing frontal headache. He has no appetite; indeed, he may be nauseated. Some men at this stage feel pains in the abdomen, or in the chest, extending around to the back. If the man does not at once seek the open air and remain away from work till he has recovered, he grows worse, his head becomes confused, he is dizzy, feels weakness in the legs, and is unable to walk or even stand. The flushed face becomes blue and livid, he begins to feel air hunger, struggles for breath, his pulse is small and rapid, his respirations at first rapid become slow, his temperature is lowered. Unconsciousness may come on suddenly while he is at work, but more often after he has left it, perhaps on the way home or several hours later. In severe cases the dyspnoea increases, the pulse becomes imperceptible, and convulsions may precede death. If the patient is bled, the blood is thicker than normal and chocolate colored. The temperature is subnormal in these acute cases at first, but later on there may be a rise of temperature to 102 degrees F. This is explained as being caused by the liberation of haematin in the blood, just as is true in malaria, for fever may be experimentally produced by intravenous injection of haematin.

Picric Acid—The nitration of phenol to form trinitrophenol, or picric acid, is one of the most dangerous processes in the making of explosives, because it is very productive of nitrous fumes and much of the nitration is carried on in unprotected receptacles. The commonest form of poisoning from the finished product, picric acid, is the so-called "itch," a dermatitis of varying manifestations and degrees of severity, accompanied by burning and itching. It is usually limited to the exposed parts of the body, but it may become general, especially in summer heat and in plants where no shower baths are provided for the men who have to pack the finished product. Besides this purely local form, there is a systematic picric acid poisoning, with symptoms of the same character as those produced by other nitro aromatic compounds, but since picric acid is a solid and not volatile, these symptoms come on more slowly and with less violence than those caused by the nitrobenzols. There is not much information to be obtained from company physicians about chronic picric acid poisoning. One of them, who is in charge of the medical work in a large plant making picric acid and drying it before packing, described two varieties of symptoms among picric acid workers, which are the same as those long familiar to French physicians, for this explosive has been for many years in use in France. The most usual symptoms are acute gastroenteritis, abdominal cramps, vomiting, diarrhea, bitter taste. The less usual symptoms are those in which the nose and throat and bronchial tubes are affected, an irritative catarrh.

Trinitrotoluol, or Toluol or Triton or Trotyl or TNT—This substance was almost unknown before the war. It had been manufactured to a very small extent in Great Britain, but no ill effects had been observed from handling it and it was manifestly less poisonous than the fairly familiar dinitrobenzol. The British entered on the manufacture of triton on a large scale, with no expectation of the disastrous results that have followed. From time to time cases of fatal toxic jaundice in triton workers have been reported by the medical journals, and, according to an article in the Lancet for December 16, 1916, no less than 50 such fatalities have occurred since the war broke out. The record for the nine months ending September, 1916, was 95 cases of toxic jaundice, with 28 deaths. There was almost complete ignorance of the effects of this poison in the United States when the manufacture began on a large scale, and it was not till serious illness had appeared among the men and women employed in handling it that information concerning causes and remedies began to spread.

The inhaling of TNT dust produces burning in the throat and nose, with abundant secretion, like a severe cold in the head, and with a sense of tightness in the chest. An obstinate cough is complained of by many as one of the earliest symptoms. But much more distressing and more common are symptoms referable to the gastro intestinal tract. Indeed, some experienced foremen think that a distaste for food is the earliest and most frequent symptom of triton poisoning. It may be that part of this distaste comes from the bitter taste in the mouth which is experienced very soon, even by visitors to the works. Sometimes the first effect of the TNT is to increase appetite and produce the appearance of improved health, but this soon passes away. In the typical gastrointestinal form—and this includes the majority of all cases of TNT poisoning—there is griping abdominal pain, referred to the waist line, constipation with flatulence, bitter regurgitation, vomiting, sometimes diarrhea. Trinitrotoluol may be recovered unchanged from the feces, and it has been suggested that it may exert a directly irritant effect on the lining of stomach and intestines, just as it does on the skin and on the respiratory mucosa. At the same time the changes in the blood already described as characteristic of the nitro group of poisons are taking place and the color grows more cyanotic. This cyanosis is not usually so marked as in nitrobenzol and anilin poisoning, though attacks of blueness with dizziness, staggering and loss of consciousness may occur from TNT poisoning as well as from the two former. Even prolonged coma, or delirium and convulsions have been reported in cases of severe and rapid poisoning. Involvement of the bladder is noted quite often by some physicians, but they find it yielding readily to ordinary treatment. Nosebleed is also not uncommon. In people with damaged lungs there is likely to be pulmonary hemorrhage. The most serious form of triton poisoning is that which the British call toxic jaundice.

Triton has, in common with many compounds of this group, an irritating effect on the skin, caused more by dust than by fumes. This is at times very distressing, enough so to force the man to give up his work, for the itching is intense and prevents sleep and makes the sufferer nervous and incapable of work. Some people are extremely susceptible to this rash, others never suffer from it at all. Women seem to be less susceptible than men, but this may be simply because they dislike a disfiguring eruption more than men do, and will take more pains to prevent it. Men may carry enough of the powder home on their clothes to give rash to members of the family. Superintendents and foremen usually believe that men acquire immunity to triton, but a very observant physician who had had almost a year's experience in a large plant said very emphatically that although he had at first believed this to be true, he had been forced to the contrary opinion.

Nitronaphthalenes—Naphthalene causes symptoms not characteristic of the phenol series to which it belongs. In mild cases there is headache, malaise, vomiting; in severer, pains in the bladder, and urethra and kidneys. The urine is dark and contains alpha-naphthol and beta-naphthol. Death has been known to occur from nephritis. There is a specific effect on the eye, shown by degenerative changes in retina and subretinal hemorrhages, or in cataract formation. Nitronaphthalenes are less dangerous poisons than are the nitro derivatives of benzol and toluol.

Nitrobenzol—The explosive nitrobenzol, well known in both Germany and Great Britain, is not manufactured in the United States except as a step in the production of anilin. Nitrobenzol, or oil of mirbane, is a dangerous poison, very volatile, easily absorbed through the skin, attacking the central nervous system and producing profound changes in the blood. These changes have been discussed above under the section on Nitro and amido derivatives of the benzine series. The action of nitrobenzol is very similar to that of anilin, but more rapid and intense. There are more deaths in proportion to cases of poisoning from nitrobenzol than of anilin, and while an ordinary case of anilin poisoning usually recovers and is back at work in a couple of days, a nitrobenzol case will have to be under medical care for four or five days or longer.

Nitrochlorbenzol and Dinitrochlorbenzol—These are well-known substances in Germany, where

they have long been in use in the making of anilin dyes. There are many reports from that country of severe poisoning among men exposed to them, and the symptoms produced are those which were described in the section on nitro and amido derivatives of the benzine series. We found them in one plant only, as by-products. Here they have been known to set up troublesome eczema, severer than that produced by picric acid or tetryl, but we heard of no constitutional symptoms which were attributed to these compounds.

Anilin—This is made from nitrobenzol, and is used in fairly large quantities for the manufacture of diphenylamin, for the explosive tetryl (tetranitromethylanilin), and for the rarer explosive tetranitranilin, or TNA. Anilin is poisonous in very small quantities, whether inhaled or spilled on the skin, and as it has a pleasant odor and is not at all irritating, it does not give warning of its dangerous nature. The symptoms have been described in the section on nitro and amido derivatives of the benzine series. It is rare to see really serious forms. Mild cases are very common and are disagreeable enough to make the men dislike to work with anilin. Foremen in charge of anilin workers say that the men are more irritable, "grouchy," and lazier than men in other kinds of work. It is not safe to push them, because they will only get angry and quit, and they really are not up to a normal day's work.

Diphenylamin—This is used in smokeless powder works. It is dissolved in the ether-alcohol for smokeless powder and incorporated with the nitroglycerin powders. As it is a volatile poison of the amido group of benzene derivatives, very closely allied to anilin, it may be expected to produce the same symptoms as the latter. We were unable to obtain any evidence of diphenylamin poisoning from physicians connected with smokeless powder works, but two of them stated that the symptoms experienced by men employed in pressing and cutting powder must be regarded as due to a mixed poison, since the vapors they inhale contain ether, alcohol and diphenylamin.

Dimethylanilin—The making of this compound by the action of anilin on methyl alcohol and its subsequent conversion to tetranitromethylanilin is attended with decided risk since all these substances are volatile poisons, but the processes are carried on in closed receptacles and actually no trouble seems to have occurred.

Tetranitromethylanilin, or Tetryl—The most usual effect among those who handle it in American factories seems, so far, to be an irritating and obstinate trade dermatitis. In one plant where tetryl and dry picric acid and the nitrochlorbenzols are all handled the physician finds that the last named are the most productive of skin inflammations, next tetryl, and last picric acid. Severe cases may have edema of the whole face, the eyes swollen shut. There is also some conjunctivitis in milder cases and irritation of the nasal mucous membrane.

Nitroglycerin—There is less danger of nitrogen oxide fume poisoning in the nitration of glycerin than in any other nitration process in this industry of making explosives. The extreme danger of explosions leads to care in mixing the acid and glycerin and any sign of over-rapid nitration with the formation of nitrous fumes is at once checked, because it might also result in explosion. This same risk of explosion brings about a division of the work into small units with only two to four men employed in each building, always an advantage when there are processes involving poisonous substances. Nitroglycerin is itself a poison which is absorbed through the lungs and through the unbroken skin. It has a decidedly depressing effect on the vascular system, dilating all the peripheral vessels with a consequent lowering of the blood pressure. Strangely enough there seems to be little of this effect observed in men who daily handle it and doubtless absorb appreciable quantities. They seem to become rapidly accustomed to it, and provided they do not leave the work they soon reach the point where they can absorb daily an amount from 20 to 30 times the medicinal dose, yet without any apparent effect on the heart or circulation. However, this immunity continues only while they are at work, and even then very hot weather or exposure to an unusual quantity of the nitroglycerin may bring on symptoms. One physician in charge of such workmen said he had seen an attack of heart failure follow when a man suddenly quit the work and the loss of dilator effect of the drug made itself felt. New men suffer from nitroglycerin headache, which they describe as a peculiarly intense, throbbing pain, beginning in the forehead and spreading all over the head. Stooping, or even lying down, makes it intolerable, and there is a great deal of restlessness and insomnia, sometimes nausea and vomiting and more rarely diarrhea. Nothing relieves t but quiet and fresh air, and it lasts from one to four days. After a while the tendency to these headaches disappears, and the man is immune as long as he continues at that sort of work; but if he leaves it for work in another part of the plant he must avoid the nitroglycerin houses, for even a few minutes' stay in one of them may be enough to bring on the headache.

Mercury—Mercurial poisoning is characterized by inflammation of the gums, with swelling and bleeding, a foul breath, and copious flow of saliva the "salivation" which was so familiar a condition in the days before the discovery of quinine when mercury was the approved remedy for malaria. In severe cases the teeth drop out. At the same time there are certain characteristic nervous symptoms, especially the so-called mercurial tremor, a fine tremor in the muscles of fingers and tongue and lips. Nervous irritability, gastric disturbances, and more or less profound anemia follow, and in long protracted cases there is nephritis and paralysis.

Fulminate of Mercury—Mercury fulminate is not itself a dangerous poison. It produces in some people a painful and disfiguring eruption of the skin. Severe fulminate dermatitis is usually like moist eczema—the skin reddened, swollen, and tense, later exuding serum, then scaling or forming a scab. Bad cases may have a good deal of swelling of face and eyelids and fingers.

Ethyl Nitrite—This is a depressant drug, formerly much used in febrile conditions to lower the blood pressure. It is one of the constituents of the fumes that are given off in large quantities in the making of mercury fulminate by the action of ethyl alcohol on mercuric nitrate. No serious cases of trouble from these fumes were reported.

Ammonia Gas—This is an irritating and corrosive gas, capable of setting up severe inflammation when inhaled. Here, too, there is the late development of the serious symptoms, and death is due to edema of the lungs as in nitrous fumes poisoning. In making dynamite ammonium nitrate is added to the dope and it is also a constituent of certain high explosive shells. The manufacture of ammonium nitrate from aqua ammonia and nitric acid involves some risk of poisoning, through an accident to the supply. The fact that ammonia is irritating to the lungs makes it dangerous to use strong ammonia vapors as an antidote for nitrous fumes poisoning, as has sometimes been done. The trouble would only be aggravated.

Ammonium Nitrate—The compound is poisonous only in large doses. It is very similar to potassium nitrate, which is often administered as a medicine in 30-grain doses over long periods of time, only the ammonium salt is somewhat less depressant to the heart than the potassium salt.

Chlorine Gas—These fumes are more choking and blinding than are nitrous fumes. Men hold their breath and run when chlorine fumes overtake them. Chlorine fumes are also more rapidly asphyxiating than nitrous fumes, but the symptoms that develop in those who survive the immediate effects are quite similar to the symptoms of nitrous fumes poisoning. There is the same delay in the development of serious dyspnoea, the same increasing air hunger, the same edema of the lungs and death by internal drowning, or development of pneumonia if the poisoning is not so severe.

Alcohol and Ether—In making smokeless powder from nitrocotton large quantities of grain alcohol are used, first to drive out the water from the cotton and then in combination with ether as a solvent. The fumes of alcohol are quite strong in the block breaking department, where the cotton impregnated with alcohol in a hydraulic press is broken up. These fumes may sometimes be strong enough to make the men somewhat drunk, but the effect of the mixture of alcohol and ether is so much severer than the pure alcohol that the latter does not attract much attention. A mixture of ether and alcohol is added to the dehydrated nitrocotton and the resulting colloided mass is pressed and cut into lengths. During these processes a great deal of the solvent evaporates and the men breathe it. Both these fluids have an effect on the central nervous

system, for when they reach the blood stream they tend to accumulate in the brain and it is there that the largest quantity of both ether and alcohol is to be found. This leads to an impairment of function of the cells of the brain, which are first over-excited and then paralyzed or narcotized. A form of chronic ether poisoning affects the digestion and general nutrition chiefly. A man who had been in charge of a smokeless powder works for six months gave his symptoms as follows: He lost his appetite, partly because he always had a taste of ether in his mouth. His breath smelt of it all the time. After about three months of this work he began to grow apathetic and listless.

INFLUENCE OF ALCOHOL ON POISONING FROM VOLATILE COMPOUNDS.

Many of the toxic substances described are volatile compounds which when absorbed have a special affinity for the cells of the central nervous system. Such are the nitro derivatives of the benzene series, nitrobenzol, nitrochlorbenzol, nitrotoluol, nitrophenol (picric acid); also the amido derivatives, aniline, diphenylamin, tetranitraniline, tetranitromethylaniline. Phenol (carbolic acid) is a poison of the same kind, and so is ether, though belonging to a different chemical group. Experiments show that in ether anesthesia the central nervous system contains more ether than does any other organ. These derivatives of the benzene series and also ether, enter into combination with the fatty substances in the brain, cholesterin and lecithin, more readily than with the water-soluble elements of other organs. The same affinity for the central nervous system is shown by alcohol. Here also it is in the brain that the greatest part of the alcohol is found in cases of alcoholic intoxication. If a man has been exposed to one of the above volatile poisons so that his brain cells have been partially poisoned, it will require only a small dose of alcohol to act as the last straw and bring on an attack of narcotic poisoning. As a matter of fact, this does occur rather frequently and gives rise in some instances to puzzling medico-legal cases, in others to faulty medical diagnoses. These are cases of mixed poisoning, of which the industrial poison is probably the more dangerous and the more responsible for the disaster. Ether men are said to be unduly susceptible to the effects of alcohol. Although this does not seem to have been observed by physicians who practise among them, the men themselves say that a single glass of beer or one drink of whiskey may be enough to make a man dead drunk if he has just come off his shift in the pressing and cutting house. These men, if taken to jail or the workhouse, sometimes scent the whole place with ether, their breath is so heavy with it. It is quite probable that such stories are true, for if a man has absorbed ether just short of the point where it begins to produce anesthesia and then takes a dose of another poison with a similar effect, the two will act together, although to the uninformed it will seem like an ordinary case of drunkenness.

MANUFACTURE OF POISONS.

Nitric Acid—For all these explosives nitric acid is an essential. Chile saltpetre (sodium nitrate) is acted on by sulphuric acid in great egg-shaped iron retorts or stills, with the fire below. Acid and saltpetre are charged through a manhole at the top, which is then tightly closed and luted down with clay. The nitric acid, which is volatile at the temperatures employed, distills out and passes through a condenser, where it is condensed to liquid by cooling with water either in glass tubes over which water flows (the Hart condensation system) or in fire clay vessels or in vessels made from an alloy of iron and silicon. The greater part of the nitric acid produced is obtained from this condenser. However, a portion of the nitric acid generated is decomposed into oxides of nitrogen of lower degrees of oxidation which are not condensed at ordinary temperatures. In order to recover this portion of the product the gases, after leaving the condenser, and from which the nitric acid proper has been removed, pass into a series of absorption towers in which they flow countercurrent to a stream of water or dilute nitric acid, which is fed over the towers. In these towers the lower oxides are oxidized and combined with water to form dilute nitric acid. The residue ("salt cake" or "candy"), which is chiefly sodium bisulphate and some neutral sulphate, runs out hot into great shallow pans, which are out in the open, covered only with a roof, and there it hardens. To make it more fluid an excess of sulphuric acid is often added to the original charge in the stills, and consequently there may be very irritating fumes when it first flows out, but there is a ready escape for them because of the open construction. Up at the top of the stills, on the charging floor, the air may be badly contaminated, during the first few minutes of the reaction, by fumes of chlorin gas, given off because there is always some chloride present as an impurity in the saltpetre. In some plants this is allowed to escape; in others it passes into the condenser system.

Sulphuric Acid—This is made in seven of the plants visited and by two processes, the older "lead-chamber" process and the newer contact process. For both, pyrites is roasted to produce sulphur dioxide, or sulphur flowers are burned, the latter being generally used in connection with the contact process. Pyrites roasting is hot and disagreeable work, but in the newer plants it has been made as tolerable as possible by good ventilation. One danger comes from the volatilization of arsenic, which is present as an impurity in all these ores, and which passes over with the sulphur oxides and must be removed in the "dust box," together with unburned pyrites and oxides of zinc and antimony. In the burning of sulphur flowers there may be neither excessive heat nor any disagreeable fumes, as was the case in one plant where a revolving furnace was used, automatically fed. At the time this place was visited the air was entirely free from fumes, as indeed were all the departments of the acid building. In either process the sulphur dioxide must be converted into sulphur trioxide in order to form sulphuric acid. In the lead-chamber process this is accomplished by the oxidizing action of oxides of nitrogen, which are introduced, together with steam, into the so-called "lead chamber." The hot sulphur-dioxide gases from the burners pass first through a tower called the "Glover tower," over which sulphuric acid containing nitrogen oxides is circulated. The hot gases drive out the nitrogen oxides and also partially concentrate the sulphuric acid in the Glover tower, being thereby themselves cooled in the process. The mixture of sulphur dioxide and nitrogen oxides passes then to the lead chambers, where the oxidation takes place as above described, additional quantities of nitrogen oxides being supplied directly to the lead chamber. The gases leaving the lead chamber are passed through a final scrubbing tower or series of towers known as the Gay-Lussac towers, where the valuable nitrogen oxides are removed by scrubbing with sulphuric acid before the gases are finally allowed to escape to the air. It is in the chamber process that the escape of fumes of sulphur dioxide may be great enough to cause much discomfort and even actual harm. In one acid works the Cottrell process for condensing these fumes by electricity has been installed, apparently with excellent results.

Acid Recovery—In almost all of the nitrating operations involved in the manufacture of explosives a spent or waste acid, consisting of a mixture of nitric and sulphuric acids, is obtained as a by-product. In order to recover the constituents of this waste acid in a valuable form the ingredients must be separated and concentrated. The operation of separating the two acids, which is usually called denitration, is accomplished by passing the acids down a tower of acid-resisting material and introducing a current of steam at the bottom of the tower. The steam serves both to heat up the mixture and drive off the volatile nitric acid and nitrogen oxides and also to dilute the mixture, breaking up the compounds of sulphuric acid with nitrogen oxides, which are comparatively stable in the presence of concentrated sulphuric acid. With this treatment the separation is accomplished, the nitric acid and nitrogen oxides being given off at the top of the tower in gaseous form and the sulphuric acid free from nitric flowing from the bottom. The condensation and absorption of the nitric acid and nitrogen oxides are accomplished substantially as described above under nitric acid. The diluted sulphuric acid flowing from the bottom of the denitrating tower must be concentrated to be suitable for most uses. This is done by passing the acid through a series of open pans or basin of material which will resist the action of hot sulphuric acid. These pans are usually heated from below by direct fire and the acid brought to boiling. In the first pans of the series practically nothing but water is evaporated from the boiling acid, which becomes gradually more concentrated. As the strength of the acid increases the boiling liquid gives off vapors of water and sulphuric acid mixed, which are condensed in order to avoid the loss of the acid and returned to the first part of the system.

Nitrocellulose—Cotton is changed to nitrocellulose or guncotton by treatment with a large quantity of mixed acids, about 1 part of cotton to 50 parts of acids. A mixture of nitric and sulphuric acids is used, the latter because the reaction between the cotton and the nitric acid results in the production of water, and strong sulphuric acid must be added to take up the water. The explosive power of the resulting guncotton depends on the percentage of nitrogen taken up. If the nitration is carried on for a longer time at a high temperature with a larger proportion of nitric acid, a nitrocellulose is formed which is not soluble, or sparingly so, in a mixture of ether and alcohol, and is classed as a high explosive. This is known as military guncotton and is also used in the mixed nitroglycerin powders such as cordite. If, on the other hand, the nitration is carried on more rapidly at a lower temperature and with a weaker nitric acid, soluble guncotton is formed, which is not classed as a high explosive, and is used not only for smokeless powder but for the manufacture of celluloid, lacquers, varnishes, artificial silk, etc.

Centrifugal or Mechanical Nitration—A typical building for this sort of nitration is three stories high, the top floor being used for the mixing and digestion of cotton and acid. The mixed acid from supply tanks outside flows into the digestor and is mixed with cotton already carefully purified. This is then sent down through supply pipes to the wringers, or centrifuges, on the floor below. There is rarely any trouble from nitrogen oxide fumes up here, unless there is a leak in the acid supply pipe—leaking pipes are no rarity in any form of nitration, for the strong acids eat through almost any substance—or unless the fumes on the second story can make their way up to the third. In cases of bad "fires" this does happen, and therefore it is best to have emergency exits and balconies for this story as well as for the second. On the second floor are the wringers or centrifugals supplied from above with acid and cotton, or in some cases the acid is carried with the cotton in the wringer. The workman fills his wringer, turns the supply pipe to one side to drip over a drain, puts on the lid loosely, and starts the centrifuge. If it does not start promptly enough, or if the cotton is matted, and does not mix well, or if there is too little acid, or if anything else goes wrong, a rapid decomposition takes place and fumes of the different oxides of nitrogen begin to come off. This is known as "firing" or "fuming off." The mixed white and orange fumes may pour out with such suddenness and violence as to hurl the man back for several yards. In one very well-managed plant where the wringer men are protected by means of strong helmets made of fiber, one man had his helmet flattened against his head by the force of such an explosion. Of course, when this occurs a quantity of liquid acid is splashed about and may give rise to severe burns.

An investigator of guncotton factories soon becomes accustomed to these "fires," the clouds of angry-looking fumes pouring out, the workmen running for the exits, the choking feeling in the air, and the light, prickling, burning sensation over the face from the fine spray of acid. Indeed, it is rare that an inspection can be made of a guncotton plant without at least one fire occurring during the visit, no matter how short it is. Eight large fires, with fumes thick enough to dye the sides, and many smaller ones, took place during a three-hour visit to one plant, but even worse was a much smaller factory where three fires occurred during seven minutes' time. Nor did the men in either place seem to look upon it as anything out of the ordinary. The rule is for the men at the wringers to make for the open air as quickly as possible and wait there till the fumes have died down and been sucked out by the exhausts. In the better constructed buildings, narrow porches with stairs leading to the ground are placed on both sides of the nitrating room, and there are many exits leading to them. In others, the arrangement is not so good; the walls of the wringer room are not free, and the men must go into the cotton rooms to escape the fumes, or perhaps into a space between buildings where fumes penetrate and do not find a ready escape. A very good arrangement was seen in a new plant in Rhode Island, where each nitrating unit, digestor and wringer, is separated from the one next to it by a fire wall, so that in case of decomposition the fumes cannot spread all through the building.

Smokeless Powder and Military Guncotton—Some of the guncotton made in this country is shipped wet to Europe, to be there converted into various kinds of powders, or it may be shipped wet to another factory in this country, but as a rule the powder is made in the same plant in which the cotton was nitrated. The various processes are carried on usually in separate buildings, and there is ample ventilation and a high standard of cleanliness, both of these necessary as measures of accident prevention, for the vapors given off are inflammable and the dust is explosive. Incidentally, the danger of industrial poisoning is also lessened by these measures. Wet guncotton comes from the washing and boiling departments which have followed the processes of nitration, and the first step is to drive out the water, then colloid the cotton by means of some solvent, and then to press and cut the rubberlike mass into appropriate shapes. After most of the water has been removed by centrifuging, the next process is dehydrating by forcing denatured alcohol in through the blocks of nitrocotton in a hydraulic press. From the press the cotton comes out in a block like a large cheese, and this is broken up by wooden hammers. A great deal of alcohol vapor is given off in block breaking, and the men may have alcohol "jags," but the effects are so much pleasanter than the effects of the ether encountered in the next step that they attract little or no attention. This block breaking is usually done in small separate buildings, and they must be kept scrupulously clean for fear of explosions. Mixing is the next operation and the solvent used differs in different powders. What is known as smokeless powder, or pyroxylin, or pyro powder, is a product of lower nitration, described as the pentanitrate of cotton, or dekanitrocotton, containing about 11.5 to 12.5 per cent. of nitrogen. It dissolves in ether-alcohol, which changes it to a colloidal state. This smokeless powder is not classed as a high explosive.

The nitroglycerin powders, cordite and others, are made from guncotton of higher nitration, a hexanitrate or endekanitrocotton, containing about 12.5 to 13.5 per cent. nitrogen. These are mixed with nitroglycerin and sometimes acetone and vaseline to form colloided strips. N. G. powders are not soluble in ether-alcohol. For smokeless powder, pyroxylin, the fragments from the block are put into a mixer or incorporating machine, where they are finely divided. Then ether and grain alcohol are run in from a hose and thoroughly mixed with it.

Picric Acid ($C_6H_2(NO_2)_3HO$)—All that has been said of the dangers of nitrogen-oxide fumes in the nitrating of cotton holds good of the nitrating of phenol. As in the case of cotton it is the mixing and the drowning processes that give rise to the most dangerous fumes. Whether or not these fumes are actually more abundant in the manufacture of picric acid than in making nitorcellulose, certainly in the United States they are more abundantly produced in the making of picric acid. So far only the danger of nitrogen-oxide poisoning in the making of picric acid has been considered, but there are other dangers. Nitric acid is handled, and there are the same risks of pipes leaking, connections breaking, acid spattering or spilling as were described in connection with the making of guncotton. In addition to this there is danger from the picric acid itself. Guncotton manufacture begins and ends with a harmless substance, but picric-acid manufacture begins with a poison, phenol, and ends with one. In a nitrocellulose plant less than one-third of the men employed may be exposed to the danger of poisoning; in a picric-acid plant practically all are exposed to some form of poisoning. Usually about 10 per cent. of moisture is left in the picric acid, and it is packed and shipped in this partly moist form, but occasionally it is dried, all but about two-tenths of 1 per cent. of the water driven out, before packing. When this is done there is much more trouble from picric-acid itch among the packers and from irritation of nose, throat, and bronchial tubes.

Phenol (C_6H_5HO)—In six of the factories that make picric acid the phenol needed for it is also manufactured, and in one that does not make picric, phenol is made. The methods used in these places involve the danger of benzol poisoning, of poisoning from sulphuric acid or sulphur dioxide, sometimes burns from caustic soda, as well as danger from the phenol itself. The first step is to sulphonate pure benzol with fuming sulphuric acid to form benzol-sulphonic acid. This is done in closed cast-iron kettles, and the work may be quite safe or fumes of benzol may be allowed to escape to a dangerous extent. The vapors of the

benzol are supposed to pass over to a cooler or condenser and then back to the sulphonator again. In one factory the whole sulphonating department was full of the odor of mirbane (nitrobenzol), caused by the sulphuric acid not being pure, but having had nitric acid added to keep it from freezing, which formed nitrobenzol. The benzol-sulphonic acid is run into a liming tank, where it is cooled and neutralized or made faintly alkaline. This is a danger point and there should always be provision for carrying off the fumes.

From the liming vat the liquid goes through filters to get rid of the sulphate of lime, and if this is done in ordinary filter presses the room is generally very wet and dirty. The clear liquid, containing the calcium salt of benzol-sulphonic acid, is led to a tub where it is treated with sodium carbonate to form the sodium salt and get rid of the remaining calcium as calcium carbonate. This is then evaporated to dryness and a fine white powder results—sodium-benzol-sulphonate. This goes to a fusion building where it is added little by little to an autoclave, in which is melted sodium hydrate—caustic soda. This is dusty work and the men doing it wear goggles and tie cloths over their faces. The sodium phenolate is allowed to solidify in iron pans, from which it must be broken and crushed and dug out. and here, too, goggles and protection for mouth and nose are needed, for the salt is said to cause as severe burns as does pure phenol. Sulphuric acid is then added to liberate the crude phenol, and at this stage there is a copious evolution of sulphur dioxide gases, which are most irritating when no means are provided for carrying them off. The phenol may be separated from the soda liquid, if it is given time to cool thoroughly, by gravity only, but if the work must be hurried, benzol is used to extract it, and then removed by distilling and used again. This introduces a second danger of benzol poisoning.

Nitroglycerin—In the United States Nobel's process is used for making nitroglycerin. In the nitration of glycerin the reaction is carried on in a steel vessel provided with mechanical air agitation and cooling coils through which water or brine is circulated. Mixed nitric and sulphuric acids are used, for in this reaction, as in nitrating cotton, water is liberated and sulphuric acid must be provided to take it up. The glycerin, previously warmed to reduce its viscosity, is introduced in one or more fine streams either over the surface of the acid or below it. Thorough agitation is needed to prevent overheating of any part of the charge, for this might result in violent decomposition or "firing," and for the same reason the cooling coils are provided to keep down the temperature. If such an accident threatens, the glycerin stream is stopped, the agitator run faster, and if that does not lower the temperature, the vent at the bottom of the nitrator is opened and the whole charge run down to the drowning tank of cool water, which is always built just under the nitrator and is fitted with mechanical air agitation. After the glycerin has all been added the charge is run into a lead separating tank, where it is allowed to stand until the acid and glycerin are separated. This tank has a glass set in the side so that the progress of separation can be observed. When separation is complete, as shown by the presence of a distinct line of demarcation, the nitroglycerin, which is the upper layer, is drawn off from a draw cock in the side of the separator to the wash tank and the waste acid is sent to the acid recovery. At the next lower level or in the next building the separated nitroglycerin flows to washing and neutralizing tanks of lead or wood, where it is agitated by air jets, and here, too, fumes of nitroglycerin are given off, and a fine spray of nitroglycerin-laden drops passes into the air and the contents of the tank may splash on the floor. From these tanks it flows to storage tanks. Then it is weighed and run through a hose into small cars for transporting to the "doping" house.

Trinitrotoluol—Trinitrotoluol, called triton and TNT in the United States, and trotyl and TNT in England, is a comparatively new explosive in this country. It was manufactured first as an explosive in Italy, in 1907. At the outbreak of the war only one American plant was making it, but very soon additional factories were erected, both for the nitration of toluol and for the preparation of high explosive charges. The production of trinitrotoluol from toluol is accomplished by the action of a mixture of nitric and sulphuric acids and may be done in a one-stage nitration or by two or three successive steps. In the latter case it is not necessary to wash the intermediate product, the mono and dinitrotoluol, but the mixture is simply allowed to separate in the nitrator, the acid drawn off and the fresh nitrating acid for the next stage added. Nitration is carried out in an iron nitrator, the mixed acid being run gradually into the toluol or partly nitrated toluol, as the case may be, and the temperature being controlled by coils in the nitrator through which water or steam is passed. The nitrator is equipped with efficient mechanical agitators. Chemists say that if during the early stages of the process the acid used is too dilute, the resulting compound will be largely phenylnitromethane, $C_6H_5CH(NO_2)_3$, and it is probable that some of the illness that has occurred in the course of such work is traceable to this compound. After the trinitrotoluol is thoroughly neutral the molten material is run into cold water with vigorous agitation where it solidifies in a granular form. Crude triton contains more or less dinitrotoluol, and sometimes, if the toluol was not pure, dinitrobenzol as well. This last is decidedly more poisonous than any of the nitrotoluols. As to the comparative poisonousness of the higher and lower nitration products of toluol, the British experience—confirmed by tests—goes to show that crude TNT containing some dinitro is no more toxic than the pure. On the other hand, American physicians who have charge of men in nitrating works maintain that more cases of poisoning develop in the dinitro department. This may be because the dinitro is more volatile than the trinitro, and because it is semi-liquid at ordinary temperature and more easily absorbed by the skin.

The breaking and shovelling seems to give rise to very little dust, for the stuff is fairly moist and pasty, about like lumps of maple sugar. It may be that the illness which undoubtedly does take place here may be caused by volatilization at ordinary temperature, if there is dinitrotoluol present. Or it may be caused by handling, though there seems little need for handling. The product of first nitration, when the process is done in two stages, is at first half liquid, and though it soon solidifies there is always some oily substance left which must be removed by centrifuging. There is a good deal of trouble from fumes or a fine spray from this centrifuge, unless an exhaust suction draft is supplied to carry it off. Washing the triton is done with hot water in great closed kettles with an opening in the top through which the men dump the fragments from the crystallizing tanks. The triton goes on to the grainers—open chasers—such as one sees used for grinding paint in oil. These should be furnished with hoods, for they are heated to drive off the water and there may be volatilization of the contents. Blending comes next, in an enormous bolting machine, which discharges either into a screen or into a bin from which it must be shovelled into the screen. Then, after passing through the screen, it is packed by hand into paper-lined barrels. These last processes, blending, screening, and packing, are all somewhat dusty, especially as some of the stuff is always spilled on the floor and ground up by the feet of passers-by. A very fine dust can be discovered over unnoticed projecting surfaces in such rooms, even when one cannot perceive dust in the air. It is generally acknowledged that there is risk of dust poisoning in this department. Sweeping with long-handled brushes goes on all day (except in the one plant where a vacuum cleaner is used), but it seems to be done cautiously and not to stir up much dust, even though it is done dry. Many of the men engaged in breaking up the TNT in the separating tanks and in screening, packing, and so on wear cloths over mouth and nose. A few further protect themselves with goggles. Rubber gloves and boots are furnished by the companies.

Sweepings, scraps carried off with the wash water, spent acid, etc., are all collected in lead tanks, there mixed with water, cooled, and the TNT crystallized out. There is usually abundance of steam coming off from these tanks, but it is said to carry only an infinitesimal percentage of TNT. In nitrating toluol there is the usual danger of decomposition, or a "boil-over," or leaking acid pipes, with the discharge of nitrous fumes, or even of nitrotoluol fumes from hot liquid. Out of a list of 10 cases of poisoning in plants nitrating toluol, the histories of which were given with a fair degree of fullness, there are six stated to have been poisoned because of an unusual exposure, something not encountered in the ordinary course of work.

One, a fatal case, was a carpenter making repairs; another was an electrician also repairing; two very severe cases, one of them fatal, came as a result of cleaning out a tank which had been full of dinitrotoluol. The fifth case, a machinist, was severely poisoned by a "boil-over" from a nitrator; and the sixth, by fumes from a leaking pipe.

Filling Shells With Trinitrotoluol—Charges for shells may be pressed or moulded. For the former kind of shell the triton powder is weighed and then put into a hydraulic press. Although this weighing and pressing does not seem to a casual observer to be attended with much production of dust, it is said by those who know to give rise to more triton poisoning than any other work. Not only is there dust from the powder, but there is a good deal of direct contact from handling, and TNT is absorbed through the skin perhaps more than in any other way. The men who work here have hands stained a bright yellow in spite of the fact that all wear gloves. These pressed charges are trimmed on a lathe, by men, and usually in the pressing room. Then they are dipped in melted paraffin and wrapped in paper with caps, and varnished. All these last processes are, in one factory, carried on by women in rooms separate from the pressing and trimming. In the other factory men do the work. The final wrapping of paraffined charges and varnishing the outside is harmless work, because the triton is safely coated over, but the paraffining and inspecting is much more dangerous than it seems to an outsider. The inspector weighs the paraffined charge, and if she finds it too heavy she must scrape off part of the paraffin and with a knife or scissors cut away enough triton to make the weight correct. The girls who do this all wear heavy gloves and are careful about cleanliness of the person, more so than are the men, because they dislike the disfiguring dye on the skin and the still more disfiguring eruption that may come from triton dust; yet they, too, suffer from triton poisoning as a result, apparently, of the insignificant amount of dust encountered in paraffining and inspecting.

More charges are made by moulding than by pressing, because the latter is the method used by the Russians and also for the mixed shells called for in some British contracts. In the moulding or pouring method there is not so much dust as in pressing, but there are more fumes. TNT melts at 80° C., and is not supposed to volatilize under 180° C., but fumes are easily perceptible around kettles not nearly at so high a temperature as that. It is also shown by experience that if melting kettles are left open and men work near them they may become poisoned. In one of these shell-filling works the poisoning caused by open kettles was evident enough to lead the management to place the large melting pot in a room quite separate from the pouring and to allow only one man to work there. In another there was a row of open kettles along the inner wall of a long shed, the outer wall of which had wide doors and windows. It had been hoped that this abundant natural ventilation would be enough to do away with any trouble from the kettles, but experience showed that it was not. The tops of the kettles were about 3 feet in diameter and they were only half covered, for one of the two half lids had to be taken off to allow the tender to watch as the kettle turned and churned up the charge of triton, and also to allow him to feed in more triton from time to time. The illness of the men here was probably caused by the fumes from these kettles and, to a certain extent, by the dust spread as the kettles were charged. This triton dust is worse when scrap is being melted than when TNT as it comes from the nitrator is used. In any case there is some dust.

Other sources of fumes are the open kettles for melting scrap and for melting out the "sink heads," for they may be left uncovered even when the moulding kettles are well covered. After the shells are filled, the danger from fumes is over and the danger from dust reappears. The solid TNT charge must be bored to allow of the insertion of a detonator, it must be "faced," i. e., the neck must be drilled down and the screw neck of the shell must be cleaned unless it has been protected during pouring by a funnel, and the outer surface must be cleaned and polished. All this is dusty and is sometimes done in quite dangerous ways. It is usual to protect the boring and planing machines to a certain extent by means of hoods with exhausts and a down draft. Cleaning the threads in the neck of the shell when it has not been protected during pouring is dusty work and so is cleaning out the bore for the detonator with a long, narrow brush which brings out a very fine, light dust. The factory which used vacuum cleaning also uses suction for the removal of dust from the bored shells. Imperfect, rejected shells must be emptied out, and this may be done in very dusty ways.

Nitrobenzol ($C_6H_5NO_2$) and Anilin ($C_6H_5NH_2$)—There is not so much risk of poisoning in the nitrating of benzol as in the subsequent reduction of the nitrobenzol to anilin, because there is less opportunity for fumes to escape. Nitration is carried on in a large steel retort with a mechanical stirring device and cooling coils. The charge of benzol is run in by gravity from the weighing tank and then the mixed acids, nitric and sulphuric, are added. In some places these acids are mixed and kept in partially closed receptacles and the fumes are allowed to escape. After about four or five hours agitation in the reactor nitration is complete and the nitrobenzol is washed and neutralized. Anilin is produced by reducing this nitrobenzol by means of iron filings and hydrochloric acid. This reduction is carried out in a cast-iron reducer, the temperature being controlled by the rate of addition of the different materials and by blowing steam into the solution if necessary to hasten the reaction. The reducer is equipped with a plough which turns slowly and prevents the separated iron sludge from solidifying in the bottom of the reducer. At the temperature of operation steam is evolved from the reaction mass, which carries with it considerable quantities of anilin. These vapors pass through a condenser and are returned to the reducer. After reduction is completed steam is turned into the reducer and the anilin, which volatilizes with the steam, is distilled out, the condensed distillate is allowed to cool and settle and anilin, being immiscible with water, separates out. There is a chance for anilin fumes to escape where the filings go in, and also from the "sludge," with the iron filings at the bottom of the reducer, for this flows out or must be shovelled out frequently. The anilin is distilled and redistilled to purify it, and from time to time samples are drawn off to be tested, by sight and smell, to see how the process is going on. Then it is drawn off into drums from the stills. In the course of much of this work anilin may spill on the floor and the men step into a pool and have their shoes wet with it. Or they may spill some on their clothing. Anilin poisoning follows skin absorption probably more promptly than absorption of fumes by breathing. Another source of poisoning is repair work, necessitating entering a reducer which has not been thoroughly cleaned out, and thorough cleaning is very difficult.

Tetryl—The first step in the manufacture of tetryl consists in the formation of dimethylanilin by treating anilin with methyl alcohol in the presence of sulphuric or hydrochloric acid. After digestion the product is washed with water to remove the excess alcohol and purified by redistillation. The dimethylanilin is sulphonated by treatment with concentrated sulphuric acid in an iron tank equipped with stirrer. The sulphonated product is nitrated by being run into mixed acid—nitric and sulphuric acids. The tetryl or tetranitromethylanilin separates out in solid form in the nitrator. The charge, after completion, is drowned in a large quantity of water and the separated solid product washed several times to eliminate all free acid. An enormous evolution of nitrous fumes takes place when the tetryl is drowned, orange clouds rising to the heavens and being visible for miles around. There seems to be much difficulty in preventing this, and, so far, all that is done is for the men to run outside and wait till the fumes subside. After thorough washing, the tetryl is dried in the same way as picric acid, except that less heat is required —only 65° to 70° F. as against 70° to 80° F. for picric acid. The dust in the drying room is quite as bad.

Diphenylamin—Diphenylamin is prepared by digesting anilin and anilin hydrochloride in an autoclave under pressure. Reaction forms hydrochloric acid, so that the autoclave used must be of material which will resist the action of hydrochloric acid at the high temperatures used. At the end of the digestion the product is washed several times with hot dilute hydrochloric acid, the temperature used being sufficient to maintain the diphenylamin in the molten condition and permit of its more thorough washing.

The hydrochloric acid dissolves the unchanged anilin from the diphenylamin. For further purification the diphenylamin, after the completion of the washing, is distilled from a still heated by direct fire.

Fulminate of Mercury—The making of this very powerful explosive is attended with a constant danger of accidental explosion, and this is true to a less extent of the handling of fulminate in filling percussion caps. This leads to a strict avoidance of dust, a scrupulous cleanliness, and a separation as much as possible of different processes, all of which measures tend also to diminish the risk of occupational poisoning. There is some danger of mercury poisoning in the making of the nitrate. Tiny globules of mercury were scattered all over the nitrating apparatus in one of these plants. Even greater is the danger in recovering mercury from the water used to wash the balloons. This liquor yields a "sludge" or "mud," which may contain as much as 30 pounds of mercury in 140 pounds, and when it is distilled the mercury is volatilized, but, of course, every effort is made to prevent it from escaping. Fulminate is made into charges for percussion caps, either in dry or moist form, the latter being decidedly preferable from our point of view, since there is no dust. When it is handled dry, excessive precautions are needed to prevent explosions, and there is very little actual contact with the powder, except in the initial weighing and the mixing with potassium chlorate. Both these processes are carried on in separate rooms and by one man only. Other processes—weighing charges, loading, and pressing—are so arranged that a man standing behind a heavy steel or a thick concrete barricade can control the mechanism by means of a lever, guiding himself by watching a mirror fixed above the machine. The substances added to the fulminate to make up the charge are none of them harmful, consisting of chlorate of potash, antimony sulphide, ground glass, sometimes sulphur. The factories manufacturing small arms commonly fill their own caps, but do not manufacture the fulminate. Many men and women are employed here in work which exposes them somewhat to the action of fulminate-laden dust, though here, too, there is enough risk of explosion to lead to avoidance of unnecessary dust and to a certain amount of segregation of some processes. There is a fairly large amount of fulminate dermatitis among the workers who do the loading and pressing and inspect the primed shells, but no more serious troubles so far as we were able to discover.

Ammonium Nitrate—It is made by the action of ammonia on nitric acid and as a usual thing most of the processes are carried on in the open under a shed that allows free escape for the disagreeable fumes of ammonia and pyridin bodies, fumes that are very heavy at certain stages of the reaction. If the work were carried on indoors some harm might result from them. Once neutralization is complete there is no fear of fumes, and the subsequent crystallization may be carried on indoors in great open chasers. The real danger to be looked for in making ammonium nitrate is an accident either to the supply of aqua ammonia or to the supply of nitric acid, for these are both powerful, fuming poisons.

TREATMENT.

Nitrous fumes poisoning.—For the asthma-like attacks the usual treatment is 15 drops of chloroform shaken up with a tablespoonful of aromatic spirits of ammonia in three-quarters of a glass of water, to be sipped by degrees during an hour's time. This does not exert any effect on the lung tissue, does not prevent the development of edema; it simply relieves the spasm and the abdominal pain. Inhalation of the vapors from this mixture may give relief, but strong ammonia vapors are capable in themselves of causing edema. Substitutes for chloroform are found in chlorodyne, small doses of opiates, bromides. A spray of some soothing liquid, such as albolene with menthol or thymol, is said to relieve the spasmodic cough. For the pain in the abdomen large doses of bicarbonate of soda or cocaine or stovaine are advised. The British committee's report lays stress on the relief afforded by vomiting, and when this does not occur spontaneously they give lukewarm salt water till the effect is secured.

Fresh air, quiet, and rest are advised even after a mild attack of fume poisoning. The diet should be simple, and laxatives should be given. Many experiments have been made to find a method of treatment which will help to ward off the development of the dreaded dropsy of the lungs. Esch claims to have found that sodium thiosulphate has such an effect by virtue of its reducing power. He recommends a hypodermic dose of a tenth to a fifth of a gram of thiosulphate or a much larger dose by mouth, since it is quite harmless. In addition inhalations of ammonia should be administered. The thiosulphate is said to be antagonistic to picric acid and the nitriles, as well as to possess this reducing power. In case of unconsciousness from nitrous fumes artificial respiration should be given, preferably with oxygen; the man should be kept warm; heart stimulants given if necessary; and as soon as possible fluids given in large quantities; milk or alkali waters with strong coffee. When edema develops absolute rest must be insisted on, so as to make as little demand as possible on the lungs. Oxygen may serve to keep a man alive till the dropsical fluid begins to be absorbed. Counter-irritation in the form of mustard plasters is recommended. Venesection and normal salt infusion is advocated, also intravenous injections of sodium bicarbonate solution.

British and French medical journals during the last two years have contained many articles on the treatment of "trench gassing," poisoning by chlorine gas, in which the later lesions are much the same as in nitrous-fume poisoning, though the immediate asphyxiating effects are much more intense. Edema of the lungs develops after a varying interval, as in nitrous-fume poisoning, and the suggestions as to treatment of this condition would apply also to edema from nitrous fumes. Large linseed poultices over the whole back are recommended. Anemic men do not suffer as severely as the plethoric, and bleeding may help. Place the man on an inclined plane at about 30°, with the neck on an upright piece and the head falling back over it to a padded rest. Massage of the chest given in this position results in the expulsion of much fluid from the lungs. The treatment may be given for 10 minutes at a time.

Nitro and amido compounds.—One authority says there are two remedial measures for poisoning by nitrobenzol and anilin, removal from the source of the poison, and administration of oxygen. Although animal experiments give no reason to believe that the amount of oxygen in the blood can be artificially increased, oxygen does seem to work, perhaps by increasing the depth of the inspirations. Many American physicians use oxygen in cases of cyanosis from these poisons, but others have seen no benefit from it and consider it an illogical form of treatment, because the methaemoglobin cannot be driven out from its combination by forcing in oxygen. They prefer to use stimulants, of which camphor seems the most valuable. Anilin on the surface of the body should be washed off with soap or with a weak solution of acetic acid or vinegar, not for the reason often held, that it serves to form acetanilid and prevent absorption, but simply because water will not remove anilin unless it is acidulated.

Trinitrotoluol.—Systemic symptoms. In cases without jaundice the British authorities recommend removal from contact with the poison, rest in bed for a day or two, a light diet of milk, fruit, and green vegetables; demulcent drinks, such as barley water, tea, and coffee; the bowels kept open by cascara sagrada or other vegetable laxatives; and a mixture of sodium sulphate, potassium citrate, and sodium bicarbonate to be given as routine treatment. If jaundice develops, rest in bed from the first is essential; milk, at first in small quantities, slowly increasing to four pints a day. The bowels must be kept loose, preferably by mistura alba, repeatedly given to maintain its action, if necessary. Alkali-producing drugs, such as citrates and bicarbonates, are given to counteract the tendency to acid intoxication. Rectal and intravenous saline injections have a definite place in the treatment of severe cases.

Dermatitis.—There are many remedies recommended for this form of triton poisoning. As a preventive the British committee recommends a mixture of 2 parts of castor oil to 1 of lanolin, rubbed into the skin after washing at the end of work. The English dermatologist, Prosser White, uses for the early itching stage a mixture containing camphor, carbolic acid, hydrarg. perchlorat, picric acid and alcohol. This is to be painted on by the physician. For home treatment he gives a mixture containing 2 parts of the above to 4 parts of lotion calam. comp. and pulv. acaciae. Then for a soothing ointment, to be applied at

POISONS USED IN MAKING EXPLOSIVES—*Continued.*

night when a bandage can be worn: Acid oleic, 9 parts and zinc oxide 1 part, stand two hours. Emplastrum plumbi 10 parts, parenol solid, 25 parts, parenol liquid, 13 parts, hydrarg. ammon. 3 parts. Two English physicians who are in charge of the force in a triton works say that any simple emollient will serve the purpose. They use zinc and bismuth ointments, lotions of tragacanth and glycerin, or boro-calamine lotion. Among American physicians alkaline washes seem to be popular, especially wet dressings of a saturated solution of bicarbonate of soda. One physician with a wide experience uses for moist eczema a teaspoonful of lysol in a pint of water; and for the dry, an ointment with phenol, calomel, zinc oxide, starch, and petrolatum. Another prescribes a wash of magnesium carbonate suspended in water, and then a mixture of alcohol and glycerin.

Fulminate of mercury.—At the United States arsenal at Frankford, the men who handle fulminate are given carbolized vaseline to rub on the skin after washing. For fulminate itch, an ointment is made of balsam of Peru, with zinc oxide ointment, and a little carbolic acid.

Picric acid.—Ointment has been recommended for severe picric-acid itch, and for the milder forms, a lotion of equal parts tincture of belladonna and tincture of aconite. Another treatment is carron oil applied after a full bath.

Tetryl dermatitis.—Dr. Enid Smith, who has had charge of 250 women handling tetryl in an English munition works, advises the following measures: Each woman hardens her hands before going to work by washing in "methylated spirit" 20 parts, to 80 parts of water, and dusts the face with a powder of zinc oxide 1 part to 3 parts of starch. She is warned not to touch the face after this. On leaving work she washes with bran or with olive-oil soap. The working clothes must be soaked in cold water and kerosene and rinsed before boiling to get rid of the tetryl dust. If a severe dermatitis occurs, the face should be steamed, then wet cloths applied to allay the irritation, and then calamine lotion or ointment of zinc oxide with lanolin and castor oil. No lead lotion must be used, as lead has a dangerous affinity for tetryl.

AMERICAN MEDICAL WOMEN.

(May S. Macy, M.D., in *American Medicine.*)

THE following table gives approximately the number of physicians, male and female, in the United States, its colonies and Canada, who are in the American Medical Directory:

State.	Total Physicians.	Women Physicians.	State.	Total Physicians.	Women Physicians.
Alabama	2,569	12	Ohio	8,045	301
Arizona	307	9	Oklahoma	2,634	54
Arkansas	2,637	25	Oregon	1,187	86

17	New York	0.15%	Kansas	Texas	Minnesota.
18	Oregon	0.15%	Arkansas	Wisconsin	Nebraska.
19	Tennessee	0.15%	Oklahoma	Washington	Oregon.

According to Dr. Macy, Illinois, Ohio, Massachusetts, Missouri, Indiana, Iowa, New York and Kansas can spare medical men for the war front, and provide medical women to substitute for them in civilian practice.

GEOGRAPHICAL RESEARCH IN 1917.

(Prepared by the National Geographic Society.)

Up to November, 1917, the territorial account of the war showed a balance of approximately 890,000 square miles in favor of the Allies. The Central Powers held Allied territory approximately equalling France in area and population, while the German and Turkish territory occupied by the Allies approximately equals the area of the Argentine Republic. In the realm of geographical exploration interest was divided mainly between the work of the National Geographic Society's 1917 expedition to Katmai volcano and Vilhjalmur Stefansson's Polar work. Amundsen's expedition to the North Polar region was held up until more favorable conditions arise.

NORTH AMERICA.

According to an account given by Mr. Cecil J. Wacher, of the Hacienda Los Lagartos, Salvador, the earthquake and the eruption of the volcano Quetzaltepeque, near San Salvador, which began June 7, 1917, were extremely severe and disastrous The slight preliminary shocks which had been felt for several days were not regarded as unusual or ominous. On the evening of the 7th a terrific shock damaged every house in the town but one. The shocks continued at intervals of a few minutes. In about an hour a great rushing noise, followed by heavy detonations and an appalling burst of flame, announced the eruption of the volcano. Five days passed before these conditions abated. The towns of Nejapa, Quetzaltepeque and Armenia were wiped out. Hot ashes carried by the wind over the mountain as far as Zarngoza, scorched the plantations of the Santa Tecla Valley; the town of Santa Tecla was severely damaged and the Salvador Railway sustained serious losses. Government losses were tremendous, wealthy families were ruined and many people suffered injury or death. The church at Armenia had been destroyed in 1915 and had just been rebuilt and newly consecrated on June 3, only to be destroyed again on the 7th. The earthquake shocks on the night of the 7th appeared to run from southwest to northeast; the almost continuous shocks of the next few days in exactly the opposite direction.

The National Geographic Society, on September 6, 1917, made public a telegram from Kodiak, Alaska, in which Robert F. Griggs, director of the society's 1917 Mount Katmai expedition, announced his party's safe return to civilization, together with the news of complete success in the expedition's scientific investigations. Dr. Griggs believes that it is now safe to place the Valley of the Ten Thousand Smokes, which was discovered by last year's expedition, foremost among the wonders of the world. It has a million active vents within an area of a hundred square miles. The expedition's survey proves that Katmai has the greatest crater on the face of the globe, with a circumference of more than 9 miles and a depth of 3,600 feet. A mud river 17 miles long was discovered and 1,600 miles of territory hitherto uncharted was mapped. Two thousand photographs were secured, and a complete collection of plants, insects, birds and geological data. Gases from the vents in the Valley of the Ten Thousand Smokes were taken also for chemical analysis. This expedition set sail from Seattle May 28, fully equipped in every particular to complete the work begun by the society's earlier expeditions of 1913, 1915 and 1916. There were no casualties, and the party reached Washington early in October. Prior to the Katmai eruption of 1912, one of the most terrific explosions in the history of the world, practically nothing was known about this great Alaskan volcanic region. Judging from Dr. Griggs's preliminary report, the expedition was one of the most successful ever undertaken by the National Geographic Society, and the data collected will be among the foremost contributions to the science of the earth's surface since the dawn of the twentieth century.

On January 26, 1917, as a result of a heavy snowslide into Gold Creek Gulch, an avalanche wind occurred near Juneau, Alaska. Several cabins were destroyed by the blast, and the debris carried up the opposite slope, along with other heavy material. A blinding whirl of snow came with the wind, and the city was enveloped in semi-darkness for several minutes.

With the information that it had discovered chains of lakes hitherto unmapped and rivers equally unknown in the interior of Labrador, the National Geographic Society's Labrador expedition, headed by W. E. Clyde Todd, curator of ornithology of the Carnegie Museum, Pittsburgh, returned to St. John's, Newfoundland, on the 17th of October. The expedition set out from Seven Islands on the north shore of the Gulf of St. Lawrence early last spring, its objects being to explore the unmapped lakes and rivers of the Hudson Bay region, a country heretofore untraversed by white men, and therefore unknown both from a geographic and biological standpoint. Elaborate photographic as well as scientific equipment was carried by the expedition. Mr. Todd's report, fully illustrated, will be published in the official organ of the society, the National Geographic Magazine. A co-leader of the expedition was Alfred Marshall of Chicago.

SOUTH AMERICA.

The long boundary controversy between Santa Catherina and Parana, two provinces of Brazil, was settled by an agreement ratified on October 20, 1916, at Rio de Janeiro.

The sugar interests of Ascope, in the interior of Peru, have arranged for the construction of a new port at Malabrigo, a situation sheltered by Malabrigo Point from the prevailing southwest winds.

Dr. Hamilton Rice returned to New York on April 24 from his expedition to the Amazon on the steam yacht Alberta. The Amazon was ascended to Iquitos in Peru, a distance of 2,100 miles, and the upper portion of the river, from Manaos to Iquitos, known as the Solimoes, was charted. Returning to Manaos, the expedition chartered a river boat, and with this and a specially constructed launch ascended the Rio Negro for a distance of 425 miles. The object of the expedition was to make a survey of the Rio Negro and an investigation of the diseases of the region, as well as to experiment in wireless communication with Radio, Virginia.

EUROPE.

A well-authenticated measurement of 9.84 inches was made in Bruton, in Southern England, during a heavy rainfall on June 28, 1917. This is the heaviest downpour within twenty-four hours that has ever been recorded in Great Britain.

During the extraordinarily severe winter of 1917 railway ferriage between Sweden and Denmark was obstructed for two months and entirely stopped for two weeks. One Captain reported that there were 200 ships caught in the ice in the Skagerrak in early February, and Danish fishermen said that 33 German submarines were blocked in the Kattegat on February 7. Moving ice exploded many mines. Ice conditions were the most severe since 1895.

AFRICA.

M. Rene Chudeau is reported to have returned from another Saharan journey. He brings favorable reports concerning the economic possibilities of the portion of the Upper Senegal crossed by the railroad from Kayes to the Niger. Irrigation has made considerable advance; Lake Faguibine has been nearly refilled by skilful engineering works and the winter flood of 1915, and the cattle raising industry is in a promising condition. These investigations were accomplished under the auspices of the Colonial Office and the Geographical Society of Paris.

Prof. Richard L. Garner, manager of the Collins-Garner Congo expedition in the interests of the Smithsonian Institution, and C. R. W. Aschmeier, of the Department of Biology of the United States National Museum, left this country in December, 1916, and have been in Africa. The objects of the expedition are the study of the fauna of the region and the collection of specimens, all of which will come to the Smithsonian Institution.

ASIA.

An all-Russian route has been completed for passengers by rail from Vladivostok to Western Russia by the opening of the Kabarovsk, one of the longest bridges in the world (8,523 feet), across the Amur.

Assistant Prof. Wellington D. Jones, of the University of Chicago, has returned to this country after extensive exploration in Eastern Asia.

GEOGRAPHICAL RESEARCH IN 1917—*Continued.*

AUSTRALASIA.

E. H. Wilson, of the Arnold Arboretum of Harvard University, is engaged in a botanical expedition in the East. He left the United States in January, 1917, and expects to return in the spring of 1918. He visited the Riu Kiu Islands, a group which has been little explored by botanists.

Unusual interest attaches to the plans of Dr. Eric Mjoeberg, of the Swedish State Museum, for an expedition which will explore the interior of New Guinea with the aid of the airplane. Geelwink Bay is to be his starting point, and the work will require about three years.

It was announced in November that the Australian trans-continental railway from Kalgoorlie to Port Augusta probably would be completed before the end of the year, the unfinished gap being then only thirty-six miles.

POLAR RESEARCH.

Christian Leden, an explorer commissioned by the University of Norway and the Geographical Survey of Canada, returned to New York late in 1916 after three years spent in the Arctic. Leden brings reports of gold deposits and a rich oil region. He travelled and lived among the Eskimos and made studies of their language, myths, poetry and music. His equipment included a phonographic oufit, which enabled him to bring back a number of records of their music.

Vilhjalmur Stefansson spent the summer of 1916 exploring the new land he discovered north of Prince Patrick Island, while a separate party planned to go west and northwest from Cape Alfred. A despatch from Dawson, dated March 9, 1917, transmitted by a Northwest Mounted Police expedition, reported that the explorer was wintering at Prince of Wales Strait with the Polar Bear and hoped that ice conditions in the spring would permit him to make his way north and east and up the St. Lawrence.

Mr. Knud Rasmussen, who set out in the summer of 1916 with a plan for the exploration of the region between Peary Land and Greenland, failed to reach his station at Thule in time to start north. He therefore took up his alternative plan of exploring the coast of Melville Bay. This district was expected to yield valuable information concerning Eskimo migrations and is an excellent field for glacier study.

The third relief ship sent in search of Donald B. MacMillan's Crocker Land expedition, the Cluett, sailed from New York late in June, 1917, under the command of Capt. Robert A. Bartlett, the second one, the Danmark, sent in 1916, having failed to reach the party. The Cluett effected the relief and returned to Nova Scotia with the members of the preceding expeditions in August. The explorers report the discovery of mineral deposits, the charting of unknown parts of the coast and islands, observations of raised shores and a remarkable collection of Arctic trophies. This collection includes relics of earlier exploration, notably a message signed by Dr. Kane in 1857, a carving from the Polar ship Alert, many Arctic furs and mounted specimens, Eskimo carvings, garments, etc., and wonderful botanical specimens. Capt. Bartlett, the rescuer of the expedition, is planning an Arctic trip during which he will make use of the airplane.

The Aurora, the auxiliary ship of the Shackleton expedition, which was blown away from the Ross Sea base leaving ten men marooned, left Port Chalmers on December 20, 1916, for the rescue of this party. The ship had been repaired and outfitted by the Australasian Committee, and Sir Ernest Shackleton, after the rescue of his men at Elephant Island, sailed for New Zealand and took command of the relief. The Aurora accomplished a remarkable voyage, reaching Cape Evans on January 10, where seven of the ten marooned men were taken aboard, and returning within wireless range of Wellington on February 5. In October, 1915, the Ross Sea party had set out to lay the southernmost depots of supplies for the trans-continental expedition. They successfully laid all the depots, travelled 1,500 miles over the Barrier and surmounted the difficulties of a terrible return journey, during which one member died of scurvy. After the return to Hut Point, the leader, Capt. Mackintosh, and one companion were lost in an attempt to cross the young sea ice to Cape Evans. Though it failed to cross the Antarctic continent, the Shackleton expedition obtained important meteorological observations on both sides of the Antarctic, charted much unknown coast of the Weddell Sea, and brought to light many new facts about ice movements. Not the least of its results is the example of splendid heroism given by the explorers.

RECENT STUDIES OF STAR CLUSTERS.

(From the Scientific American.)

According to a recent count by Melotte there are 245 star clusters, of which eighty-three are globular clusters, and 162 loose or open clusters. While the open clusters are almost all in the Milky Way and are symmetrically arranged with respect to it, the globular clusters are mostly confined to one hemisphere, the pole of which is in galactic longitude 296 degrees and galactic latitude—8 degrees. The fact that none of the clusters show any proper motion seems to prove that they are enormously distant, as the alternative that they are all moving in the same direction as the sun and at the same speed is too improbable to be considered. Moreover, no relative motion has yet been found in clusters, though the positions of the component stars in some of them have been measured by Barnard over a period of seventeen years with the 40-inch refractor of the Yerkes Observatory. The only exception to this statement is the case of two stars in the cluster Messier 92, and it is, of course, uncertain whether the two moving objects in such a case actually belong to the cluster. From considerations based upon the apparent magnitudes of the stars and their probable real luminosities, Shapley has provisionally adopted for the great cluster in Hercules (Messier 13) a parallax of 0.00003 sec.

The apparent radius of this cluster is not less than 17 minutes of arc. "Accepting this result," says Shapley, "and the adopted value of the parallax, we find that the distance across the cluster is of the order of 1,100 light-years. To an observer on the nearer edge of the cluster, a star on the opposite side would have a parallax of 0.003 sec., and if intrinsically 100 times brighter than our sun, would still be nearly two magnitudes below the limits of visibility to the naked eye." The sun seen from any part of this cluster would, on the same basis, be fainter than a 22d-magnitude star; and it is probable that the entire galactic system to which our sun belongs would have about the size and appearance of the Greater Magellanic Cloud as seen from the earth.

LYNCHINGS IN THE UNITED STATES IN 1917.

Lynchings—Excluding the forty or more negroes put to death by mobs during the riots at East St. Louis there were, according to the records kept by the Division of Records and Research of the Tuskegee Institute in 1917 to November 1, 32 lynchings, of which 30 were in the South and 2 in the North. Thirty-one were males and 1 female. Of those lynched, 30 were negroes and 2 were whites. Eleven or one-third of those put to death were charged with rape or attempted rape.

The offenses for which lynchings occurred were: Attempted rape 6, rape 5, murder 3, killing an officer of the law 2, for not getting out of road and being insolent 2, attacking women 2, entering woman's room 2, wounding officer of the law 1, stealing coat 1, intimacy with woman 1, accidentaly killing child by running automobile over it 1, vagrancy 1, wounding and robbing a man 1, fomenting strikes 1, attacking an officer of the law 1, opposition to war draft 1, insulting girls 1. The States in which lynchings occurred and the number in each State were as follows: Alabama 4, Arkansas 4, Arizona 1, Florida 1, Georgia 2, Kentucky 2, Louisiana 5, Mississippi 1, Montana 1, Oklahoma 1, South Carolina 1, Tennessee 2, Texas 6, Virginia 1.

FINDINGS ON THE BISBEE, ARIZ., DEPORTATIONS.

FOLLOWING are the findings, rendered to President Wilson, November 6, 1917, by the Federal Commission appointed by him to investigate and report on the deportations, on July 12, 1917, at Bisbee, Ariz., during the copper strike and anti-I. W. W. demonstrations:

(1) A strike was called in the Warren district on June 26, 1917, to be effective the following day. While undoubtedly the men sincerely felt that several grievances called for rectification by the companies, having regard to the conditions in this district and the Government's need for its copper production the grievances were not of such a nature as to have justified the strike. Here, as elsewhere, there was, however, no machinery for the adjustment of difficulties between the companies and the men which provided for the determination of alleged grievances by some authoritative and disinterested tribunal in which both the companies and the men had confidence and before which they had an equal opportunity of urging their respective claims. This is a fundamental difficulty in the settlement of grievances that may arise in this district, and here, as in the other mining camps in Arizona visited by the President's mediation commission, a plan has been worked out establishing such machinery whereby in the future, at least during the period of the war, grievances will be settled by an orderly, impartial process, and the resort to strike or lockout will be wholly without foundation.

(2) Many of those who went out did not in fact believe in the justice of the strike, but supported it, as is common among workingmen, because of their general loyalty to the cause represented by the strikers and their refusal to be regarded in their own estimation, as well as in the minds of fellow workers, as "scabs."

(3) Shortly after the strike was called the Sheriff of the county, through the Governor of Arizona, requested the aid of Federal troops. The request was based on the fact that the State militia had been drafted into the Federal service and the State, therefore, was without its normal militia protection. Governor Campbell recommended to the Secretary of War that an immediate investigation of the situation at Bisbee be made by a Regular Army officer in order to ascertain the need of troops. The Governor's recommendation was followed and an investigation of the situation in Bisbee was made by an experienced officer. Such investigation was made on June 30 and again on July 2, and after both investigations the officer reported that everything was peaceable and that troops were neither needed nor warranted under existing conditions.

(4) That the conditions in Bisbee were, in fact, peaceful and free from any manifestations of disorder or violence is the testimony of reputable citizens, as well as of officials of the city and county, who are in a position to report accurately and speak without bias.

DEPORTED FROM WARREN DISTRICT.

(5) Early on the morning of July 12 the Sheriff and a large armed force presuming to act as deputies under the Sheriff's authority, comprising about 2,000 men, rounded up 1,186 men in the Warren district, put them aboard a train, and carried them to Columbus, N. Mex. The authorities at Columbus refused to permit those in charge of the deportation to leave the men there, and the train carried them back to the desert town of Hermanas, N. Mex., a nearby station. The deportees were wholly without adequate supply of food and water and shelter for two days. At Hermanas the deported men were abandoned by the guards who had brought them, and they were left to shift for themselves. The situation was brought to the attention of the War Department, and on July 14 the deportees were escorted by troops to Columbus, N. Mex., where they were maintained by the Government until the middle of September.

(6) According to an army census, of the deported men 199 were native-born Americans, 468 were citizens. 472 were registered under the Selective Draft Law, and 433 were married. Of the foreign born, over twenty nationalities were represented, including 141 British, eighty-two Serbians, and 179 Slavs. Germans and Austro-Hungarians (other than Slavs) were comparatively few.

(7) The deportation was carried out under the Sheriff of Cochise County. It was formally decided upon at a meeting of citizens on the night of July 11, participated in by the managers and other officials of the Copper Queen Consolidated Mining Company (Phelps-Dodge Corporation, Copper Queen Division) and the Calumet and Arizona Mining Company. Those who planned and directed the deportation purposely abstained from consulting about their plans either with the United States attorney in Arizona, or the law officers of the State or county, or their own legal advisers.

(8) In order to carry the plans for the deportation into successful execution the leaders in the enterprise utilized the local offices of the Bell Telephone Company, and exercised or attempted to exercise a censorship over parts of interstate connections of both the telephone and telegraph lines in order to prevent any knowledge of the deportation reaching the outside world.

(9) The plan for the deportation and its execution are attributable to the belief that violence was contemplated by strikers and sympathizers. This belief has no justification in the evidence.

(10) Neither such fear nor evidence justifying such fear was ever communicated to the Governor of Arizona, nor were the Federal authorities ever apprised that a change of conditions had taken place in the district.

(11) The deportation was wholly illegal and without authority in law either State or Federal.

(12) Following the deportation of the 12th, in the language of Governor Campbell, of Arizona, "the constitutional rights of citizens and others have been ignored by processes not provided by law—viz., by deputy sheriffs who refused persons admittance into the district and the passing of judgment by a tribunal without legal jurisdiction resulting in further deportations."

(13) Immediately after the first deportation, and until late in August, the function of the local judiciary was usurped by a body which to all intents and purposes was a vigilance committee, having no authority whatever in law. It caused the deportation of large numbers of others. So far as this committee is concerned, its activities were abandoned at the request of the Governor of Arizona late in August.

(14) Among those who were deported from the district and who thereafter were arrested in seeking entrance into it were several who were registered under the Selective Draft Law and sought to return or remain in the district.

RECOMMENDATIONS MADE BY THE COMMISSION.

These findings of facts make certain recommendations by the President's mediation commission inevitable: 1. All illegal practices and the denial of rights safeguarded by the Constitution and statutes must at once cease. The right of unimpeded admittance into the Warren district of all who seek entrance into it in a lawful and peaceable manner must be respected. The right of all persons freely to move about in the Warren district or to continue to reside within it must be scrupulously observed except in so far as such right is restricted by the orderly process of the law. To this end we have directed letters to Governor Campbell and Sheriff Wheeler, of Cochise County. 2. In so far as the deportation of July 12 and the events following constitute violations of the laws of Arizona, we join in the recommendation of Governor Campbell that the responsible law officers of the State and county pursue appropriate remedies for the vindication of such laws. 3. In so far as the evidence before the commission indicates interference with the enforcement of the Selective Draft Law the facts should be brought to the attention of the Attorney-General of the United States. 4. In so far as the evidence before the commission indicates an interference with interstate lines of communication, the facts should be submitted for appropriate attention by the Interstate Commerce Commission. 5. In so far as deportations such as we have set forth have not yet been made a Federal offense, it is our duty to report to the President the wisdom of recommending to the Congress that such occurrences hereafter be made criminal under the Federal law to the full extent of the constitutional authority of the Federal Government. Respectfully submitted:

The President's Mediation Commission, W. B. Wilson, Chairman; J. L. Spangler, E. P. Marsh, J. H. Walker; Felix Frankfurter, Counsel to the Commission.

SUMMARY OF BUSINESS CONDITIONS OCTOBER 23, 1917.

(From the Federal Reserve Bulletin for November.)

	District No. 1—Boston.	District No. 2—New York.	District No. 3—Philadelphia.	District No. 4—Cleveland.
General business	Hesitant, except for war orders.	Active and well maintained.	Good	Good.
Crops—Condition		Fair	Good	Good.
Outlook		Harvest good		Very good.
Industries of the district.	Busy for the most part.	Generally very active.	Very busy	Fair, but uneasy tone.
Construction, building, and engineering.	Well up to previous high record.	Very quiet	Very dull	Poor.
Foreign trade	Good	Heavy, measured in value, particularly exports.	Large	
Bank clearings	Increase	Decrease	Decreasing	Increase.
Money rates	Temporarily decreasing.	Steady at moderately firm rates.	No change	Firm.
Railroad, post office, and other receipts.	Decreased	Railroad receipts heavy; telegraph tolls very much increased.	Increasing	Increase.
Labor conditions	Unsatisfactory	Labor supply hardly adequate.	Unsettled	Restive.
Outlook	Uncertain	Good	Good	Not unfavorable.
Remarks				Fuel, labor, and transportation difficulties quite troublesome.

	District No. 5—Richmond.	District No. 6—Atlanta.	District No. 7—Chicago.	District No. 8—St. Louis.
General business	Highly satisfactory.	Good	Good	Active.
Crops—Condition	Yield satisfactory; prices high.	Good	Good	Excellent.
Outlook		Good	Good	
Industries of the dist.	Running full time.	Operating fully	Active	Active.
Construction, building, and engineering	Private building limited; Government work in large volume.	Slow	Slow	Decrease.
Foreign trade	Limited by restrictions and scarcity of freight room.	Slow		
Bank Clearings	Increase	Increasing	Increasing	Little change.
Money rates	Plentiful at 5 to 6%.	Slightly increasing	Firm	Firm.
Railroad, post office, and other receipts	Increase in gross receipts absorbed in increased operating costs.	Good	Post office increasing	Increase.
Labor conditions	Scarce and wages high.	Fair	Shortage	Labor scarce; somewhat unsettled.
Outlook	Satisfactory	Good	Good	Good.
Remarks	Flush times would hardly be an exaggeration of conditions in the district.			Cotton late; early killing frosts reported.

	District No. 9—Minneapolis.	District No. 10—Kansas City.	District No. 11—Dallas.	District No. 12—San Francisco.
General business	Active	Averages 25% over last year.	Satisfactory	Active.
Crops—Condition		Corn good	Fair	
Outlook		Good	Fair	
Industries of the district.	Active	Very busy and behind with orders.	Active; running full time.	
Construction, building, and engineering.	Fair to good	Fair	Slight decrease	Slight decrease.
Foreign trade			Export trade dec.	Increase.
Bank clearings	Up	40% over last year.	Increase	Increase.
Money rates	Firm	No appreciable change.	Firm; ample funds for legitimate requirements.	Firmer.
Railroad, post office, and other receipts.	Strong	Good volume	Increase	Increase.
Labor conditions	Good	Improved; increased shortage.	Acute shortage	Disturbed.
Outlook	Very good	Good	Encouraging	For active industry and large trade.
Remarks		Conditions arising from Government regulations becoming more settled.	Business situation satisfactory; outlook good except in South Central and Western Tex.	

NOTE—The data in the above table were gathered by the agents of the Federal Reserve Board throughout the country.

UNITED STATES POST-OFFICE STATISTICS.

Fiscal Years.	Number of Post-Offices.	Extent of Post Routes in Miles.	Revenue of the Department.	Expenditure of the Department.	Amount Paid for. Compensation to Postmasters.	Amount Paid for. Transportation of the Mail.
1903	74,169	506,268	$134,224,443	$138,784,488	$21,631,724	$65,321,711
1904	71,131	496,818	143,582,624	152,362,117	22,273,344	69,820,732
1905	68,131	486,805	152,826,585	167,399,169	22,743,342	72,862,605
1906	65,600	478,711	167,932,782	178,449,778	23,544,585	76,174,945
1907	62,659	463,406	183,585,005	190,238,288	24,575,696	81,090,849
1908	61,158	450,738	191,478,663	208,351,886	25,599,397	81,381,421
1909	60,144	448,618	203,562,383	221,004,102	26,569,892	84,052,596
1910	59,580	447,998	224,128,657	229,977,224	27,521,013	85,259,102
1911	59,237	435,388	237,879,823	237,648,926	28,284,964	88,058,922
1912	58,729	436,469	246,744,015	248,525,450	28,467,726	89,154,811
1913	58,020	436,293	266,619,525	262,067,541	29,126,662	92,278,517
1914	56,810	435,597	287,934,565	283,543,769	29,968,515	98,002,421
1915	56,380	433,334	287,248,165	298,546,026	30,409,145	104,701,200
1916	55,934	446,711	312,057,688	306,204,033	31,135,234	106,939,022
1917	55,413	479,487	329,726,116	319,838,718	31,899,850	111,522,255

Of the whole number of post-offices at the close of the fiscal year June 30, 1917, 10,381 were Presidential offices and 45,032 were fourth-class offices.

MONEY ORDERS ISSUED ON DOMESTIC FORMS IN FISCAL YEAR ENDED JUNE 30, 1917.

States and Territories.	Value.	States and Territories.	Value.	States and Territories.	Value.

Number of money orders issued on domestic forms, 133,291,973, amounting to $822,679,622.83; number of money orders issued on international forms, 1,973,714, amounting to $32,284,182.85.

Domestic money orders paid number 133,605,805, amounting to $834,695,404.16; international money orders paid number 251,817, amounting to $4,796,558.28.

RURAL DELIVERY SERVICE.

The following table exhibits the growth of the rural delivery service from 1898 to 1917.

Year.	Carriers (Number).	Daily Mileage.	Annual Cost.	Year.	Carriers (Number).	Daily Mileage.	Annual Cost.
1898	148	2,960	$50,241	1910	40,997	993,068	$36,914,769
1901	4,301	100,299	1,750,321	1911	41,559	1,007,772	37,125,630
1903	15,119	332,618	8,051,599	1912	42,199	1,021,492	41,859,422
1904	24,566	552,725	12,645,275	1913	42,805	1,028,603	45,642,766
1905	32,055	721,237	20,864,885	1914	43,652	1,050,266	47,377,070
1906	35,318	820,318	25,011,625	1915	43,710	1,073,099	52,565,811
1907	37,582	883,117	26,661,555	1916	42,766	1,063,305	51,952,326
1908	39,143	891,432	34,371,939	1917	43,338	1,112,556	52,420,000
1909	40,499	979,541	35,661,034				

The maximum salary of rural carriers was increased July 1, 1914, from $1,100 to $1,200.

NEW YORK STATE LEAGUE OF SAVINGS AND LOAN ASSOCIATIONS.

President—Elmer E. Stanton, Troy. *First Vice-President*—F. A. Garnjost, Yonkers. *Second Vice-President*—Seward Hakes, Ilion. *Third Vice-President*—J. Barth Cronin, Brooklyn. *Treasurer*—John H. White, Schenectady. *Secretary*—Archibald W. McEwan, 2161 Bathgate Avenue, Bronx, New York City. The associations also have an office at No. 56 Pine Street, New York City; F. A. Garnjost, Chairman; E. M. Cutler, Treasurer, and Archibald W. McEwan, Secretary, known as "The Liberty Bond Committee, Representing Building Loan and Savings Associations of the Second Federal Reserve District." A section of the New York State Banking Law, enacted in 1917, enables these associations to buy and sell United States Government war bonds on a non-profit basis.

METROPOLITAN LEAGUE OF SAVINGS AND LOAN ASSOCIATIONS.

The Metropolitan League of Savings and Loan Associations is an organization of forty-seven associations in New York City and contiguous counties. The officers and trustees are: *President*—J. Barth Cronin, 573 Clinton Street, Brooklyn. *Vice-President*—W. D. Carter, Pier 14, East River, New York. *Secretary*—Archibald W. McEwan, 2161 Bathgate Avenue, Bronx, New York. *Treasurer*—Edward M. Cutler, 56 Pine Street, Manhattan, New York.

BURMA'S MINERAL PRODUCTION.

(Consul Lawrence P. Briggs, Rangoon, Burma, India.)

The figures are:

MINERAL PRODUCTS.	1915.	1916.	MINERAL PRODUCTS.	1915.	1916.
Petroleum	$6,033,378	$5,357,531	Iron ore	$20,147	$21,011
Tungsten ore	1,383,890	2,366,656	Sapphires and spinels	6,898	8,104
Lead and lead ore	1,538,550	1,567,211	Antimony ore	33	2,433
Salt	403,780	717,776	Amber	970	766
Silver	151,343	430,732	Molybdenite	.....	445
Building and road material	320,036	319,958	Platinum	484	225
Tin and tin ore	207,142	314,765	Copper	11,515	.....
Rubies	169,748	174,453	Clay for pottery	651	412
Jade	61,695	45,330			
Gold	60,028	37,517	Total	$10,371,135	$11,393,679
Zinc ore	847	28,854			

The production (in tons of 2,000 pounds) of each of other metals was:

MINERALS.	1915.	1916.	MINERALS.	1915.	1916.
	Tons.	*Tons.*		*Tons.*	*Tons.*
Tungsten ore (wolframite)	2,546	3,680	Block tin	128	113
Lead and lead ore	42,262	13,955	Iron ore	15,526	16,081
Silver			Antimony ore	13.5	1,000
Tin ore	265	497	Molybdenite	.....	0.4
Zinc ore	87	2,610			

Tungsten ore is obtained from the western slope of the mountains which separate Southern Burma from Siam—the districts of Mergui, Tavoy, and Thaton, and, further north, the Southern Shan states. Tavoy alone produces about 85 per cent. of the entire output, and it is claimed that it is the greatest wolfram region in the world. The output of gold diminished from 3,183 ounces in 1915 to 1,983 ounces in 1916; that of platinum from 17.7 to 9.25 ounces. Practically all the gold and platinum produced in Burma is obtained by the Burma Gold Dredging Company from the upper waters of the Irrawaddy River in the Myitkyina district, about 400 miles above Mandalay. Silver is obtained only in connection with lead and zinc in the Bawdwin mines.

Rubies, sapphires, and spinels are obtained from a district known as Ruby Mines, lying along the waters of the Irrawaddy River about 100 miles north to Mandalay. The amount is gradually diminishing—304,872 carats in 1914, 251,449 carats in 1915, and 209,724 carats in 1916. The price of rubies rose, however, during the past year, and the value of the output increased from $176,646 to $182,558. Jadeite or Burmese jade is obtained by the Chinese in the Myitkyina district and carried to Yunnan. During the past four years the output has remained nearly constant—164 tons in 1913, 188 tons in 1914, 183 tons in 1915, and 189 tons in 1916—but the value has suffered a great decline. A variety of amber is found in the Myitkyina district. The production fell from 1,158 pounds in 1915 to 557 pounds in 1916, but, because of the rise in price, the value of the output has remained nearly constant.

LIVE STOCK IN NEW ZEALAND.

(Consul General Alfred A. Winslow, Auckland.)

THE matter of conserving the farm stock in New Zealand at this time is receiving much attention, not only on the part of the New Zealand Government but the stock raisers themselves, for fear that the great temptation to sell owing to the high prices may induce many to allow their stock to decrease materially. New Zealand is essentially a stock-raising country, and it is estimated that the domestic animals in this dominion are worth nearly $218,000,000, and that the income from this source for 1916 was well over $145,000,000. Export returns for last year show that $60,276,829 was paid for wool and nearly $34,000,000 for frozen mutton and lamb. In addition there were exports of butter, cheese, tallow, hides, pelts, etc.

The last census of stock in the country shows a small decrease in the number of sheep, and a slight increase in the number of cattle, when there should have been under normal conditions a fairly large increase in both, since a considerable area of newly occupied land has been taken over within the last year or two. There is sufficient unoccupied land in New Zealand, if put to the best possible use, along with the land now occupied, to practically double the number of sheep and cattle now kept in the country, which would mean about 50,000,000 sheep and 5,000,000 head of cattle. It is expected that this climax may be reached within a few years after the close of the war, when many additional settlers are expected for the land in this country.

TUNGSTEN FROM SOUTH CHINA.

(Consul General George E. Anderson, Hongkong.)

THERE has been great activity in the shipment of wolfram ore from South China through Hongkong in the past few months, and present indications are that the export will assume very important proportions. Because of war restrictions and other conditions most of the ore heretofore exported has gone to Great Britain, and British war regulations at the present time make it difficult to ship South China ore to the United States. It is anticipated that this state of things will be remedied in the course of a short time, and in the meanwhile buyers for American steel manufacturers have been investigating the South China situation and have organized the work of gathering the available ore to such an extent that there is almost a boom in the business. The course of the trade in Hongkong since the development of the South China fields commenced this year may be shown by the fact that the exports from Hongkong in June amounted to 60 tons, in July to 78 tons, and for the first half of August to 92 tons, permits to ship to the United States being withdrawn about the middle of August. There is now on hand in Hongkong and Canton warehouses perhaps 500 tons of the ore ready for sending to the United States as soon as permission from the British Government covering trans-shipment at Hongkong can be obtained.

There seems to be considerable difference of opinion as to what effect this new supply of tungsten from South China will have upon the American and European markets. One American buyer expresses the opinion that with a proper development of the South China field the available supply of tungsten in the world can be increased by at least 20 per cent. While shipments so far have been considerable, the actual systematic development of the fields has not yet commenced. The ore so far shipped has been obtained almost altogether from surface pockets or deposits in the hills of Kwangtung Province, particularly in the North and East River country. It has been gathered in characteristic Chinese style—a little here and a little there and without regard to the origin of the pockets or the possibility of developing veins or strata of ore-bearing rock. The actual limits of the field, accordingly, are not clearly defined. On the other hand, the deposits so far found and worked are so widely scattered that there is every reason to believe that the actual ore to be obtained from the field is of large amount.

CHINA.

(Revised by the Chinese Embassy at Washington.)

AREA AND POPULATION.

Territory.	Square Miles.	Population.	Territory.	Square Miles.	Population.
*China proper	1,532,000	309,674,000	Mongolia and other dependencies	1,200,000	760,000
Manchuria	364,000	14,917,000	Manchu Banners	.....	1,700,000
Turkestan	580,000	2,491,000			
Thibet	700,000	1,500,000	Total	4,376,000	331,042,000

* 18 provinces.

On the conclusion of the war between Russia and Japan in 1905 a treaty and additional agreement relating to Manchuria were entered into between Japan and China. By the former the Chinese Government consented to all the transfers and assignments made by Russia to Japan in Manchuria; and by the latter cities and towns in Manchuria were opened as places of international residence and trade. In July, 1910, a convention was signed between Russia and Japan agreeing to co-operate to maintain the *status quo* in Manchuria in accordance with the treaties and conventions already made. In March, 1915, China agreed to extend the lease of the territory on the peninsula to 99 years.

Railways—In 1915 there were about 6,500 miles open, inclusive of the Manchurian lines, while 2,500 miles more are projected or under construction.

Telegraphs—The total length of line in operation at the end of 1914 was 36,339 miles, with 49,963 miles of wire.

The latest estimates of the foreign residents in the open ports of China are: Americans in China (1917), 5,600. Other foreign residents in 1916—British, 9,099; Russians, 55,235; French, 2,374; Japanese, 104,275; Germans, 3,792; Portuguese, 2,293; other nationalities, 2,965; total, 185,633.

The foreign trade of China, 1916, was imports of gold, $407,961,526; exports of gold, $380,619,919, exclusive of treasure. The tonnage entered and cleared, 1916, 88,020,101, of which American amounted to 799,913 tons; British, 35,840,573; French, 596,237; German, 66,532; Japanese, 24,233,835; Russian, 1,545,085; Chinese, 23,397,109.

In 1916 the number of vessels registered for inland waters was 1,499, of which 265 were foreign and 1,234 under Chinese flag.

The number of post-offices in 1914 was 8,324, and postal articles handled numbered 551,249,500.

EXPORTS FROM HONGKONG.

The declared exports from Hongkong to the United States for the first half of 1917 were valued at $7,956,287 as compared with $5,363,000 in the same period of 1916, $3,019,248 in 1915, $2,630,258 in 1914, and smaller returns in previous years. The record for the first six months amounted to substantially twice the exports from the colony to the United States in the whole of any previous normal year. The declared exports to the Philippines amounted to $2,310,679 as compared with $2,157,334 a year ago, while those to Hawaii increased from $150,971 to $185,660.

JAPAN.

It is claimed that the Empire was founded by the first Emperor, Jimmu Tenno, 660 B. C. The succession to the throne devolves upon the male descendants. By the Constitution of February 11, 1889, the Emperor has the right of all the executive powers, assisted by the advice of the Cabinet Ministers who are appointed by him.

Emperor—Yoshihito—(Born Aug. 31, 1879, succeeded to throne, July 29, 1912.)

House of Peers—*President*—Prince I. Tokugawa. *Vice-President*—Marquis Kuroda. *Secretary-General*—Mr. K. Yanagida.

The composition of the House of Peers is as follows: Princes of Blood, 12; Princes, 12; Marquises, 35; Counts, 17; Viscounts, 69; Barons, 63; Imperial Nominees, 123; Representatives of Highest Taxpayers, 43; total, 374.

House of Representatives—*President*—Mr. Y. Ooka. *Vice-President*—Mr. K. Hamada. *Secretary-General*—Mr. S. Terada.

The number of members is as follows: Seiyukai, 163; Kokuminto, 36; These parties are pro-Government; Kenseikai, 122; Independents, 60; total, 381.

The Cabinet consists of the following members: *Prime Minister*—Marshal Terauchi. *Interior*—Baron Goto. *Foreign Affairs*—Viscount Motono. *Finance*—Mr. K. Shoda. *War*—Lieut.-Gen. Ken-Ichi Oshima. *Marine*—Admiral Tomosaburo Kato. *Agriculture and Commerce*—Mr. Kiyoshi Nakaohoji. *Justice*—Mr. Itasu Matsumuro. *Education*—Mr. Ryohei Okada. *Communications*—Baron Den.

Five principal islands—Honshiu, Kiushiu, Shikoku, Hokkaido, and Taiwan—and many small islands make up the Empire.

Islands.	Area Sq. Mi.	Islands.	Area Sq. Mi.	Islands.	Area Sq. Mi.
Honshiu (Mainland)	87,426	Awaji	220	Chosen (Korea)	84,738
Shikoku	7,083	Iki	52	Taiwan (Formosa)	13,944
Hokkaido*	30,502	Tsushima	266	Hokoto (Pescadores)	47
Kiushiu	15,703	Riukiu†	941	Karafuto	13,253
Kurile Islands‡	6,068	Ogasawarajima§	27		
Sado	337			Grand total	260,738
Oki	131	Total	148,756		

*Excluding the Chishima. †55 islands. ‡31 islands. §20 islands.

In 1905 Japanese Karafuto and the lease of Port Arthur, Talien and adjacent territory were ceded by Russia by the Treaty of Portsmouth, N. H. The Chino-Japanese Treaty of December 22, 1905, provided for the interests of China and Japan in relation to Manchuria (see China). On August 23, 1910, by a treaty between Japan and Korea, the Korean Territory was annexed to Japan.

The population of Japan in 1914 was: Males, 27,091,958; females, 26,504,926; total, 53,696,858.

JAPANESE TRADE.

The year 1917 witnessed increase in Japanese trade. This was particularly true in those branches of industry having to do with the manufacture of war material. The increase in war trade brought its influence to bear on other forms of national endeavor. Many new markets were opened to her trade. Recent estimates indicated that Japan sold to the United States alone considerably more than $100,000,000 worth of silks a year. The following table, prepared by the Chamber of Commerce Journal, Yokohama, shows the new markets recently opened to Japanese goods.

Articles Exported.	Former Markets.	New Markets.
Woollen cloth	China	Asiatic Russia.
Cotton blankets	Asia	South Africa and Australia.
Cotton Hosiery	"	England, Holland, Russia, South Africa, and Australia.
Gloves		England, China, and Russia.
Stockings	Kwantung and Hongkong	China, England, and Russia.
Imitation Panama hats	China and Hongkong	England, China, and Australia.
Bracelets	British India	
Shell buttons	All markets	
Printing paper	China	England, East Indies, Australia, and Manila.
Cardboards	Asia	
Porcelain	China, England, and America	Australia.
Glass	China, Hongkong, and Straits Settlements.	Other Asiatic countries.
Toys	British India, Singapore, and East Indies.	England, America, and Canada.

The Japan Department of Communications published the following statement of the condition of the electrical industry at the end of July, 1917: Plants supplying current, 568 companies with $160,796,063 capital; electric railways, 42 companies, $21,706,985 capital; engaged in both branches, 48 companies, $148,482,339 capital. Compared with the figures for the corresponding period last year there is an increase in the number of enterprises of 35, with an aggregate capital of $17,892,057.

FINANCIAL ACTIVITIES.

The modern banking system of Japan dates from the promulgation in 1872 of the National Banking Regulations, which were modelled on the national bank act of the United States and provided for the conversion of national bank notes into specie. By 1899 national banks had ceased to exist as such, their places having been taken by banks organized under special acts and by so-called ordinary banks operating under the ordinary bank regulations promulgated in 1893. Of the "special" banks there are now 52, for which the Hypothec Bank acts as a central bank. There are now 1,423 ordinary banks under the control of the Minister of Finance. These banks must also make semi-annual reports similar to those required by the American Comptroller of the Currency.

There are 664 savings banks in the country. These are under the control of the Minister of Finance. Their directors are under unlimited liability with respect to the obligations of the bank incurred during their terms of office. Two years after the end of their terms they are released from this liability. Savings banks must provide themselves with interest-bearing national or municipal bonds to one-fourth the amount of their deposits and place them in the deposit section of the Department of Finance. The savings banks of Japan are not very large individually, owing principally to the popularity of the postal savings bank operated by the Imperial Government. Deposits of the postal-savings banks at the end of April, 1917, were 319,161,273 yen ($158,942,314)—one-fourth as large as the total of all the 664 savings banks. Deposits of the postal banks have increased by 118,000,000 yen ($58,764,000) since the beginning of the war.

The profits of the special banks are highly satisfactory and the dividends they pay are not less so. The Bank of Japan pays 12 per cent per annum, the Yokohama Specie 12 per cent, the Industrial Bank 6 per cent, the Agricultural Bank 9 per cent, the Bank of Taiwan 10 per cent, the Bank of Chosen, 7½ per cent, and the Hokkaido Colonial 10 per cent. Their stocks are quoted on the Tokio Stock Exchange. There are 1,423 banks that operate under the ordinary bank regulations. Many of them were formerly national banks and

these maintain their old numerical designations, dropping the word national. There were at one time 165 national banks. The largest of the ordinary banks are: The First Bank, capital 13,000,000 yen, surplus 9,600,000 yen; the Fifteenth Bank, capital 23,500,000, surplus 5,540,000; the Mitsui Bank, capital 20,000,000, surplus 9,500,000; the Sumitomo Bank of Osaka, which has just voted to increase its capital from 15,000,000 to 30,000,000 yen; the Third Bank, with capital of 5,000,000, which will be increased this month to 10,000,000, and a surplus of 3,400,000 yen; the Yasuda Bank, capital 10,000,000, and surplus of 3,000,000; the One Hundredth Bank, capital 6,000,000, surplus 4,000,000; and the banking department of the Mitsubishi Co.

While the deposits of these banks may look small compared with those of the greater banks of the United States, they compare most favorably with those of the generality of American banks. The deposits of the Mitsubishi, for example are over 100,000,000 yen ($50,000,000), those of the Yasuda Bank exceed 60,000,000 yen, and so do the deposits of the Third Bank. The Sumitomo Bank's deposits are 140,000,000 yen. The deposits of practically all the Japanese banks have grown rapidly, the total for the Associated Banks of Tokio having reached on June 13, 1917, a new high record of 850,000,000 yen ($423,300,000), over twice what they were when the war broke out. The deposits of the Osaka Associated Banks have also practically doubled since the beginning of the war. Loans of the Associated Banks of Tokio on June 13 were only 690,000,000 yen, and as a means of getting rid of the excess of money a banking syndicate has been formed by the Yokohama Specie Bank, the Industrial Bank of Japan, the Bank of Taiwan, the Mitsui, the Mitsubishi, the First, Fifteenth and other banks to loan a large amount to the Government of France, probably 40,000,000 yen, though the amount has been reported as high as 100,000,000 yen. This money will be spent in Japan, the loan being in the nature of a credit operation.

There are no trust companies as such in Japan, but two of the special banks and eight of the ordinary banks do a trust-company business. There are 831 mutual loan societies.

JAPAN'S SPECIAL INTERESTS IN CHINA RECOGNIZED BY THE UNITED STATES.

(An official statement on November 5, 1917, by the United States Department of State.)

ON Friday, November 2, 1917, the Secretary of State and Viscount Ishii, the special Japanese Ambassador, exchanged at the Department of State the following notes dealing with the policy of the United States and Japan in regard to China:

Department of State, Washington, November 2, 1917. Excellency: I have the honor to communicate herein my understanding of the agreement reached by us in our recent conversations touching the questions of mutual interest to our Governments relating to the Republic of China. In order to silence mischievous reports that have from time to time been circulated it is believed by us that a public announcement once more of the desires and intentions shared by our two Governments with regard to China is advisable. The Governments of the United States and Japan recognize that territorial propinquity creates special relations between countries, and, consequently, the Government of the United States recognizes that Japan has special interests in China, particularly in the part to which her possessions are contiguous.

The territorial sovereignty of China, nevertheless, remains unimpaired and the Government of the United States has every confidence in the repeated assurances of the Imperial Japanese Government that while geographical position gives Japan such special interests, they have no desire to discriminate against the trade of other nations or to disregard the commercial rights heretofore granted by China in treaties with other powers. The Governments of the United States and Japan deny that they have any purpose to infringe in any way the independence or territorial integrity of China, and they declare, furthermore, that they always adhere to the principle of the so-called "open door," or equal opportunity for commerce and industry in China.

Moreover, they mutually declare that they are opposed to the acquisition by any Government of any special rights or privileges that would affect the independence or territorial integrity of China or that would deny to the subjects or citizens of any country the full enjoyment of equal opportunity in the commerce and industry of China.

I shall be glad to have Your Excellency confirm this understanding of the agreement reached by us. Accept, Excellency, the renewed assurance of my highest consideration. (Signed) ROBERT LANSING.

His Excellency VISCOUNT KIKUJIRO ISHII, Ambassador Extraordinary and Plenipotentiary of Japan, on Special Mission.

REPLY OF SPECIAL AMBASSADOR.

The reply of Viscount Ishii, made the same day, repeated, word for word, the understanding as set forth in Secretary Lansing's note, the two notes being, in fact, duplicates of each other.

STATEMENT BY SECRETARY LANSING.

The announcement of the exchange of notes was accompanied by the following statement from the Secretary of State:

"Viscount Ishii and the other Japanese commissioners who are now on their way back to their country have performed a service to the United States as well as to Japan which is of the highest value. There had unquestionably been growing up between the peoples of the two countries a feeling of suspicion as to the motives inducing the activities of the other in the Far East, a feeling which, if unchecked, promised to develop a serious situation. Rumors and reports of improper intentions were increasing and were more and more believed. Legitimate commercial and industrial enterprises without ulterior motive were presumed to have political significance, with the result that opposition to those enterprises was aroused in the other country. The attitude of constraint and doubt thus created was fostered and encouraged by the campaign of falsehood, which for a long time had been adroitly and secretly carried on by Germans whose Government, as a part of its foreign policy, desired especially to so alienate this country and Japan that it would be at the chosen time no difficult task to cause a rupture of their good relations. Unfortunately there were people in both countries, many of whom were entirely honest in their beliefs, who accepted every false rumor as true, and aided the German propaganda by declaring that their own Government should prepare for the conflict which they asserted was inevitable, that the interests of the two nations in the Far East were hostile, and that every activity of the other country in the Pacific had a sinister purpose.

SUSPICION WAS INCREASING.

"Fortunately this distrust was not so general in either the United States or Japan as to affect the friendly relations of the two Governments, but there is no doubt that the feeling of suspicion was increasing and the untrue reports were receiving more and more credence in spite of the earnest efforts which were made on both sides of the Pacific to counteract a movement which would jeopardize the ancient friendship of the two nations. The visit of Viscount Ishii and his colleagues has accomplished a great change of opinion in this country. By frankly denouncing the evil influences which have been at work, by openly proclaiming that the policy of Japan is not one of aggression, and by declaring that there is no intention to take advantage commercially or industrially of the special relation to China created by geographical position, the representatives of Japan have cleared the diplomatic atmosphere of the suspicions which had been so carefully spread by our enemies and by misguided or overzealous people in both countries. In a few days

the propaganda of years has been undone, and both nations are now able to see how near they came to being led into the trap which had been skilfully set for them.

"Throughout the conferences which have taken place Viscount Ishii has shown a sincerity and candor which dispelled every doubt as to his purpose and brought the two Governments into an attitude of confidence toward each other which made it possible to discuss every question with frankness and cordiality. Approaching the subjects in such a spirit and with the mutual desire to remove every possible cause of controversy the negotiations were marked by a sincerity and good will which from the first insured their success. The principal result of the negotiations was the mutual understanding which was reached as to the principles governing the policies of the two Governments in relation to China. This understanding is formally set forth in the notes exchanged and now made public. The statements in the notes require no explanation. They not only contain a reaffirmation of the 'open door' policy, but introduce a principle of noninterference with the sovereignty and territorial integrity of China, which, generally applied, is essential to perpetual international peace, as clearly declared by President Wilson, and which is the very foundation also of Pan-Americanism as interpreted by this Government.

FURTHER PURPOSE ACCOMPLISHED.

"The removal of doubts and suspicions and the mutual declaration of the new doctrine as to the Far East would be enough to make the visit of the Japanese commission to the United States historic and memorable, but it accomplished a further purpose, which is of special interest to the world at this time, in expressing Japan's earnest desire to co-operate with this country in waging war against the German Government. The discussions, which covered the military, naval, and economic activities to be employed with due regard to relative resources and ability, showed the same spirit of sincerity and candor which characterized the negotiations resulting in the exchange of notes. At the present time it is inexpedient to make public the details of those conversations, but it may be said that this Government has been gratified by the assertions of Viscount Ishii and his colleagues that their Government desired to do their part in the suppression of Prussian militarism and were eager to co-operate in every practical way to that end. It might be added, however, that complete and satisfactory understandings upon the matter of naval co-operation in the Pacific for the purpose of attaining the common object against Germany and her allies have been reached between the representative of the Imperial Japanese Navy, who is attached to the special mission of Japan, and the representative of the United States Navy.

ISHII WON GOOD WILL OF ALL.

"It is only just to say that the success which has attended the intercourse of the Japanese commission with American officials and with private persons as well is due in large measure to the personality of Viscount Ishii, the head of the mission. The natural reserve and hesitation which are not unusual in negotiations of a delicate nature disappeared under the influence of his open friendliness, while his frankness won the confidence and good will of all. It is doubtful if a representative of a different temper could in so short a time have done as much as Viscount Ishii to place on a better and firmer basis the relations between the United States and Japan. Through him the American people have gained a new and higher conception of the reality of Japan's friendship for the United States which will be mutually beneficial in the future. Viscount Ishii will be remembered in this country as a statesman of high attainments, as a diplomat with a true vision of international affairs, and as a genuine and outspoken friend of America."

CHINA'S ANSWER TO THE UNITED STATES—JAPAN NOTE.

The following declaration of the Chinese Government concerning the notes exchanged between the Governments of the United States and Japan dated November 2, 1917, was handed to the Secretary of State by the Chinese Minister on November 12, 1917:

The Government of the United States and the Government of Japan have recently, in order to silence mischievous reports, effected an exchange of notes at Washington concerning their desires and intentions with regard to China. Copies of the said notes have been communicated to the Chinese Government by the Japanese Minister at Peking, and the Chinese Government, in order to avoid misunderstanding, hastens to make the following declaration so as to make known the views of the Government.

The principle adopted by the Chinese Government toward the friendly nations has always been one of justice and equality, and consequently the rights enjoyed by the friendly nations derived from the treaties have been consistently respected, and so even with the special relations between countries created by the fact of territorial contiguity, it is only in so far as they have already been provided for in her existing treaties. Hereafter the Chinese Government will still adhere to the principle hitherto adopted, and hereby it is again declared that the Chinese Government will not allow herself to be bound by any agreement entered into by other nations.

KOBE LEADING PACIFIC PORT IN FOREIGN COMMERCE.

(Consul Robert Frazer, Jr., Kobe, Japan.)

The foreign commerce of the port of Kobe has shown a remarkable expansion since the outbreak of the war. In 1916 its total foreign commerce increased 36 per cent., as compared with the year immediately preceding the war, or from $258,539,000 to $352,601,000; and, although the latter amount constituted a record when it was made, it bids fair to be surpassed by about 35 per cent. in 1917.

The United States is both the chief customer of and principal seller to this district, the total volume of trade between the United States (including insular possessions) and Kobe having amounted to $81,000,000 in 1916. Of this large sum, more than $50,000,000 represented Japanese purchases from and $30,000,000 Japanese sales to the United States.

Returns of the foreign trade of Kobe, as compared with the most recent returns vailable for the other principal ports of the Pacific, are as follows:

Kobe, Japan, 1916	$352,601,000	State of Washington Customs District	300,541,000
Yokohama, Japan, 1916	353,645,000	Manila, 1916	87,248,000
Shanghai, China, 1916	348,689,000	Valparaiso, Chile, 1915	38,234,450
Singapore, Straits Settlements, 1915 (inclusive of intercolonial trade)	273,211,000	Canton, China, 1916	67,103,963
Sydney, Australia, 1915	257,097,000	Tientsin, China, 1916	52,534,000
San Francisco Customs District, 1916	209,138,000	Callao, Peru, 1915	29,438,000

While it is true that in 1916 Yokohama outranked Kobe, for the first seven months of 1917 the foreign trade of that port amounted to only $237,922,000, contrasted with Kobe's seven-months total of $270,479,000. Pro-rated for the complete year this indicates a total of $463,678,000 in 1917 for Kobe, against $407,866,000 for Yokohama. (American figures for the fiscal year 1917 (ending June 30) show the total foreign trade of the Washington customs district to have been $376,000,000, and that of the San Francisco district $286,840,000.)

JAPAN'S GOLD AND SILVER IMPORTS.

(By Commercial Attache F. R. Rutter, Tokio.)

THE following table shows the monthly gold and silver imports and exports (specie and bullion) of Japan for the last five years.

MONTH.	1913.	1914.	1915.	1916.	1917 (Jan. to Aug.)
IMPORTS.					
January	$1,000	$311,000	$734,000	$13,439,000	$2,037,000

JAPANESE POSTAL SAVINGS REACH HIGH MARK.

The Japan Advertiser states that for the first time since the inauguration of the postal savings bank system in Japan deposits in the Government savings bank have reached more than 400,000,000 yen ($199,400,000). The figures registered were 400,238,000 yen ($199,518,643). Compared with the corresponding date in 1916 the total represents an increase of 116,000,000 yen ($57,826,000). "This speaks much," says the Advertiser, "for the prosperity that all classes of people in Japan are enjoying because of the war."

PAN AMERICAN SOCIETY OF THE UNITED STATES (INCORPORATED).

Headquarters, 15 Broad Street, New York. *President*—John Bassett Moore. *Honorary Presidents*—Robert Lansing, Secretary of State of the United States, Domicio da Gama, of Brazil, the ranking Ambassador of Latin America. *Honorary Vice-Presidents*—Elihu Root, Andrew Carnegie, Archer M. Huntington, Robert Bacon, Lloyd C. Griscom, Henry White. *First Vice-President*—Cabot Ward. *Second Vice-President*—John Barrett. *Third Vice-President*—Nicholas Murray Butler. *Secretary*—Harry Erwin Bard. *Treasurer*—Lorenzo Daniels.

The Latin-American Republics.

(Data compiled by Director-General John Barrett, of the Pan-American Union.)

The diplomatic and other information that follows under the heads of the several republics is introductory to the data following this, under the caption "Trading with Latin America." Statistics as to area and population will be found in the indexed tabulations elsewhere.

The Pan-American Union is the international organization and office maintained in Washington, D. C., by the twenty-one American republics, as follows: Argentina, Bolivia, Brazil, Chile, Colombia, Costa Rica, Cuba, Dominican Republic, Ecuador, Guatemala, Hayti, Honduras, Mexico, Nicaragua, Panama, Paraguay, Peru, Salvador, United States, Uruguay, and Venezuela. It is devoted to the development and advancement of commerce, friendly intercourse, and good understanding among these countries. It is supported by quotas contributed by each country, based upon the population. Its affairs are administered by a Director-General and Assistant Director, elected by and responsible to a Governing Board, which is composed of the Secretary of State of the United States and the diplomatic representatives in Washington of the other American governments. These two executive officers are assisted by a staff of experts, statisticians, commercial specialists, editors, translators, compilers, librarians, clerks and stenographers. The Union publishes a monthly bulletin in English, Spanish, Portuguese and French, which is a record of Pan-American progress. It also publishes numerous special reports and pamphlets on various subjects of practical information. Its library, the Columbus Memorial Library, contains 33,000 volumes, 16,000 photographs, 121,000 index cards, and a large collection of maps. The Union is housed in a building erected through the gifts of Andrew Carnegie.

ARGENTINA.

President—Sr. Hipólito Irigoyen. *Vice-President*—Sr. Pelagio Luna.

THE CABINET.

Minister of Interior—Dr. Domingo E. Salaberry (ad. in.). *Minister of Foreign Relations and Worship*—Sr. Honorio Pueyrredon. *Minister of the Treasury*—Dr. Domingo E. Salaberry. *Minister of Justice and Public Instruction*—Sr. José S. Salinas. *Minister of Agriculture*—Sr. Gambia J. Pueyrredón. *Minister of Public Works*—Sr. Pablo Torrello. *Minister of War*—Sr. Elpidio Gonzales. *Minister of Marine*—Sr. Federico Alvarez de Toledo.

Argentina as a republic with a Constitution dates from 1853. The document was revised in 1866 and 1898. The President is elected for six years by electors appointed by the fourteen provinces. The National Congress consists of thirty Senators and one hundred and twenty members of the House of Deputies. The Senators serve for six years, the Deputies for four years. The Vice-President is Chairman of the Senate. There are fourteen Provinces, ten Territories, and the Federal District of Buenos Ayres. The Governors of the Provinces are elected by the people for not ess than three years. Each Province has its own Legis.ature.

In Buenos Ayres the Mayor is appointed by the President of the Republic with the approval of the Senate. The Municipal Council is selected from the taxnayers. This, in general, is the plan of all of the city Councils throughout Argentina. There is no State Religion, but the Roman Catholic Church is supported by the public funds. Education is free and compulsory. The Supreme Court is the highest tribunal. Trial by jury is guaranteed by the constitution, but seldom used. Military service is compulsory between the twentieth and forty-fifth years. There are five Military Districts, with a standing army of about 24,000, and a reserve of 125,000

BOLIVIA.

President—Sr. José Gutierrez Guerra.
First Vice-President—Sr. Ismael Vasquez.
Second Vice-President—Sr. José S. Quinteros.

THE CABINET.

Minister of Foreign Affairs and Worship—Sr. Julio Zamora. *Minister of Interior and Improvements*, Sr. Ricardo Mujia. *Minister of the Treasury*—Sr. Alfredo Ballivián. *Minister of Justice and Industry*—Sr. Julio Gutierrez. *Minister of Public Instruction and Agriculture*—Sr. Claudio Sanjinés. *Minister of War and Colonies*—Dr. Andrés S. Muñoz.

The Republic of Bolivia was so named in 1825. The Constitution dates from 1880. There are more than 800 miles of railways and 3,000 miles of telegraph. The President is elected for four years by the people and not eligible for the next election. The Congress consists of sixteen Senators (two for each department) holding office six years each, and seventy members of the Chamber of Deputies, holding office four years each. The Senators are paid $300 a month during the session, and the Deputies get $15 a day when they attend. The republic is divided into eight Departments, three Territories, sixty-five Provinces, 683 Cantons and twenty-four Sub-Cantons, administered by Prefects and their subordinates, the Prefects themselves being appointed by the President of the Republic. Each city has a Municipal Council.

Roman Catholicism is the State Religion, but freedom of worship is allowed. The boundary dispute between Bolivia, Brazil and Chile was settled by treaty in 1903-1904, and that between Bolivia and Peru in 1911-1912, but the dispute between Bolivia and Paraguay is still open. Education is free and compulsory. There are universities at Sucre and La Paz. There is a military school at La Paz also. There are public libraries in the capitol of all of the districts. The Supreme Court has seven Judges; there are District Courts of five Judges in each Department, and every smaller community has its system of courts. The Attorney-General is head prosecutor. Justice is administered free. The revenue is derived mainly from customs duties. There is a standing army of about 4,000 men. Every male between nineteen and fifty years is subject to military service.

Approximately 5,000,000 acres is under cultivation. There are no seaports. The greatest industry is rubber, to which more than 40,000,000 acres are devoted. Other products are cattle and sheep to the extent of more than 2,000,000 head; cereals, cocoa and coffee. Bolivia has a gold standard.

BRAZIL.

President—Dr. Wenceslau Broz Pereira Gomez.
Vice-President—Bernando Montiero.

THE CABINET.

Foreign Affairs—Nilo Peçanna. *Finances*—Antonio Carlos de Andrade. *Public Works and Transportation*—A. Travares de Lyra. *Interior and Justice*—Carlos Maximiliano. *Agriculture*—José Bezerra. *Navy*—Admiral Alexandrino de Alencar. *Army*—General Caetano de Faria.

The Republic of Brazil dates from 1889, when the Emperor Dom Pedro 2d was put off the throne. There are twenty States, one National Territory and one Federal District, each of the old Provinces forming a State, with a large share of home rule. The National Congress consists of sixty-three Senators, each serving nine years, and 212 Members of the Chamber of Deputies, each serving three years. All are chosen by popular suffrage. The President of the Republic serves four years and is not eligible for the next term. The election is by the people, by an absolute majority of the votes, the Presidential election being held on March 1. There is no State Church. Education is free but not compulsory.

Rio de Janeiro is administered as a Federal District. The New Civil Code dates from Jan. 1, 1917. Coffee is the chief product, then rubber. The cattle trade is extensive and there are now more than 30,000,000

head, besides 20,000,000 hogs, more than 10,000,000 sheep, and more than 10,000,000 horses and mules. Military service is obligatory between twenty-one and forty-five years. Brazil's standing army is 20,000, plus 20,000 militia.

Brazil is about 200,000 square miles larger than the United States. It extends on both sides of the equator about three-fifths the breadth of the torrid zone, and 10 degrees or more into the south temperate zone. From east to west it is four-fifths or more the breadth of South America at its broadest point. The eastern half of Brazil bordering on the Atlantic, except the extreme north, is hilly and even mountainous. Much of the country is rolling uplands and table lands. The north, except immediately on the seacoast, and west of Brazil are but little settled or developed. The latter is the basin of the Amazon River. To the southwest is the basin of the Rio del Plata. These two river basins have heavy rainfall and are for the most part covered with dense forests, although in the south on the Upper Paraguay, an affluent of the Rio del Plata, there are open prairie lands.

In Brazil rubber is classified for commercial purposes as seringa (about nine-tenths of all), manitoba, mangaheira, and sorba. The great bulk of the seringa is produced from the hevea tree. The normal annual production of rubber in Brazil is between 40,000 and 60,000 metric tons. About 50 per cent. of all the rubber is exported to the United States. Brazil produces more than half of the world's total crop of coffee. The normal export is twelve or thirteen millions of bags, of 60 kilos (132 pounds) each, yearly. The greater part of this coffee is produced in the State of Sao Paulo.

CHILE.

President—Juan Louis Sanfuentes.

THE CABINET.

Minister of Interior—Señor don Eliodoro Yáñez. *Minister of Foreign Affairs*—Señor don Eduardo Suarez Mujica. *Minister of Justice*—Señor don Arturo Alemparte. *Minister of Finances*—Señor don Ricardo Salas Edwards. *Minister of War*—Señor don Oscar Viel. *Minister of Public Works*—Señor don Malaquias Concha.

The Constitution dates from 1833 with subsequent amendments. The National Congress consists of thirty-seven Senators and 118 Deputies, all chosen directly by the people. The President serves five years and is elected by delegates named by the people. The Presidential election is held June 25. The republic is divided into twenty-three Provinces, each subdivided into eighty-three Departments and one Territory, the latter being down by the Straits of Magellan. The State Religion is Roman Catholic, but there is freedom of worship. Education is free but not compulsory. Military service is compulsory between the ages of eighteen and forty-five.

Extending over 38½ degrees of latitude, from 17° 15′ to 55° 59′ south. Chile has a coast line on the Pacific Ocean of 2,627 miles with an average breadth of a little over 100 miles. It includes all of the territory south of Peru from the crest of the Andes to the ocean, extending to Cape Horn at the extremity of Tierra del Fuego. It comprehends, therefore, every variety of temperate climate from the frigid to the torrid. The most significant fact about Chilean natural conditions is the amount and distribution of rainfall. Beginning at the north there is almost an absolute desert with scarcely any rainfall at all. As one goes south the precipitation increases in proportion to the distance travelled until, in the extreme south of Tierra del Fuego, there is an excessive rainfall, amounting to over 100 inches per annum. About the centre of Chile, where are located the cities of Santiago and Valparaiso and where is the bulk of the population, the rainfall is about equivalent to that of San Francisco and is adequate for growing the plants and fruits of the temperate and sub-tropical localities. In the extreme south the country is heavily wooded, but as one goes north and the rainfall becomes less, the forests gradually disappear until in the vicinity of Santiago there is but little natural growth of forest trees. North of Santiago, except in spots in the mountain valleys, there are almost no trees. Irrigation has been developed in the north where water from the mountain streams is available. Due to the lack of rainfall and to the ocean breezes from the Pacific, northern Chile is not so hot or oppressive as its geographical location would indicate.

There are over 5,000 miles of railway in operation in the country, of which more than two-thirds are State owned and the remainder by private corporations. The main lines of railways run north and south with side branches and spurs toward the mountains and to the ocean. The railway system of Chile is connected with the Argentine railway system through a tunnel under the Andes near Santiago, and with the Bolivian railway system by lines running from Antofagasta and from Arica. There are 22,334 miles of telegraph lines in the republic, of which the Government owns over 16,500. Steamship lines extend from the principal ports of Chile to all parts of the world. One of the principal lines, subsidized by the Government, operates from southern Chile along the Pacific coast to Panama.

The greatest industries of Chile are the mining industries: nitrate of soda, copper, iodine, and borate of lime. Of these the principal is nitrate, a soluble mineral which would be entirely washed out of the soil if northern Chile had any considerable rainfall. Scientists are not agreed as to the origin of the caliche, the mineral ore from which the nitrate of soda is extracted. Chile has only in comparatively recent years assumed a prominent position as a producer of copper and iron, and the development of the latter metal is yet in its infancy. The production of copper and copper concentrates is at present over one hundred millions of metric tons.

COLOMBIA.

President—Dr. José Vincente Concha.
**First Designado*—Marco Fidel Suárez.
**Second Designado*—Jorge Holquin.

THE CABINET.

Minister of the Interior—Dr. Miguel Abadía Méndez. *Minister of Foreign Affairs*—Don Marco Fidel Suárez. *Minister of War*—Don Salvador Franco. *Minister of Finance*—Don Tomás Suri Salcedo. *Minister of the Treasury*—Don Pedro Blanco Soto. *Minister of Public Instruction*—Don Emilio Ferrero. *Minister of Public Works*—Don Jorge Vélez. *Minister of Agriculture and Commerce*—Don Luis Montoya S.

*Designated for the Presidency.

The Republic of Colombia was founded in 1819 and was made a Federation of eight States, later increased to nine, all coming in under the Constitution of 1886. The States were later changed to Departments with Governors appointed by the President of the Republic. There are now fourteen Departments, two Intendencies," and seven Commissaries. The Congress consists of thirty-four Senators, elected indirectly for four years each, and ninety-two Representatives, elected by the people for two years each. The President serves four years. Roman Catholicism is the State religion. The University of Bogata dates from 1572. Military service is compulsory and there is a standing army of 50,000.

Colombia lies wholly within the torrid zone, but owing to the fact that about one-half of the republic is occupied by the three branches of the great Cordillera into which the mountain system of South America splits at the northern end thereof, it possesses to a remarkable degree a variation of climate, soil and temperature. The mountainous area of Colombia comprehends the centre and western part thereof. The mountain system is very much broken and while three main chains are recognizable, as a matter of fact there are many cross lines and elevated plateaus which give to the whole country a character not unlike that of Switzerland.

COLOMBIA—*Continued.*

The bulk of the population of Colombia is located on these elevated uplands, although there is a considerable population in the Atlantic coast region.

About 700 miles of railways are in operation. Gold is found in nearly all the western half of the republic and particularly near the Pacific. Platinum has also been mined to a considerable extent Colombia is at present the second country in the production of this metal. The gold production is usually between $4,000,000 and $5,000,000 per annum and platinum about $600,000. Coal is known to exist in several localities in Colombia and nearly all of the coast region both on the Caribbean and on the Pacific is rich in mineral oils, which are only just beginning to be exploited. The principal forest products are tagua and rubber, the exports of which are something under $1,000,000 each. Cattle are raised. At present the principal cattle product exported is hides, of which about two and a quarter million dollars' worth leave the country. About one-half of all the exports of Colombia in value consists of coffee, amounting to $17,000,000 a year. Bananas represent a new industry of which something over $2,000,000 a year are exported.

COSTA RICA.

President—Sr. Frederico Tinoca Granados.
**First Designado*—Sr. Rafael Cañes Mora.
**Second Designado*—Lic. Ezequiel Gutiérrez Iglesias.

THE CABINET.

Secretary of State, Foreign Relations, Attorney-General, Worship and Charities—Dr. Carlos Lara. *Secretary of Interior and Department of Police*—Amades Johanning. *Secretary of Treasury and Commerce*—Manuel Francisco Jiminez. *Secretary of War and Marine*—José Joaquin Tinoco Granados. *Secretary of Improvements*—General Juan Bautista Quiros. *Secretary of Public Instruction*—Roberto Brenes Mesén.

*Designated for the Presidency.

The Constitution dates from 1871. The Constitutional Congress consists of forty-three Deputies serving four years each. The President is elected for four years. The State religion is Roman Catholic, but the Constitution guarantees freedom of worship. The standing army is about 40,000. On the Atlantic side the land lies low and temperatures are higher, and there is a heavy growth of forests. Most of the population is on the Pacific side and near the ocean, but the principal port is Limón on the Atlantic side. There is a good rainfall in all of the republic, but heavier on the Atlantic than on the Pacific side.

There are about 430 miles of railways in Costa Rica, of which 69 miles are Government owned. Most of the railways are comprehended in the system of the Northern Railway Company, operating, also, the Costa Rica Railway. This system of railways has its focus at Limón and extends to the capital and to other points of the interior and of the west. There are steamship lines connecting Limón with the United States and Europe, and on the Pacific side Puntarenas with the United States, Panama, and the South. In addition there is a coastwise service of small vessels on both coasts. There are known to be considerable mineral deposits in Costa Rica, but as yet there is but little mining except for gold and this is not on a very large scale. The export of gold, with some silver, amounts to about $900,000 a year.

The two great industries of Costa Rica are bananas and coffee, the former accounting for more than one-half in value of all the exports of the republic. In fact, Costa Rica is the great banana producing country of the western hemisphere, its exports being greater than that of any other of the American republics, amounting to from 10,000,000 to 12,000,000 bunches a year. The export of coffee represents usually from $3,000,000 to $3,500,000 annually. Costa Rican coffee in Europe is considered among the finer grades.

DOMINICAN REPUBLIC.

Provisional President—Dr. Francisco Henríques y Carvajal.

THE CABINET.

Secretary of Interior and Police—Federico Henríquez y Carvajal. *Secretary of Foreign Affairs*—José M. Cabral y Baez. *Secretary of Treasury and Commerce*—Lic. Francisco J. Peynado. *Secretary of Public Instruction and Justice*—Emilio Prudhomme. *Secretary of Improvements and Communications*—Eliseo Espaillet. *Secretary of War and Marine*—General Miguel Mascaró. *Secretary of Agriculture and Immigration*—Eladio Sanchez.

Dominica has had a Constitution since 1844. The National Congress consists of twelve Senators and twenty Deputies. Senators serve six years and Deputies four years. The President serves six years and is chosen by an electoral college. There are twelve Provinces, each administered by a Governor appointed by the President. Roman Catholic is the State religion, but there is freedom of worship. Education is free and compulsory. Revenue is derived chiefly from custom duties. The army is about 1,000 men.

The Dominican Republic occupies the eastern and larger part of the Island of Santo Domingo or Hayti. There is more than 350 miles of railways in the Dominican Republic, of which more than one-half in length are owned by private individuals. Steamship lines connect the principal ports with the United States and Europe. The principal industries in the republic are agricultural, in particular the raising of cacao and sugar cane. Next to Cuba, the Dominican Republic appears best suited to the production of cane sugar to compete with the beet sugar industry of Europe. The exports of raw sugar in normal years amount to over $5,000,000 annually. The production of cacao has advanced rapidly. Coffee and tobacco are produced in considerable quantities. There is some cotton grown and the production of tropical fruits, bananas and cocoanuts is advancing. The principal forest industry is the export of woods, lignum vitae, satin wood and mahogany.

ECUADOR.

President—Dr. Alfredo Banguero Moréno.

THE CABINET.

Minister of Interior—Dr. José María Ayora. *Minister of Foreign Affairs*—Dr. C. M. Tobar y Borgoño. *Minister of Finance*—Sr. Miguel G. Hurtado. *Minister of Public Instruction*—Dr. Manuel E. Escudero. *Minister of War and Marine*—Sr. Rafel Pino Roca.

Ecuador was made a republic in 1830, and the present Constitution dates from 1906. The President serves four years. The Upper House of Congress consists of thirty-two Senators for four years each, and the Lower House of forty-eight Deputies for two years each, both elected by adults who can read and write. The President of the Supreme Court of Justice is head Counsel of the State. The Constitution recognizes only the Roman Catholic religion, the churches and convents passing under the control of the State in 1904. Civil marriages were established by law in 1902. Primary education is free and compulsory. The standing army is 10,000 men.

The higher mountainous area, occupying about one-third of the republic, with plateaus and valleys between the mountain chains, is from 3,000 to 12,000 feet above the sea. Here the climate is equable, the rainfall less and but little or no forest growth. The eastern side of the mountains, the third division of Ecuador, is the fringe of the great plain of the Amazon River. Here the vegetation, as in most parts of the Amazon valley, is represented by a heavy forest growth quite different in character from the vegetation of the Pacific coast. This over-the-mountain region of Ecuador is almost unsettled, the only industries being the forest industries, principally rubber gathering. There are numbers of uncivilized Indians scattered

through this country, but only here and there a trading post or other evidence of civilization. The bulk of the population of Ecuador is located in the uplands, in the valleys between the mountains and in the coast region.

There are 365 miles of railway lines in operation in Ecuador. The greater part of this mileage is represented in the Guayaquil and Quito line, extending from the principal port of the republic to the capital, a distance of 297 miles. There is a short line of railways running from Puerto Bolivar to Machala, Pasage and Guajo. A new line of railway has begun construction from the Bay of Caraquez to Quito. The total length of this line is about 186 miles. A railway is also projected from Huigra to Cuenca. Steamship lines touching at Guayaquil and other ports connect with Panama on the north, and with Europe through the Strait of Magellan on the south. Cacao and coffee are the chief exports.

GUATEMALA.

President—Lic. Manuel Estrada Cabrera.
First Designado—General Mariano Serrano.
Second Designado—General Manuel Duarte.

THE CABINET.

Secretary of Interior and Justice—Lic. José Maria Reyna Andrade. *Secretary of Foreign Relations*—Dr. Luis Toledo Herrarte. *Secretary of Treasury and Public Credit*—Sr. Guillermo Aguirre. *Secretary of War*—General Luis Ovalle. *Secretary of Improvements*—Sr. Luis F. Mendizabal. *Secretary of Public Instruction*—Lic. J. Eduardo Girón.

The republic was founded in 1847. There is a National Assembly consisting of one representative for every 20,000 of population, and a Council of State of thirteen members. The representatives are elected by the people and President together with the Council of State. The President serves six years. The State religion is Roman Catholic, but other religions are guaranteed under the Constitution. Schooling is free and compulsory. The standing army is about 86,000, with a reserve of 41,000. Conscription liability runs from eighteen to fifty years.

Guatemala lies high, with altitudes of from 4,000 to 11,000 feet. The country is broken by mountain ranges, with plateaus and valleys. The climate is not oppressive and is generally healthy. The soil is fertile and the rainfall good. The bulk of the population is toward the Pacific. There is but little settlement on the north and a scanty settlement on the Atlantic side. There are 500 miles of railway. The capital is connected with both the Atlantic and Pacific. Steamship lines connect the ports of the Atlantic with Europe and with the United States, and on the Pacific with the United States, other parts of Central America and Panama. Although the mountains of Guatemala are known to be rich in minerals, there has been very little development in the mining industry in that country. Guatemala is an agricultural country, a coffee-growing country, the exports of this product accounting for about 80 per cent. of the total exports. Guatemalan coffee, like that of the other Central American countries, has a reputation in Europe, where it brings high prices. There has been some development in bananas and sugar.

HAYTI.

President—M. Philippe Sudre Dartiquenave:

Secretary for Foreign Relations and Minister of Justice—M. Edmond Dupuy. *Secretary of the Treasury and Department of Commerce*—M. Edmond Héraux. *Secretary for Public Instruction*—M. Auguste Scott. *Secretary of Public Works and Agriculture*—M. Furcy Châtelain. *Secretary of the Interior and Ecclesiastical Affairs*—M. Osmin Cham.

Hayti has been independent since 1804. The present Constitution dates from 1889. The Chamber of Communes consists of ninety-nine members, each serving three years and elected by the people, and thirty-nine Senators serving six years each and elected indirectly. The President serves seven years. The religion is Roman Catholic. Education is free. The army consists of 5,000 men, with a reserve of 20,000.

Hayti occupies the western portion of the island of Santo Domingo, or Hayti, and is a land of high mountains and valleys. There is a good rainfall and the soil is productive. Except in the low-lying coast region, of which there is but little in Hayti, the temperatures are not excessively high, and in the highest valleys, even in midsummer, the climate is agreeable. Hayti is one of the most densely populated of all the American republics, the average being nearly 200 persons to the square mile. There are 70 miles of railway. The principal means of transportation is by water. There are good harbors and landing places every few miles along the coast, consequently most of the transportation is carried on by means of steamships, sailing vessels, and even canoes, from one point to another. The principal ports are the capital, Port au Prince, Aux Cayes, Jacmel, Jeremie, Cape Haitien, Gonaives, and Port de Paix.

In the early days of the Spanish, and later of the French, occupation mining was an industry in Hayti and the gold mines were celebrated, but at present there is scarcely any mining. The industries of the country are now agricultural, including coffee. Cacao, of which the annual production is something like 3,000 tons, is cultivated with advantage in all of the hot lowlands. Cotton is grown extensively and there is some export of raw cotton. Of the forest industries, the principal are dyewoods, logwood and fustic, and the cabinet wood, cedar and lignum-vitæ. There is also a considerable export of orange skin, honey, hides and goatskins.

HONDURAS.

President—Dr. Francisco Bertrand.
First, Second and Third "Designados"—Lic. Francisco Escobar, Dr. Naziro Soriano, Lic. Antonio Madrid.

THE CABINET.

Minister of Foreign Affairs—Dr. Don Mariano Vásquez. *Minister of Interior*—Dr. Don Francisco J. Mejia. *Minister of Finances*—General Don Leopoldo Córdova. *Minister of War and Navy*—Dr. Don Jéronimo J. Reina. *Minister of Public Instruction*—Dr. Don Silverio Lainez. *Minister of Public Works and Agriculture*—Dr. Don Manuel S. López.

The republic is governed by a charter proclaimed in 1894. The Congress of Deputies consists of forty-two members serving four years each. The President is elected for four years. There is no state religion. Education is free and compulsory. The army is 2,000 men, with 54,000 in reserve. Bananas are the chief crop. In general the coast lands lie high. Honduras is heavily forested, but there are open savannahs on the uplands suitable for cattle grazing. The bulk of the population is in the western half of the country adjoining Salvador. The climate of the uplands is mild and agreeable, but in the low-lying lands it is hot and oppressive.

There are about 150 miles of railways in operation in the republic extending from the coast inland. There are a number of surveys for new railroads projected, connecting the capital with other parts of the republic. Steamship lines extend from the Atlantic Coast of Honduras to the United States and to the principal European countries, and on the Pacific Coast to the United States, to other Central American ports, Panama and South America. The principal ports in the order of their importance are Amapala, Puerto Cortez, La Ceiba and Trujillo. Amapala is on the Bay of Fonseca on the Pacific side. The other ports are on the Atlantic. The greatest development of the natural resources of Honduras has been in mining and in the production of certain agricultural products, principally bananas, cocoanuts and coffee. The mining is almost entirely gold and silver, with some nickel. For the fiscal years 1913-1914 the value of the mineral exports was $886,966, all of which except about $20,000 was gold and silver cyanide precipitates.

MEXICO.

(Contributed to THE ALMANAC by the Mexican Ambassador, Senor Ygnacio Bonillas.)

President—Gen. Venustiano Carranza.

THE Cabinet: *Foreign Relations*—Lic. Ernesto Garza Perez, Acting Secretary. *Interior*—Lic. Manuel Aguirre Berlanga, Acting Secretary. *Fomento*—Ing. Pastor Rouaix, Secretary. *Finance*—Rafael Nieto, Acting Secretary. *War and Marine*—Gen. J. Agustin Castro, Acting Secretary. *Commerce and Industry*—Ing. Alberto J. Pani, Secretary. *Communications and Public Works*—Ing. Manuel Rodriguez Gutierrez, Acting Secretary. There are three departments not members of the Cabinet: *Sanitation*—Dr. J. M. Rodriguez, Chairman of the High Board of Health. *University*—Rector Lic. Jose N. Macias. *Attorney-General*—Pascual Morales Molina.

The new Constitution of the United Mexican States was adopted by the Constituent Congress in the City of Queretaro on January 31, 1917, and promulgated on the following February 5. Like the Constitution of 1857, it provides for a representative democratic, federal republic, consisting of free and sovereign States in all that concerns their internal affairs, but united in a federation according to the principles of this fundamental law. The supreme power of the federation is divided for its exercise into legislative, executive and judicial

The National Congress is composed of a Senate and a House of Representatives, the former consisting of 58 members 2 for each State and the Federal District, and the latter of one representative for each 60,000 inhabitants or for any fraction thereof exceeding 20,000 on the basis of the general census of the Federal District and of each State and Territory. Any State or Territory in which the population shall be less than that fixed as above stated shall nevertheless elect one representative. The members of Congress are elected by direct elections. Suffrage is possessed by all citizens who have reached the age of 18 years if married, and of 21 years if not married. In the last Presidential election women voted in the Federal District and in some States, and their votes were counted. There is one regular session of Congress from September 1 to December 31, but the President of the Republic may call extra sessions.

During recess of Congress there is a Permanent Committee consisting of 14 Senators and 15 Representatives appointed by the respective houses on the eve of the day of adjournment. In addition to the powers expressly vested in it by the Constitution, the Permanent Committee has the following powers:

I. To give its consent to the use of the national guard as provided in Article 76, Clause IV.

II. To administer the oath of office, should the occasion arise, to the President, to the Justices of the Supreme Court, to the Superior Judges of the Federal District and Territories, on such occasions as the latter officials may happen to be in the City of Mexico.

III. To report on all pending matters, so that they may be considered in the next session.

IV. To call extraordinary sessions in the case of official offenses or offenses of the common order committed by Secretaries of Executive Department or Justices of the Supreme Court, and official offenses committed by State Governors, provided the case shall have been already instituted by the Committee of the Grand Jury, in which event no other business of the Congress shall be considered, nor shall the session be prolonged beyond the time necessary for a decision.

SUPREME EXECUTIVE'S POWER.

The exercise of the supreme executive power of the Union is vested in a single individual called "President of the United States of Mexico," who is elected by direct ballot for a single term of four years and can never be re-elected. The Presidential term begins December 1. In the event of the permanent disability of the President of the Republic, if this occurs within the first two years of the respective term, the Congress, if in session, shall forthwith act as an electoral college, and with the attendance of at least two-thirds of its total membership shall choose a President by secret ballot and by a majority vote; and the same Congress shall issue the call for Presidential elections and shall endeavor to have the date set for this event as far as possible coincide with the date of the next election of Representatives and Senators to Congress. Should the disability of the President occur while Congress is in recess, the Permanent Committee shall forthwith designate a President ad interim, who shall call Congress together in extra session in order that it may in turn issue the call for Presidential elections in the manner provided in the foregoing paragraph. Should the disability of the President occur in the last two years of the respective term, the Congress, if in session, shall choose the substitute to conclude the period of the Presidential term; if Congress is not in session the Permanent Committee shall choose a President ad interim and shall summon Congress in extra session, or order that it may act as an electoral college and proceed to the election of the substitute President. The President ad interim may be chosen by Congress as substitute President. The citizen designated as President ad interim for the purpose of calling elections, in event of the disability of the President within the first two years of the respective term, shall not be chosen in the elections held to fill such vacancy and for which he was designated.

If the President-elect shall fail to present himself at the beginning of any constitutional term, or the election not have been held and the result made known by December 1, the outgoing President shall nevertheless vacate office and the President ad interim chosen by the Congress, or in its recess by the Permanent Committee, shall forthwith assume the executive power. All action taken hereunder shall be governed by the provisions of the foregoing article.

In case of a temporary disability of the President, the Congress, or the Permanent Committee if the Congress shall not be in session, shall designate an Acting President during such disability. If a temporary disability shall become permanent, the action prescribed in the preceding article shall be taken. In the event

of a leave of absence granted to the President of the Republic the person acting in his stead shall not be disqualified from being elected in the ensuing period, provided he shall not have been in office during the holding of elections.

The President shall not resign office except for grave cause, upon which the Congress shall pass, to which body the resignation shall be tendered. The President, before entering upon the discharge of the duties of his office, shall make the following affirmation before the Congress, or in its recess before the Permanent Committee:

"I do solemnly affirm that I will defend and enforce the Constitution of the United States of Mexico and the laws arising thereunder and that I will faithfully and conscientiously perform the duties of President of the United States of Mexico, to which I have been chosen by the people, having ever in mind the welfare and prosperity of the nation; if I shall fail to do so, may the nation call me to account."

The Cabinet is composed of the following secretaries: Foreign Relations, Interior, Fomento (Promotion), Finance, War and Marine, Commerce and Industry, Communications and Public Works, and of the Departments of Sanitation and University, and the Attorney General. The judicial power of the federation is vested in a Supreme Court and in Circuit and District Courts, whose number and powers shall be fixed by law. The Supreme Court of Justice shall consist of eleven members; its sittings shall be in banc and its hearings shall be public, except in the cases where public interest or morality shall otherwise require. It shall meet at such times and under such conditions as by law prescribed. No sittings of the court shall be held without the attendance of at least two-thirds of its total membership, and all decisions rendered shall be by a majority vote.

The Justices of the Supreme Court chosen to this office in the forthcoming elections shall serve two years; those elected at the conclusion of this first term shall serve four years, and from and after the year 1923 the Justices of the Supreme Court, the Circuit and District Judges may only be removed for malfeasance and after impeachment proceedings, unless the Circuit and District Judges be promoted to the next higher grade. The same provision shall govern, in so far as it be applicable to the terms of two and four years respectively, to which this article refers. The Justices of the Supreme Court shall have the following qualifications:

I. They shall be Mexican citizens by birth, in the full enjoyment of their civil and political rights. II. They shall be over thirty-five years of age at the time of election. III. They shall be graduates in law of some institution or corporation authorized by law to confer such degrees. IV. They shall be of good repute and not have been convicted of any offense punishable with more than one year's imprisonment; but conviction of larceny, deceit, forgery, embezzlement or any other offense seriously impairing their good name in the public mind shall disqualify them for office, whatever may have been the penalty imposed. V. They shall have resided in the country for the last five years, except in the case of absence due to public service abroad for a period not exceeding six months. The members of the Supreme Court of Justice shall be chosen by the Congress, acting as an electoral college; the presence of at least two-thirds of the total number of Representatives and Senators shall be necessary for such action. The election shall be by secret ballot and by a majority vote, and shall be held as among the candidates previously proposed, one being nominated by each State Legislature, as provided in the respective State laws. Should no candidate receive a majority on the first ballot, the balloting shall be repeated between the two candidates receiving the highest number of votes.

All Circuit and District Judges shall be appointed by the Supreme Court of Justice; they shall have such qualification as by law required, shall serve four years and shall not be removed except by impeachment proceedings or for incapacity to discharge their duties, in accordance with the law. The Supreme Court of Justice may remove the District Judges from one district to another, or it may fix their seats in another locality, as it may deem most advantageous to the public business. A similar procedure shall be observed in the case of Circuit Judges. The Supreme Court of Justice may likewise appoint auxiliary Circuit and District Judges to assist in the labors of such courts as have an excessive amount of business, in order that the administration of justice may be speedy; it shall also name one or more of its members or some District or Circuit Judge or shall designate one or more special commissioners, whenever it shall deem it advisable or on the request of the President or of either house or of any State Governor, solely for the purpose of inquiring into the behavior of any Judge or Federal Justice or into any fact or facts which amount to a violation of any individual rights or to the subversion of the popular will or any other offense punishable by federal statute.

The Circuit and District Courts shall be assigned among the several Justices of the Supreme Court who shall visit them periodically, shall observe the conduct of their Judges, listen to any complaint presented against them and perform all such other acts as the law may require. The Supreme Court shall appoint and remove at will its clerk of the court and other employees on the roster established by law. The Circuit and District Judges shall likewise appoint and remove at will their respective clerks and employés. The Supreme Court shall choose each year one of its members to act as Chief Justice, with the right of re-election. Each Justice of the Supreme Court on assuming office shall make an affirmation before Congress, or if this is in recess, before the Permanent Committee, as follows: The Presiding Officer shall say:

"Do you promise to perform faithfully and conscientiously the duties of Justice of the Supreme Court with which you have been charged, and to defend and enforce the Constitution of the United States of Mexico and the laws arising thereunder, having ever in mind the welfare and prosperity of the nation?" To which the Justice shall reply. "I do." On which the Presiding Officer shall answer: "If you fail to do so, may the nation call you to account." The Circuit and District Judges shall make the affirmation of office before the Supreme Court or before such other authority as the law may determine.

Mexico is divided politically into 28 States, one Federal District and two Territories. Governors of the States are elected by direct ballot in the same manner as the President of the Republic, as are also the Legislatures, which consist of one house, and the judiciary of each State. The Governors of the Federal District and Territories are appointed by the President. The States and Territories are divided into districts (counties) and these subdivided into municipalities which elect their own administrative councils, Mayors and Justices of the Peace. Local elections have been held in the following States where the three branches of the Government, legislative, executive and judicial, are now installed, as well as all the municipal authorities in the same States.

Aguascalientes, Coahuila, Colima, Campeche, Durango, Guanajuato, Guerrero, Hidalgo, Jalisco, Michoacan, Mexico, Nuevo Leon, Puebla, Queretaro, Sonora, Sinaloa, San Luis Potosi, Vera Cruz, Zacatecas.

COAST OF MEXICO.

Mexico has a coast line of 1,400 miles along the Mexican Gulf, 327 miles on the Caribbean Sea, and no less than 4,574 miles on the Pacific Ocean, including the Gulf of California between the peninsula of Lower California and the Mexican mainland, measuring indentations. On the Gulf of Mexico the chief ports are: Matamoros, Tampico, Tuxpam, Vera Cruz, Puerto Mexico (Coatzacoalcos), Frontera, Ciudad del Carmen, Campeche and Progreso. On the Caribbean Sea there are two ports of entry: Ascension and Espiritu Santo, also Payo Obispo for Government transports. On the Pacific side there are the ports of Guaymas, Topolobampo, Altata, Mazatlan, San Blas, Manzanillo, Alcapulco, Puerto Angel, Salina Cruz, Tonala and San Benito, on the mainland, and Ensenada, La Paz Bahia Magdalena, Santa Rosalia and Muleje on the peninsular of Lower California.

MEXICO—*Continued.*

PROGRESS OF THE COUNTRY

Notable progress has been made in the extension of the post and telegraph service in the republic. There are now about 3.000 post-offices of all classes. 500 telegraph stations. with 25 telephone and 14 wireless telegraph stations. The length of wires totals about 75,000 kilometres (46,602 miles), while an equally efficient cable system shows a total length of cable amounting to 775,000 metres (over 480 miles) There has been but little activity in the development of railway systems, owing to the prevailing political unrest. The recent editions make a total about 16.000 miles. Mexican trade statistics are not available for a date later than June 30, 1913. The following are estimates:

FOREIGN COMMERCE (IN GOLD):

Year ended June 30, 1914. estimate—Exports, $176,000,000; Imports, $65,000,000. Total, $241,000,000. Year ended June 30, 1915, estimate—Exports, $150,000,000, Imports, $61,000,000. Total. $211,000,000.

United States trade with Mexico for year ended June 30, 1916: Imports, $97,676,544. exports, $48,808.542 The movement in revenue stamps has been as follows: 48,189,300 ordinary revenue stamps amounting to $141,698,812.50; 30,365,040 revenue stamps for the federal contribution tax amounting to $20,630,960; 27,269,139 revenue stamps in special taxes, amounting to $40,766,044 87,184,717 tobacco stamps, amounting to $2,810,046.17; making a total of 193,008,197 revenue stamps, amounting to $205,905,862.67.

Disbursements from May 1 to August 10 last amount to $22,500,000. Daily average expenditure 817,000 pesos silver (pesos silver = 0.50 United States currency). According to information on record in the Treasury Office throughout the republic, the stock of specie is as follows: On May 1 last, $5,583,722.55. On June 1 last, $5,817,000.65. On July 1 last, $6,985,922.21. On August 1 last, $8,321,028.51.

OIL EXPORTATIONS.

Official reports of the exportation of petroleum for the months of July and August, 1917, have just been given out by the Treasury Department. From the Tampico zone there was shipped 898,359.37 tons, which returned an income from taxes of $974,256.96 Mexican money. From the Tuxpam district there were exported 284,802.45 tons, returning $309.049 taxes. From the Port of Mexico. Isthmus of Tehuantepec there went 35,315.24 tons, returning $46,573.49 in taxes. The gross total was 1,218,477.07 tons, returning a total of $1,328,879.45 Mexican gold, equivalent to $664,439.72 American gold. This is a trifle over 50 cents per ton, or between seven and eight cents per barrel American gold.

WIRELESS STATIONS.

There are fourteen wireless stations in operation, namely:

A—Mexico. D. F., Saltillo, Coahuila; Vera Cruz, Ver. One in each of these three cities, of five kilowatts radiating energy and approximate transmitting range of one thousand kilometres (625 miles), under ordinary atmospheric conditions in day time, or double the distance (2,000 Km. = 1,250 miles) at night under exceptionally favorable conditions.

B—Merida, Yucatan. One station of two and one-half kilowatts radiating energy, and about eight hundred to sixteen hundred kilometres transmitting range (equivalent to 500 or 1,000 miles)

C—Ciudad Juarez, Chih. (Opposite El Paso, Tex.) One station of two and one-half kilowatts radiating energy and about eight hundred to sixteen hundred kilometres transmitting range. (500 or 1,000 miles)

This station was visited in April, 1914. and may have been altered later, but not to exceed the five kilowatts type.

D—Campeche. Cam.: Payo Obispo. Quintana Roo Territory; Tuxpam, Ver.; Tampico, Tam.; Guaymas, Son.: Santa Rosalia. Baja Calif Territory; San Jose del Cabo, Baja Calif.; Mazatlan, Sinaloa. One station in each of these eight places, of one and one-half kilowatts radiating energy and about four hundred to eight hundred kilometres transmitting range. (250 or 500 miles).

E—Xcalak, Quintana Roo Territory. One station of one-half kilowatt radiating energy to receive and transmit messages only to Payo Obispo in the extreme southern portion of Quintana Roo Territory, across Lake Chetumal.

MEXICO'S VARIETY OF CLIMATE.

(By John Barrett.)

Mexico has every variety of climate. In the south and on the Gulf Coast, and in parts of the inter or of the centre and toward the Gulf there is rain for ordinary crops. In some places there is a superfluity of rain, particularly on the Gulf Coast in the north and northeast. On the Pacific Coast, in the Gu f of California, there is a deficiency of rain. In large areas of this portion of Mexico there is a flow of streams from the mountains for crops and pastures. Irrigation works of considerable value have been built. In other places irrigation is carried on in a more or less primitive manner. By far the major part of Mexico lies high and the country on the whole is mountainous The exceptions to this general statement apply to the coast lands on both the Gulf and Pacific sides and to most of the Yucatan Peninsular, but these locations differ very much among themselves. In the neighborhood of Vera Cruz and Tampico the land is low and quite tropical. In the Yucatan Peninsular, on the contrary, while there are no great elevations, the country is of a somewhat hilly character and the climate is usually milder.

There are 16 000 miles of railways About 60 per cent. of the mileage is included in the system of the National Railways of Mexico. controlled by the Government, and the remaining 40 per cent are independent roads. some of which are controlled by the State Governments. Steamship lines connect Mexico on the Gulf side with the United States and Europe, and on the Pacific side the United States, Canada, China and Japan. The principal ports in the order of their importance are, for imports: Vera Cruz, Tampico. Progreso. Coatzacoalcos. Guaymas, Mazatlan and Santa Rosalia; and for exports: Tampico, Vera Cruz, Progreso, Santa Rosalia. Coatzacoalcos, Mazatlan. Isla del Carmen, Campeche and Frontera. Guaymas, Mazatlan and Santa Rosalia are on the Pacific. the others are on the Gulf of Mexico. Important frontier customs ports of entry and export from and to the United States are Laredo, Ciudad Juarez, Ciudad Porfirio Diaz, La Morito. Matamoras. Nogales and Agua Prieta.

Mexico is a mining country The value of its output in this industry represents over $90,000.000 annually. of which more than two-thirds are gold and silver. the value of the silver being about double that of the gold mined. Of the metals other than gold and silver, the principal are antimony. 3.000 to 4,000 metric tons annually: mercury. 1 to 20 tons: copper 60,000 tons; copper ore, about 120,000 tons: zinc ore, 40,000 to 50,000 tons; non-metals, asphalt, about 20.000 tons; coal, 50.000 to 60.000 tons.

LABOR FEATURES OF MEXICAN CONSTITUTION.

(By the United States Department of Labor.)

The new Constitution contains a number of provisions of importance to labor. some of them being in advance of the generally accepted legal regulations of this country Exploitation of the working classes and their subjection to the holders of large properties, which continued to flourish under the Constitution of 1857, were some of the evils that were especially sought to be remedied in the new instrument. Many of the provisions of the old Constitution have been taken over into the new but the corrective effect of new features gives to these an aspect different from that they previously had Thus the prohibition of slavery, which appears in both the old and the new documents. acquires a new significance in view of the provision of the new Constitution that no contract for labor shall be binding except for the time fixed by law and shall not "exceed one year to the prejudice of the party rendering the service, nor shall it in any case what-

soever embrace the waiver, loss or abridgement of any political or civil right." In case of breach, no compulsory fulfilment may be had, the workman being liable civilly for resultant damages.

FREEDOM OF OCCUPATION.

Freedom to engage in any pursuit or occupation is guaranteed by both Constitutions, the present one inserting the provision that it must be lawful and that no one shall be deprived of the fruit of his labor except by judicial decree. Orders for arrest or detention may be issued only by competent judicial authority, preceded by a charge, accusation or complaint for the specific offense punishable by imprisonment, supported by an affidavit of a reliable party or by such other evidence as shall make the guilt of the accused probable. No one may take the law into his own hands, and the detention of persons shall be exercised only for offenses meriting corporal punishment. Punishment of violations of municipal and police regulations may consist only of fines or imprisonment not exceeding 36 hours; the fines against workman or unskilled laborer may not be greater than the amount of his weekly wage or salary. Imprisonment for non-payment of such fine may in no case exceed 15 days. Speedy trials must be had, and the period of detention before trial may not exceed the time set by law as the maximum period of imprisonment for the offense charged; the period of detention shall in all cases be considered a part of the final sentence.

The ownership of lands and water is declared to be vested originally in the nation, which has the right to transmit title and to impose such limitations as the public interest may demand, both in the regulation of the development of natural resources and in the division of large landed estates for the purpose of developing small holdings, establishing new centres of rural population, encouraging agriculture, etc. Legal capacity to acquire ownership of lands and properties is possessed only by Mexicans, native or naturalized, and by Mexican companies, and these alone may obtain concessions to develop mines, water or mineral fuels within the republic. Foreigners may be granted the same right if they agree to be considered as Mexicans in respect to such property and not to invoke the protection of their Governments in regard thereto. However, no foreigner may obtain direct ownership of lands or waters under any condition within a zone of 100 kilometres (62 miles) from the frontiers and of 50 kilometres (31 miles) from the seacoast.

In each State and Territory there shall be fixed a maximum area of land that any one individual or corporation may own. Excess property, if not voluntarily subdivided, may be subdivided by the local Government by means of expropriation proceedings Persons acquiring such subdivided lands have twenty years in which to make payment, the rate of interest not to exceed 5 per cent. The buyer may not alienate his lands during that period.

PROHIBITION OF MONOPOLIES.

The prohibition as to private and governmental monopolies found in the old Constitution is reproduced in the new, with added provisions as to punishment for accumulating or cornering necessaries for the purpose of bringing about a rise of price. Acts or measures which stifle or endeavor to stifle free competition in any production, industry, trade or public service are forbidden; as are also agreements or combinations by producers, manufacturers, merchants, common carriers and the like for the purpose of preventing competition and compelling the payment of exorbitant prices. Associations of labor organized to protect their own interests are not to be deemed a monopoly, nor are co-operative associations or unions of producers when, in defense of their own interests or those of the general public, they sell prime local products directly in foreign markets. Such associations must, however, be under the supervision of the Government, Federal or State, and have special authorization in each case.

It is declared to be the duty of every Mexican to compel the attendance of his children or wards under fifteen years of age at either private or public schools in order that they may receive primary instruction and military training for such periods as the State laws indicate.

NICARAGUA.

President—General Emiliano Chamorro.
First Designado—Salvador Chamorro.
Second Designado—Vicente Rappaccioli.

THE CABINET.

Minister of Foreign Relations—Dr. J. Andrés Urtecho. *Minister of Interior*—Dr. Alfonso Solorzano. *Minister of the Treasury and Public Credit*—Dr. Octaviano César. *Minister of War and Marine*—General Tomas Masis. *Minister of Improvement and Public Works*—Gutierrez Navas. *Minister of Public Instruction*—Gordiano Herdocia.

The present Constitution of Nicaragua dates from 1913. The Congress consists of forty Deputies for four years each and thirteen Senators. The President serves four years. The prevailing religion is Roman Catholic. Education is free. The standing army has 2,000. Military service is obligatory between seventeen and fifty-five years. Nicaragua is the largest of the Central American Republics and has a great variety of climates. On the Atlantic Coast the country is low-lying, sometimes swampy, with high temperatures in the Summer time and with a dense tropical forest growth. In the western part of the republic, where is located the great bulk of the population, the country is high and mountainous, the rainfall is less and the climate is healthy and agreeable.

There are less than 200 miles of railway in the republic, located on the Pacific side, extending from the port of Corinto to Managua and other cities of the interior. Steamship lines connect with Nicaraguan ports on both the Atlantic and Pacific Coasts, in the former case to the United States and Europe, and in the latter to the United States, other Central American countries, Panama and South America. The principal ports on the Atlantic side are Bluefields and San Juan del Norte, and on the Pacific side Corinto, San Rafael and San Juan del Sur. The chief industry is agriculture, particularly the cultivation of coffee, which ordinarily accounts for about one-half of the total exports of the country Bananas, sugar and cacao are also produced. Of the forest industry, furniture woods and rubber are the principal There are numbers of cattle in the country, but there is no export of meat products except the by-products, hides principally. The production of gold and silver is attaining proportions

PANAMA.

President—Dr. Ramón M. Valdés.
**First Designado*—Ciro L. Urriola.
**Second Designado*—Ramón F. Acevedo.
**Third Designado*—Pedro A. Diaz.

*Designated for the Presidency.

THE CABINET.

Secretary for Foreign Affairs—D. Narciso Garay. *Secretary of Finance*—D. Aurelio Guardia. *Secretary of the Interior and Justice*—Dr. Eusebio A. Morales. *Secretary of Public Instruction*—D. Guillermo Andreve. *Secretary of Promotion*—D. Antonio Anguizola.

Lies between Costa Rica and Colombia, with the Caribbean Sea on the north and Pacific Ocean on the south. The Panama Canal Zone runs across this republic. Panama has a single republican form of government with the regular division into legislative, executive and judicial branches. There are eight provinces: Bocas del Toro, Chiriqui, Veraguas, Colon, Los Santos, Cocle, Herrera and Panama as political

PANAMA—*Continued.*

subdivisions The capital city is Panama. Panama has no navy and no army, but has a national police corps of 1,000 men.

The independence of the republic of Panama has been recognized by Colombia since 1914. The Chamber of Deputies consists of thirty-three members The President serves four years and is not eligible for the next term. The prevailing religion is Roman Catholic. Education is free. The Canal Zone is administered by the United States.

The republic of Panama comprises the isthmus of the same name connecting Central America with South America There are two low mountain ranges inclosing valleys and plains which afford pasture for cattle. In some of the uplands the climate is agreeable the year round, but for the most part during the Summer season Panama is hot. But like Central America and Mexico, the Pacific side has a more equable climate on the whole than the Atlantic side. Outside of the important cities and towns Panama is thinly settled and the national industries are largely forestry and fishing. The total mileage of railways is 151 miles of which the principal is a line across the isthmus from Colon to Panama of forty-eight miles, with a branch of three miles to Balboa, the Pacific entrance to the Canal. The remaining mileage is principally in the section adjacent to Bocas del Toro primarily for the transport of bananas. A number of railroads are projected, in particular a line known as the Panama-David road, which will be approximately 360 miles in length. The greatest transportation enterprise in Panama is the Canal, to which the railway across the isthmus is subsidiary. The principal export is bananas, accounting for about two-thirds of all the exports There is also some cacao raised and exported. There has been development in the cattle industry and there is a good home market and an export of hides and horns. Ivory nuts, cocobolo wood, cocoanuts, rubber, mahogany tortoise shell and mother-of-pearl are also exports of consequence.

PARAGUAY.

President—Manuel Franco.
Vice-President—José P. Montero.

THE CABINET.

Minister of Foreign Affairs—Manuel Gondra. *Minister of War and Navy*—Ernesto Velázquez. *Minister of the Interior*—Luis Riart. *Minister of Finance*—Eusebio Gaona. *Minister of Justice, Education and Culture*—Felix Paiva.

The republic of Paraguay is administered under the Constitution of 1870. It has a Senate of thirteen members and a Chamber of Deputies of twenty-six. The President serves four years. There are twenty electoral districts and ninety-three departments, with five military zones. Roman Catholicism is the state religion, but other creeds are permitted. The law of civil marriage dates from 1899. The army is 3,000 men, with compulsory military service.

Paraguay has a sub-tropical climate. There are several mountain ranges of no great altitude. Much of the country is level and prairie-like, but much is heavily forested. That part west of the Paraguay River, called the "Chaco," is low lying and swampy, but there are extensive areas rising a few feet above the swamp suitable for cattle raising. There are few people in this section, and parts are little explored. Paraguay, east of the Paraguay River, is inclosed between this river and the Parana, both tributaries of the Rio del Plata. It is along the Paraguay and Parana, particularly the former, that most of the population is located. There are 232 miles of railways in a single line in operation from the capital, Asunción, to Villa Encarnación on the upper Parana River, where connection is made by means of a train ferry with the Argentine System across the river. Most transportation in Paraguay is by means of the river system. The Paraguay and its numerous branches afford easy and cheap communication for all of western and central Paraguay, and the Parana and its tributaries for the southern and eastern sections of the country.

Paraguay is an agricultural and stock-raising country, but as yet these two industries have been but little developed The prairie lands of Paraguay are suited for cattle, the principal exports being fresh meat, jerked beef and hides. Fruits, and particularly oranges, grow in the utmost luxuriance in Paraguay. It has been said that oranges are more common in Paraguay than acorns in Pennsylvania, and as a rule they are almost as cheap The only export of fruit is to Argentina and Uruguay on the south. Oil of pettigrain, extracted from the sour orange tree leaves, is an article of export. Yerba mate is one of the principal products of Paraguay and is sometimes called Paraguay tea. It is used in most of the South American countries and is beginning to be used in the United States and Europe. The finest qualities of yerba are produced in Paraguay, although the whole production of the republic is less than that of Brazil. Considerable quantities of tobacco are produced and exported to Argentina principally. Quebracho wood and extract are also articles of importance in the export trade.

PERU.

President—Dr. José Pardo.
First Vice-President—Ricardo Bentin.
Second Vice-President—Vice-Admiral M. Meliton.

THE CABINET.

President of the Cabinet and Minister of Foreign Affairs—Francisco Tudela Varela. *Minister of the Interior*—German Arenas. *Minister of Justice*—Ricardo Flores. *Minister of Finance*—Baldomero Maldonado. *Minister of War*—Colonel Cesar la Fuente. *Minister of Commerce and Public Works*—Hector Escardó.

Peru became an independent republic July 28, 1821. It is divided into nineteen departments and three provinces. The executive power is vested in the President, who is elected for four years. The legislative power is intrusted to a Senate of fifty-two members and a House of Representatives of 116 members. The Government owns and operates the postal and telegraph lines in Peru, with the exception of the railway telegrams. Principal exports: Minerals, sugar, rubber, cotton, wood, guano, straw hats, petroleum.

The Constitution forbids any other religion than the Roman Catholic, but a new amendment welcomes all religions, the State continuing to support the Roman Catholic churches and convents, to which it holds title. Education is free and compulsory. The army consists of less than 7,000.

The climate of Peru, except on the eastern slope of the Andes, is not so hot as its geographical location, wholly within the torrid zone, would indicate. On the coast cool ocean breezes for most of the day blow from the Pacific Ocean and the dryness of the atmosphere prevents even a high temperature from being oppressive. There are 1,800 miles of railways, and 3,000 miles are projected or under survey or construction. Steamship lines connect most of the Pacific ports of Peru with Europe by way of the south, or with Panama to the north. Coastwise lines are in operation along the whole Pacific Coast of Peru. By way of the Amazon and its tributaries eastern Peru is in communication, through Brazil, with Europe and the United States. Iquitos is the principal Peruvian port on the upper Amazon. Ocean going steamships make regular sailings from Iquitos. The principal ports in the order of their importance are: For imports, Callao, Mollendo, Salaverry, Iquitos (on the Amazon), Paita, Eten, Pisco, Pacasmayo; and for exports, Callao, Paita, Mollendo, Salaverry, Iquitos, Pisco, and Eten.

The whole of eastern Peru is undeveloped. There are no industries except rubber, ivory nuts, dye-

PERU—*Continued.*

woods and like forest industries. Mining is the great industry in the mountain area and on the Pacific slope of the mountains. The principal metal now mined is copper, often mixed with silver. Lead and gold are also mined in considerable quantities. Bismuth, vanadium, wolframite and the non-metals, salt and borate of lime are important. Oil wells are in operation on the sea coast. The total value of the mineral products of Peru is $15,000,000 or $16,000,000 annually. In the coast country agriculture is developed to a high degree. The principal exports are cotton, sugar, rice, cacao and fresh fruits. The sheep and alpaca industry is important in the uplands of Peru. The export of sheep wool is about $800,000 annually, and of alpaca about twice this amount. There is also a large export of llama wool about equivalent to the export of sheep wool. The rubber export amounts to from $4,000,000 to $5,000,000 annually and the cotton and sugar export to about $7,000,000 each.

SALVADOR.

President—Carlos Meléndez.
**First Designado*—General José Miguel Batres.
**Second Designado*—Dr. Tomás García Palomo.
**Third Designado*—Dr. Ramón García González.

*Designated for the Presidency.

THE CABINET.

Minister of Foreign Affairs and Public Instruction—Francisco Martinez Suárez. *Minister of Finance*—Tomás G. Palomo. *Minister of War and Navy*—Enrique Cordova. *Minister of Interior*—Cecilio Bustamante.

The republic of Salvador has been such since 1839. The National Congress has forty-two Deputies, three for each department, elected by the people and serving one year. The President's term is four years. Education is free and there is no State religion. The army has 15,000 men, with a reserve of 50,000. Coffee is the chief crop. Salvador is nearly 600 square miles smaller than New Jersey. Although in the tropics Salvador, owing to the mountainous nature of the country, has a very equable climate. The rainfall is good and the land fertile, particularly in the valley between the mountains. A railway line connects Salvador's principal port, Acajutla, with the capital, San Salvador, sixty-five miles. There is a branch line of twenty-five miles to Santa Ana and also a line from the capital to Santa Tecla of about nine miles. A line from Ateos to Santa Anta, for many years out of commission, has been recently rebuilt and put in operation.

The system of the International Railways of Central America which is intended to connect the Salvadorean port of La Unión with ports in Guatemala is under construction. The system will give Salvador a direct outlet to the Atlantic Coast. Acajutla, La Libertad, and La Unión, are the principal ports in Salvador. From these ports steamship lines connect with other Central American ports on the Pacific, with the west coast of the United States, Panama, and South America. Salvador is pre-eminently an agricultural country, but there has been considerable development in the mining industries, particularly in gold and silver. The output of these two metals amounts to about $1,500,000 annually, of which the greater proportion is gold. Coffee is the staple export, and accounts for about 80 per cent. in value of the total exports. In addition, there is a trade in indigo, sugar, balsam of Peru (of which Salvador has almost a complete monopoly), hides, rubber, and leaf tobacco. There are considerable quantities of cattle in the country, but most of these are consumed locally and only the by-products, hides, horns, etc., are exported.

URUGUAY.

President—Dr. Feliciano Viera.

THE CABINET.

Minister of the Interior—Dr. Pablo Varzi. *Minister of Foreign Affairs*—Dr. Baltasar Brum. *Minister of Finance*—D. Federico Vidiella. *Minister of Public Works*—D. Santiago Rivas. *Minister of Industries*—Dr. Justino Jiménez de Aréchaga. *Minister of Public Instruction*—Dr. Rodolfo Mezzera. *Minister of War and Marine*—Dr. Baltasar Brum (acting).

The republic of Uruguay has stood since 1828, with a Constitution dating from 1830. It has nineteen Senators and ninety Representatives in its Parliament, the Senators serving six years and the Representatives three. The Representatives are elected directly by the people and the Senators are chosen by an Electoral College. The President's term is four years. Roman Catholicism as the State religion was abolished in 1916. Education is free and compulsory. The army is 10,000, with a National Guard of 40,000 There are no very high mountains and the country is the smallest in South America. Nearly all of Uruguay is arable and well watered. Being within the south temperate zone it is not subject to either extreme heat or cold. Its summers are about like those of Virginia and Maryland, while the winters are much milder than these two States. There is a good rainfall and most of the country is open, rolling prairie. There are some timbered areas.

Uruguay has 1,600 miles of railways, of which over 1,000 miles are of standard gauge and under State guarantee. Almost every plantation is in direct communication with Montevideo, the capital, by means of a natural waterway. Steamship lines connect the principal ports with the United States and Europe. The principal port is the capital, Montevideo, and the great bulk of the foreign commerce of the country is carried on through this port. Paysandú, Mercedes, Carmalo, Fray Bentos, Casa Blanca, Salto and Santa Rosa are important ports. Much of the industrial development of Uruguay is within the last thirty years. Although grain-producing, it is as yet a cattle-raising country. Nearly all of Uruguay is one great cattle range and the exports from this industry represent about nine-tenths of all the foreign exports. One of the most important of the meat industries of Uruguay is the preparation of tasajo, or jerked beef. Most of this product goes to the other countries in South America for consumption.

URUGUAY TO STAND BY THE AMERICAS.

The Government of Uruguay made the following announcement in June, by President Viera:

"Considering that, in various communications the Government of Uruguay has proclaimed the principle of American solidarity as the criterion of its international policy, understanding that the grievance against the rights of one country of the continent would be considered as a grievance by all and provoke them to uniform and common reaction; second, that, in the hope of seeing an agreement in this respect realized between the nations of America which may make the practical and efficient application of such ideals possible, the Government has adopted a watchful attitude with reference to its action, although it has signified in each case its sympathy with the continental nations which have seen themselves obliged to abandon their neutrality. Considering that as long as such an agreement is not made, Uruguay, without acting contrary to its sentiments and convictions, could not treat the American nations, which in defense of their own rights find themselves compromised in an intercontinental war, as belligerents; and considering that this criterion is shared by the honorable Senate, the President of the Republic, at a general Cabinet meeting, decrees: First, to order that no American country, which in defense of its own rights should find itself in a state of war with nations of other continents, will be treated as belligerents; second, that it is ordered that existing decrees which may be in opposition to this resolution are to remain without fulfillment; third, let it be communicated, published, and so forth."

THE LATIN AMERICAN REPUBLICS—*Continued.*

URUGUAY—(*Continued.*)

URUGUAYAN EXPORT DUTIES ON WOOL AND HIDES.

(Cablegram from American Consul, Montevideo.)

A law of November 9 increased export duties on the following products to 4 per cent., assessed on stated valuation for fiscal year 1917-18, viz: Raw wool, 120 pesos per 100 kilos; washed wool, 200 pesos per 100 kilos; dry cattle hides, 80 pesos per 100 kilos; salted cattle hides, 45 pesos per 100 kilos; sheepskins, 75 pesos per 100 kilos; tallow, 25 pesos per 100 kilos. Pulled wool, valuation fixed later. New rates in effect since November 9. (Uruguayan peso, $1.03; kilo, 2.2046 pounds.)

(The export duties on the above products in force hitherto are as follows: Wool of all kinds, 1.30 pesos per 100 kilos; dry cattle hides, 0.12 peso each; salted cattle hides, 0.25 peso each; sheepskins, salted, free; sheepskins, dried, 0.80 peso per 100 kilos; tallow, 0.50 peso per 100 kilos. An unverified report has been received stating that combed wool has been exempted from duty.)

THE 1917 WOOL CROP.

During the twelve months beginning October 1, 1917, the port of Montevideo will export from 90,000 to 92,000 bales of wool, while 8,000 to 10,000 bales may be shipped from Salto, Paysandu, and Mercedes to Buenos Ayres for export. Uruguayan exports will include a certain amount of wool from the Brazilian State of Rio Grande do Sul, which may be expected to offset local consumption and perhaps leave a surplus of 4,000 or 5,000 bales to be added to the Uruguayan clip available for exportation. Wool shipments from Montevideo during the coming season will be from 15 to 20 per cent. above those during the period from October 1, 1916, to September 30, 1917. According to unofficial figures Montevideo wool shipments for the 1916-17 season reached the total of 77,712 bales. The generally anticipated increase of 15 to 20 per cent. over this figure would give from 89,000 to 93,000 bales for the 1917-18 season. Wool shipments from Montevideo were as follows during the last three market and shipping years—from October 1 to September 30.

VENEZUELA.

Provisional President—Dr. Victorino Márquez Bustillos. (General Juan Vicente Gomez re-elected in May, 1916, but has not taken office.)

First Vice-President—Dr. R. Rojas Fernández.

Second Vice-President—Caracciolo Parra Picón.

THE CABINET.

Minister of Interior—Gral. Ignacio Andrade. *Minister of Foreign Affairs*—Dr. Bernardino Mosquera. *Minister of Finances*—Dr. Román Cárdenas. *Minister of Army and Navy*—Dr. C. Jiménez-Rebolledo. *Minister for the Promotion of Agriculture, Commerce, Mines, Post and Telegraph*—Dr. Gumersindo Torres. *Minister of Public Works*—Dr. Luis Velez. *Minister of Public Education*—Dr. R. González-Rinconcs.

Venezuela became free in 1830 and its present Constitution was adopted in 1914. The Senate consists of forty members, serving for three years each, and the Chamber of Deputies consists of one member for each 35,000 of inhabitants. The President serves seven years. Roman Catholic is the State religion, but others are tolerated. Education is free. The army is less than 20,000. In the mountains and on the high plateaus the climate is mild and equable. There is an abundant rainfall for most of the year and vegetation grows luxuriantly. The mountains and uplands are in the northern part close to the ocean. This country has the densest population of any part of Venezuela. On the llanos in the south and west, except in the cities and towns, there is a very scanty population. The heavy forest country of the south, bordering Brazil, is entirely uninhabited, except by aborigines.

There are 600 miles of railways. Most of the lines are privately owned, and run from the coast into the interior. Steamship lines connect the principal ports with the United States and Europe. The ports in the order of their importance are, for imports: La Guaira, Maracaibo, Puerto Cabello, Ciudad Bolivar, Carúpano, Caño Colorado and Puerto Sucre; and for exports: Maracaibo, Puerto Cabello, La Guaira, Ciudad Bolívar, Carúpano, Caño Colorado, and Puerto Sucre. La Guaira is the port of Caracas. Maracaibo is on Lake Maracaibo, and Ciudad Bolívar is on the Orinoco River. Mining, agriculture and stock raising have all made considerable advancement in Venezuela, but agriculture is at present the principal industry, and coffee and cacao the principal exports. Next in importance is the cattle industry. The principal forest industry is the gathering and shipment of rubber and balata (a variety of rubber). The mining industry is represented principally by asphalt and gold. There has been some development in oil production.

THE LEAGUE FOR NATIONAL UNITY.

Organized in Washington, D. C., October 8. Purposes: "To create a medium through which the loyal Americans of all classes, sections, creeds, and parties can give expression to the fundamental purpose of the United States to carry on to a successful conclusion this new war for the independence of America and the preservation of democratic institutions and the vindication of the basic principles of humanity."

The officers: *Honorary Chairmen*—His Eminence James Cardinal Gibbons, Frank Mason North, Federal Council of the Churches of Christ of America. *Chairman*—Theodore N. Vail, President American Telephone and Telegraph Company. *Vice-Chairmen*—Samuel Gompers, President American Federation of Labor; Charles A. Barrett, President Farmers' Educational and Co-operative Union in America; George Pope, President National Association of Manufacturers. *Director*—Ralph M. Easley, Chairman National Civic Federation. *Secretary*—D. L. Cease, editor Railway Trainmen's Journal. *Treasurer*—Otto H. Kahn, Kuhn, Loeb & Co.

Trading With Latin America.

(From a special publication on the subject issued in September, 1917, by the Irving National Bank of New York.)

IN order to appreciate the commercial possibilities of Latin America, a knowledge of fundamental conditions is essential. Trade can be developed effectively only with a thorough knowledge of the following facts:

(a) Physical conditions. (b) Exact location with relation to the United States and competitive nations, particularly distances between North American ports and those in Latin America. (c) Geographical and climatic conditions, altitudes etc., within the individual countries. (d) Conditions of the inhabitants, with special reference to per capita purchasing power. (f) Means of transportation to and within the republics, port conditions, etc. (g) Principal industries, manufactures, agricultural and mineral products, and exports. (h) Most efficient means of obtaining maximum volume of sales. (i) Tariffs in effect. (j) Laws concerning commerce, etc.

Business methods in Latin America are rooted deeply in tradition, custom, etc. The influence of economic laws resulting from certain political conditions materially affect the situation. To an extent which the American sometimes fails to realize, climate, geographical situation, and consequently transportation, exercise a marked influence. The effect of tariffs, the agricultural or mineral development, and the extent to which commerce has advanced are other features that must be considered. They will explain many unusual requests and orders. Latin America presents many startling contrasts. The state of mind or outlook of a merchant in a remote settlement in the interior is entirely different from that of an importer in a thriving city as highly developed as Buenos Ayres. The underlying principles for the conduct of business are the same in both cases, but their application is quite another matter. The culture, and even the civilization, of such dealers is distinctly different. A study of the trade conditions in Latin America will impress the American manufacturer with a grave defect in many manufacturing plants. This is their lack of versatility. In order to provide the units required by Latin American importers (including size, qualities, etc.) methods of production must be given greater flexibility. Manufacturing processes for domestic needs must be planned with relation to export requirements. The added flexibility will make more likely the winning of foreign markets. In many lines of manufacture, the principle of alloting a definite percentage of output for export, must be adopted. If this is not done, filling of orders becomes a matter of chance. Foreign trade cannot be won and held against competitors without service. The Latin American dealer must be convinced that he can depend upon the American manufacturer for deliveries. When this principle is established, the price frequently is a secondary consideration.

UNITED STATES GOVERNMENT AIDS BUSINESS MEN.

The Government, through its several Bureaus, aids American business men to increase their trade with foreign countries. The Bureau of Foreign and Domestic Commerce is not alone in this important work. The Department of State, through ambassadors, ministers, commercial attachés, consuls general, consuls, special agents and foreign trade advisers, extends useful service.

Foreign Trade Advisers—This Bureau is the commercial office of the Department of State. The foreign trade advisers bear a quasi-diplomatic relation to commerce. It is their function to take up with foreign embassies the subject of matters relating to trade. The Foreign Trade Advisers obtain information regarding the securing of concessions from foreign governments; assist in obtaining rebates for possible overcharges in foreign custom houses; aid in obtaining information regarding business affairs which require diplomatic co-operation; undertake consideration of commercial treaties and policies. They have much to do with analyzing the effect of legislation upon foreign commercial treaties and relations.

Commercial Attaches—These are appointed to foster trade development abroad. Their duties include the analysis of trade problems and other commercial questions. They also are expected to keep in constant touch with business developments in their districts, and to report on efforts being made by foreign nations to obtain trade there. The commercial attachés are attached to our embassies or legations, but work directly under the Department of Commerce and supervision of the Bureau of Foreign and Domestic Commerce.

Special Agents—These are selected to make special investigations regarding the possibilities of American trade in certain lines. They are chosen preferably because of their knowledge of conditions in the particular line of business which they are delegated to investigate. They usually confine their studies to certain countries. When necessary they buy samples of foreign goods which compete with American products. The results of their investigations are published in "The Special Agents' Series."

Samples—The Bureau of Foreign and Domestic Commerce has assembled a collection of foreign-made goods, which may be seen in the New York Custom House. Most of these have been forwarded by special agents or commercial attachés. Whenever possible (provided the articles are not too bulky), samples are sent to American manufacturers for their inspection.

Arbitration—Facilities for the arbitration of disputes which arise in trade between businessmen of Argentina and those in the United States now have been provided. Through an agreement between the Chamber of Commerce of the United States and the Bolsa de Comercio of Buenos Ayres, Argentina, disputes now may be referred to a joint committee of arbitration. This method affords an easy means of settling differences which may arise. Details may be had by addressing the Chamber of Commerce of the United States, Washington, D. C. This is an unofficial body.

International High Commission—This was a development of the Pan American Financial Congress which met in Washington, D. C., in May, 1915. The committees which were appointed to consider numerous important factors in connection with Latin American trade have submitted their reports. Legislation which is necessary to make effective their recommendations will greatly simplify commercial intercourse between the Republics of America.

American Consuls—In building trade with Latin American countries, manufacturers can count on the hearty co-operation of American consuls, as well as the agents of the Bureau of Foreign and Domestic Commerce. It will be found worth while frequently to consult with the agents of the Bureau in the branch offices If they are not easily accessible, inquiries should be addressed to the Bureau at Washington. In many cases information that may be desired already has been compiled for others, hence much needless correspondence can be avoided by acting on this suggestion.

Prepaid Postage—Great care should be taken to insure that letters are fully prepaid. If short paid, the fine for double the amount must be paid by the consul. When letters require direct answers, return postage should be inclosed. If this cannot be in the shape of the stamps of the country, an International Post Office Coupon (six cents) often may be used. Letters relating to trade matters are forwarded through the Department of State.

Consular Aid to Salesmen—The first visit that an American commercial representative abroad should make after arrival in a city is to the American consul. Although the consul may not be able to render concrete aid, it is more than likely that he can give some suggestions which may prove valuable. In the routine of consular business, information regarding the sale of goods may develop, and this likewise can be communicated to the representatives of American houses. Of extreme interest is the case with which an American salesman, who brings good letters to the consul, can gain entrée to the best society, and be introduced to the officials of commercial organizations. Such courtesies are invaluable.

Catalogues Sent Consuls—The indiscriminate sending of catalogues to American consuls should be

condemned very strongly. The effectiveness of catalogues sent to consuls is largely dependent upon the activity and attitude of the individual consul. Certain consuls are glad to distribute a reasonable number of catalogues. Catalogues thus sent invariably must be accompanied by price list and discount sheets, together with information regarding sales arrangements. They should be in the language of the country. In a contrary event, they are just so much waste paper.

Samples Sent to Consuls—Occasionally well meaning but not fully informed American manufacturers, without inquiry, send samples of their products to consular representatives. In doing so they neglect to provide for the duty, which in many countries is exacted even on small sample shipments. Such distribution of samples should not be made without obtaining, in advance, all the facts regarding this feature, and making provision for possible expenses.

Branch Offices of the Bureau of Foreign and Domestic Commerce—District offices: New York, 409 Custom House; Chicago, 504 Federal Building; Boston, 1801 Custom House; St. Louis, 402 Third National Bank Building; New Orleans, 1020 Hibernia Bank Building; San Francisco, 307 Custom House; Seattle, 848 Henry Building. Co-operative offices: Cleveland Chamber of Commerce; Philadelphia Chamber of Commerce; Cincinnati Chamber of Commerce; Los Angeles Chamber of Commerce; Southern Railway System, Chattanooga, South American agent; Portland (Ore.) Chamber of Commerce; Greater Dayton Association, Dayton; Southern Railway, Cincinnati, 96 Ingalls Building.

COMPOSITION OF THE POPULATIONS.

(For areas and population totals see index for "Countries of the World.")

Argentina: Chiefly Mestizos (descendants of Spanish native intermixture); foreigners, about 1,750,000, of which majority are Italians and Spanish. There are some Indians.

Bolivia: Mestizos, 550,000; whites, 250,000; Indians, 1,600,000; Wild Forest Indians, 130,000; balance miscellaneous.

Brazil: Whites, 8,000,000; mixed (whites, negroes, etc.), 8,000,000; negroes, 4,000,000; Indians, 2,500,000; balance miscellaneous.

Chile: Whites, 1,500,000; Mestizos, 2,100,000; Indians, 1,400,000.

Colombia: Whites, 700,000; Mestizos, 2,300,000; Indians, 800,000; negroes, 1,600,000; balance miscellaneous.

Costa Rica: Almost all whites; some Mestizos; negroes about 26,000; Indians, 5,000.

Cuba: Whites and Mestizos, 1,700,000; colored, 680,000

Ecuador: Mestizos and whites, 700,000; Indians, 700,000; miscellaneous, 100,000.

Guatemala: Mestizos and whites, 700,000; Indians, 1,300,000; balance miscellaneous.

Hayti: Almost entirely blacks; a small percentage of whites.

Honduras: Mestizos and whites, 392,000, Indians, 200,000.

Mexico: Whites, 3,000,000; Mestizos, 7,000,000; Indians, 5,000,000.

Nicaragua: Whites and Mestizos, 400,000; Indians, negroes, etc., 250,000.

Panama: Whites and Mestizos, 300,000; negroes, 30,000; miscellaneous, 57,000.

Paraguay: Mestizos and whites, 600,000; Indians, 200,000.

Peru: Whites, 900,000; Mestizos, 1,200,000; Indians, 3,000,000; miscellaneous, 400,000.

Salvador: Mestizos, 550,000; whites, 130,000; Indians, 570,000.

Santo Domingo: Chiefly Mestizos. Indian and negro blood largely represented.

Uruguay: Chiefly Mestizos and whites; good percentage of Europeans; Indians, 100,000.

Venezuela: Mestizos and whites, 2,000,000; Indians, 550,000; negroes (and mixtures), 200,000.

The term "Mestizos" means a mixture of races. Mestizos have resulted from the intermarriage of Spanish or Portuguese settlers with the natives. There are many degrees of purity. The complexion of Mestizos varies greatly—some being very swarthy or dark, while others are much lighter.

CLIMATIC CONDITIONS.

Hot Tropical Lowlands—These are found in a large part of Latin America. The islands of Cuba, Santo Domingo and Hayti naturally are in this category. They also comprise the coasts of Mexico on both the Atlantic and Pacific sides, likewise the republics of Central America. In South America they extend from Colombia to Argentina on the Atlantic, and from Panama to Ecuador on the Pacific. The width of the zone varies, but in a number of the countries the mountains begin not far from the coast.

Semi-Tropical Region—This is coexistent with the Tropical Zone and marks the beginning of the elevated regions. In some cases it results from elevation and in some from latitude, as the southern part of Chile.

Arid Region—This region includes a considerable part of Northwest Mexico and the long, narrow strip of the west coast of South America. It includes the Andes region of Ecuador, Peru, Chile and Bolivia.

Interior Swampy Region—This embraces a considerable part of Brazil, Peru, Bolivia. It is not generally inhabited and is marked by vast forest growths of a jungle nature.

Temperate Region—This characterizes the uplands of Mexico, Central America, the highlands of Colombia, Ecuador, Bolivia, Peru, Chile and Venezuela. The southern part of Brazil, all of Argentina, Paraguay and Uruguay also are included in the Temperate Zone.

Mountains and Rivers—These, together with plains and valleys, exercise a marked influence on geographical, consequently commercial, conditions. Chief among the mountains are the Sierra Madre ranges in Mexico and Central America, and the Andes Mountains in South America. Among the rivers may be mentioned the Amazon, Orinoco, Magdalena and La Plata. Still other factors are winds and ocean currents, notably on the west coast of South America. The interior of Argentina is typical of the plains.

AGRICULTURE.

In most of the countries agriculture is the chief source of wealth. This applies to those wholly tropical as well as to those lying in the temperate regions. Although modern methods have widely replaced more primitive ones, there still is a vast field for development. The use of the most economical implements, agricultural machinery, etc., creates an enormous opportunity for the American manufacturer. This applies to the methods used in cultivating both tropical and temperate products. Among the greatest sources of wealth in tropical agriculture are sugar, coffee, rubber, cacao, medicinal products, etc. Every product of the temperate zone, including the fruits, is known in Latin America.

CATTLE RAISING

This is one of the greatest sources of wealth in Latin America. The vast tracts of land suitable for grazing make South America one of the chief sources of the world's supply of meat, hides, skins, and animal products. Goats, sheep, hogs, etc., can be successfully raised. The fur and skins of wild animals will become an increasingly important article of export in a number of the countries. Packing plants, which require implements and tools, as well as miscellaneous supplies, afford growing opportunities for American manufactures.

MINING.

Mining has been one of the most important industries of the Latin America republics since its earliest days. Although enormous amounts of silver, gold, copper, tin, zinc, and other metals have been removed from the mines the outlook for the future is even brighter than in the past. Mining operations require quantities of machinery, tools, etc. In addition, the building of railways and the construction of other means of transportation will be greatly influenced; this development will necessitate many articles of American manufacture.

FOREIGN INFLUENCES.

In certain of the countries foreign influence is very marked. This is especially true of Argentina, Brazil and Chile, in which the investments of English capital are exceedingly heavy. In all of these countries other European nations have made great efforts to win trade, and many enterprises are dominated by their nationals. A peculiarity of this situation is that certain lines of commerce are largely in the hands of merchants of certain nationalities. Thus railways are largely operated by British, the dry goods business is largely French, the hardware trade chiefly German, the grocery and liquor lines Italian and Spanish. Practically all of these merchants are greatly aided by the establishment of banks, conducted by their own countrymen, who naturally favor all enterprises in which their nationals are concerned.

EXPORTS AND IMPORTS.

The total commerce between the United States and Latin America in the calendar year of 1916 reached the unprecedented sum of $1,260,793,000, as against $921,025,000 in the previous year. This was a gain of approximately 36%. Exports from the United States to Latin America during 1916 reached $484,000,000, as compared with $317,644,000 in 1915, or an increase of about 52%. Imports amounted to $776,402,000, as against $603,381,000, a gain of $173,000,000, or 28%. These figures are an index to the possibilities of Latin American commerce. The following table shows for the three years, 1913, 1914, 1915, the imports of Latin America from the United States, United Kingdom, Germany and France:

	Total imports.	United States.	United Kingdom.	Germany.	France.
1913	$1,321,861,199	$330,915,267	$322,757,575	$218,827,871	$109,954,670
Per cent	100	25.03	24.42	16.55	8.32
1914	811,268,634	253,643,183	217,189,333	132,707,139	60,344,865
Per cent	100	27.94	23.92	14.62	6.64
1915	907,841,133	339,285,239	170,623,161	14,930,490	38,195,899
Per cent	100	41.82	21.03	1.84	4.71

For the same period the exports of Latin America were as follows:

	Total exports.	United States.	United Kingdom.	Germany.	France.
1913	$1,552,750,952	$477,939,264	$329,803,547	$192,204,270	$124,137,411
Per cent	100	30.78	21.24	12.38	7.99
1914	1,275,312,612	487,166,328	284,634,459	111,524,475	81,706,281
Per cent	100	38.20	22.32	8.75	6.41
1915	1,657,778,386	639,580,447	372,542,445	531,663	109,420,693
Per cent	100	38.65	22.46	0.03	6.60

BANKING AND FINANCE.

The chief standard is gold, which is in use in ten of the countries. These are Uruguay, Nicaragua, Costa Rica, Hayti, Bolivia, Santo Domingo, Cuba, Peru, Ecuador and Venezuela. There is another gold standard of modified form called the "gold exchange," which has been adopted by Brazil, Panama, and Argentina. Honduras and Salvador have the silver standard. The countries in which occur the greatest fluctuations are Guatemala, Colombia, Paraguay, and Chile. In these the currency is most unstable. The United States Government issues quarterly tables of units of value in the Latin American countries. While exchange naturally varies materially, the establishment of dollar exchange has enabled the Latin American merchants to make definite calculations for payments of their purchases in the United States. Native capital is represented in almost all the financial institutions of Latin America. However, there has not been enough money to take care of the actual requirements of commerce. Crops require financing; this is especially the case in the great coffee producing regions, and is felt in lesser degree throughout the agricultural districts in general. Money is high—interest rates running from 8% up, and 12% is not uncommon. Banks, as a rule, have paid good dividends, and although they have been quite liberal in credits, generally have been prosperous. Merchants in most places have arranged with banks for a certain credit to be extended to them. Against this credit they are permitted to draw. The co-operation characteristic of American banking circles is lacking and competition is keen. Business men often have opened accounts in several banks and in this manner obtained large lines. Checks are not as common as in the United States, and actual money is employed to a far greater degree than in North America. The possibility of good profits has served to attract foreign capital to every republic of Latin America. This capital has had a vital effect on the banking situation.

European nations long since recognized that the extension of foreign trade was largely dependent upon the export of capital. This movement began in the early 1800s, and the Latin American countries were recognized as particularly desirable fields. Since 1870 English capital in particular has poured into South America. The investments were used principally for railway construction, development of agricultural resources, the building of public works, such as wharves, docks, etc., and the creation of banks Other European nations closely followed the British. To-day foreign capital includes investments made by Germans, French, Spanish, Italian, Belgian, Dutch, Austrian, and Portuguese interests. Latterly the Japanese have been getting a foothold, particularly in Brazil. As an indication of the extent of European investments in the southern republics may be cited the following figures. They represent an estimate of the investment of British capital in all Latin American countries up to the end of 1913 (South American Journal, London, January 7, 1917).

Argentina	$1,788,703,305	Colombia	$33,270,470
Brazil	1,119,476,375	Honduras	15,716,000
Mexico	807,621,945	Paraguay	14,978,650
Chile	319,691,185	Ecuador	13,904,870
Uruguay	230,726,965	Salvador	11,123,500
Cuba	222,223,090	Nicaragua	6,195,500
Peru	128,291,400	Bolivia	2,089,600
Guatemala	52,226,100	Shipping	76,811,150
Venezuela	39,750,045	Banks	92,572,685
Costa Rica	33,300,300		
		Total	$5,008,673,135

In order to make possible the issuance of bills of exchange on the United States which might be sold to advantage by the merchants of other countries, it was necessary to suply a market for such bills on the same basis as sterling exchange in London. This was accomplished by the passage of the Federal Reserve Act, which permitted American banks to establish branches in Latin American countries and also permitted the rediscount by the banks of acceptances covering the shipment of merchandise to and from the Latin American republics, as well as other foreign markets. As a result of this legislation the dollar has been definitely established in international banking. Another result has been the elimination of double commission, which has had to be paid in the case of bills drawn on London for account of American banks.

CREDIT CONDITIONS.

In Latin America credit conditions differ materially from those prevailing in the United States. Generally speaking, capital is insufficient for the needs of commercial interests and the developmen of natural resources. Merchants in many places are compelled to extend credit to planters, and as agriculture is one of the chief resources, the dealers have to make heavy outlays before they can realize thereon. Another marked difference is the necessity for investing heavily in freight and duty before the merchandise can be put on sale. In some countries the duty, assessed on ad valorem basis, averages as much as 50 or 60 per cent. of the cost of the merchandise. These factors naturally make it desirable for the merchants to obtain al the time possible, hence their desire for long credits. The general character of credit risks is good. Latin Americans of the best class have a high regard for their credit, and expect to meet their obligations. Unfortunately, in many cases, because of the monetary system, exchange fluctuates greatly, and merchants who otherwise might meet their bills and acceptances promptly, delay their settlements in order to minimize the losses which would result from payment on days when exchange would be particularly disadvantageous. There is complaint in some quarters (from export commission houses in particular) that some of the Latin American dealers unnecessarily abuse their correspondents in the matter of non-payment of accepted drafts. This, like other abuses, must be guarded against.

Reports relative to Latin American houses may be obtained from practically the same sources as those in the United States. They are as follows: (a) American banks having correspondents in Latin America; (b) foreign or American houses, whose names are given as reference, or noted by the salesman; (c) mercantile agencies; (d) foreign banks with whom Latin Americans have filed their references; (e) banks or financial institutions in the Latin American country where orders originate; (f) home office of American bank with branch in Latin America; (g) business organizations, such as the Philadelphia Commercial Museum, the American Manufacturers' Export Association, the National Association of Manufacturers; (h) exchange service conducted by the National Association of Credit Men, and other bodies; (i) express companies with foreign departments; (j) foreign trade papers, journals, etc.

THE LATIN AMERICAN TYPE.

The Latin Americans should have special consideration in view of the fact that they form a very large part of the population. They are white and of the "Mestizo" type, which is mixed Spanish and Indian blood. In some of the countries, notably Brazil, there are a good many mulattoes, a mixture of black and white. In almost all of the countries the largest part of the population is Indian. Merchants are developed from all these classes, but from the "Mestizo" come large buyers. Latin American traits naturally vary, but they safely may be generalized as follows: Exceedingly hospitable to those who are well introduced; very polite, not only in social, but in business intercourse; punctilious to a degree. The North American should note particularly their regard for politeness and should not handicap himself by ignoring it. In the main they are interested in modern methods and are anxious to avail themselves of new ideas. With this characteristic they combine a certain spirit of conservatism which must be recognized.

LEGAL FORMALITIES.

When opening offices in Latin America the matter of registration of business houses, agencies, etc., must be carefully looked after. The transaction of business is considered illegal unless conducted in a certain prescribed form. These details are not onerous and the American Consul can give the necessary information as to how to begin business properly. In this connection the necessity for the frequent use of Government stamped paper should be remembered. Latin American governments make a strong point of this feature and there usually is little difficulty in ascertaining just how and when it must be employed.

Legal proceedings should be avoided at almost any cost. "Keep out of the courts" in the Latin American countries is advised by all authorities. The court costs are expensive and the procedure usually is so prolonged that it is often best to compromise at a loss rather than to engage in protracted legal action.

COMMERCIAL CONDITIONS IN CENTRAL AMERICA.

This group includes the republics of Guatemala, Honduras, Salvador, Nicaragua, Costa Rica and Panama. These countries lie immediately southeast of Mexico and offer a promising field for American commercial development. In the main, they are mountainous, but practically every kind of climate is represented. The needs of the people must be considered in relation to climate. The trade fields in the republics of Honduras and Nicaragua are sharply divided by the mountains in the interior. There is practically no communication except by horse or muleback between the interior and the Atlantic Coast. This must be considered in granting agencies, as the cities on the east coast cannot be canvassed successfully from other parts of the republic. Certain products may require local agencies in each of the countries. In that event the respective capitals may be chosen. Some manufacturers prefer to grant agencies to men in Panama who make periodical trips to the other countries. San José, Costa Rica, or Guatemala are the locations of houses which operate throughout Central America. Less frequently the other capitals are selected.

The coast cities of Honduras and Nicaragua should be visited from New Orleans. Close proximity to this southern port of the United States gives the merchants of that city certain advantages. The other countries are canvassed by salesmen who travel either north or south along the Pacific Coast. They usually are expected to visit at least the following towns: In Panama (Atlantic Coast) Bocas del Toro, Colon and Panama; Nicaragua, Corinto, Leon, Managua, Granada; Salvador, Sonsonate and San Salvador. In Honduras, Amapala and Tegucigalpa; in Guatemala, Guatemala City and Quezaltenango. If the traveller has time, there are other important commercial cities whose volume of business is not so large which may be visited to advantage. The most comfortable time in which to travel is the dry season, which, roughly speaking, extends from November to April. Many firms find it advisable to visit the more important towns twice a year in order to obtain the business for Christmas and Easter supplies Agricultural products contribute greatly to the wealth of these republics. The chief product is coffee. Second in importance is the banana. The latter is responsible for much of the wealth of the republics of Honduras, Costa Rica, Panama and Guatemala. The growth of cacao is assuming constantly increasing importance. Other agricultural products are grown and are being developed. Sugar and indigo are produced. Cattle raising is growing in importance and many hides and skins are exported.

Gold and silver are found in the republics of Salvador, Nicaragua, Honduras and Costa Rica. In the others traces of these metals have been found, but mining has not assumed the importance which it enjoys in the republics mentioned, where the operations of mining companies contribute greatly to the national wealth. The inhabitants of Central America are chiefly Mestizos and Indians. The latter make up the largest portion of the population in the republics of Guatemala, Salvador, Nicaragua and Honduras. In Costa Rica the population is almost entirely Mestizos, the percentage of pure Indian blood being very small. In Panama and on the east coast of Nicaragua and Honduras there is very large representation of negro blood. This is due to the employment of negroes in the cultivation of the banana. Europeans and other foreigners are found in all the republics, but not in large numbers.

Because of the large Indian population of Guatemala, the imports of that republic are very much less than in Costa Rica. The character of the purchases also differ greatly. Costa Rica can consume many products which are not salable except in limited quantities in Honduras, Nicaragua and Guatemala. The regulations for assessment of customs duties on samples vary materially. Generally speaking, bond may be given for the withdrawal of the samples within a stated length of time. In many lines the markets are dominated by the United States. The European war created a market for American products which heretofore had been supplied by Europe. Practically every kind of article can be sold to a greater or lesser degree, and the sale is dependent upon the per capita wealth and buying power of the various republics.

THE WEST INDIAN ISLANDS: CUBA, SANTO DOMINGO, HAYTI.

Cuba is far more highly developed than either Santo Domingo or Hayti. Their climates, in the main, are very similar. In Cuba, Havana is generally selected as the city from which all points in the island are canvassed. It is in easy communication with all the rest of the republic. At the extreme other end, Santiago occasionally may be useful, particularly where business is highly developed. In Hayti, Port au Prince, the most important centre, is chosen usually. In the main, the business of the republic may easily be looked after from this point. In Santo Domingo, the city of San Domingo may be selected. Santiago or Puerto Plata also are chosen by certain manufacturers. Havana is easily accessible from the Gulf ports, as well as from New York.

Santo Domingo can be approached from New York, while there now is a steamship line which supplies service between the island and Porto Rico. In Cuba a salesman practically may choose his own route. In Hayti and Santo Domingo this is influenced largely by the irregular sailing dates of steamship lines. Here the cost of travelling is high. The traveller must decide after visiting the capitals of Hayti and Santo Domingo whether it will pay him to visit other places as well. As in the case of Cuba, the Winter is the most desirable time for travel. While the heat in the Summer is great, it is not as oppressive as the heat in the Northern United States. As far as business is concerned, this is influenced largely by the crops. While sugar is being ground, merchants usually are busy and aim to have well assorted stocks for that period. They also desire to provide themselves with good assortments for their Easter business and for the Christmas holidays. Travellers must arrange their trips in order to obtain the business sufficiently far in advance in order to insure shipments to meet these conditions. The chief sources of wealth in all of these republics are agricultural. Cuba depends chiefly on sugar and tobacco, although the raising of fruits is growing in importance. In Santo Domingo and Hayti a considerable portion of the products is made up of tobacco, cacao, cotton, etc. Other items of export are iron and copper ore, hardwoods, hides and skins, sponges, beeswax, logwood, etc.

The inhabitants of these islands vary. In Cuba a very considerable portion of the population is colored, mulattos and blacks. The whites, however, are greatly in the majority. In Hayti almost all the people are negroes, the percentage of foreigners being very small. In Santo Domingo there is a very large population that is of Spanish descent, and a smaller portion of African and Indian blood. In the latter country are many Syrian merchants. Cuba is the largest buyer of American goods among the Latin American countries. The poorer classes of Santo Domingo and Hayti are not able to purchase in the same proportion as the better paid Cubans. Cuba is an excellent, although highly competitive market for all kinds of goods. The regulations regarding customs duties should be studied before the salesman takes his departure. In the case of Cuba, the regulations are particularly strict, it being necessary to advance the value of the duty on samples. If exported within a certain period, the money is returned. In the other countries bond may be given. These republics afford an excellent market for many lines of manufacture. Cuba can consume practically everything either of a staple or novelty nature. Santo Domingo and Hayti offer less desirable markets, but the staples for the common people make up an important share of the imports. The improving economic condition of the inhabitants of Santo Domingo will make that a better field for American manufacturers.

CHILE, PERU AND BOLIVIA.

This group of republics lies in the western part of South America. They have much in common and fundamental trade conditions as well as the physical characteristics are fairly similar in each of the countries (especially in Peru and Bolivia). The climates represented cover a wide range, due principally to the great differences in altitude and to proximity to the equator. The length of Chile is so great that all climatic conditions are known. Valparaiso and Santiago usually are considered together, being so near to each other. Many firms maintain houses in both cities. Agents are established in either place, but a good many find it desirable to locate in the port (Valparaiso) from which they easily can work north or south. For highly specialized lines requiring more than one central agency, Valdavia, in the south, and Iquique, in the north, are both important. In Peru the chief port is Callao, but agencies generally are located in Lima, which is but a few miles distant. The eastern half of Peru is extremely tropical and the port Iquitos must be approached from the Atlantic. Because of the magnificent distances in Peru, the respective claims of other centres also must be considered, particularly Arequipa, which is important commercially. Other cities are Trujillo and Cuzco. Bolivia, with its capital, La Paz, also must be given special consideration. A central agency may be established in La Paz, but because of the expense of travelling, the business conditions and outlook in other parts of the country must be seriously studied. Oruro is a headquarters for many important houses.

The traveller may approach these republics from the north or the south. It is a disputed point whether the cities of Bolivia should be visited first by way of the Peruvian port of Mollendo, or by way of Antofagasta. The traveller should decide this point after a serious study of all phases of the matter before leaving the United States. Attention also should be paid to the other important cities en route. Bolivia has a fairly marked temperate climate, the seasons being the reverse of those of the United States. The various sections of Chile must be studied separately because of their very great length. The variation in rainfall also is marked, there being practically none in the north, and a superabundance in the south. In Peru the conditions are similar to those in Bolivia. From a business standpoint, in the case of seasonal lines, visits must be calculated so as to insure sufficient time for the execution of orders and for the arrival of merchandise before the Winter and Spring holidays.

The resources of these three republics are numerous. Chile's chief dependence is upon nitrates, but there are important copper mines and other metals are found. In Peru, the copper mines have been particularly productive, but gold and silver also are mined. Bolivia is world famous for its tin, silver and copper. Agriculture also is varied, practically all crops of the temperate as well as tropical zone being produced. Peru is especially famous for sugar and cotton. Rubber also is shipped from the Amazon region. Copper, panama hats, wool, etc., are other exports. In Chile are found all the grains, while in Bolivia, particularly in the Amazon region many medicinal plants as well as rubber are found. Cattle raising is extensively carried on, and in all of the republics there are tracts particularly adapted to grazing. Fruits also are raised, particularly in the altitudes for which they are especially adapted. Coffee, likewise, is produced. Neither Peru nor Bolivia are especially adapted to manufacturing. In Chile there has been a marked development in the manufacturing industries and there are numerous factories, mills, tanneries, etc. The government is particularly interested in developing business in this line.

These republics constitute a fine and growing market for American products of many kinds. The per capita wealth and importations vary, but an increasing p rcentage of the people, especially in Chile, are able to buy many things which heretofore were not available. In Chile particularly there is a demand for appliances and accessories in the machinery line, while in all three republics the demand for mining machinery, etc., is increasing. The inhabitants of Chile, Peru and Bolivia differ somewhat. There is a greater similarity between those of Bolivia and Peru than with those of Chile. There are many hundreds of thousands of Indians, but out of a total population of 2,300,000 not more than 750,000 are of the upper class. In Chile the difference in the various classes is less marked than perhaps in any of the other republics. The people are chiefly the development of European intermixture with natives, but greater opportunities having been given the latter than in some republics, their condition is more advanced. In Peru the percentage of the really white inhabitants is quite small, while the Mestizos form the next largest class, and the Indians the largest of all.

TRADING WITH LATIN AMERICA—*Continued*

VENEZUELA, COLOMBIA, ECUADOR.

This group of republics lies in the northern part of South America. They have many features in common; their climates, physical charact ristics, and general commercial position resemble each other very closely. One of the chief ports of Colombia is Cartagena. This is an important commercial centre, but not quite so important as Barranquilla, which lies about sixteen miles from the Atlantic on the River Magdalena. For the Atlantic Coast region, an agency may be established in Barranquilla, as firms there also frequently canvass the interior. The capital is Bogota, which likewise is important, being about a week's journey up the river and over the mountains. The Cauca Valley is very important, and Medillin often is selected for another agency.

The chief port of Venezuela is La Guayra, and the city of Caracas, the capital, usually offers the most promising place for an agency. Maracaibo likewise may be suggested because of its importance in the western region of Venezuela. In Ecuador, Guayaquil is the chief port and business point. It is here that agencies most frequently are established and the country is canvassed from this place. The City of Quito, about three hundred and twenty-five mile inland, also offers certain advantages. At scattered points there are other good places to work. The uplands of these republics are pleasant or cold all the time. The most enjoyable time at which to visit the other regions is from December to April. Consideration also should be given to the commercial requirements for the arrival of merchandise at the proper moment for sale, which is after harvest. In all three republics the chief dependence is placed upon agriculture. Because of the wide range of climates and altitudes, the variety is a very large one. In the case of all three republics, coffee and cacao are the most important items, but rubber, tobacco, ivory, nuts, and in Colombia, bananas, also are important items. Cattle raising offers particular advantages and there is a good business in the shipment of hides and other animal products. The mineral wealth contributes materially to the income of Colombia, and gold has been taken from the republic for many years. There are other minerals besides, and the resources in this respect are still in their infancy as regards development.

In none of these countries has manufacturing assumed an important aspect. There are innumerable small plants to supply local needs, but manufacturing is not done on a very extensive scale. It is believed that the next few years will see the growth of small factories. The inhabitants of the three northern States mainly are Mestizos and Indians. In Ecuador the percentage of Indians is particularly large. In both Colombia and Venezuela there is a larg number of negroes. The traveller whose territory covers these countries usually comes by way of Venezuela, visiting successively the port of La Guayra, then Caracas, then Maracaibo; later the ports of Colombia are considered, and thence the trip to the interior to Bogota. Frequently, travellers who do not object to hard travelling continue on to the Pacific Coast leaving by the port of Buenaventura, then Guayaquil, in Ecuador, and to the capital, Quito.

ARGENTINA, BRAZIL, PARAGUAY AND URUGUAY.

In no other group of countries in Latin Amer ca is it so important to consider the proper division of territory. The distances, as a rule, are great. In the case of Brazil, three weeks sometimes are required for the delivery of mail from one part to another. The difference between North and South Brazil is marked, consequently the northern cities should not be included in the same territory as the southern. Naturally, Rio de Janeiro is of greatest importance. In the north, an important city is Para, in which an agency also may be established, likewise in Bahia. Besides these there are other important points, including Sao Paulo, which, next to Rio, is the largest city in Brazil. Santos, the great coffee port, also is entitled to recognition.

In Argentina agencies generally are established in Buenos Ayres, and other parts of the republic are canvassed from that place. The important cities of Tucuman and Mendoza, in the west and northwest, have to be considered as distributing points, as do also Cordova, Rosario (for the northern part), and Bahia Blanca (for the southern and southwestern parts). Some American houses have found it advantageous to conduct their business in Uruguay and Paraguay from Buenos Ayres, but in the case of Paraguay, the city of Asuncion may be made the general point of distribution. In Uruguay, there, of course, is Montevideo, which for general purposes also may be used. There are certain other cities, but an intensive study of the trade situation on the ground would be necessary in their consideration.

It generally is the custom for travellers who are given these countries of South America to work, to begin in Northern Brazil, visiting successively Para, Bahia, Pernambuco, and then Rio. From this point trips are made to the more important inland cities. Thence the journey is continued to Buenos Ayres, and again trips must be made to the interior, depending upon the plans of the traveller. Montevedio, in Uruguay, or Asuncion, in Paraguay, are next in order, and may be successively canvassed. It is only a night's ride from Buenos Ayres to Montevedio. Generally speaking, it is more agreeable to travel in the tropical part of Brazil in the months corresponding to our Summer. In Argentina the climate differences are less marked, as is also the case in the other republics. The needs of the particular trade or industry should be studied in order to determine the most strategic time at which to arr ve.

In the case of Brazil, coffee is of the first importance, rubber second. Other products are known and are coming into greater importance as items of export, including medicinal plants, cacao, cotton, etc. In Argentina the chief products are cereals, and the business of second importance is meat packing and cattle raising; the plains of the Argentine lend themselves peculiarly to this industry. Manufacturing plants are growing in number, both in the Argentine and in Brazil. In Uruguay the cat le industry and agriculture are the chief sources of wealth. Hides, skins, tallow, etc., are exported. Paraguay has a number of semi-tropical products, such as Paraguay tea or mate, hardwoods, quebracho extract, oranges, etc. The raising of wheat and cattle growing also are of importance.

There is no mining in Paraguay and very little in Uruguay. Brazil, however, has important diamond fields, while other deposits of minerals are known to exist, including iron, coal and manganese, which are receiving attention. In Argentina, mining has assumed no importance, but a marked development may be expected in both of these countries.

Inhabitants—There is quite a difference in the character of the people in these various republics. In Brazil there is a very important colored strain, the color line not being sharply drawn. In Argentina the European nations have contributed materially to the population, particularly Italians and Spaniards. There is a very considerable Mestizo population which is largely of the better classes. Uruguay likewise has a large Mestizo population, although there is a considerable admixture of Europeans, especially Italians and Spaniards. In Paraguay the people are mixed, and the number of Indians is large.

Per Capita Imports—In two of these countries the percentage of imports in relation to the population is rather large, especially Argentina, of about $47.00, and Uruguay, $42.00. Paraguay is less, being about $10.00, and in Brazil, about $13.50.

Goods in Demand—The wealthy classes of these republics can afford to buy all luxuries, as well as the more staple products. Generally speaking, almost anything that can be exported finds a market in one or another of the regions of these republics.

ARGENTINE EXPORTS FOR THE FIRST EIGHT MONTHS OF 1917.

(Consul General W. Henry Robertson, Buenos Ayres.)

DUE principally to the lack of shipping space, the exports during the first eight months of this year were considerably smaller than for the same period last year with the exception of quebracho logs, butter, sheepskins, horsehides, wool, tallow, and frozen beef. The comparative figures are as follows:

ARTICLES.	JANUARY-AUGUST— 1917.	JANUARY-AUGUST— 1916.	ARTICLES.	JANUARY-AUGUST— 1917.	JANUARY-AUGUST— 1916.

PARAGUAY TRADE FOR FIRST SIX MONTHS OF 1917.

According to the Direccion General de Estadistica of the Paraguayan Government, the total value of imports and exports of Paraguay, by countries, in gold pesos of $0.965 American currency, for the six months ended June 30, 1917, is as follows, compared with the corresponding period of 1916:

COUNTRY.	IMPORTS FROM Jan.-June, 1916.	IMPORTS FROM Jan.-June, 1917.	EXPORTS TO Jan.-June, 1916.	EXPORTS TO Jan.-June, 1917.
Argentina	$738,201	$926,576	$1,756,772	$2,507,570
Brazil	8,135	99,461	5,265	1,926
France	31,268	43,125	49,878	78,394
Germany	39,015	16,532	.....	.....
Great Britain	835,107	821,052	28,033	16,357
Holland	9,545	6,545	55,945	1,440
Italy	103,428	25,571	34,193	39,095
Spain	59,381	169,406	72,761	215,002
United States	267,384	529,816	111,885	136,481
Uruguay	19,863	19,747	108,472	268,253
Other countries	14,940	34,419	456	847
Total	$2,126,267	$2,730,573	$2,123,760	$3,265,365

The values herein given are based on the fixed valuations specified in the Paraguayan tariff of 1909, so that the actual values of imports and exports are 50 per cent. greater than those indicated in the tables. The imports from the United States for the six months of 1917 practically doubled in value compared with the corresponding period in 1916. A considerable portion of the goods imported from Argentina are not products of that country, but are from other countries, and a large part of the exports to Argentina, particularly hides, meats, and tanning extracts, are merely exported through Buenos Ayres agents to other countries.

EXPORTS OF AMERICAN-MADE DYESTUFFS.

(By the Department of Commerce.)

OF all the industries created or developed as a direct result of war conditions, none has shown more rapid progress than American dyestuffs. From only seven establishments, in which 528 people were engaged in producing 6,619,729 pounds of coal-tar colors, valued at $1,126,699 in 1914, the industry has developed until now it not only supplies the domestic demand for colors but has even invaded the foreign market in European neutral and allied countries—Canada, Mexico, Argentina, Brazil, British India, and Japan.

* Figures cover period from January 1, to June 30, 1917 † July only

It is understood in the trade that plans are under way for entering foreign markets on a large scale

ARGENTINA'S FOREIGN TRADE FOR FIRST HALF OF 1917.

Figures of the foreign trade of Argentina for the first six months of 1917, compiled by the Direccion General de Estadistica de la Nacion show the exports for the first half of 1917 amounted to $305,272,013, as compared with $246,057,367 for the corresponding period of 1916; and the imports were $88,836,152 and $104,966,451 for the same periods.

The following table shows the value of the exports and imports, all amounts being given in Argentine gold pesos equivalent to $0.964 American currency:

Countries.	Imports from.		Exports to.	
	Jan.-June, 1916.	Jan.-June, 1917.	Jan.-June, 1916.	Jan.-June, 1917.

During the fiscal year 1914, the last year before the war, the United States bought 63,800,000 pounds of cheese from Europe. The average monthly imports were about 5,300,000 pounds. In August of this year exactly 99 pounds of European cheese was imported. It came from Italy. Argentina has turned to cheesemaking on a large scale and is now placing important quantities in the United States.

ENGLAND'S MACHINERY TRADE IN 1917.

Imports of iron, steel, machinery, hardware, etc., into the United Kingdom for the first nine months of 1917, compared with the amounts for the corresponding period in the preceding year, were:

CLASSING COTTON FOR MARKET.

(By the United States Department of Agriculture.)

To learn to classify all the grades and qualities of cotton requires years of experience, but the grower need not know them all. If he learns to recognize three grades—low middling, middling, and good middling—he will be able to deal with most of the white cotton grown in the average season. By practising with a full set of types or official standards for comparison, copies of which are furnished at a small charge by the United States Department of Agriculture, a knowledge of the other grades may be obtained gradually. Four qualities should determine the value of cotton fibre: (1) Grade, (2) color (3) length, and (4) character. With the re-enactment of the United States cotton futures act, August 11, 1916, the following grades for cotton were repromulgated: (1) Middling fair, (2) strict good middling, (3) good middling, (4) strict middling, (5) middling, (6) strict low middling, (7) low middling, (8) strict good ordinary, (9) good ordinary. This range of grades covers practically all white cotton grown in an average season. Middling, as the name indicates, is the middle or basic grade, and is the grade upon which the market quotations are based.

All grades above middling should bring a higher price and all below should bring a lower price than that quoted for middling, the amount above or below varying according to the commercial differences in use where the cotton is marketed. When cotton is not white its nature or class is customarily indicated by modifying terms. At some markets there may be several classes of the same grade of cotton, that is, middling off color, middling spotted, middling yellow tinged or middling yellow, or middling blue stained. The grade of cotton is determined by three factors: (1) Foreign matter or impurities, such as leaf, dust, sand, motes and cut seed; (2) color and (3) quality of the ginning. The color standards re-established and promulgated immediately after the enactment of the cotton futures act, August, 1916, are as follows:

Yellow tinged cotton of the grade of low middling.

Yellow tinged cotton of the grade of strict low middling.

Yellow tinged cotton of the grade of middling.

Yellow tinged cotton of the grade of strict middling.

Yellow tinged cotton of the grade of good middling.

Yellow stained cotton of the grade of middling.

Yellow stained cotton of the grade of strict middling.

Yellow stained cotton of the grade of good middling.

Blue stained cotton of the grade of middling.

Blue stained cotton of the grade of strict middling.

Blue stained cotton of the grade of good middling.

CLASSING COTTON FOR MARKET—*Continued.*

It is estimated that on an average about one-fifth of the American cotton crop falls within these standards for color. The economic advantage of uniform standards for handling these classes of cotton is therefore obvious. Factors that influence the color of cotton are weather, insects, and soil. Long-staple cotton, with the exception of sea island and Egyptian, is classed according to grade in practically the same way as short-staple cotton. There is a greater difference of opinion concerning the length of staple than there is concerning grade. Experts vary considerably in their estimates of the length of the same sample of cotton, sometimes from one-eighth to three-sixteenths of an inch in the longer lengths. This is often due, no doubt, to the fact that they do not "pull" the staple in the same way. A rule used for measuring the drawn sample, therefore, is not always a sure index of the length, for one classer may discard more long or short fibres than another. If, however, all branches of the trade had the same type or standard sample of cotton for 1 inch, 1⅛ inches, 1¼ inches, and so on, cotton could be compared with the standard, both being pulled in the same way, and doubtless a greater uniformity could be established.

In addition to grade, color, and length of staple, the value of any cotton for spinning purposes is influenced very largely by its character, which means the strength, body, drag, and uniformity of staple, all of which may be noted when the cotton is "stapled." These characteristics vary in cotton from year to year, owing to the season, soil, fertilizer used, and variety of seed planted. It has not been found advisable, therefore, to attempt to maintain uniform standards covering these variable qualities in the staple of cotton.

DAUGHTERS OF THE CINCINNATI.

President—Miss Julia Chester Wells. *Vice-President*—Miss Laura Sylvina Heilner. *Secretary*—Miss Helen Richards, 13 West 31st Street, N. Y. City. *Treasurer*—Miss Annie Clarkson. Incorporated in 1894. The objects are "to renew, foster and develop among its members the friendships formed and cemented amid the trying ordeals of the War of the Revolution, in the camp, and on the battlefield by their ancestors; to advance and encourage investigation and study of the history of the Revolution, its causes and results; to cherish the memory and record the deeds of the noble women who encouraged and assisted the patriot cause; to commemorate by celebrations and tablets the achievements of our ancestors in the Revolution, and to gather and carefully preserve documents and relics relating to the Revolutionary period."

The great work of the society is the education of a daughter of a Naval or Army officer, with a view to self-support in Teachers' College.

YOUNG MEN'S CHRISTIAN ASSOCIATION OF THE CITY OF NEW YORK.

General offices, 215 West Twenty-third Street, New York City. Officers: *President*—Wm. Fellowes Morgan. *Treasurer*—Samuel Sloan. *General Secretary*—Walter T. Diack. *Comptroller*—Henry M. Orne. The association maintains a work for men and boys at thirty-two points in Manhattan and the Bronx; 11 city branches, 10 student, 5 railroad and 6 army branches.

Branches of the Association—1. Twenty-third Street, 215 West Twenty-third Street; 2. West Side, 318 West Fifty-seventh Street; 3. Harlem, 5 West One hundred and Twenty-fifth Street; 4. East Side, 153 East Eighty-sixth Street; 5. Young Men's Institute, 222 Bowery, near Prince Street; 6. Washington Heights, 531 West One Hundred and Fifty-fifth Street, near Broadway; 7. Bronx Union, 470 East One Hundred and Sixty-first Street, corner Washington Avenue; 8. Williamsbridge, 640 East Two Hundred and Sixteenth Street, corner Willett Avenue; 9. Intercollegiate, 2929 Broadway, 129 Lexington Avenue, etc.; 10. French, 109 West Fifty-fourth Street; 11. Army, Forts Jay, Wadsworth, Wood, Slocum and Schuyler, office, 215 West Twenty-third Street; 12. Colored Men's, 252 West Fifty-third Street and uptown office of the Secretary, 135 West One Hundred and Thirty-fifth Street; 13 Bowery, 8 East Third Street, near the Bowery; 14. Railroad, N. Y. C. and N. H. lines, 309 Park Avenue, corner Forty-ninth Street West Seventy-second Street and North River, Mott Haven, 355 East One Hundred and Fiftieth Street, New Durham, N. J., R. R. Men's Building; 15. Railroad, Pennsylvania Railroad, Eighth Avenue and Thirty-second Street.

College Associations affiliated with the Intercollegiate Branch—Club Houses, 129 Lexington Avenue, 346 West Fifty-seventh Street; office, 2929 Broadway. 1. Columbia University; 2. College of Physicians and Surgeons; 3. College of the City of New York; 4. Cornell University Medical College; 5. New York Homoeopathic Medical College; 6. Union Theological Seminary; 7. New York University; 8. University and Bellevue Hospital Medical College.

The membership is 26,606, including 2,675 boys. There are 688 employés in addition to the 168 paid teachers. There are 13,548 gymnasium members, and 6,640 physical examinations were given; 4,503 members served on committees, 10,199 students in evening educational classes, 159,798 books drawn from libraries, 1,379,054 meals supplied, 8,048 situations secured, 5,305 religious meetings attended by 541,584, sleeping accommodations for 1,870 men, men directed to rooms outside of buildings 5,576. The association buildings are open to all enlisted men as though they were members. The net expenses for the year 1916 were $824,887.18.

STATE EXECUTIVE COMMITTEE Y. M. C. A.

THE State Executive Committee of the Young Men's Christian Associations of the State of New York has its general office at 215 West Twenty-third Street, New York City *Chairman*—William M. Kingsley. *Treasurer*—Samuel Woolverton. *State Secretary*—F. W. Pearsall. This committee was incorporated under the laws of New York, April 14, 1886, having for its object "the establishing and assisting Young Men's Christian Associations, and generally to provide for the spiritual, intellectual, physical and social well-being of young men in accordance with the aims and methods of Young Men's Christian Associations of the State of New York." Besides these activites the State Committee owns and operates Camp Dudley at Westport-on-Lake-Champlain, as a Summer camp for boys.

The membership in the State is 87,926, divided as follows: general 65,610, of which 16,165 are boys; railroad, 14,503; student, 3,182; county and small town, 2,375; colored, 543; army and navy, 1,713. A triennial meeting of the State Association, comprising the 191 associations in the State, is held in February.

YOUNG MEN'S CHRISTIAN ASSOCIATIONS OF NORTH AMERICA.

International Committee—General offices, 124 East Twenty-eighth Street, New York City. Officers: The International Committee, incorporated in 1883, is now composed of 115 representative Christian business men scattered throughout North America, with present officers as follows: *Chairman*—Alfred E. Marling. *Treasurer*—B. H. Fancher. *General Secretary*—John R. Mott.

Organization—Under the general supervision of this committee there are 2,087 different Young Men's Christian Associations fully organized and recognized by the International Convention; with 5,188 paid officers; 91,155 directors and volunteer committeemen, and 720,468 members. This represents an increase of 7 per cent. over similar data for the preceding year.

Property and Funds—The total amount of net property and funds paid in is $97,025,000. The total gross property is $13,600,000 more than the net property Contributions toward current expenses for the past year, $4,045,000; and total current and operating expense, local and supervisory $21,105,000. The difference between the contributions and the total expense represents the amount paid for privileges furnished members and others in the various association plants, social, educational, physical, economic, and so on. In addition, $576,400 was spent on regular association work in foreign lands, and $1,500,000 for association work on the Mexican border and in Europe previous to April 1, 1917. This financial data as a whole shows an increase of 8 per cent. over that of the previous year.

Activities—The service of the association includes many activities, the more important of which are: social, of which there were 50,600 receptions, socials and important get-togethers; employment, 85,000 men secured situations; physical, in which 250,500 different men and boys were trained in regular gymnasium classes; educational, in which 83,131 pursued courses of study in regular class work; Bible study, in which 150,067 pursued regular courses; 32,300 decisions for the Christian life, and 9,311 united with the church as a direct result of association effort, an increase of 9 per cent. over 1916.

FOREIGN WORK.

With its 450 employed officers, this regular work of the association movement in foreign lands has exceeded that of all preceding years in significance of results sought and obtained. Native trained leaders now exceed 300, or 50 per cent. more than their foreign colleagues. The volume of local support for this work is steadily growing. Government recognition of it was never so favorable. Enormous gains were made in turning the attention of members to the improvement of social conditions.

The War—When America entered the war association leaders called for $3,000,000 to provide association service among the enlisted men in America for the Summer of 1917, and the public responded to this appeal in May with $5,000,000. With the mobilization in the cantonments and camps, the association in each of such places has been building and equipping from five to thirteen huts or association club houses for the comfort and service of the men.

The enlarging demands for association work among enlisted men in America, together with the recent and unprecedented call to duplicate association service among the armies of Russia, France and Italy; these combined requests formed an overwhelming appeal which led the National War Work Council to ask the public for $35,000,000 in November. The response to this appeal with $50,000,000 from over 2,000,000 persons was far more generous than was anticipated.

FEDERAL RESERVE BOARD.

(Revised to December 1, 1917.)

Ex-officio Members—William G. McAdoo, Secretary of the Treasury, *Chairman*, and John Skelton Williams, Comptroller of the Currency; W. P. G. Harding *Governor;* Paul M. Warburg, *Vice-Governor;* Frederic A. Delano, Adolph C. Miller, Charles S. Hamlin; H. Parker Willis, *Secretary;* Sherman Allen, *Assistant Secretary and Fiscal Agent;* M. C. Elliott, *Counsel.*

THE banking and currency law, known as the Federal Reserve Act, was approved December 23, 1913.

Under the system known as the National Banking System, which was inaugurated at the latter end of the Civil War, the National banknote currency was based upon Government bonds deposited in the Treasury, and the currency thus issued has been classed by economists as bond-secured currency. This plan was evolved not only to nationalize and unify the currency, which had theretofore consisted of notes issued by State banks, but as well to create a market for United States bonds, and in this way to sustain their value. It was entirely successful for the latter purpose, but has outworn its usefulness as a banking system because of its entire want of elasticity.

The Federal Reserve Act is the result of a long discussion by statesmen, financiers, economists and bankers, and is a constructive measure based upon and growing out of many bills which have been introduced within the past twenty years. Under it twelve cities, known as Federal Reserve cities, are established, and the (continental) United States is divided into twelve geographical districts, each district containing one of the reserve cities. The twelve districts and their respective reserve cities are as follows:

Dist. No. 1..	Boston, Mass.	Dist. No. 5..	Richmond, Va.	Dist. No. 9..	Minneapolis, Minn.
Dist. No. 2..	New York, N. Y.	Dist. No. 6..	Atlanta, Ga.	Dist. No. 10..	Kansas City, Mo.
Dist. No. 3..	Philadelphia, Pa.	Dist. No. 7..	Chicago, Ill.	Dist. No. 11..	Dallas, Tex.
Dist. No. 4..	Cleveland, Ohio.	Dist. No. 8..	St. Louis, Mo.	Dist. No. 12..	San Francisco, Cal.

Every National bank is required to become a stockholder in the Federal Reserve bank of the district in which it is situated, and any State bank or trust company which complies with certain specified requirements is permitted to become a member bank. There are at the present time 7,658 National Banks in the United States which have thus been required to become member banks. Eighty-seven State banks are also members.

The largest district, Chicago, has 1038 member banks. The smallest, Atlanta, has 376.

Each member bank is required to subscribe to the stock of the Federal Reserve bank of its district in the amount equal to 6 per centum of its paid-up capital stock and surplus. The Federal Reserve bank does not do business with the public in the sense that banks usually do; it may better be described as a bank of banks. It is made a depositary for a certain proportion of the reserve of all the member banks, and in addition may also be a depositary for Government funds. An important function is as a bank of issue and redemption of currency, for it may secure from the Treasury Government notes known as Federal Reserve notes, which it is authorized to issue against commercial paper with a minimum gold reserve of 40 per centum. Besides this, Federal Reserve banks are granted certain powers in the matter of operations in the open market, such as the purchase of commercial paper, foreign exchange, etc., and in a general way are expected to perform important functions as clearing houses between their member banks.

Each Federal Reserve bank has nine directors, three of whom represent the member banks, three represent commercial, agricultural or other industrial pursuit (these six being chosen by the member banks), and finally three Government directors chosen by the Federal Reserve Board. These nine directors are charged with the duty of appointing all necessary officers, including the active manager of the bank, who is designated as its Governor.

The salary of the members of this board is $12,000 per annum each, which salaries, together with all other expenses of operating the system, are assessed against the Federal Reserve banks in proportion to their capital stock and surplus. Secretary to the board, H. Parker Willis; Assistant Secretary and Fiscal Agent, Sherman Allen. Headquarters, Washington, D. C.

The capital of the Reserve banks of the system follows:

Dist. No. 1 (Boston)	$10,926,200	Dist. No. 8 (St. Louis)	$6,538,800
Dist. No. 2 (New York)	24,416,300	Dist. No. 9 (Minneapolis	5,110,600
Dist. No. 3 (Philadelphia)	10,531,000	Dist. No. 10 (Kansas City)	6,731,200
Dist. No. 4 (Cleveland)	12,919,200	Dist. No. 11 (Dallas)	5,556,600
Dist. No. 5 (Richmond)	6,953,300	Dist. No. 12 (San Francisco)	7,970,366
Dist. No. 6 (Atlanta)	4,989,200		
Dist. No. 7 (Chicago)	15,999,600	Total	$118,642,366

EMBEZZLEMENTS IN THE UNITED STATES—1916-17.

Press notices and despatches, as collated by the Bonding Department of the Fidelity and Casualty Company of New York, indicate for the six months ending June 30, 1917, the following defalcations:

Banks and trust companies	$2,883,900.00	Transportation companies	$70,471.50
Beneficial associations	21,747.00	Courts and trusts	37,428.50
Public service	80,966.30	Miscellaneous	940,440.69
General business	2,100,849.06		
Insurance companies	743,967.87		$6,879,761.62

The totals for the calendar year, 1916, were:

Banks and trust companies	$2,799,319.80	Transportation companies	$73,453.00
Beneficial associations	430,607.00	Courts and trusts	220,974.00
Public service	851,336.98	Miscellaneous	296,849.00
General business	1,593,928.50		
Insurance companies	59,540.00		$6,326,008.28

DECLINE IN FRANCE'S FOOD PRODUCTION.

According to the Food Administration, France, in 1913, produced 87,830,000 hundredweight of wheat; in 1914, 76,930,000 hundredweight; in 1915, 60,630,000; in 1916, 58,410,000, and in 1917 but 39,900,000 hundredweight. In foodstuffs, which comprise all cereals and include potatoes and beetroot, the 1913 production of 358,000,000 hundredweight had declined in 1917 to only 222,000,000 hundredweight.

GREAT BANKS OF THE WORLD.

(Compiled by the Federal Reserve Board.)

A comparative statement showing principal assets and liabilities of the leading central banks of issue, at dates specified.

(In thousands of dollars; i. e., 000 omitted.)

DEPOSITS AND PURCHASES OF SILVER BY THE UNITED STATES.

Silver purchased during the fiscal year 1917 totaled 6,161,680.34 fine ounces, costing $4,513,215.19, at an average price of 73¼ cents per fine ounce; the silver received and repaid to the depositors thereof in bars bearing the Government stamp totaled 4,610,396.06 fine ounces; the silver deposited by foreign Governments to be worked into coin totaled 811,754.81 fine ounces; the United States silver coin received for recoinage totaled 6,241,240.81 fine ounces, with recoinage value of $8,627,946.34; the Philippine silver coins received for recoinage totaled 149,129.07 fine ounces; the transfers of silver between mint service offices totaled 1,231,661.15 fine ounces, making an aggregate quantity of silver handled by the mint service during the fiscal year 1917 of 19,205,677.21 fine ounces. The large increase over last year of silver handled was due principally to the extraordinary demand for subsidiary silver coin and to the placing in circulation of the new design subsidiary silver coins.

COINAGE OF THE UNITED STATES—FISCAL YEAR 1917.

THE amount of domestic coin produced during the fiscal year 1917 was 406,500,972 pieces of the face value of $25,445,148.68. The gold coinage was $1,230,040, which includes $30,040 in McKinley gold dollars authorized under the Act of Congress of February 23, 1916. The silver coinage consisted of 116,399,800 pieces of the face value of $18,263,600, which includes $13,750,400 in value of silver coins of the new design. The minor coinage executed totaled 289,831,132 pieces of nickel and bronze of the face value of $5,951 508.68.

The coinage of the three mints was as follows:

	Gold.		Silver.		Minor.	
	Pieces.	Value.	Pieces.	Value.	Pieces.	Value.
Philadelphia	30,040	$30,040	74,188,000	$10,595,000	211,428,132	$4,055,078
San Francisco	240,000	$1,200,000	26,366,000	3,903,000	39,267,000	924,950
Denver	None.	None.	15,845,800	3,765,600	39,136,000	971,480

The total number of the various coins produced was as follows: Half eagles, 240,000; McKinley memorial dollars, 30,040; silver half dollars, 9,179,800; silver quarter dollars, 19,678,000; dimes, 87,542,000; nickels, 76,329,934; cents, 213,501,198.

The mints at Philadelphia and San Francisco coined for Central and South American States 515,000 gold pieces; 4,884,313 of silver; 7,700,000 of nickel and 5,670,000 of bronze.

MONETARY SYSTEM OF THE UNITED STATES.

(Revised by the Director of the Mint.)

	Gold Coin.	Standard Silver Dollars.	Subsidiary Silver Coin.	Minor Coin.
Weight.....	25.8 grains to the dollar.	412.5 grains.	385.8 grains to the dollar.	5c. piece: 77.16 grains, 75 p. c. copper, 25 p. c. nickel.
Fineness.....	900-1000.	900-1000.	900-1000.	1c. piece: 48 grains, 95 p. c. copper, 5 p. c. tin and zinc.
Ratio to gold...	.....	15.988 to 1.	14.953 to 1.	
Limit of issue..	Unlimited.	Coinage ceased in 1905.	Needs of the people.	Needs of the people.
Denominations.	$20, $10, $5, $2½.	$1.	50 cents, 25 cents, 10 cents.	5 cents, 1 cent.
Legal tender...	Unlimited.	Unlimited, unless otherwise contracted.	Not to exceed $10.	Not to exceed 25 cents.
Receivable.....	For all public dues.	For all public dues.	For all dues up to $10.	For all dues up to 25 cents.
Exchangeable..	For gold certificates, as below, and subsidiary and minor coin.	For silver certificates and smaller coin.	For minor coin.	.....
Redeemable....	.....	.....	In "lawful money" at the Treasury in sums or multiples of $20.	In "lawful money" at the Treasury in sums or multiples of $20.

	Gold Certificates.	Silver Certificates.	United States Notes.	Treasury Notes of 1890.	National Bank Notes.*
Limit of issue..	For gold bullion to ⅔ of the amount of gold certificates outstanding for gold coin, unlimited unless gold coin reserve against U. S. notes greenbacks. falls below $100,000,000.	Unlimited for standard silver dollars.	$346,681,016.	No further issues; volume steadily diminishing by redemption in silver dollars.	Not to exceed capital of banks.
Denominations	$10,000, $5,000, $1,000, $500, $100, $50, $20, $10.	$100, $50, $20, $10, $5, $2, $1.	$1,000, $500, $100, $50, $20, $10, $5, $2, $1.	$1,000, $500, $100, $50, $20, $10, $5, $2, $1.	$1,000, $500, $100, $50, $20, $10, $5.
Legal tender...	Not a legal tender.	Not a legal tender.	For all debts, public and private, except customs and interest on public debt.	Unlimited, unless otherwise contracted.	Not a legal tender.
Receivable....	For all public dues.	For all public dues.	For all public dues.	For all public dues.	For all public dues except customs.
Redeemable...	In gold coin at the Treasury.	In silver dollars at the Treasury.	In gold at the Treasury.	In gold or silver dollars at the Treasury.	In "lawful money" at the Treasury, or at bank of issue.

"Legal tender" (legal offer of payment of debt) is a quality given a circulating medium by Congress, and possessing this quality it becomes "lawful money." United States notes are by regulation receivable for customs so long as they continue redeemable in coin. There are still in use small amounts of $1 and $2 national bank notes; also $500 and $1,000 silver certificates. Treasury notes were issued for purchases of silver bullion, which was coined into dollars wherewith the notes are being redeemed as rapidly as practicable.

* Federal Reserve Notes: Limit of issue at the discretion of the Federal Reserve Board through Federal Reserve agents to Federal Reserve banks for the purpose of discounting paper for banks (members of the Federal Reserve System) and for no other purpose. Denominations: $100, $50, $20, $10, $5 (not a legal tender). Receivable for all public dues. Redeemable in gold coin of the United States by the Treasurer and in gold and lawful money by any Federal Reserve bank.

BANKS IN MANHATTAN AND BRONX.

The New York Clearing House at 77 Cedar Street is composed of banks and trust companies associated for exchanging checks and bills they hold against one another. The Federal Reserve Bank of New York and the Assistant Treasurer of the United States at New York also clear. Other banks, not members of the association, clear through members. The representatives of the members appear at the Clearing House at 10 o'clock every business day, with the checks and drafts to be exchanged. The resulting balances are ascertained in about an hour, and before 1.30 o'clock those indebted pay their balances, and after that hour the other banks receive the amounts due them. The Clearing House has been in operation since 1853.

Elsewhere in this section of the ALMANAC, under the heading "Statement of Banks in the New York Clearing House Association," will be found statistics as to the capital, profits, loans, gold holdings, and deposits of most of the institutions named in this table.

Banks are open from 10 A. M. to 3 P. M., and on Saturdays from 10 A. M. to 12 noon. Commercial paper except sight or demand bills, falling due on Saturday is payable on the following business day.

BANK NOTES ISSUED AND REDEEMED IN 1917.

The Comptroller of the Currency gives out the following statement relating to the national bank notes and Federal Reserve notes issued and redeemed through his office during the year ending October 31, 1917, together with the amount of notes of each class in the Treasury vaults October 31, 1917, and the amount of notes outstanding in the hands of the public on the same date:

Total amount of national bank notes and Federal Reserve notes issued through the office of the Comptroller of the Currency during the year ending October 31, 1917, $1,301,970,430.

Amount redeemed and destroyed through office of Comptroller of the Currency during same period $464,410,082.50.

Total amount of notes outstanding October 31, 1917, $1,644,520,095.

Total amount new notes in vaults October 31, 1917, $996,028,350.

The large increase during the year ($689,746,800) in the amount of Federal Reserve notes outstanding is due mainly to the issuance of Federal Reserve notes against the deposit of gold or gold certificates with the Federal Reserve agents; amount of gold and gold certificates so held October 31, 1917, being approximately $600,000,000. The figures as to the printing, issue, and redemption, and amount outstanding of national bank notes and Federal Reserve notes separately for the year ending October 31, 1917, are as follows:

	National Bank Notes.	Federal Reserve Notes.
New notes printed and delivered by the Bureau of Engraving and Printing from October 31, 1916, to October 31, 1917	$261,705,870.00	$1,291,280,000.00
Notes issued by Comptroller's Office Oct. 31, 1916, to Oct. 31, 1917	325,570,430.00	976,400,000.00
Notes redeemed and destroyed through Comptroller's Office from Oct. 31, 1916, to Oct. 31, 1917	335,679,477.50	128,730,605.00
Excess of national bank notes redeemed and destroyed Oct. 31, 1916, to Oct. 31, 1917, over amount issued during same period	10,109,047.50	.....
Excess of Federal Reserve notes issued Oct. 31, 1916, to Oct. 31, 1917, over amount redeemed and destroyed same period	.....	847,669,395.00
Total amount of new notes in vault Oct. 31, 1917	341,088,330.00	654,940,000.00
Reduction during the year in national bank notes in vault of	72,889,530.00	.....
Increase during the same period in Federal Reserve notes in vault of	.....	177,420,000.00
Total amount of notes outstanding Oct. 31, 1917	716,276,375.00	928,243,720.00
Reduction during the year in national bank notes outstanding of	9,792,915.00	.....
Increase during the same period in Federal Reserve notes outstanding of	.....	689,746,800.00

THE MERCHANTS' ASSOCIATION OF NEW YORK.

The Merchants' Association of New York is a commercial and civic organization "to foster the trade and welfare of New York," to develop its industries, and to protect and promote its interests. The association was founded in 1897. Headquarters, Woolworth Building, 233 Broadway. It has 5,000 members, representing every trade, industry, and profession, doing business in all the five boroughs of the city. The organization includes a Research Bureau, a Traffic Bureau, an Industrial Bureau, a Foreign Trade Bureau a Convention Bureau, a Publicity Bureau, and a Membership Bureau. It is a membership corporation, governed by a board of twenty-four directors elected by the membership. The association has thirty-three standing committees, who make recommendations to the directors.

President—William Fellowes Morgan. *First Vice-President*—Lewis E. Pierson. *Second Vice-President*—James G. White. *Third Vice-President*—William Hamlin Childs. *Treasurer*—Silas D. Webb. *Secretary*—S. C. Mead. *Assistant to the Secretary*—Hugh Lynch. *Research Director*—F. B. De Berard. *Traffic Manager*—J. C. Lincoln. *Foreign Trade Manager*—W. H. Mahoney. *Manager Convention Bureau*—John R. Young. *Manager Membership Bureau*—G. W. Bramhall. *Manager Industrial Bureau*—Alfred L. Smith. *Publicity Manager*—Robert H. Fuller.

* Per mile of line. † Decrease.

The net operating income of the railways of the United States for September, 1917, was less than September, 1916, by $83 per mile, or 17.8 per cent. Total operating revenues, $357,731,325, exceeded those for September, 1916, by $32,420,037. Operating expenses, $243,610,187, were greater by $40,134,208. Net operating revenue, $114,121,138; decreased, $7,714,171. Taxes, $25,088,258, increased by $11,318,287. Net operating income was $88,985,043, which is a decrease of $19,015,968. If spread over the mileage represented, operating revenues averaged $1,547 per mile, an increase over September, 1916, of 9.7 per cent.; operating expenses per mile, $1,053, were greater by 19.5 per cent.; net operating revenue per mile, $494, shows a decrease of 6.5 per cent., while net operating income per mile, $385, decreased 17.8 per cent. Taxes per mile rose 81.8 per cent.

The nine months of the current calendar year, compared with the corresponding period of the preceding year, show changes per mile of line as follows: Operating revenues increased 11.6 per cent.; operating expenses increased 18.7 per cent.; net operating revenue decreased 2.0 per cent.; taxes increased 29.7 per cent.; while operating income decreased 6.6 per cent. Operating income per mile decreased 15.9 per cent. in the East, increased 1.4 per cent. in the South, and increased 0.6 per cent. in the West.

September net operating income per mile was 17.8 per cent. less in 1917 than in 1916, 9.5 per cent. less than in 1915, 9.2 per cent. greater than in 1914, and 8.1 per cent. greater than in 1913.

ORDER OF THE KNIGHTS OF THE GOLDEN HORSESHOE.

This order was instituted by Governor Alexander Spotswood, of Virginia, in 1716, and revived in 1916. It is an ancestral patriotic society, whose object is to commemorate the journey of Governor Spotswood and his knights across the Blue Ridge Mountains, opening up the western domain in 1716. Descendants of knights (original) and of any ancestor of the highest rank and station (military or civil) of Colonial times, are eligible to membership, which is by invitation only. The headquarters are in Baltimore.

President General—Thomas C. Washington. *Vice-President General*—Dr. Lyon G. Tyler. *Second Vice-President General*—Harvey C. Thomas. *Third Vice-President General*—Dr. J. G. B. Bulloch. *Keeper of the Seal*—Miss Emma H. Bulloch. *Chaplain General*—Rev. Arthur Adams. *Knight Bearer of the Sword*—Dr. Marcus Benjamin. *Herald Marshal General*—Francis John Taliaferro Brooke. *Provost General*—Francis B. Culver, Baltimore, Md. *Deputy Provost General*—Daniel Smith Gordon, Washington, D. C. *Treasurer General*—Miss Virginia Fairfax Gordon, Washington, D. C. *Registrar General*—Mrs. Harvey C. Thomas, Baltimore, Md. *Secretary General*—Miss Ada Amelia Hadel, Baltimore, Md.

INSURANCE STATISTICS.

(Compiled by the New York State Insurance Department, Jesse S. Phillips, Superintendent).

THESE figures cover the operations of the companies in 1916 and represent conditions on January 1, 1917.

LIFE COMPANIES.

Assets—The gross assets were $5,144,624,477.37, an increase of $293,927,595.83 as compared with the previous year. Of this amount New York State companies have $2,824,055,801.04, an increase of $137,836,508.58: companies of other States and countries $2,320,568,676.33, an increase of $156,091,087.25. The aggregate of premium notes and loans shows an increase of $628,236.21 during 1916, while deferred and uncollected premiums have increased $4,887,039.55.

Liabilities, Surplus and Other Funds—The total liabilities of the companies, excluding gross surplus of $163,530,985.40 and special funds of $128,144,286.10, was $4,852,949.205.87. On the above basis the liabilities of the New York State companies as reported were $2,699,893,658.14; companies of other States and countries $2,153,055,547.73. For New York State companies the gross surplus (including $1,114,000 of capital) was $44,618,215.30; special funds $79,543.927.60; companies of other States and countries surplus (including $10,150,000 of capital) was $118,912,770.10; special funds, $48,600,358.50; aggregate surplus and special funds, $291,675,271.50.

Income—The aggregate of New York State companies was $494,580,601.10, an increase over 1915 of $29,887,274 80; companies of other States and countries $496,871,856.31, an increase of $35,832,818.72, making the gross income $991,452,457.41, and the gross increase over the income of the preceding year $65,720,093.52 The net excess of income over disbursements for 1916 was $270,827,066.04; while for 1915 it was $212,089 191.97. The total premium income for 1915 was $684,632,052.85, for 1916, $736,319,365.39.

Disbursements—The total was $720,625,391.37, an increase of $6,982,219.45; $305,044,148.21 was paid for claims, $100,733 275.49 for lapsed and surrendered policies; $119,715,638.77 in dividends to policyholders; $4,856,948 26 on supplementary contracts not involving life contingencies; $3,372,357.70 in dividends to stockholders, $65,806,369.41 for commissions; $62,529,255.56 for salaries and medical examiners' fees; $1,983,381.77 loss on sale or maturity of ledger assets, and $56,584,016.20 for miscellaneous purposes. This classification shows that $530,350,010.73 was paid to policyholders, while the cost of management, including dividends to stockholders, was $190,275,380.64.

Policy Record—The New York State companies issued 638,994 policies, insuring $1,020,900,111, and terminated 359.798 policies, insuring $600,797,118. The companies of other States and countries issued 620,266 policies insuring $1,376,278,497, and terminated 296,064 policies, insuring $614,589,639. The aggregate of the above is 1,259,260 policies issued, insuring $2,397,178,608 and 655,862 policies terminated, insuring $1,215,386.757. Compared with 1915 it appears that the companies issued 167,711 more policies last year, and the amount of insurance written increased $443,102,282. There were 873 less policies terminated in 1916 than in 1915, and $60,389,136 less insurance. The terminated policies were scheduled as follows:

	Number.	Amount.		Number.	Amount.
Deaths	82.546	$189,831,985	Lapse	244,787	386,009,414
Maturity	33,983	60.092 490	Decrease	3,410	64,400,900
Disability	78	126,022			
Expiry	132.759	170,337,313	Totals	655,862	$1,215,386,757
Surrender	158,299	344.588,633			

The net increase of policies is 603,451, and of insurance in force $1,181,801,616. These figures are upon the basis of "paid-for" business.

Policies in Force—At the close of 1916, the companies doing business in this State had 8,891 679 policies in force insuring $16,814,540,674, classified as follows: Whole life, 5,622,859 policies, insuring $11,253,-780,218; endowment, 2,553,686 policies, insuring $3,591,141,688; all other, including term and irregular policies, 715,134 policies, insuring $1,843,372,786, total amount of additions to same, $126,264,982.

Policies in Force in New York State, Including Industrial—Total 8,036,874, insuring $3,757,103,221; issued during 1916, 1,200,995 policies, insuring $627,020,700; premiums received, $134,321,244.60; claims incurred, $52,573,458 73; claims paid, $52,203,964.75.

Group Insurance—The State has approved what is known as the intermediate standard of mortality, based upon the actual experience of mortality among working people whose circumstances enable them to purchase policies of $500 in amount, and pay the premiums thereon quarterly, semi-annually or annually. The reports show that approximately one million of these policies are now outstanding.

FIRE AND MARINE COMPANIES.

Assets—The aggregate assets were $806,939,676.91, classified as follows: New York joint stock companies, $230,502,084.77; joint stock companies of other States, $344,838,131.97; foreign fire insurance companies, United States branches, $183,603,188.93; New York mutuals, $587,237.79; mutuals of other States, $47,409,033.45. Compared with 1915, these figures show an aggregate increase of $71,262,819.41.

Liabilities—Excepting capital: New York joint stock companies, $108,632,874.85; other States' joint stock companies $191,603,632.61; foreign fire insurance companies of other countries, United States branches, $119,297,963 59; New York mutuals, $93,161.32; other States' mutuals, $24,012,141.99; total, $443,639,-774.36; an increase of $45,542,220.89. The total amount of capital for 1916 was $102,936,664.

Income—The aggregate of which was $473,933,517.82. Net excess of income over disbursements $51,142,948.99. Two hundred and twenty-five companies received $58,173,544.31 more than they disbursed, and twenty-six companies disbursed $7,030,595.32 more than they received.

Disbursements—The total amount was $422,790,568.83; which was $42,238,079.81 more than was reported for 1915 The American capital or net assets of foreign companies, under section 27 of the Insurance Law, was $32,668,478.93, an increase of $722,699.98, compared with the amount reported for 1915.

Two hundred and seventy-five companies at the close of the year were covering $71,144,628,903 of risks in force. During the year, the companies, for $763,467,854.79 in gross premiums, undertook to carry $94,095,198,140 of risks, an average premium of about .8114 for every $100 insured. Of the income of all fire, fire-marine and marine companies $466,389,996.65 was received in premiums; $226,944,559.87 was paid for losses; $195,284,107 09 for miscellaneous disbursements, and $36,377,095.86 for dividends.

Joint stock fire companies of this and other States and countries, and mutuals of this and other States—Fire premiums received were $51,158,907.33; fire losses paid, $22,988,434.87; fire losses incurred, $24,499,-624.34, showing an apparent net excess of fire premiums received over fire losses incurred of $26,659,282.99. The estimated expense for the transaction of this business was $17,052,969.11, which if added to the incurred losses makes a total of $41,552,593.45. On this basis the excess of fire premiums received over fire losses incurred and estimated expenses was:

COMPANIES.	Excess of Fire Premiums Received Over Fire Losses Incurred and Estimated Expenses.
New York State	$2,792.287.33
Other States	4,542,170.46
Other countries	2,271,856 09
	$9,606,313.88

INSURANCE STATISTICS—*Continued.*

The amount of fire risks written in the State of New York in 1915 was $6,339,916,390; in 1916, $7,141,805,428; an increase of $801,889,038. The amount of marine and inland risks written in 1915 by fire and fire-marine companies was $2,690,959,509; in 1916, $5,226,335,741, an increase of $2,535,376,232.

The underwriting gain of the 275 fire, fire-marine and marine insurance companies reporting to the department for the year 1916, based on earned premiums, was $23,676,268. Gain from investments $35,961,977, total gain $59,638,245, from which must be deducted the loss in surplus of $43,772,216 from dividends declared, balance of remittances to and from home offices of foreign fire and marine companies of other countries and changes in special reserves, making a total net gain in surplus of $15,866,029 for 1916 as against a total net gain in 1915 of $31,818,051. The fire, fire-marine and marine insurance companies doing business in this State were possessed of $867,614,886 of admitted assets, not including assets held abroad nor premium notes of mutual companies, an increase of $84,601,054 as compared with 1915. The liabilities of these companies, excepting scrip and capital, were $477,450,182, an increase of $55,387,138 over the return of the preceding year. The income was $524,763,212, and disbursements were $438,605,763, an increase as compared with 1915 of $71,554,079 in income and an increase of $51,155,070 in disbursements. The whole number of companies reporting in 1916 was 275, an increase of 11 over 1915.

CASUALTY, FIDELITY, SURETY AND CREDIT COMPANIES.

Assets—The total admitted assets were $234,038,470.42, an increase over 1915 of $30,734,983.24. Of this amount the New York State companies (33) held $74,381,576.19, an increase of $9,587,064.70; companies of other States and countries (38) held $159,656,894.23, an increase of $21,147,918.54 over the previous year.

Liabilities—Excluding capital: New York companies, $42,025,087.22; companies of other States and countries, $102,987,521.08, an aggregate of $145,012,608.30. The total amount of capital employed, including statutory deposit or deposit capital of United States branches of foreign companies, was $46,900,000, divided as follows: New York State companies, $16,800,000; companies of other States and countries, $30,100,000.

Income—The aggregate of which was $187,358,565.22. Sixty-six companies received $35,381,736.05 more than they disbursed and five companies disbursed $211,001.32 more than they received. The net excess of income over disbursements was $35,170,734.73. The total premium income for 1915 was $141,411,485.60; for 1916, $168,590,990.08.

Disbursements—Total was $152,187,830.49, an increase of $10,672,799.06 over the preceding year. $65,717,751.49 was paid for losses and $9,352,768.91 in the investigation and adjustment of claims. The dividend payments to stockholders were $4,572,028.57, a decrease from 1915 of $388,412.80.

Underwriting and Investment—Thirty-five companies sustained an underwriting loss of $4,461,911, while thirty-six companies made a gain from underwriting of $3,928,236, a net loss from underwriting of $533,675. Seventy-one companies reporting made a gain of $9,250,587, on account of their investment operations during the year, none of the companies reporting showing a loss on investment account. The net decrease in surplus from stockholders' dividends declared and from miscellaneous sources was $1,590,359, making a total net gain in surplus in 1916 for all companies of $7,126,553, against a net gain for 1915 of $3,298,654.

The following was the statement of receipts and expenditures by local associations in 1916:

RECEIPTS AND DISBURSEMENTS FOR 1916.

The aggregate receipts for 1916 were $1,061,913,023, an increase of $94,999,609 over the previous year. The receipts from weekly dues were $32,694,918 in excess of 1916, and the mortgage loans made were $61,-468,763 in excess of the previous year. The total expenses of management for all associations amounted to $9,583,253, which is a little less than nine-tenths of one per cent. of the total receipts, about the same as in previous years. In detail the receipts and disbursements for the year 1916 were as follows:

RECEIPTS, 1916.	
Cash on hand Jan. 1, 1916	$40,580,535
Weekly dues	334,745,910
Paid-up stock	43,528,921
Deposits	92,858,417
Loans repaid	324,325,968
Interest	92,724,828
Premium	4,724,832
Fines	1,462,448
Pass books and initiation	850,751
Borrowed money	93,563,754
Real estate sold	7,291,147
Miscellaneous receipts	22,255,512
Total	$1,061,913,023

DISBURSEMENTS, 1916	
Pass book loans	$35,401,085
Mortgage loans	413,289,211
Stock withdrawals	296,855,851
Paid up stock withdrawals	32,412,910
Deposit withdrawals	84,568,868
Expenses	9,583,253
Borrowed money repaid	94,095,873
Interest	3,374,880
Real estate purchased	13,604,985
Miscellaneous disbursements	20,614,892
Cash on hand Jan. 1, 1917	58,111,215
Total	$1,061,913,023

Officers: *President*—L. L. Rankin, Columbus, Ohio. *First Vice-President*—E. L. Keesler, Charlotte, N. C. *Second Vice-President*—Mark D. Rider, Chicago, Ill. *Third Vice-President*—Edwin F. Howell, New York, N. Y. *Treasurer*—Robert T. Corson, Philadelphia, Pa. *Secretary*—H. F. Cellarius, Cincinnati, Ohio. *Assistant Secretary*—Philip G. Ricks, New Orleans, La.

ESTIMATED WHEAT SURPLUS AND DEFICIENCY, BY STATES.

(By the Department of Agriculture, October 15.)

UNDER normal conditions the per capita consumption of wheat in the United States for food is estimated at about 5.3 bushels. This estimate has been obtained in two ways. Several years ago an investigation was made among distributers of flour as to the average amount of flour consumed per person, and the amount was reduced to its wheat equivalent. Studies of data of wheat production, exports, etc., indicate that the apparent domestic consumption of wheat in the United States usually varies from year to year between 4.9 bushels and 5.5 bushels, averaging about 5.3 bushels. Last year conditions were unusual, and the apparent per capita consumption was about 4¾ bushels, or almost 10 per cent. less than the normal. This year's wheat situation resembles last year rather than the normal, therefore in calculating the theoretical surplus and deficiency of wheat supply by States, the consumption is calculated on the basis of 10 per cent. less than the normal. In the five years, 1909-1913, when the United States surplus averaged 108,844,000 bushels (as indicated below), the exports from the United States averaged 102,518,000 bushels.

According to the Food Administration, the total holdings of butter in 332 storage houses reporting showed an increase for October 1, 1917, over September 1 of 3,354,098 pounds, and a loss of 3,064,697 pounds, as compared with the same date in 1916, or about 3 per cent. The exports of butter for July and August, 1917, decreased 2,437,555 pounds, as compared with the same months in 1916. The exports of cheese increased 3,224,694 pounds in these months.

AVERAGE OF PRICES RECEIVED BY PRODUCERS OF THE UNITED STATES.

(By the Department of Agriculture.)

PRICES of articles quoted below as first of month are averages of reports of county crop reporters, weighted according to relative importance of county and State; 15th of month prices are averages of returns from a list of about 7,000 country buyers; State averages are weighted according to their relative importance to obtain the United States averages.

MOVEMENT OF EGYPTIAN COTTON.

(Consul Arthur Garrels, Alexandria.)

For statistical purposes the Egyptian cotton year begins September 1 and ends August 31. Practically the entire crop is grown for export. With the exception of a few bales shipped through Port Said, the whole exportation is handled through Alexandria. According to figures published by the Alexandria General Produce Association, the arrivals at Alexandria during the 1916-17 season amounted to 5,111,080 cantars (cantar = 99.05 pounds). A recapitulation of the movement and stocks on hand for the period in question is given as follows:

	Cantars.		Cantars.
Stock at Alexandria September 1, 1916	93,000	Exports	4,813,129
Receipts	5,111,080	Local consumption	63,345
		Destroyed by fire	1,606
Total	5,204,080	Total	4,878,080
		Stock on hand, including 16,950 cantars at Port Said	326,000

The Egyptian cotton bale approximates 750 pounds. The 1916-17 exports were made up of 630,610 bales, with proportions to various countries of destination as follows: England, 346,196 bales; Spain, 12,534; United States, 134,891; France, 28,063; Japan, 20,682; Italy, 54,726; Portugal, 929; Russia, 32,446; and Greece 143.

SPAIN'S TRADE FOR THE FIRST HALF OF 1917.

(Consul-General Carl Bailey Hurst, Barcelona.)

Spain's imports during the first six months of 1917 show an increase in value compared with the corresponding periods of the two preceding years, while the exports, although still in excess of 1915, decreased in contrast to the corresponding period of 1916. The total values of imports and exports, respectively, during the first six months of 1915, 1916, and 1917 follow: 1915, $102,552,422 and $113,087,786; 1916, $117,428,379 and $122,760,087, and 1917, $126,087,700 and $121,715,011. Over 40 per cent. of the value of the imports was due to heavy shipments of gold in coin and bullion, which have continued to arrive in increasing quantities from the United States. Imports of gold during the first six months of 1915 amounted to $9,748,577; in 1916, $28,220,107, and in 1917, $50,979,772. Aside from precious metals, a decrease is noticeable in the value of imports as a whole, the balance of trade being in Spain's favor to the amount of $46,785,491. The greatest decrease in imports is in alimentary products, followed by raw materials. There is a slight increase in the imports of manufactured articles and live animals. Imports of drugs, chemicals, and pharmaceutical products show a marked decrease. Sulphur, refined, ground, and flour of sulphur fell from 5,793 tons during the first six months of 1916 to 1,717 tons in the corresponding period of 1917; refined sulphur from 1,286 to seventy-six tons; insecticide compounds from 2,822 to 164 tons; fecula for industrial use from 3,255 to 803 tons; alkaline carbonates, borates, and silicates from 1,116 to 711 tons; superphosphates of lime and Thomas's slag from 8,570 to 3,052 tons.

Imports of coal and coke also decreased, but imports of petroleum and mineral oils increased slightly. Ores, including natural phosphates of lime, fell from 112,793 tons in 1916 to 80,615 in 1917; unpolished bars of iron and steel of any section fell from 2,143 to 1,006 tons; iron plates or sheets fell from 8,459 to 1,167 tons, while a corresponding decrease is noted in importations of tubes of iron and steel as well as large pieces. copper, brass, tin, and other metals. Among the raw materials showing the greatest decrease in imports during the first half year of 1917 are: Hemp, which fell from 1,754 to 533 tons; washed wool, from 5,350 to 1,675 tons; pulp for paper making, from 21,964 to 15,091 tons; reed cane, vegetable hair, rush, and similar materials, from 1,013 to 477 tons; and tallow and other animal fats, from 5,647 to 3,111 tons. On the other hand, imports of raw cotton increased from 52,030 to 149,075 tons; iron and steel in the form of waste articles, from 5,715 to 12,379 tons; nitrate of soda, from 28,586 to 40,078 tons; raw jute, manila hemp, agave, and other vegetable fibres, from 14,920 to 24,581 tons; untanned hides and skins, from 3,665 to 6,438.

LOSSES OF THE SPANISH MERCHANT MARINE.

The losses of the Spanish merchant marine on account of submarines between August 17, 1915, when the Isidoro was sunk, and June 16, 1917, the date of the sinking of the Eriaga, was 41 vessels, with a total tonnage of 92,508. Three of the vessels lost were of over 4,000 tons, six of over 3,000 tons, seventeen over 2,000 tons, while the remaining vessels ranged between 1,000 and 2,000 tons each. Two vessels were sunk in 1915, twenty in 1916, and nineteen in the first six months of 1917.

SWEDISH BANKING DEVELOPMENT.

(Vice Consul Arthur E. J. Reilly, Stockholm.)

THE Central Bureau of Statistics has published an account of the development of the Swedish bank system during the past forty years. The survey shows that in 1875 the Swedish banking companies, both those with joint and several responsibility and those with limited liability, which together reached a total of thirty-seven, possessed paid-up capital amounting to $19,887,866 and reserve funds amounting to $3,105,180. At the close of 1916 the number of banks had risen to sixty, with $111,479,536 in paid-up capital and $74,239,399 in reserve funds. While the State Bank of Sweden at the close of 1916 could show assets amounting to $181,332,628, the banking companies had no less than $1,102,335,314. All the banking companies together reported net profits of $24,610,440 in 1916, compared with $13,228,480 in 1915 and $13,768,400 in 1913, which is an immense increase. The greater part of the increased profits has been used for purposes of consolidation.

Altogether $13,048,920 was distributed in dividends, as against $11,448,960 in 1915 and $11,071,080 in 1913. The reserve funds have obtained from the profits $3,225,112, as compared with $779,880 and $1,490,240 in 1915 and 1913, respectively, while the contingencies funds have received $5,601,200, as against $1,184,560 and $1,136,320, respectively. To the next year's accounts have been transferred such considerable amounts as $2,795,240, compared with $333,040 and $361,800 in the other years named. The deposits in the banks, which at the close of 1913 amounted to $453,353,320, rose during the past year from $535,592,640 to $669,295,160, a striking proof of the abundant supply of capital. Against total deposits of $712,998,280 (including claims on and liabilities to native banks) there stood advances to the public of $779,587,880 at the end of 1916. The number of bank offices in 1916 rose from 721 to 805; that is to say, one bank office for every 7,152 inhabitants (7,923 at the beginning of the year). At the close of 1913 the number of banking offices was 640, or one for every 8,810 inhabitants.

DECREASE IN IRISH EMIGRATION.

(Vice Consul C. C. Broy, Dublin.)

DURING the nine months ended September, 1917, there were only 1,650 emigrants from Ireland, a decrease of 3,831 from the corresponding period in 1916. The emigrants in 1917 went to the following countries: England and Wales, 788; Scotland, 705; United States, 83; Canada, 40; South Africa, 12; Australia 12; New Zealand, 9, and other countries, 1. Emigration to the United States as compared with the nine months of 1916 shows a decrease of 2,932.

PHILIPPINE TRADE FOR THE FIRST SIX MONTHS OF 1917.

(Commercial Agent, J. F. Boomer, Manila.)

THE total foreign trade of the Philippine Islands for the first six months of 1917 was nearly $8,500,000 in excess of that for the corresponding months of the preceding year. The following tables show the total value of the imports from and the exports to each country during the first six months of 1916 and 1917:

Y. *Secretary General*—Rev. Francis W. Howard, LL. D., Columbus, Ohio. *Treasurer General*—Rev. Francis T. Moran, D. D., Cleveland, Ohio. *Executive Board*—Very Rev. John F. Fenlon, S. S., D.D., Washington, D. C.; Mgr. J. B. Peterson, Ph. D., Boston, Mass.; Mgr. J. P. Chidwick, D. D., Yonkers, N. Y.; Very Rev. J. P. O'Mahoney, C. S. V., LL. D., Bourbonnais, Ill.; Rev. M. A. Schumacher, C. S. C., Notre Dame, Ind.; Rev. F. P. Donnelly, S. J., Worcester, Mass.; Rev. Joseph F. Smith, New York, N. Y.; Rev. John A. Dillon, LL. D., Newark, N. J.; Brother John A. Waldron, S. M., Clayton, Mo.

RELIGIOUS DENOMINATIONS IN THE UNITED STATES.

In a separate table appear the Roman Catholic statistics for the United States, by dioceses.

Statistics of Ministers, Churches, Communicants or Members, prepared by Dr. H. K. Carroll, for year 1916, and published (1917) in the Bulletin of Church Statistics, under the auspices of the Federal Council of the Churches of Christ in America.

These statistics cover the territory of the United States and its possessions exclusively. Ministers, churches, and communicants or various denominations in foreign countries are deducted from the denominational totals.

(i) Not embraced in list of Lutheran Church Year Book.

SEATING CAPACITY OF CHURCHES.

The total seating capacity of church edifices reported in 1906, according to the Census Bulletin of August 20, 1909, was 58,536,830, an increase over 1890 of 14,976,767, or 34.4 per cent. The seating capacity reported for the Protestant bodies was 53,282,445; for the Roman Catholic Church, 4,494,377; and for the remaining bodies, 760,008. The rate of increase was practically the same for both the Protestants and the Roman Catholics, being 33.6 per cent. for the former, and 33.3 per cent. for the latter. The increase in the seating capacity of churches has kept pace with the increase in population, the seating capacity being 69.2 per cent. of the population in 1890, compared with 69.5 per cent. in 1906.

The average seating capacity per organization for the Protestant bodies taken together was 317, and for the Roman Catholic Church, 436. With the single exception of the Roman Catholic Church, all the denominations showed an average seating capacity considerably in excess of the average membership.

The floor space of the large cathedrals of the world is as follows, in square feet: St. Peter's, Rome, 227,069; Seville, Spain, 124,000; Milano, Italy, 107,000; St. John the Divine, New York City, 99,500; Cologne, Germany, 91,464; St. Paul's, London, 84,025; York, England, 72,860; Amiens, France, 71,208; St. Sophia, Constantinople, 70,000; Chartres, France, 68,260; Lincoln, England, 66,900; Winchester, England, 64,200; Notre Dame, Paris, 64,108; Westminster, England, 61,729; St. Patrick's, New York City, 55,000.

ROMAN CATHOLIC HIERARCHY OF THE UNITED STATES.

(Revised by P. J. Kenedy & Sons, Publishers of the Official Catholic Directory, New York City.)

APOSTOLIC DELEGATION.

His Excellency, Most Rev. Giovanni Bonzano, Apostolic Delegate, 1811 Biltmore St., Washington, D. C.

Archbishop Platon Rozhdestvensky of North America, and Bishop Innocent, of Alaska, represent the Greek Orthodox Church, and Archimandrite Raphael, New York, the Syrian Greek Orthodox Church.

UNIVERSITY FORUM OF AMERICA.

An educational institution of travelling professorships of eminent men of action and original investigators, whose lectures are based on personal experience and observation. The lectures are delivered before the leading universities, colleges, and other educational bodies throughout North America, Europe, and in other parts of the world.

The forum acts as a standing committee, a bureau of information, a clearing-house through which universities and colleges may promptly and readily secure national leaders to speak at first-hand and authoritatively concerning their particular line of life-work and activity.

Meetings in New York City are held weekly on Tuesday evenings. *President*—Alexander Cumming, 316 West 88th Street, New York City.

STAR OF BETHLEHEM.

Star of Bethlehem—Ancient and Illustrious Order of and Knights and Ladies of. Chartered at Philadelphia 1869; lodges, 172; members, 21,110; sickness benefits paid, $522,000. Officers: Emt. Grand Commander, Frank C. Reichlin, Detroit, Mich.; Emt. Grand Vice-Commander, Henry Reimann, Trenton, N. J.; Emt. Grand Scribe-Treasurer, Thomas J. Crowe, 926 Cass Avenue, Detroit, Mich.

Eastern Star Benevolent Fund—(Insurance Auxiliary) 2,306 members; death benefits paid, $171,018

BAPTIST WORLD ALLIANCE.

President—Rev. R. S. McArthur, D. D., New York. *European Secretary*—Rev. J. H. Shakespeare, M. A., London. *American Secretary*—Rev. R. H. Pitt, D. D., Richmond, Va. *Chairman American Executive*—Rev. L. A. Crandall, D. D., Minneapolis, Minn.

BAPTIST YOUNG PEOPLE'S UNION OF AMERICA.

President—H. B. Osgood, Chicago, Ill. *Vice-Presidents*—W. Fred Reynolds, Brockville, Ont.; A. H. Vautier, Philadelphia, Pa.; H. W. Riehl, Louisville, Ky. *Recording Secretary*—George W. Wason, Brooklyn, N. Y. Headquarters, 125 North Wabash Avenue, Chicago. War activities are thus stated:

1—Co-operation with the United States Food Administration: 2—Furnishing copies of the New Testament to the Baptist boys who have been called into service. 3—Co-operation with the Committee on Temperance for camps and cantonments in the homeland and in France. 4—Pushing the work of keeping in touch at home and abroad. 5—Co-operation with the various war committees as formed by the Northern and Southern Baptist Conventions.

At the Detroit Convention the following recommendation in the Board of Managers' report was unanimously adopted: "In view of the fact that a great many of our fine young people who offer themselves for some form of Christian service (Ministry, Missionary, etc.) are lost sight of by the churches and the denomination because of inadequate plans for keeping in touch with these young people, we wish to recommend the organization of 'Baptist Volunteers' as an auxiliary to the Baptist Young Peoples' Union of America, the General Secretary of the Union to be the Executive Secretary of the auxiliary. "The purpose of this organization will be to keep in close touch with these young people by correspondence and otherwise, in order to hold them to the ideal of Christian service to which they have given themselves.

NATIONAL COUNCIL OF THE CONGREGATIONAL CHURCHES OF THE UNITED STATES.

14 Beacon Street, Boston, Mass. *Moderator*—Rev. William Horace Day. *First Assistant Moderator*—Rev. William E. Barton. *Second Assistant Moderator*—Rev. Harold M. Kingsley. *Secretary*—Rev. Hubert C. Herring. *Assistant to Secretary*—Rev. O. E. Harris. *Treasurer*—Rev. John J. Walker.

BOARD OF FOREIGN MISSIONS REFORMED CHURCH IN AMERICA.

25 East Twenty-second Street, New York. *President*—Rev. Henry E. Cobb, D. D. *Secretary*—Rev. W. I. Chamberlain, Ph. D. *Treasurer*—Howell S. Bennet, 25 East Twenty-second Street, New York. Special War Activities: War Service Commission in co-operation with War Time Commission, Federal Council of Churches. *Chairman*—Rev. Oscar M. Voorhees, D. D. *Secretary*—Rev. Abram Duryee, 25 East Twenty-second Street, New York.

RELIGIOUS EDUCATION ASSOCIATION.

President—Rev. Washington Gladden, D. D., Columbus, Ohio. *First Vice-President*—Lemuel H. Murlin, LL. D., President Boston University. *Treasurer*—David R. Forgan, President the National City Bank, Chicago. *General Secretary*—Henry Frederick Cope, D. D., headquarters, the McCormick Building, 332 South Michigan Avenue, Chicago. *Vice-Presidents*—President C. A. Barbour, D. D., Rochester; Prof. William Adams Brown, Ph. D., New York; Hon. P. P. Clayton, Ph. D., Washington; President W. H. P. Faunce, LL. D., Providence; President Edgar O. Lovett, Ph. D., Houston; President Robert A. Falconer, Litt. D., Toronto; Chancellor J. H. Kirkland, Nashville; Rt. Rev. William Lawrence, LL. D., Boston; Bishop W. F. McDowell, S. T. D., Washington; Mrs. Ella Lyman Cabot, Boston; President E. P. Robertson, University North Dakota; President W. L. Poteat, Wake Forest, N. C.; Dean George Hodges, LL. D., Cambridge; Rt. Rev. Walter T. Sumner, Portland, Ore.; President Mary E. Woolley, LL. D., Mount Holyoke; President Charles W. Dabney, LL. D., Cincinnati.

War activities are thus stated: "The point of contact for this association lies in a study of the changes in education, especially in moral and religious training, necessitated or indicated by the war. We are therefore preparing certain educational surveys, encouraging necessary changes and adaptations in the instructional work of churches, and agencies in the camps, and preparing for a general conference which will discuss the kinds and methods of education necessary in the new world conditions, especially in the conditions which will follow the war."

PRESBYTERIAN ASSEMBLIES.

OFFICERS OF THE LAST GENERAL ASSEMBLY OF THE PRESBYTERIAN CHURCH IN THE UNITED STATES OF AMERICA.

Moderator—J. Wilbur Chapman, D. D., LL. D., Jamaica, N. Y. | *Stated Clerk*—Rev. W. H. Roberts, D. D., LL. D., 1319 Walnut Street, Philadelphia, Pa.

*Commonly known as the Presbyterian Church, South.

THE CHURCH PENSION FUND.

(Of the Protestant Episcopal Church of America, Headquarters 14 Wall Street, New York City.)

Established by the General Convention, October 22, 1913; adopted by the convention of all of the sixty-eight dioceses and the conventions of nineteen of the missionary districts in 1915 and 1916; chartered by the Legislature of New York, April 3, 1914.

President—Rt. Rev. William Lawrence, D. D., Bishop of Massachusetts. *Treasurer*—J. Pierpont Morgan. *Secretary*—Monell Sayre. *Trustees* (elected by the General Convention)—Rt. Rev. William Lawrence, D. D.; Rt. Rev. David H. Greer, D. D.; Rt. Rev. Theodore M. Morrison, D. D.; Rt. Rev. Robert A. Gibson, D. D.; Rt. Rev. Philip M. Rhinelander, D. D.; Rt. Rev. Rogers Israel, D. D.; Rev. William T. Manning, D. D.; Rev. James H. McIlvaine, D. D.; Rev. Edward L. Parsons, D. D.; Rev. Ernest M. Stires, D. D.; Samuel Mather, J. Pierpont Morgan, William Fellowes Morgan, Charles A. Peabody, William H. Truesdale, Charlton Yarnell.

Financial support: An assessment upon each parish and other salary-paying organization in the church of 7½ per cent. upon the salary paid to the clergy (a rectory adding one-sixth to the money salary). The assessment system went into operation on March 1, 1917, the initial reserve contributed by the church during the preceding year amounted to $8,712,879.17. The General Convention designs the Church Pension Fund to assure support to all of the aged and disabled clergy and the families of all deceased clergymen. The pension benefits are:

First—At sixty-eight, upon retirement from regular active work, an annuity equal to 1¼ per cent. of the average annual salary, multiplied by the years of service. Minimum $600. The minimum not promised if ordination took place at thirty-six or over. Second—Upon disability at any age, an annuity during its continuance of 40 per cent. of the average salary for the previous five years. Minimum $600. Third—To a widow, one-half of the old age annuity to which the husband would have been entitled, calculating his annuity from the date of marriage only. Minimum $300, if marriage contracted before retirement. Fourth—To minor orphans $100 from ages one to seven; $200 between ages seven and fourteen; $300 from age fourteen to majority or end of dependence.

The clergy ordained prior to March 1, 1917, and their families can only receive the minimum pensions given above, and half of the minor orphans' benefits, until the annual assessments, in any individual case, have been paid sufficiently long after March 1, 1917, as to entitle the beneficiary to a larger grant. At the end of seven months' operation the fund announced a pension budget of $200,000 a year.

AMERICAN BOARD OF COMMISSIONERS FOR FOREIGN MISSIONS.

The head office of the American Board of Commissioners for Foreign Missions is at the Congregational House, 14 Beacon Street, Boston, Mass. There are three district offices: (1) at the United Charities Building, Twenty-second Street and Fourth Avenue, New York City, Rev. E. L. Smith, D. D., Secretary; (2) 19 South La Salle Street, Chicago, Ill., Rev. A. N. Hitchcock, D. D., District Secretary; (3) 417 Market Street, San Francisco, Cal., Henry H. Kelsey, D. D., District Secretary. Its officers are: *President*—Edward C. Moore, D. D. *Corresponding Secretaries*—James L. Barton, LL. D., Cornelius H. Patton, D. D., Edward L. Smith, D. D. *Treasurer*—Frank H. Wiggin.

The American Board, which is the oldest foreign missionary society in the United States, was organized June 29, 1810. During its history it has sent out over 3,000 missionaries, of whom 679 are now in service. In the 724 churches which have been organized by these missionaries there are now enrolled 86,970 members. The total receipts from the beginning have been $47,944,182.60; for year 1916, $1,247,715.99.

The mission fields now occupied by the board are: Mexico; Micronesian Islands; Mindanao, Philippine Islands; Japan; North China; Shansi, in Northwestern China; Foochow and Canton, in Southern China; Ceylon; Madura, in Southern India; the Marathi field in Western India; in Southern Africa, the Rhodesian branch and the Zulu branch, West Central Africa; Bulgaria and Asiatic Turkey; Austria; Spain; Greece, and Serbia.

LUTHER LEAGUE OF AMERICA.

Organized at Pittsburgh, Pa., October 31, 1895, by delegates representing State, District and individual organizations from twenty different States in the Union and District of Columbia. *President*—C. T. A. Anderson, 35 South Dearborn Street, Chicago, Ill. *First Vice-President*—O. C. Rohde, Toledo, Ohio. *Second Vice-President*—George W. Rapps, Milwaukee. *General Secretary*—Harry Hodges, Philadelphia. *Literature Secretary*—Rev. Luther M. Kuhns, Omaha, Neb. *Treasurer*—P. Walter Banker, Kingston, Pa. *Executive Committee*—Composed of the President, Vice-Presidents, General Secretary, Literature Secretary, Treasurer, and E. F. Eilert, Chairman, New York; William C. Stoever, Lit. D., Philadelphia; Rev. E. A. Trabert, Lima, Ohio; O. C. C. Fetta, Indianapolis, Ind.; I. S. Runyon, New York; Rev. G. F. Gehr, Wilkinsburg, Pa.; James M. Reynolds, Valatie, N. Y.; Rev. M. J. Bieber, D. D., Montreal, Canada. *State Leagues*: NEW YORK—President, Louis A. Wilke, North Tonawanda. PENNSYLVANIA—President, William H. Menges, Menges Mills. NEW JERSEY—President, Dr. W. P. Steinhaeuser, Asbury Park. ILLINOIS—President, J. Alexander Nelson, Chicago. OHIO—President, O. C. Rohde, Toledo. WISCONSIN—President, George W. Rapps, Milwaukee. INDIANA—President, O. C. C. Fetta, Indianapolis. IOWA—President, Bessie L. Winders, Burlington. SOUTH DAKOTA—President, Henry W. Stellner, Aberdeen. MINNESOTA—President, Rev. C. J. Rockey, Minneapolis. CONNECTICUT—President, Otto Reisch, Southington. OREGON-WASHINGTON—President, W. S. T. Derr, Vancouver, Wash. NEBRASKA—President, Walter M. Wolfe, Omaha. KANSAS, President, Evan W. Tonsing, Atchison. MICHIGAN—President, A. E. Burke, Kalamazoo. CANADA—President, E. B. Westcott, Trinity, Hamilton. DISTRICT OF COLUMBIA—President, F. W. Leonhardt, Washington. CENTRAL CALIFORNIA—President, Charles L. Trabert, Berkeley. BALTIMORE, President, Carl M. Distler, Baltimore.

The Luther League is co-operating with the Lutheran War Commission in caring for the spiritual and physical needs of our men in camp and at the front and rendering aid to their families at home.

UNIVERSALIST GENERAL CONVENTION.

President—Rev. Lee S. McCollester, D. D., Tufts College, Massachusetts. *Vice-President*—Roger S. Galer, Mt. Pleasant, Ia. *Secretary*—Rev. W. H. Skeels, Watertown, N. Y. *Treasurer*—J. B. Horton, Boston, Mass. *Trustees*—Rev. Frank O. Hall, D. D., New York City; Louis Annin Ames, New York City; Charles L. Hutchinson, Chicago; Frederick A. Winkelman, Chicago; Rev. Marion D. Shutter, D. D., Minneapolis; Mrs. Mary C. Rice, Springfield, Mass.; Rev. V. E. Tomlinson, D. D., Worcester, Mass.; Rev. Lee S. McCollester, D. D., Tufts College, Mass.; Rev. James F. Albion, D. D., Portland, Me.; Joseph L. Sweet, Attleboro, Mass.

MISSIONARY BOARD OF THE CHURCH OF GOD.

Headquarters, Anderson, Ind. Executive Committee: *President*—F. G. Smith. *Vice-President*—E. E. Byrum. *Secretary-Treasurer*—J. W. Phelps. The annual Ministerial Assembly (corresponding to a conference) has two officers, E. A. Reardon, Chicago, Ill., and Charles E. Brown, Detroit, Mich. The officers of the General Assembly, or Camp Meeting, of the Church of God, are the following committeemen: A. L. Byers, Chairman; E. L. Cook, Secretary; H. D. Freeman, Treasurer; W. A. Bixler, H. D. Groesbeck.

VEDANTA SOCIETY.

50 West Sixty-seventh Street, New York. *President*—Martin Krudop. *Vice-President and Treasurer and Secretary pro tem*—Mrs. J. A. Caldwell.

FEDERATION OF AMERICAN ZIONISTS.

44 East Twenty-third Street, New York. *President*—Dr. Harry Friedenwald, Baltimore, Md. *Chairman, Executive Committee*—Louis Lipsky, New York. *Treasurer*—Louis Robison, New York. *Executive Secretary*—Senior Abel, New York. *Financial Secretary*—Max Goldman, New York.

NATIONAL WOMAN'S CHRISTIAN TEMPERANCE UNION.

The National Woman's Christian Temperance Union Committee plans for team work to some 20,000 local unions. The plans are grouped under ten divisions to work for: 1—Nation-wide Prohibition as a war measure. 2—Soldiers and sailors. 3—Relief work. 4—Moral education. 5—Woman in industry. 6—Americanization. 7—Co-operation with the United Committee on Temperance Activities in the Army and Navy. 8—Community interest. 9—Finance. 10—Membership.

Officers: *President*—Miss Anna A. Gordon, Evanston, Ill. *Vice-President-at-Large*—Mrs. Ella A. Boole, 1429 Avenue H, Brooklyn, N. Y. *Corresponding Secretary*—Mrs. Frances P. Parks, Evanston, Ill. *Recording Secretary*—Mrs. Elizabeth P. Anderson, Fargo, N. Dak. *Assistant Recording Secretary*—Mrs. Sara H. Hoge, Lincoln, Va. *Treasurer*—Mrs. Margaret C. Munns, Evanston, Ill.

AMERICAN SUNDAY SCHOOL UNION.

Organized 1817 under title of "Sunday and Adult School Union." Name changed in 1824 to "American Sunday-School Union." Charter obtained in 1845. Object—To establish and maintain Sunday-schools, and to publish and circulate moral and religious publications. It does not organize churches. When a Union Sunday-school develops religious life in such strength and numbers that the members believe a church is needed, they decide to what denomination it shall belong. Nine hundred and tweve churches have grown out of the schools organized in the last eleven years.

In one hundred years it has circulated $12,000,000 to $15,000,000 worth of Bibles and Testaments and religious works, and has organized 131,814 Sunday-schools (an average of over three schools for each day in 100 years). Into these schools have been gathered 699,034 teachers and 5,179,570 scholars.

Officers: *President*—Martin L. Finckel. *Vice-Presidents*—Clarkson Clothier, James F. Stone, M. D. *Recording Secretary*—William H. Hirst. *Treasurer*—John E. Stevenson. *Secretary of Missions*—George P. Williams, D. D. *Editor of Publications*—James McConaughy. Headquarters, 1816 Chestnut Street, Philadelphia, Pa.

THE BROTHERHOOD OF ST. ANDREW.

"An organization for the spread of Christ's Kingdom among young men." The work is done through parochial chapters. There are 1,143 senior and junior chapters, with about 12,000 members. The official organ, St. Andrew's Cross, is published at the national office. "The Brotherhood will receive the names and addresses of men in any part of the country who might be held or won for God and the Church by the friendship and sympathy of a Brotherhood man." *President*—Edward H. Bonsall. *First Vice-President*—H. D. W. English. *Second Vice-President*—Courtenay Barber. *General Secretary*—Franklin S. Edmonds. *Executive Secretary*—George H. Randall., editor St. Andrew's Cross. *Corresponding Secretary*—Walter M. Kalmey. *Field Secretaries*—G. Frank Shelby, the Far West; B. F. Finney, the South; Franklin H. Spencer, the Middle West. *Army and Navy Department*—Chairman, Walter Kidde; Chief Secretary, B. F. Finney; Executive Secretary, F. S. Titsworth; Treasurer, G. W. Pepper. National headquarters, the Church House, Twelfth and Walnut Streets, Philadelphia.

COUNCIL.

President—Herbert Adams. *Vice-President*—Howard Russell Butler. *Corresponding Secretary*—Harry W. Watrous. *Recording Secretary*—Charles C. Curran. *Treasurer*—Francis C. Jones. Frederick W. Kost, Elliott Dangerfield, Colin C. Cooper, Robert Aitken, Douglas Volk, and E. Irving Couse.

The addresses given in the list refer to the City of New York when not otherwise specified. The National Academy was founded in 1826. The schools of the National Academy are open from the first Monday in October to the middle of May. Circulars containing rules and other details may be had on application at the academy, Amsterdam Avenue and West 109th Street.

THE PILGRIMS.

The Pilgrims was organized in London during coronation year, 1902. It was born of a desire on the part of a few Anglo-Americans, who foregathered in London at that time, to have a society that would stand for the promotion of good fellowship and friendship between Britons and Americans as individuals.

The British Pilgrims has a membership of 400. The American Pilgrims was organized in 1903 and has a membership of 650, which is the limit specified in the rules. There is a long waiting list of applicants.

The society takes no part in politics or affairs of state or church, but simply and solely the cementing of friendship between citizens of the United States and its dependencies and the subjects of the British Empire. It exists for the one purpose of fostering by social means a friendly understanding between the people of the United States and those of Great Britain.

The citizens of the United States and its dependencies and subjects of the British Empire, and others prominent for their sympathy with the objects of the society, are eligible for membership, and membership in one society *ipso facto* constitutes membership in the other.

The officers and Chairman of the Executive Committee of the Pilgrims of Great Britain are as follows: *President*—The Rt. Hon. Viscount Bryce, O. M. *Vice-Presidents*—The Archbishop of Canterbury; Field-Marshal Lord Grenfell, G. C. M. G.; Admiral the Hon. Sir Hedworth Meux, G. C. B., K. C. V. O. *Honorary Treasurer*—J. Wilson Taylor. *Secretary*—M. E. Welsh-Lee. *Chairman of Executive Committee*—Harry E. V. Brittain, M. A.

The officers and Chairman of Executive Committee of the Pilgrims of the United States are as follows: *President*—(Vacant.) *Vice-Presidents*—Chauncey M. Depew; Admiral Lord Beresford, G. C. B., G. C. V. O.; Nicholas Murray Butler; F. Cunliffe-Owen; George T. Wilson. *Treasurer*—Wm. Curtis Demorest, 60 Liberty Street, New York. *Secretary*—George W. Burleigh, 52 Wall Street, New York. *Chairman of Executive Committee*—George T. Wilson, 120 Broadway, New York.

(Statistics supplied by the Bureau of the Census for THE WORLD ALMANAC.)

The term illiterate, as here used, includes all persons unable to write their own language, except in cases indicated by an asterisk (*), where the basis is inability to read (a).

ACCIDENT HAZARDS IN FACTORIES.

Figures gathered by the Massachusetts Industrial Accident Board show that the larger number of accidents occur between 10 and 11 A. M. and 3 and 4 P. M.; and that all days except Saturdays and Sundays share about equally in mishaps. The wages of the largest group of workers suffering non-fatal accidents ranged from $8 to $15 per week. The maximum number of accidents occurred to workers earning from $11 to $12 per week; the wage-earners from 21 to 29 years of age met the largest number of non-fatal accidents, and the greatest number of fatalities were suffered by workers from 40 to 49 years of age. Of the whole number of non-fatal accidents, disability lasted less than one day in 40,661 cases. In 79 per cent. of the cases the average duration of disability was two weeks or less. The average duration of disability was 12.48 days. The figures cover 1914. The wage loss for the year was $3,172,440. The number of accidents per thousand employed for twenty selected branches of industry was as follows:

Industry.	Number Per 1,000.	Industry.	Number Per 1,000
Automobile factories	271	Woolen and worsted mills	65
Foundries and metal working	257	Cotton mills	64
Slaughter and packing houses	178	Dyeing and finishing textiles	56
Electrical supplies	164	Carpet mills	55
Rubber factories	153	Marble and stone cutters	54
Box makers (wood)	125	Boots and shoes	51
Tanneries	116	Makers of blank books	45
Car and railroad shops	99	Knitting mills	43
Box makers (paper)	74	Jewelry factories	39
Candy	66	Clothing makers	21

LAWN TENNIS.

National singles patriotic tournament (substituted for championship on account of war). Robert Lindley Murray, formerly of Palo Alto, Cal., but now of Niagara Falls, N. Y., won the national patriotic tournament held at the West Side Tennis Club, Forest Hills, N. Y., August 20-25. He defeated Nat Niles, of Boston, in the final round, 5—7, 8—6, 6—3, 6—3.

National doubles patriotic tournament, held at the Longwood Cricket Club, Boston, Mass., August 13. Fred B. Alexander and Harold A. Throckmorton defeated the challengers, Harry C. Johnson and Irving C. Wright, 11—9, 6—4, 6—4, in the challenge round of the national doubles.

Women's national patriotic tournament, held at Philadelphia Cricket Club, St. Martins, Philadelphia, Pa., June 18. Singles—final round. Miss Molla Bjurstedt d. Miss Marion Vanderhoeff, 4—6, 6—0, 6—0. Doubles—final round: Miss Molla Bjurstedt and Miss Eleonora R. Sears d. Mrs. Robert Le Roy and Miss Phyllis Walsh, 6—2, 6—4. Mixed doubles—Miss Molla Bjurstedt and Irving C. Wright d. Miss Florence A. Ballin and W. T. Tilden 2d, 10—12, 6—1, 6—3.

Clay court patriotic tournament held at Cincinnati Tennis Club, Cincinnati, Ohio, July 7-14. Singles—final round: Samuel. T. Hardy d. Charles S. Garland, 3—6, 6—1, 1—6, 6—3, 6—3. Doubles—final round: Charles S. Garland and Samuel T. Hardy d. H. T. Emerson and W. H. Hopple, 6—4, 6—2, 6—3. Women's singles—final round: Miss Ruth Sanders d. Mrs. Walter Ellis, 6—1, 6—3. Women's doubles—final round: Miss Ruth Sanders and Mrs. Charles Gregg d. Mrs. Walter Ellis and Miss Adele Levy, 6—4, 6—2. Mixed doubles—final round: Miss Ruth Sanders and Howard Cordes d. Miss Leonora Hofer and Charles Garland, 6—1, 6—2.

Junior and Boys' championships, U. S. N. L. T. A., held at West Side Tennis Club, Forest Hills, N. Y., August 20-25. Charles S. Garland of Pittsburgh d. Fritz Bastian of Indianapolis. Boys'—Vincent Richards of New York d. J. D. E. Jones, Jr. of Providence. Score. Junior—final round: 6—2, 6—1, 2—6, 6—3. Boys'—final round: 6—0, 6—3, 6—1.

National indoor championships held at the Seventh Regiment Armory, New York, February 10-22. Singles—final round: S. H. Voshell d. C. B. Herd, 7—5, 6—3, 6—3. Doubles—final round: Dr. William Rosenbaum and F. B. Alexander d. A. H. Man, Jr. and C. B. Herd, 6—4, 6—4, 2—6, 7—9, 6—4.

Women's national indoor championship, held at Seventh Regiment Tennis Club, in Seventh Regiment Armory, March 12-17. Singles—final round: Miss Marie Wagner d. Miss Eleanor Goss, 6—3, 6—1. Doubles—semi-final round: Miss Marie Wagner and Miss M. H. Taylor d. Mrs. Anderson and Miss Howe, 6—4, 6—4.

Junior national indoor championship, Seventh Regiment Armory, New York, December 26-30. Singles—final round: E. H. Binzen d. H. B. O. Boyle, 6—1, 7—5, 6—3. Doubles—final round: Willard Botsford and R. B. Haines d. I. L. Hopkins and F. N. Hopkins, 6—3, 6—2, 5—7, 6—3.

STATE AND SECTIONAL TOURNAMENTS.

Pacific Coast tournament, Claremont Country Club, Oakland, Cal., June 14. Singles—final round: William M. Johnston d. J. R. Strachan, 6—3, 0—6, 6—1, 4—6, 6—2. Women's singles—final round: Mrs. G. W. Wightman d. Miss Helen Baker, 6—8, 6—0, 6—0.

Great Plains patriotic tournament, Rockhill Tennis Club, Kansas City, Mo., July 14-21. Singles—final round: E. J. Lockhorn d. Heath Moore, 2—6, 6—0, 6—2, 6—4. Doubles—final round: Frank Howard and W. J. Krebs d. P. R. Porter and W. A. Sternberg, 7—5, 6—0, 6—1.

Women's metropolitan patriotic tournament, West Side Tennis Club, Forest Hills, N. Y., May 14-19. Women's singles—final round: Miss Molla Bjurstedt d. Mrs. C. V. Hitchins, 6—3, 6—1. Women's doubles—final round: Miss Molla Bjurstedt and Miss Marie Wagner d. Miss Helen Pollak and Miss Helen Bernhardt, 6—1, 7—5. Mixed doubles—final round: Miss Molla Bjurstedt and A. H. Man, Jr. d. Miss Florence A. Ballin and F. B. Alexander, 6—4, 8—6.

Northwestern patriotic tournament, Burton Courts, Deephaven, Lake Minnetonka, Minn., July 21-28. Men's singles—final round: J. J. Armstrong d. W. F. Winterble, 6—0, 6—3. Men's doubles—final round: M. Hutchinson and P. Brain d. John Adams and J. J. Armstrong, 4—6, 6—4, 9—7, 2—6, 7—5. Women's singles—final round: Miss M. Davis d. Miss C. B. Neely, 6—2, 6—3. Mixed doubles—semi-final round: Miss Drake and Brain d. Miss Croby and Jayne, 7—5, 6—2.

Central States patriotic tournament, St. Louis A. A. A., June 29. Men's singles—final round: Theodore Drewes d. Roland Hoerr, 6—2, 6—2, 6—4. Men's doubles—final round: F. O. Josties and Theodore Drewes d. C. D. Jones and Roland M. Hoerr, 1—6, 6—2, 6—3, 6—4.

Western patriotic tournament, Chicago, Ill., July 30. Men's singles—final round: Walter T. Hayes d. Samuel Hardy, 6—3, 6—0, 6—1. Men's doubles—final round: Garland and Hardy d. Hayes and Burdick, 6—2, 4—6, 7—5, 3—6, 6—3. Women's 6—0, 6—3. Women's doubles—final round: Miss singles: Miss Carrie B. Neely d. Miss Mary K. Voorhees, Neely and Miss Seavey d. Miss Steever and Miss Voorhees, 15—13, 6—3.

ODD AND MISCELLANEOUS SPORT EVENTS.

L. Prettyman, Yale, won the Intercollegiate handball championship defeating A. Golembi, Columbia, in the final round played at Brooklyn, April 7, 1917. Golembi and Stein, Columbia, defeated Horton and Prettyman, Yale, in the final round of the doubles.

Two rinks of Boston lawn bowlers defeated a similar combination of the Buffalo Lawn Bowling Club for the United States trophy by a score of 43 to 40 at Buffalo, N. Y., August 4, 1917.

Newell W. Banks, of Detroit, defeated Alfred Jordon, London, in a match for the checker crossboard championship at Cedar Point, Ohio., on August 11, 1917, following a week of play. Scores: Banks won 5 games, lost 2; Jordon won 2 games, lost 5, with 11 games drawn.

Christian Christensen, a Danish athlete, in a physical endurance test at Chicago, Ill., August 23, 1917, walked, ran, swam, rowed a boat and rode a bicycle one mile each for a total of five miles in 54m. 25s.

National Roque Championship tournament held at Norwich, Ct., August 25, 1917. Medal winners: First Division—J. C. Kirk, Philadelphia, National Champion; Gerald Brassill, Norwich, Ct., second. Second Division—Rev. R. C. Sartmann, Wilmington, Del.; C. M. Thompson, Willimantic, Ct.

ROWING.

THE declaration of a state of war with Germany caused the abandonment of virtually all collegiate and amateur regattas scheduled for the season of 1917. Neither the Harvard-Yale nor Poughkeepsie Intercollegiate Regatta was held, and only those dual races rowed early in the Spring.

YALE VS. HARVARD—VARSITY EIGHTS.

Yale and Harvard eights have rowed fifty races, beginning in 1852 on Lake Winipiseogee at two miles, when Harvard won. In 1855 the course was changed to Springfield and lengthened to three miles. Lake Quinsigamond was the scene for nine years, and Lake Saltonstall for 1869. After an interval of seven years the crews in 1876-77 went to Springfield, Mass., when the four-mile course was inaugurated. In 1878 the crews changed again to New London, Ct. For records prior to 1889 see 1914 ALMANAC.

* Record for course.

INTERCOLLEGIATE REGATTA.

Rowed at Poughkeepsie, N. Y., on the Hudson. Results since 1900:

VARSITY EIGHT-OARED—FOUR MILES.

June 30, 1900—Pennsylvania, 19m. 44 3-5s.; Wisconsin, 19m. 46 2-5s.; Cornell, 20m. 4 1-5s.; Columbia, 20m. 8 1-5s.; Georgetown, 20m. 19 1-5s.

July 2, 1901—Cornell, 18m. 53 1-5s. (record); Columbia, 18m. 58s.; Wisconsin, 19m. 6 4-5s.; Georgetown, 19m. 21s.; Syracuse, 19m. 49s.; Pennsylvania, 19m. 58 1-5s.

June 21, 1902—Cornell, 19m. 5 3-5s.; Wisconsin, 19m. 13 3-5s.; Columbia, 19m. 18 3-5s.; Pennsylvania, 19m. 26s.; Syracuse, 19m. 31 2-5s.; Georgetown, 19m. 32s.

June 26, 1903—Cornell, 18m. 57s.; Georgetown, 19m. 27s.; Wisconsin, 19m. 29 2-5s.; Pennsylvania, 19m. 36 2-5s.; Columbia, 19m. 54 4-5s.

June 28, 1904—Syracuse, 20m. 22 3-5s.; Cornell, 20m. 31 1-5s.; Pennsylvania, 20m. 42s.; Columbia, 20m. 45 2-5s.; Georgetown, 20m. 52 2-5s.; Wisconsin, 21m. 1 1-5s.

June 29, 1905—Cornell, 20m. 29 2-5s.; Syracuse, 21m. 47 2-5s.; Georgetown, 21m. 49s.; Columbia, 21m. 53 4-5s.; Pennsylvania, 21m. 59 4-5s.; Wisconsin, 22m. 6 1-5s.

June 23, 1906—Cornell, 19m. 36 4-5s.; Pennsylvania, 19m. 43 4-5s.; Syracuse, 19m. 45 1-5s.; Wisconsin, 20m. 13 4-5s.; Columbia, 20m. 18 3-5s.; Georgetown, 20m. 36s.

June 26, 1907—Cornell, 20m. 2 3-5s.; Columbia, 20m. 4s.; Annapolis, 20m. 13 4-5s.; Pennsylvania, 20m. 33 2-5s.; Wisconsin, Georgetown, Syracuse.

June 27, 1908—Syracuse, 19m. 34 1-5s.; Columbia, 19m. 35 1-5s.; Cornell, 19m. 39s.; Pennsylvania, 19m. 52 3-5s.; Wisconsin, 20m. 43 4-5s.

July 2, 1909—Cornell, 19m. 2s.; Columbia, 19m. 4 2-5s.; Syracuse, 19m. 15 1-5s.; Wisconsin, 19m. 24 1-5s.; Pennsylvania, 19m. 32 1-5s.

June 25, 1910—Cornell, 20m. 42 1-5s.; Pennsylvania, 20m. 44 1-5s.; Columbia, 20m. 54 1-5s.; Syracuse, 21m. 1 3-5s.; Wisconsin, 21m. 15 3-5s.

June 27, 1911—Cornell, 20m. 10 4-5s.; Columbia, 20m. 16 4-5s.; Pennsylvania, 20m. 33s.; Wisconsin, 20m. 34s.; Syracuse, 21m. 3 2-5s.

June 29, 1912—Cornell, 19m. 31 2-5s.; Wisconsin, 19m. 35 2-5s.; Columbia, 19m. 41s.; Syracuse, 19m. 47s.; Pennsylvania, 19m. 55s.; Stanford, 20m. 25s.

June 21, 1913—Syracuse, 19m. 28 3-5s.; Cornell, 19m. 31s.; Washington, 19m. 33s.; Wisconsin, 19m. 36s.; Columbia, 19m. 38 1-5s.; Pennsylvania, 20m. 11 1-5s.

June 26, 1914—Columbia, 19m. 37 4-5s.; Pennsylvania, 19m. 41s.; Cornell, 19m. 44 1-5s.; Syracuse, 19m. 59 2-5s.; Washington, 20m. 1 3-5s.; Wisconsin, 20m. 20s.

June 28, 1915—Cornell, 19m. 36 3-5s.; Leland Stanford, 19m. 37 4-5s.; Syracuse, 19m. 43 3-5s.; Columbia, 20m.; Pennsylvania, 20m. 10 1-5s.

June 17, 1916—Syracuse, 20m. 15s.; Cornell, 20m. 22 4-5s.; Columbia, 20m. 41 1-5s.; Pennsylvania, 20m. 52 4-5s.

For previous results in varsity four-oared, junior eight-oared and freshman eight-oared races see 1917 ALMANAC.

BEST INTERCOLLEGIATE RECORDS.

Varsity eight-oared, four-mile race: Cornell, July 2, 1901, 18m. 53 1-5s. Varsity four-oared, two-mile race: Cornell, June 28, 1915, 10m. 1-5s. Freshman eight-oared, two-mile race: Cornell, July 2, 1909, 9m. 11 3-5s.

THE OXFORD-CAMBRIDGE BOAT RACES.

Not held in 1917 owing to the war. For previous winners see 1915 ALMANAC.

DUAL INTERCOLLEGIATE AND AMATEUR REGATTAS, 1917.

April 7—Philadelphia, Pa. 1 mile 550 yards—Yale Varsity Eight, 6m. 52s.; Pennsylvania, 6m. 53 1-5s. Yale Junior Eight, 6m. 41s.; Pennsylvania, 6m. 41 2-5s.

April 7—Annapolis, Md., 1 mile 550 yards—United States Naval Academy Varsity Eight, 7m. 37s.; Potomac B. C., 7m. 53s.

April 7—Oakland, Cal. 3 miles—University of Washington Eight, 17m. 28 3-5s.; Stanford University, 17m. 43 1-5s.; University of California—no time taken.

May 12—Princeton, N. J. 1 mile 550 yards—Princeton University Freshman Eight, 7m. 14s.; Central High School, Philadelphia, 7m. 33 2-5s.

July 4—Boston, Mass. New England Amateur Rowing Association Regatta on Charles River Course. Results: Senior eight-oared shells—Won by St. Alphonsus (J. Doherty, bow; William Blanchard, 2; J. Scannell, 3; J. Sullivan, 4; William French, 5; Dr. J. H. Keenan, 6; S. West, 7; Harry McGowan, stroke; F. Keating, coxswain); Farragut, of Lynn, second, and West Lynn, third. Time—7m. 15s. Senior singles—Won by Cary Faulkner, Riverside B. C.; John Sullivan, St. Alphonsus B. C., second; A. Mosher,

ROWING—*Continued.*

Crescent C. C., third. Time—10m. Novice singles—Won by T. Scanlan, Riverside B. C.; S. West, St. Alphonsus B. C., second; E. J. Donovan, Shawmut R. C., third. Time—11m. 16s. Intermediate singles—Won by Lothrop Withington, Union Boat Club, E. E. Farnan, Metropolitan B. C., second; Harry McGowan, St. Alphonsus B. C., third; W. J. Skayhan, Shawmut R. C., fourth. Time—10m. 23s. Junior singles—Won by William Bresnahan, Springfield B. C.; William French, St. Alphonsus, second; G. A. Zoeller, Metropolitan B. C., third; Clyde Putnam, Metropolitan B. C., fourth. Time—10m. 27s. Senior doubles—Won by Riverside B. C. (Cary Faulkner, bow; Willie Faulkner, stroke); St. Alphonsus, second, and Metropolitan, third. Time—9m. 19s. Intermediate doubles—Won by Union B. C. (George B. Magrath, bow, and Lothrop Withington, stroke); St. Alphonsus B. C., second. Time—9m. 54s. Junior doubles—A rowover for St. Alphonsus (William French and S. West). Time not taken. Junior eight-oared shells—Won by Rockrimmon B. C., of Springfield (J. Moore, coxswain; A. Pablino, stroke; H. Hauschilds, 7; J. Connor, 6; R. Bannon, 5; C. Bannon, 4; H. Burke, 3; L. Durant, 2; E. Kane, bow); Farragut B. C., second; Riverside B. C., third. Time—7m. 14s. Senior doubles—Won by St. Alphonsus; Metropolitan B. C., second. Time—8m. 23s.

ICE SKATING.

INTERNATIONAL Outdoor Championship, held at Saranac Lake, N. Y., January 30 to February 1. Results: 220-yard dash, senior—Edward Horton, first; Jack Walker, second; George Pasho, third. Time—20 1-5s. One-mile novice—Ralph H. Milne, Plattsburg, first; James J. Hennessey, Lake Placid, second; Ray E. Bryant, Lake Placid, third. Time—3m. 1s. One-mile, senior—Sigurd Larsen, Chicago, first; Arthur Staff, Chicago, second; Lee Jansen, Chicago, third; Harry Cody, Toronto, fourth. Time—2m. 52s. Three-quarter mile, senior—Sigurd Larsen, Chicago, first; Edward Horton, Saranac Lake, second; Charles Fisher, Minneapolis, third; Harry Cody, Toronto, fourth. Time—2m. 6 2-5s. Two-mile, senior—Arthur Staff, Chicago, first; Harry Cody, Minneapolis, second; Sigurd Larsen, Chicago, third. Time—5m. 57 3-5s. 220-yard hurdles—Jack Walker, Saranac Lake, first; Horton, second; Arthur Staff, third. Time—23s. One mile, boys of 16—Charles Jewstraw, Lake Placid, first; James J. Hennessey, Lake Placid, second; Harry Jewstraw, Lake Placid, third. Time—3m. 9 4-5s. 440 yards, final—Arthur Staff, Chicago, first; Jack Walker, Saranac Lake, second; Ed. Horton, third. Time—40s. Half mile, final—Arthur Staff, Chicago, first; Sigurd Larsen, Chicago, second; Charles Fisher, Minneapolis, third. Time—1m. 24 2-5s. Three miles, senior—Arthur Staff, Chicago, first; Sigurd Larsen, Chicago, second; George Pickering, Montclair, N. J., third. Time—9m. 35 1-5s.

International Indoor Championships, held at Pittsburgh, Pa., March 7-8. Results: Half mile—Arthur Staff, Chicago, first; Harry Cody, Toronto, second; Carl Stevenson, Toronto, third. Time—1m. 7 3-5s. One mile—Arthur Staff, Chicago, first; Harry Cody, Toronto, second; Sigurd Larsen, Chicago, third. Time—3m. 32s. 220 yards—Carl Stevenson, Toronto, first; Roy McWhirter, Chicago, second; Arthur Staff, Chicago, third. Time—18 1-5s. Three-quarter mile—Arthur Staff, Chicago, first; Harry Cody, Toronto, second; Carl Fisher, Milwaukee, third. Time—1m. 56 2-5s. One-quarter mile—Arthur Staff, Chicago, first; Carl Stevenson, Toronto, second; Carl Fisher, Milwaukee, third. Time—35 1-5s. Three miles—Arthur Staff, Chicago, first; Harry Cody, Toronto, second; Carl Fisher, Milwaukee, third. Time—8m. 21 2-5s.

Eastern Outdoor Championships, held at Newburgh, N. Y., February 12. Results: Five-mile handicap—Archie Rogers, Newburgh (scratch), first; George Pickering, New York A. C. (25 yards), second; Charles Jewstraw, Lake Placid (50 yards), third. Time—17m. 46s. One-mile championship—Walter Kehune, New York A. C., first; Charles Jewstraw, Lake Placid, second; Archie Rogers, Arlington, third. Time—3m. 11 2-5s. Quarter-mile championship—Edward Horton, Saranac, first; George Pickering, New York A. C., second; Donald M. Baker, New York A. C., third. Time—41 1-5s. Half-mile championship—Walter Kehune, New York A. C., first; George Pickering, New York A. C., second; Edward Horton, Saranac, third. Time—1m. 27 3-5s.

Annual Cohoes, N. Y., Marathon Race, 26 miles, won by Archie Rogers, Poughkeepsie. Time—1h. 25m. 22s.

Metropolitan Outdoor Championship, Yonkers, N. Y., February 10. Results: Half mile—Walter Thorne, Boston, first; George Pickering, New York, second; Walter Kuehne, New York, third. Time—1m. 24s. One mile—Walter Kuehne, New York, first; J. Smith, Montclair, second; Walter Thorne, Boston, third. Time—3m. 20 4-5s. Indoor Championships, New York, March 19. Results: Half mile—Walter Kuehne, New York, first; Stanley Gershel, New York, second; William Taylor, New York, third. Time—1m. 34 3-5s. One mile—George Pickering, New York, first; Don Baker, New York, second; Walter Kuehne, third. Time—3m. 31 1-5s.

Heavyweight—Dan Dowd, South Boston.

PUGILISTIC CHAMPIONS AND RECEIPTS.

All attempts to designate and classify the pugilistic champions and title holders are more or less arbitrary because of the fact that few such champions won and defended the championships at the same weight. Among the lighter weight boxers it is not at all unusual for a pugilist to be forced from one class into the next higher by growth and increased weight. The following list, dating from 1890, is generally

accepted by critics and boxers as being the correct classification, although holders did not always win title from previous champions:

HEAVYWEIGHTS (over 158 lbs.)—1890-1892, John L. Sullivan; 1892-1897, James J. Corbett; 1897-1899, Robert Fitzsimmons; 1899-1906, James J. Jeffries; 1906-1908, Tommy Burns; 1908-1915, Jack Johnson; 1915-1917, Jess Willard.

MIDDLEWEIGHTS (158 lbs.)—1890-1897, Robert Fitzsimmons; 1897-1907, Tommy Ryan; 1907-1908, Stanley Ketchel; 1908, Bill Papke and Stanley Ketchel; 1908-1910, Stanley Ketchel; 1911-1913, claimed by Frank Klaus, Mike Gibbons, Ed McGoorty and Geo. Chip; 1914-1917, Al McCoy: 1917, Mike O'Dowd.

WELTERWEIGHTS (145 lbs.)—1890-1893, no recognized champion; 1894-1896, Tommy Ryan; 1896-1897, Kid McCoy; 1898-1900, Billy Smith; 1900, Rube Ferns; 1901, Matty Matthews and Rube Ferns; 1901-1904, Joe Walcott; 1904-1908, Dixie Kid; 1908-1912, 1916, Jack Britton; 1917, Ted (Kid) Lewis.

LIGHTWEIGHTS (133 lbs.)—1890-1893, Jack McAuliffe; 1893-1899, Kid Lavigne; 1899-1902, Frank Erne; 1902-1908, Joe Gans; 1908-1910, Battling Nelson; 1910-1912, Ad Wolgast; 1912-14, Willie Ritchie; 1914-17, Freddie Welsh; 1917, Benny Leonard.

FEATHERWEIGHTS (122 lbs.)—1890-1892, no recognized champion; 1892-1897, George Dixon; 1897, Solly Smith; 1898, Solly Smith and Dave Sullivan; 1898-1900, George Dixon; 1900-1901, Terry McGovern; 1901-1904, Young Corbett; 1904-1908, Tommy Sullivan; 1908-1911, Abe Attell; 1911-1917, Johnny Kilbane.

BANTAMWEIGHTS (116 lbs.)—1890-1892, George Dixon; 1892-1894, no recognized champion; 1894-1898, Jimmy Barry; 1898-1901, no recognized champion; 1901-1903, Harry Forbes; 1903-1905, Frankie Neil; 1905-1907, no recognized champion; 1907-1913, Johnny Coulon; 1914-15, Kid Williams; 1916-1917, Pete Herman.

June 5, San Francisco, Cal.—Wladek Zbyszko defeated Ed Lewis, winning only fall in 2h. 31m.

July 4, Boston, Mass.—Ed Lewis defeated Wladek Zbyszko two out of three falls. Time—Zbyszko, 57m. 45s.; Lewis, 24m. 44s. and 4m. (stopped).

August 25, Hartford, Ct.—Wladek Zbyszko defeated John Freberg on referee's decision when latter was injured at end of 45m.

INTERCOLLEGIATE CHAMPIONSHIPS.

Held at Cornell University, Ithaca, N. Y., March 17. Won by Cornell, 32 points; second, Pennsylvania, 15; third, Lehigh, 15; fourth, Princeton, 4; fifth, Columbia, 0. Individual results: First places—115-pound class—Won by Servais, Penn, by decision over Rofe, Cornell, in 15m. 125-pound class—Won by Wigsten, Cornell, by fall over Jones, Princeton, in 13m. Hold head scissors. 135-pound class—Won by Kaiser, Penn, by decision over Repa, Lehigh, in 21m. 145-pound class—Won by Post, Cornell, by decision over Milligan, Penn, in 21m. 158-pound class—Won by Sager, Cornell, by fall over Graham, Penn, in 5m. 3s. on head and arm hold. 175-pound class—Won by Zepp, Cornell, by decision over Cohn, Princeton, in 21m. Heavyweight class—Won by Bard, Cornell, by decision over Pons, Lehigh, in 21m. Second places—115-pound class—Rofe, Cornell, beat Rosenweig, Columbia, by fall in 5m. 40s. 125-pound class—Jennes, Lehigh, beat Jones, Princeton, by decision in 15m. 135-pound class—Repa, Lehigh, beat Cornell, Cornell, by decision in 21m. 145-pound class—Milligan, Penn, beat Neubert, Lehigh, by fall in 58s. 158-pound class—Dayton, Lehigh, beat Graham, Penn, by decision in 15m. 175-pound class—Statler, Penn, beat Parrish, Lehigh, by decision in 15m. Heavyweight class—Pons, Lehigh, beat Taylor Penn, by fall in 2m 27s. Third places—115-pound class—Kirk, Lehigh, beat Rosenweig, Columbia, by fall in 8m. 125-pound class—Jones, Princeton, beat Bjork, Columbia, by fall in 14m. 135-pound class—Cornell, Cornell, beat Ainee, Columbia, by fall in 6m. 27s. 145-pound class—Neubert, Lehigh, beat Barish, Columbia, by fall in 8m. 52s. 158-pound class—Graham, Penn, beat Girdner, Columbia, by decision in 15m. 175-pound class—Parrish, Lehigh, beat Cohn, Princeton, by decision in 15m. Heavyweight class—Winn, Princeton, beat Taylor, Penn, by fall in 2m. 2s.

DUAL MATCHES.

January 13, New York—Princeton, 25 points; Columbia, 8 points.

January 27, South Bethlehem, Pa.—Lehigh, 26 points; Springfield, 4 points.

January 29, State College, Pa.—Penn State, 28 points; Mass. Tech., 0 points.

February 10, New Haven, Ct.—Yale, 28 points; Columbia, 0 points.

February 17, Cambridge, Mass.—Harvard, 24 points; Columbia, 0 points. New Haven, Ct.—Yale, 16 points; Pennsylvania, 10 points. Annapolis, Md.—Navy, 34 points; Pittsburgh, 0 points. Ithaca, N. Y.—Cornell, 27 points; Bucknell, 0 points.

February 22, South Bethlehem, Pa.—Lehigh, 24 points; Brown, 5 points.

February 24, Annapolis, Md.—Navy, 17 points; Yale, 14 points. Philadelphia Pa.—Lehigh, 18 points; Pennsylvania, 5 points. Princeton, N. J.—Cornell, 21 points; Princeton, 7 points.

March 1, State College, Pa.—Penn State, 23 points; Princeton, 4 points.

March 3, Annapolis, Md.—Penn State, 21 points; Navy, 10 points.

March 5, Philadelphia, Pa.—Pennsylvania, 26 points; Columbia, 4 points.

March 10, Princeton, N. .—Yale, 23 points; Princeton, 10 points.

March 11, New York—Columbia, 17 points; Brown, 13 points.

March 17, State College, Pa.—Penn State, 23 points; Princeton, 4 points.

AMATEURS.

Amateur Athletic Union Championships, held at Atlantic City, N. J., May 12. Results final bouts: 115-pound class—Won by Louis Servais, of the University of Pennsylvania, on decision from A. Dialetis, of the Greek-American A. C., New York. 118-pound class—Won by Carl Benson, Swedish-American A. C., Brooklyn, on decision from A. J. Dunkley, Bronx Church House, New York. 135-pound class—Won by Peter Mitropoulos, Gary, Ind., Y. M. C. A., on default from George Treitler, Hungarian-American A. C. 125-pound class—Won by Carl Liljehult, Bronx Church House, New York, on default from C. Mullinos, Greek-American A. C., New York. 145-pound class—Won by Harry Jenkins, Pittsburgh, on decision from George MacLennan, Gary, Ind., Y. M. C. A. 158-pound class—Won by Charles Johnson, Swedish G. A. P., Boston, physicians forbidding William Americus, Greek-American A. C., New York, runner up, to compete in final. Heavyweight class—Dexter Very, Pittsburgh, won on a decision from Karl Kunert, Indiana Y. M. C. A. Light heavyweight class—Dexter Very, Pittsburgh, defeated Karl Kunert, Indiana Y. M. C. A. Time—4m. 34s.

Metropolitan A. A. U. Championships, held at New York City clubs at various times during March and April. Final results: 108-pound class—C. Benson, Swedish-American A. C., threw J. Dunkley, Bronx Church House, with a half Nelson and body hold in 7m. 15s. 135-pound class—N. Chrisoverghis, Greek-American A. C., defeated G. Treitler, Hungarian-American A. C., on points. Time—15m.

WRESTLING—*Continued.*

175-pound class—C. Johnston, New York A. C., defeated C. Hedlink, unattached, on points. Time—15m.

115-pound class—C. Benson, Swedish-American A. C., defeated A. Dialetis, Greek-American A. C., on points. Time—15m.

158-pound class—J. Molnar, Hungarian-American A. C., defeated W. Americus, Greek-American A. C., on points. Time—15m.

Heavyweight class—A. Franz, New York A. C., defeated C. L. Disch, Norwegian-American A. C., on points. Time—15m.

TRAP SHOOTING.

The Interstate Association's Eighteenth Grand American Trap-Shooting Tournament, Chicago, Ill., August 20-24. Results: Preliminary, August 20, South Shore Introductory, 100 targets, 18 yards' rise—First, F. Troeh, 199; second, J. E. Chatfield, 198; third, A. C. Skutt, 197. First day, August 21, Chicago Overture, 100 targets, 16 yards—First, E. H. Powell, 100; second, C. A. Gunning, 100; third, H. P. De Mund, 100. National Amateur Championship at double targets, 50 pairs—First, C. B. Platt, 96; second, M. Arle, 95; third, R. H. Bruns, 93. National Amateur Championship at single targets—M. Arle, Thomasboro, Ill. (75 straight in shoot-off), 99. Second day, August 22, Preliminary Handicap, 100 targets, 666 entries—First, J. Peterson, 18 yards, 99; second, J. L. Lumpp, 18 yards, 98; third, J. B. Lallance, 18 yards (won in shoot-off), 97. Women's Events—August 21, Miss L. Muesel, Green Bay, Wis., 46; August 22, Mrs. A. H. Winkler, Chicago, Ill., 47; August 24, Mrs. A. Almert, Chicago, Ill., 45. Third day, August 23, Grand American Handicap, 100 targets, 808 entries, 704 starters—First, C. Larson, Waupaca, Wis., 20 yards, 98; second, M. Arle, Thomasboro, Ill., 22 yards, 98; third, R. C. Smith, Mound, Ill., 19 yards, 97; fourth, I. C. Norwood, Davenport, Ia., 17 yards, 97; fifth, H. C. Hood, Pittsburgh, Pa., 19 yards, 96. Yardage Trophies in Grand American Handicap—16 yards, B. H. Little (won in shoot-off), 95; 17 yards, J. W. Reed (won in shoot-off), 94; 18 yards, A. R. Jones (won in shoot-off), 95; 19 yards, J. G. Fye (won in shoot-off), 95; 20 yards, G. W. Lewis, 95; 21 yards, D. C. Rogers, 95; 22 yards, F. S. Wright, 95. Fourth day, August 24, Consolation Handicap, 100 targets—First, R. A. Nutt, El Paso, Ill., 19 yards, 96; second, J. Livingston, Sprineville, Ala., 21 yards, 95; third, C. B. Stickley, Vanclusc, Va., 18 yards, 95. G. A. H. Women Contestants—First, Mrs. L. G. Vogel, Detroit, Mich., 87; second, Mrs. C. D. Moon, Eau Claire, Wis., 86. Professional Championship—Homer Clark, Alton, Ill., 94.

For winners of preceding years see 1917 ALMANAC.

Handicap Tournaments—The Interstate Association's Twelfth Southern Handicap, Roanoke, Va., May 8-10. Southern Handicap won by Dr. L. G. Richards, Roanoke, Va. (21 yds.); score, 95x100..

The Interstate game between Massachusetts and Rhode Island on July 4th was won by Rhode Island by 25 runs.

The game between Rhode Island District Cricket League and New Bedford Cricket League on September 3rd was won by Rhode Island by 12 runs.

On account of the war there was no Inter-Collegiate games played during the season.

The following New York cricketers were killed in the European War during 1917, W. Johnstone (Crescent A. C.), H. C. Hertslett (Crescent A. C.), A. Tilbury (Kings County), H. B. H. Boyce (Bensonhurst), C. E. S. Stephenson (Port Washington).

The highest individual score in the United States during the season was hit by J. R. Vetterlein, 120.

The highest individual score in Canada during this season was hit by W. D. Chandler, 201.

There was no first class cricket in England, due to the war, and the annual matches between Oxford University and Cambridge University and the Eton vs. Harrow games did not take place.

H. Livingston of the Pittsburgh Field Club established a record for the United States by scoring three consecutive centuries in one week in a tournament held in Chicago in August, 1907; a similar feat was performed by H. N. R. Cobiet in Canada in a tournament held in Vancouver, British Columbia, in August, 1906. H. V. Hordern of the University of Pennsylvania established a record for the United States and Canada by securing 213 wickets during 1907. J. B. King and F. F. Kelly are the only two bowlers who have taken over 2,000 wickets. A. C. MacLaren scored 424 for Lancashire vs. Somerset at Taunton, England, July, 1895—the record in a first-class match. A. F. J. Collins, playing at Clifton June, 1899, for Clarke's House against North Town, scored 628, not out—the record in any match. Melbourne University scored 1,094 runs against Essenden at Melbourne (Australia), 1898—the highest authenticated record. In a match between A. E. Stoddart's English team and New South Wales 1,739 runs were scored—a record in first-class cricket. The longest partnership on record was 623 runs by Captain Oakes and Private Fitzgerald, First Royal Munster Fusiliers vs. Army Service Corps at Curragh, 1895. In a small match in Australia F. R. Spofforth bowled down all 10 wickets of his opponents in each inning—a feat without parallel. F. R. Spofforth on the Australian tour in 1878 took 764 wickets—a world's record. Dr. W. G. Grace, the world's greatest cricketer, died October 23, 1915. He hit up 217 centuries during his career, which will not likely ever be equalled.

Best records in the United States and Canada are by G. S. Pattersen eleven playing against A. M. Woods eleven at Philadelphia, scoring 689 runs, in 1894. Australians against Vancouver scored 633 for 8 wickets in 1913. J. B. King scored 344 runs for Belmont against Merion B. in 1906. W. Robertson, 206, not out, and A. G. Sheath, 118, not out, scored 340 runs in partnership, without the loss of a wicket, at San Francisco in 1894. Smallest score, Americas 0 against Roseville at Guttenberg, N. J., in 1897. The smallest score in international match in United States, West Indians 13 against Australians, 1913. Smallest score in Canada, Winnipeg 6 against Australians, 1913. Largest score in the Metropolitan District Cricket League Championship, New Jersey Athletic Club 385 runs for 5 wickets against Manhattan, at Bayonne, N. J., 1897.

Seven centuries in a season, P. J. Higgins of Los Angeles in 1912, 159, 100, 100, 121, 182, 110, 240.

G. S. Patterson of the Germantown C. C. scored 1,748 runs in season of 1892—a record for the United States. Rev. F. W. Terry of Toronto C. C. scored 1,509 runs in season of 1892—a record for Canada.

On May 30, at the Staten Island Cricket Club grounds, Livingston, a game was played between the New York Halifax Cup eleven and the Rest of New York for the benefit of the British Red Cross, which netted $2,330.50.

New York for the first time won the Halifax Cup, the premier competition in the United States.

GOLF.

OWING to the war there were no national championship tournaments. The following State and sectional championships were held with results as appended:

Western Amateur Championship, Midlothian C. C., Chicago, Ill. Final round. Francis Ouimet defeated K. P. Edwards, 1 up in 36 holes. Western Open Championship, Westmoreland C. C., Chicago, Ill. Won by J. M. Barnes, 283; second, W. Hagen 285; third, J. Hutchinson, 286. Woman's Western Championship, Flossmoor C. C., Chicago, Ill. Final round. Mrs. F. C. Letts defeated Miss E. Rosenthal, 5 and 4. National Open Patriotic Tournament, Whitemarsh C. C., Philadelphia, Pa. Won by J. Hutchinson, 292; second, T. McNamara, 299; third, A. Cunningham, 304. North and South Open Championship, Pinehurst, N. C. Won by M. J. Brady, 141; second, F. McLeod, 143; third G. Nichols, 144. North and South Amateur Championship, Pinehurst, N. C. Final round. N. W. Maxwell defeated W. C. Fownes, Jr., 2 and 1. Southern Association Amateur Championship, Birmingham, Ala. Final round. R. Jones defeated L. Jacoby, 6 and 4. North and South Woman's Championship, Pinehurst, N. C. Final round. Miss E. Rosenthal defeated Mrs. D. C. Hurd, 3 and 2. Trans-Mississippi Championship, St. Joseph, Mo. Final round. S. W. Reynolds defeated H. Legg, 2 and 1. Florida State Championship, Palm Beach, Fla. Final round. Men: J. R. Hyde defeated H. C. Clark, 3 and 2. Women: Miss E. Rosenthal defeated Mrs. C. M. Bragg, 3 and 2. Southern Association Woman's Championship, Montgomery, Ala. Final round. Mrs. K. G. Duffield defeated Mrs. L. Hunter, 1 up, 19 holes. Metropolitan Woman's Championship, Piping Rock, L. I. Final round. Mrs. W. A. Gavin defeated Mrs. T. Hucknall, 5 and 4. Texas State Championship, Fort Worth, Tex. Final round. B. H. Brown defeated B. Heard, 3 and 2. Kansas State Championship, Topeka, Kan. Final round. A. Bonebrake (age 16 yrs.) defeated H. L. Armstrong, 10 and 9. Missouri State Championship, St. Louis, Mo. Final round. J. Manion defeated R. E. Lord, 2 and 1. Northern California Championship, San Francisco, Cal. Final round. D. Grant defeated J. Neville, 1 up, 36 holes. Western Golf Association Junior Championship. Final round. F. J. Wright, Jr., defeated R. A. Haight, 3 and 2. Chicago City Championship, Chicago, Ill. Final round. Mrs. F. C. Letts defeated Mrs. M. Jones, 2 and 1. Philadelphia City Championship, Philadelphia, Pa. Final round. Mrs. C. F. Fox defeated Miss E. Chandler, 7 and 5. Eastern Interscholastic Championship, Nassau C. C., L. I. Final round. A. L. Walker defeated R. T. Haight, 2 up, 36 holes. Olympic Cup Team Championship, Chicago, Ill. Western Golf Association Team (4 men), 655; Southern Association Team 661; Michigan Team 685. Best individual score 36 holes, K. P. Edwards, 160.

PREVIOUS NATIONAL CHAMPIONSHIP WINNERS.

United States Open Championship, 1916 at Minikahda Club, Minneapolis, Minn. Final round, June 30. Won by Charles G. Evans, Jr., amatcur, 286; J. Hutchinson, 288, second; J. M. Barnes, 290, third. 1915, at Short Hills, N. J., won by Jerome Travers amateur, 297; second, T. L. Mc-

GOLF—*Continued.*

Namara professional, 298; third, R. G. McDonald 300. 1914, at Midlothian, Chicago, Ill., won by W. C. Hagen, score 290; Charles Evans, Jr., 291, second; George Sargent, third. 1913, at Brookline, Mass., won by Francis Ouimet, 72, with Harry Vardon, 77 second, and Edward Ray, 78, third, after a triple tie in final round of 304. 1912, at Buffalo, N. Y., won by Jack McDermott, 294, with Tom McNamara, 296, second and Alex. Smith and M. J. Brady tied at 299 for third. 1911, at Wheaton, Ill., after a triple tie between J. J. McDermott, M. J. Brady and George O. Simpson at 307, J. J. McDermott won in the playoff, with Brady second and Simpson third. 1910, at Philadelphia, Pa., Alex. Smith, 298. 1909, at Englewood, N. J., George Sargent, 290. 1908, at Myopia, Fred McLeod, 322. 1907, at Philadelphia Cricket Club, Alexander Ross, 302. 1906, at Onwentsia, Alex. Smith, 295. 1905, at Myopia, W. Anderson, 314. 1904, at Glen View, W. Anderson, 303. 1903, at Baltusrol, W. Anderson, 307. 1902, at Garden City, L. Auchterlonie, 307. 1901, at Myopia, W. Anderson, 331. 1900, at Chicago, Harry Vardon, 313.

United States Amateur, 1916 at Merion Club, Philadelphia. Charles G. Evans, Jr., Chicago, defeated Robert A. Gardner, Chicago, 4 up and 3 to play. 1915, at Detroit, Mich., Robert A. Gardner, Chicago, defeated John G. Anderson Mount Vernon, N. Y., 5 up and 4 to play. 1914, at Manchester, Vt., Francis Ouimet defeated Jerome D. Travers, 6 up and 5 to play. 1913, at Garden City, L. I., J. D. Travers defeated J. G. Anderson, 5 up and 4 to play. 1912, at Wheaton, Ill., J. Travers defeated Charles Evans, Jr., 7 up and 6 to play. 1911, at Rye, N. Y., H. H. Hilton, amateur champion of England, defeated F. Herreshoff, 1 up in 37 holes. 1910, at Brookline, Mass., W. C. Fownes, Jr., defeated W. K. Wood, 4 up and 3 to play. 1909, at Wheaton, Ill., R. A. Gardner beat H. Chandler Egan, 4 up and 2 to play. 1908, at Garden City, J. D. Travers beat Max Behr, 8 up and 7 to play. 1907, at Euclid, J. D. Travers beat A. Graham, 6 up and 5 to play. 1906, E. M. Byers beat G. S. Lyon, 2 up. 1905, at Wheaton, Ill., H. Chandler Egan beat D. E. Sawyer, 6 up and 5 to play. 1904, H. Chandler Egan; 1903, W. J. Travis; 1902, L. N. James; 1901 and 1900, W. J. Travis.

United States Ladies' Championship, 1916 at Waverly, Mass. Miss Alexia Sterling, Atlanta, Ga., defeated Miss Mildred Caverly, Philadelphia, Pa., 2 up and 1 to play. 1915, at Lake Forest, Ill. Mrs. Clarence H. Vanderbeck, Philadelphia, Pa., defeated Mrs. W. A. Gavin, England, by 3 up and 2 to play. 1914, at Glen Cove, N. Y., Mrs. H. Jackson, Boston, defeated Miss E. V. Rosenthal, Chicago, 1 up. 1913, played at Wilmington, Del., October 18, Miss G. Ravenscroft of England defeated Miss M. Hollins, 2 up. 1912, played at Essex Country Club, Manchester, Mass., Miss M. Curtis defeated Mrs. R. H. Barlow, 3 up and 2 to play. 1911, at Westchester County, N. Y., Miss M. Curtis. 1910, at Chicago, Ill., Miss Dorothy Campbell, Hamilton, Ont. 1909, at Philadelphia, Miss Dorothy Campbell. 1908, at Washington, Miss Kate C. Harley. 1907, at Midlothian, Miss Margaret Curtis. 1906, at Brae Burn, Miss Harriet Curtis. 1905, at Morris County, Miss Pauline Mackay. 1904, at Merion C. C., Miss G. Bishop. 1903, at Wheaton, Ill., Miss B. Anthony. 1902-01, at Brookline and Baltusrol, Miss G. Hecker. 1900, at Shinnecock, Miss F. C. Griscom.

AUTOMOBILE RACES AND RECORDS.

OFFICIAL RECORDS ACKNOWLEDGED BY THE CONTEST BOARD OF THE AMERICAN AUTOMOBILE ASSOCIATION:

The third annual indoor games of the I. C. A. A. A. A. were held at Philadelphia, Pa., March 3. Results, finals only: 50-yard dash—Won by Harvard, 28 points; second, Massachusetts Institute of Technology, 19 points; third, Yale, 16 points; fourth, Cornell, 13 points. Individual winners—First, O'Hara, M. I. T.; second, Moore, Harvard; third, Teschner, Harvard; fourth, Treadway, Yale. Time—5 3-5s. 50-yard high hurdles—Won by Yale, 29 points; second, Princeton, 17 points; third, Cornell, 14 points. Individual winners—First, Farwell, Yale; second, Davis, Yale; third, Crawford, Princeton. Time—6 4-5s. Two-lap relay—Won by Princeton (Terrell, Jelke, Barrett, Moore); second, Harvard; third, Yale; fourth, Penn. Time—2m. 40s. Three-lap relay—Won by Cornell (Shelton, Acheson, Windnagle, Crim); second, Penn; third, Penn State. Time—4m. 20s.; a new record. Six-lap relay—Won by Yale (Rolfe, Ireland, Cooper, Overton); second, Penn State; third, Penn. Time—9m. 59 4-5s. Twelve-lap relay—Won by Cornell (Wenz, McDermott, Boynton, Dresser); second, M. I. T.; third, Columbia; fourth, Penn. Time—22m. 7 2-5s.; a new record. Medley relay—Won by Syracuse (Peterson, Williams, Newkirk, Watson); second, Cornell; third, Penn State. Time—8m. 13s. First man ran four laps; second, two laps; third, six laps; fourth, eight laps. Graduate relay—Won by Penn (Lockwood, Ferguson, Steele, Meredith); second, Dartmouth; third, Cornell. Time—3m. 34 1-5s. First three men ran two laps; fourth man, four laps. Pole vault—Individual winners—Foss and Sewell, Penn, and Newstetter, Penn, tied at 12 ft. High Jump—Won by Penn, with average of 5.81 ft.; second, Cornell, average 5.69 ft.; third, M. I. T., average 5.62 ft. Individual winners—Richards and Thiebault of Penn tied at 6 ft. 1 in. Broad Jump—Won by Cornell with average of 20 ft. 9 1-16 in.; second, Penn, average of 20 ft. 3 3-16 in. Individual winners—First, Culbertson, 21 ft. 3 3-4 in.; second, Richards, 21 ft. 1-2 in.; third, Jones, Penn, 20 ft. 10 3-4 in. Shot put—Won by Cornell with average of 42 ft. 3 in.; second, Princeton, average of 38 ft. 6 3-5 in.; third, Penn, average of 31 ft. 6 1-2 in. Individual winners—First, Sinclaire, Princeton, 44 ft. 9 1-2 in.; second, Richards, 42 ft. 10 in.; Howell, 41 ft. 3 in.

BEST I. C. A. A. A. A. RECORDS.

100-yard dash—9 4-5s., B. J. Wefers, Georgetown University, New York, May 30, 1896, and R. C. Craig, Michigan, Cambridge, Mass., May 26 and 27, 1911. 220-yard dash—21 1-5s., B. J. Wefers, Georgetown University, New York, May 30, 1896, and R. C. Craig, Michigan, Philadelphia, May 28, 1910, and Cambridge, Mass., May 27, 1911, and D. F. Lippincott, Pennsylvania, Cambridge, Mass., May 31, 1913. 440-yard run—47 2-5s., J. E. Meredith, Pennsylvania, Cambridge, Mass., May 27, 1916. Half-mile run—1m. 53s., J. E. Meredith, Pennsylvania, Cambridge, Mass., May 27, 1916. One-mile run—4m. 14 2-5s., J. P. Jones, Cornell, Cambridge, Mass., May 31, 1913. Two-mile run—9m. 23 4-5s., J. S. Hoffmire, Cornell, Cambridge, Mass., May 30, 1914. Running broad jump—24 ft. 4 1-2 in., A. C. Kraenzlein, Pennsylvania, New York, May 27, 1899. Running high jump—6 ft. 4 1-2 in., W. M. Oler, Jr., Yale, Philadelphia, May 29, 1915. Putting 16-pound shot—48 ft. 10 3-4 in., P. Beatty, Columbia, Philadelphia, Pa., June 1, 1912. Throwing the hammer—173 ft. 6 in., Lee Talbott, Pennsylvania, Harrisburg, Pa., May 7, 1910. Pole vault—13 ft. 1 in., R. Gardner, Yale, Philadelphia, Pa., June 1, 1912. 120-yard high hurdles—15s., F. S. Murray, Leland Stanford, Cambridge, Mass., May 27, 1916. 220-yard hurdles—23 3-5s., A. C. Kraenzlein, Pennsylvania, New York, May 28, 1898, and J. I. Wendell, Wesleyan, Cambridge, Mass., May 31, 1913. One-mile walk—6m. 45 2-5s., W. B. Fetterman, Jr., Pennsylvania, New York, May 28, 1898.

WESTERN INTERCOLLEGIATE CONFERENCE CHAMPIONSHIPS.

Seventeenth annual meet, held at Chicago, Ill., June 8-9. Point scores: Chicago 54½, Illinois 41½, Missouri 24. Oberlin 10, Grinnell 8, Notre Dame 8, Kansas 7, Purdue 6, Indiana 3½, Northwestern 3, Ohio State 3. Dubuque 3, Ames 2½, Nebraska 1.

Summaries, finals only: One-mile run—Won by Fall Oberlin; Todd, Ohio State, second; Otis, Chicago, third. Time—4m. 15 4-5s. 120 hurdles—Won by Simpson, Missouri; Ames, Illinois, second; Starrett, Notre Dame, third. Time—14 4-5s. 100-yard dash—Won by Scholz, Missouri; Butler, Dubuque, second; Hoyt, Grinnell, third. Time—10s. 440-yard run—Won by Curtiss, Chicago; Spink, Illinois, second; Clark, Chicago, third. Half-mile run—Won by Jones, Chicago; Rodkey, Kansas, second; Somers, Illinois, third. Time—1m. 59 2-5s. 220-yard dash—Won by Hoyt, Grinnell; Feurstein, Chicago, second; Heuring, Indiana, third. Time—21 4-5s. Javelin throw—Won by Higgins, Chicago; Arbuckle, Purdue, second; Vedder, Illinois, third. Distance—194 ft. 11 in. (new Conference record). Shot put—Won by Higgins, Chicago; Bachman, Notre Dame, second; Husted, Illinois, third. Distance—43 ft. 10¾ in. Hammer throw—Won by Bennett, Illinois; Brelos, Chicago, second; Husted, Illinois, third. Distance—151 ft. 7 in. One-mile relay—Won by Chicago (Feurstein, Brinkman, Curtiss, Clark); Illinois second, Northwestern third. Time—3m 22 4-5s. Two-mile run—Won by Fall, Oberlin; Tenney, Chicago, second; McKinney, Illinois, third. Time—9m. 41s. Running broad jump—Won by Simpson, Missouri; Overbee, Illinois, and Kreidler, Illinois, tied for second. Distance—23 ft. 3¾ in. 220-yard hurdles—Won by Simpson, Missouri; Selbie, Missouri, second; Ames, Illinois, third. Time—24 1-5s. Pole vault—Won by Graham, Chicago; Fisher, Chicago, and Ames, Illinois, tied for second. Height—12 ft. 6 in. High jump—Fisher, Chicago, and Rice, Kansas, tied for first; Webster, Illinois, and Luther, Indiana, tied for third. Height—5 ft. 9 in. Discus throw—Won by Husted, Illinois; Bachman, Notre Dame, second; Higgins, Chicago, third. Distance—134 ft. 11½ in.

BEST CONFERENCE RECORDS.

100-yard dash—9 4-5s., W. W. May, Chicago, June 1, 1907, and June 6, 1908, and J. Ward, Chicago, Urbana, Ill., June 5, 1915. 220-yard run around a turn—22s., William Hogenson, Chicago, June 3, 1905; H. J. Huff, Grinnell, June 1, 1907. Straightaway—21 3-5s., J. Ward, Chicago, Urbana, Ill., June 5, 1915. 440-yard run—47 2-5s., Binga Dismond, Chicago, Evanston, Ill., June 3, 1916. 880-yard run—1m. 53 1-5s., Don Scott, Mississippi A. and A., Evanston, Ill., June 3, 1916. One-mile run—4m. 15 4-5s., E. H. Fall, Oberlin, Chicago, Ill., June 9, 1917. Two-mile run—9m. 33 2-5s., A. H. Mason, Illinois, Urbana, Ill., June 5, 1915. 120-yard high hurdles—14 3-5s., Robert Simpson, Missouri, Evanston, Ill., June 3, 1916. 220-yard low hurdles—23 4-5s., Robert Simpson, Missouri, Evanston, Ill., June 3, 1916. Pole vault—12 ft. 8 1-4 in., J. K. Gold, Madison, Wis., June 7, 1913. Running high jump—6 ft. 5-8 in., W. French, Kansas, June 4, 1910. Running broad jump—23 ft. 9 3-4 in., D. G. Stiles, Wisconsin, Urbana, Ill., June 5, 1915. Putting 16-pound shot—47 ft. 1-4 in., Ralph Rose, Michigan, June 4, 1904. Throwing 16-pound hammer—160 ft. 4 in., K. Shattuck, California, Madison, Wis., June 7, 1913. Throwing the discus—155 ft. 2 in., A. M. Mucks, Wisconsin, Evanston, Ill., June 3, 1916. One-mile relay (4 men)—3m. 21 4-5s., Chicago (Campbell, Stegemann, Cornwall, Dismond), Urbana, Ill., June 5, 1915. Javelin throw—194 ft. 11 in., C. G. Higgins, Chicago, Ill., June 9, 1917.

UNIVERSITY OF PENNSYLVANIA RELAY CHAMPIONSHIPS.

Held at Franklin Field, Philadelphia, Pa., April 27-28. Results: One-mile college relay championship of America—Won by Pennsylvania (Pope, Dorsey, Scudder, Lennon); second, Missouri; third, Illinois. Time—3m. 25s. Four-mile college relay championship of America—Won by Chicago (Powers, Jones, Otis, Tenny); second, Mass. I. T.; third, Lafayette; fourth, Pennsylvania State. Time—18m. 39 1-5s. Two-mile college championship of America—Won by Pennsylvania (Walker, Berry, Dorsey and Scudder); second, Notre Dame; third, Chicago. Time—8m. 2-5s. Middle Atlantic States Collegiate A. A. one-mile championship—Won by

COLLEGE ATHLETICS—*Continued.*

Dickinson (Palm, Saul, Cook, and Atkinson); Rutgers, second; New York University, third. Time—3m. 31 3-5s. One-mile freshman college relay championship of America—Won by Pennsylvania (Davis, Hough, Maxam, Eby); second, Penn State. Two entries. Time—3m. 22s., breaking record for the event of 3m. 25 4-5s., made by Pennsylvania in 1913.

DUAL, TRIANGULAR AND SECTIONAL MEETS.

New England Intercollegiate Championships, Cambridge, Mass., May 19. Points scored by competing colleges: Mass. I. T. 61, Brown 50, Worcester Polytechnic 13, Holy Cross and Middlebury 8 each, Trinity 6, Tufts 5, Boston College 3.

Middle States Intercollegiate Conference Championships, South Bethlehem, Pa., May 19. Results: Lafayette 38½, New York University 29, Swarthmore 25¼, Lehigh 18½, Dickinson 15, Delaware 12½, Rutgers 6, Gettysburg 5, Washington and Jefferson 3¼.

Missouri Valley Conference Championships, Ames, Ia. Results: Missouri 57, Nebraska 34½, Iowa State 34, Grinnell 18, Kansas 12½, Drake 6, Simpson 1.

Dual track meet scores: Stanford University 67, California 55, Chicago 92, Northwestern 43, Illinois 83 7-12, Notre Dame 51 5-12, Carlisle Indians 77, Lebanon Valley 49, Ohio State 68½, Indiana 61½, Grinnell 70, Drake 50, Swarthmore 69, Rutgers 51, Lafayette 91, Bucknell 21, Lafayette 62, Carlisle Indians 42, Chicago 83, Notre Dame 52, Worcester Technology 76 2-3, Boston College 49 1-3, Northwestern 77, Indiana 58, Nebraska 66, Minnesota 59, Ohio State 61, Oberlin 56, Mass. I. T. 78, Brown 48, Springfield T. S. 65, Rensselaer Polytechnic 57, Swarthmore 66, Delaware 38, Illinois 73½, Chicago 61½, Lafayette 76, Lehigh 36, Nebraska 77, Kansas 37, Ohio 67, Northwestern 67 (tie), Penn State 68 1-3, Pittsburgh 57 2-3.

TRACK AND FIELD ATHLETICS.

AMATEUR ATHLETIC UNION CHAMPIONSHIPS.

National A. A. U. Junior Championships, held at St. Louis, Mo., August 31. Point scores: Illinois A. C., 44; Meadowbrook A. C., Philadelphia, 30; Columbian A. C., St. Louis, 22; Missouri A. A., 13; Salem-Crescent A. C., New York, 10; Alpha P. C. C., New York, 8; University of Missouri, 7; Boston A. A., 7; Pittsburgh A. A., 5; Germantown Boys' Club, Philadelphia, 5; Chicago Turngemeinde, 5; Danish-American Athletic Club, Chicago, 3; Washington University, St. Louis, 3; Kansas City A. C., 2; Paulist A. C., New York, 2; Perryville High School, 2; Logan Square A. C., Chicago, 2; Missouri School of Mines, 1; Millrose A. C., New York, 1; unattached, 29.

Summaries: Track events: 100-yard dash—Won by W. D. Hayes, Boston A. A.; P. J. White, Salem-Crescent A. C., second; Irwin Mahl, Columbian A. C., third; P. K. Walters, Paulist A. C., fourth. Time—10s. 220-yard dash—Won by P. J. White, Salem-Crescent A. C.; Allen Woodring Meadowbrook A. C., second; P. K. Walters, Paulist A. C., third; L. Murchison, Columbian A. C., fourth. Time—22 2-5s. 440-yard dash—Won by F. J. Shea, Pittsburgh A. A.; Miller, Illinois A. C., second; O'Brien, Loughlin Lyceum, third; Smith, Meadowbrook A. C., fourth. Time—50s. Mile run—Won by L. M. Shields, Meadowbrook A. C.; Cameron, Illinois A. C., second; Boynton, Germantown Boys' Club, third; Cook, Millrose A. A., fourth. Time—4m 32 4-5s. Five-mile run—Won by L. L. Glover, Meadowbrook A. C.; B French, Illinois A. C., second; C. L. Mollor, Logan Square A. C., third; John Probst, Columbian A. C., fourth. Time 27m 25 3-5s Three-mile walk—Won by A. Jessup, unattached, New York; Albert Parker, Danish-American A. C., Chicago, second; B. Charles Foster, unattached, Los Angeles, third; J. Kaysing, Columbian A. C., fourth. Time—24m. 29 3-5s. 120-yard high hurdles—Won by Harold Barron, Meadowbrook A. C.; Bush, Illinois, second; Renick, Missouri, third; Loffler, Columbian A. C., fourth. Time—15 2-5s. (new junior record). 220-yard low hurdles—won by Earl Renick, Missouri University; Dean Lefle Columbian A. C., second; E. Javaux, Perryville High School, third; M. P. Brazill, Missouri School of Mines, fourth Time—27 3-5s. 440-yard low hurdles—Won by C. A. Walsh, unattached, New York; A. Boeddecker, Columbian A. C., second; George Puchta, Columbian A. C., third. Time—1m. 1 4-5s. 880-yard run—Won by R. Bechtel, Illinois A. C.; Russell Foster, Meadowbrook A. C., second; Charles Brady, Missouri A. A., third; W. F. Harmer, Germantown Boys' Club, fourth. Time—2m. 3 3-5s. Field events: Running high jump—Won by C. L. Seibert, Chicago Turngemeinde; L. Watson, Alpha P. C. C., second; Walter Whalen, Boston A. A., third; E. Gideonson, Columbian A. C., fourth. Height— 6 ft. 1 in. (new junior A. A. U. record). Running broad jump—Won by E. F. Jones, Alpha P. C. C., New York; W. A. Dowding, Illinois A. C., second; R. S. Grubb, Germantown Boys' Club, third; O. V. Van Camp, Illinois A. C., fourth. Distance—22 ft. 4 in. Running hop, step, jump—Won by H. Evans, Illinois A. C.; Dave Johnstone, New Orleans, second; L. Labet, Salem-Crescent A. C., third; F. Z. Beanblossom, Missouri A. A., fourth. Distance—44ft. 11 in. Pole vault—Won by E. Knourek, Illinois A. C.; Sweeney, Meadowbrook A. C., second; Childs, Columbian A. C., third. Height—12 ft. 5¾ in. (New junior record.) 16-pound hammer throw—Won by J. J. Shanahan, Illinois A. C., with 128 ft. 9.5 in.; Benjamin F. Sherman, New York, unattached, 127 ft. 5.9 in., second; H. C. Franz, Illinois A. C., 123 ft. 11 in., third, L. Barnes, Jr., Kansas City A. C., 114 ft. 9⅛ in., fourth. Discus throw—Won by W. H. Boehm, Missouri A. A.; Richard Kremer, Washington, second; P. F. O'Connor, unattached, New York, third; R. Deeds, Columbian A. C., fourth. Distance—119 ft. ⅜ in. 16-pound shot put—Won by Loud, Missouri A. A., Elsey, New York, second; Hawes, Illinois A. C., third; Barnes, Kansas City A. C., fourth. Distance—42 ft. 11⅛ in. 56-pound weight throwing—Won by H. Tycer, St. Louis, Mo.; Al Hurd, Columbian A. C., second; P. McEntire, Illinois A. C., third; B. F. Sherman, New York, unattached, fourth. Distance—28 ft. 3 in. Javelin throw—Won by Howard Berry, Meadowbrook A. C.; Milton Anier, Illinois A. C., second; R. Thompson, Illinois A. C., third; R. Deeds, Columbian A. C., fourth. Distance—164 ft. 9 in.

National A. A. U. Senior Championships, held at St. Louis, Mo., September 1. Point score: Chicago A. A., 60; Illinois A. C., 23; Boston A. A., 15; Millrose A. A., New York, 14; Kansas City A. C., 10; Irish-American A. C., New York, 10; Meadowbrook A. C., Philadelphia, 8; Pittsburgh A. A., 7; New York A. C., 5; Toronto Y. M. C. A., 5; Brigham Young University, Salt Lake City, 5; Alpha P. C. C., New York, 4; Long Island A. C., 3; Chicago Turnverein, 3; Salem-Crescent A. C., New York, 3; Missouri A. A., St. Louis, 3; United States Marines, 3; Multnomah A. C., Portland, Ore., 2; Dorchester Club, Dorchester, Mass., 2; University of Missouri, 1; unattached, 18.
